SPECIFIC RISKS

- Emerging market risk: The Fund invests in developing overseas markets which carry a higher risk than investing in larger established markets. Investments in emerging markets are likely to experience greater rises and falls in value and may suffer trading problems. A Fund which invests in emerging markets rather than more developed countries may encounter difficulties when buying and selling investments. Emerging markets are also more likely to experience political uncertainty and investments held in these countries may not have the same protection as those held in more developed countries.
- Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.
- Full details of risks are disclosed in the chapter 'Risk Factors' in the prospectus.

Portfolio invested in bonds issued by borrowers worldwide

ABOUT THE FUND

The Fund seeks to grow your capital and generate income primarily by investing in emerging markets bonds.

It is an actively managed, well diversified portfolio mainly made up of securities denominated in US Dollars.

The Fund may invest up to: - 100% of its net assets in Emerging markets - 100% of its net assets in High yield - 20% of its net assets in Equity

High yield bonds are issued by companies whose business is more sensitive to the economic cycle and pay higher interest. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

To achieve its aims the Fund invests in bonds issued by emerging markets governments and companies. Some of the issuers may be considered high-quality, with a low risk of defaulting on their interest payments, while other issuers are companies or governments that may be considered at higher risk. The Fund can also use complex derivatives, primarily to hedge risks.

PERFORMANCE EVOLUTION USD (NET OF FEES)

PERFORMANCE HISTORY USD (NET OF FEES)

	YTD	2021	2020	2019	2018	2017
UBAM - EMERGING MARKET DEBT OPPORTUNITIES	-20.28 %	-1.80 %	6.71 %	9.20 %	-7.23 %	9.61 %
	September 2022	3 months	1 year	3 years	5 years	Since inception
UBAM - EMERGING MARKET DEBT OPPORTUNITIES	-6.48 %	-5.26 %	-21.57 %	-15.00 %	-14.18 %	51.14 %

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY

Benchmark
Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

Derivatives
Derivatives are financial instruments whose prices depend on the price movements in a reference variable, known as the underlying. Underlying assets may be shares, equity indices, government bonds, currencies, interest rates, commodities like wheat and gold, or also swaps. Derivative financial instruments may be unconditional forward transactions or they may be options. They are traded either on futures and options exchanges on standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the price of the underlying lead in certain situations to considerably higher price fluctuations in the derivative. Derivatives can be used to hedge against financial risks, to speculate on price changes (trading) or to take advantage of price differences between markets (arbitrage).

Duration
Duration is the average time to payout. This key figure is used to measure the influence of interest rate movements on the price of a bond or bond fund. Duration is defined in years (e. g. 3-year duration means that the value of a bond would increase by 3% if interest rates fall by 1% and vice versa).

High-yield bond
Bonds with high interest rates and high risk exposure. The issuers of such securities are often companies with a low credit rating.

High-yield fund
A fund for high-yield bonds (i.e. bonds with low credit ratings).

Investment grade
A rating provides information about the creditworthiness of a debtor. The higher the rating, the less likely the debtor is to default. A distinction is made between high-quality (investment grade) and speculative bonds (high-yield or junk bonds). For investment-grade bonds, Standard & Poor's issues ratings from AAA to BBB, while Moody's ratings range from Aaa to Baa.

Credit default swap (CDS)
A credit default swap (CDS) is a kind of insurance against the risk of credit default. Upon conclusion of a credit default swap agreement, the protection seller pledges himself to pay compensation to the protection buyer if a specified credit event occurs (eg default or late payment). In return, the protection seller receives a premium. The amount of the CDS premium depends primarily on the creditworthiness of the reference debtor, the definition of the credit event and the maturity of the contract.

THIS IS A MARKETING DOCUMENT. It reflects the opinion of Union Bancaire Privée, UBP SA or any entity of the UBP Group (hereinafter "UBP") as of the date of issue. It is not intended for distribution, publication, or use in any jurisdiction where such distribution, publication, or use would be unlawful, nor is it directed at any person or entity at which it would be unlawful to direct such a document.

This document has been made on a best-effort basis, is furnished for information purposes only and does not constitute an offer or a recommendation to purchase or sell any security, unless otherwise provided for in the present disclaimer. The opinions herein do not take into account individual investors' circumstances, objectives, or needs. Each investor must make his own independent decisions regarding any securities or financial instruments mentioned herein. Before entering into any transaction, each investor is urged to consider the suitability of the transaction in relation to his particular circumstances and to independently review, with professional advisors as necessary, the specific risks incurred, in particular at financial, regulatory and tax levels.
