查核報告

致（盧森堡）法盛國際基金I股東

對於（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）之免責聲明

[譯註：該基金未於台灣註冊登記，故略譯。]

本事務所對（盧森堡）法盛國際基金 I 及其旗下各子基金之意見（除（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund 外）

本事務所已查核（盧森堡）法盛國際基金 I（下稱「基金」）及其旗下各子基金（除（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）外）之財務報表，包括：

- 截至 2022 年 12 月 31 日之淨資產報表；
- 截至 2022 年 12 月 31 日之投資表；
- 該年度結束時之淨資產變動表；及
- 財務報表附註，包括重大會計政策之摘要。

本事務所認為，後附之財務報表符合盧森堡有關財務報表編製及表達之法律及監管要求，真實且公允地表達基金及其旗下各子基金（除子基金（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）外）截至 2022 年 12 月 31 日之財務狀況，以及截至該日止之年度經營成果及淨資產變動。

對於（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）免責聲明之意見基礎

[譯註：該基金未於台灣註冊登記，故略譯。]

就基金及其旗下各子基金（除（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）外）之意見基礎

本事務所依據 2016 年 7 月 23 日有關審計專業之法規（下稱「2016 年 7 月 23 日法規」）及盧森堡金融業監管委員會（下稱「CSSF」）於盧森堡所採用之國際審計準則進行查核。本事務所根據 2016 年 7 月 23 日法規及國際審計準則所應負之責任，載於本報告之「會計師對查核財務報表的責任」一節。本事務所亦係獨立於上述「意見」中提及之基金及其旗下各子基金之外，符合 CSSF 於盧森堡所採用由國際會計師倫理標準委員會發布之國際專業會計師倫理守則（包括國際獨立標準）（下稱「IESBA Code」）及審查上述「意見」中提及之基金及其旗下各子基金財務報表所要求的相關倫理規範。本事務所已履行這些倫理規範下之其他倫理責任。本事務所相信本事務所就基金及其旗下各子基金所取得之查核證據可對所表示之意見提供充分合理之依據（除（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund 外）。

關於基金及其旗下各子基金（除（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）外）之其他資訊

基金董事會須對其他資訊負責。其他資訊包括年報內的訊息，但不包括財務報表及本事務所之查核報告。

本事務所對財務報表的意見並不涵蓋其他資訊，本事務所亦不會對該等其他資訊表達任何形式的確認結論。

關於財務報表的查核，本事務所有責任閱讀其他資訊，並考慮其他資訊是否與財務報表或本事務所在查核過程中所了解的情況存有重大抵觸或者存在重大錯誤陳述的情況。基於本事務所已執行的工作，倘若本事務所認為其他資訊存在重大不實陳述，本事務所必需報告此事實。

就此，本事務所就基金及其旗下各子基金（除（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）外）並無應報告之事項。

基金董事會對財務報表的責任

基金董事會負責財務報表的編製及公允表達，以符合盧森堡有關財務報表編製及表達之法律及監管要求，並負責基金董事會認為編製財務報表所必要的內部控制，以避免因詐欺或錯誤而導致財務報表之編製有重大不實陳述。

於編製財務報告時，除了基金董事會有意將基金或任何子基金清算、或停止運作、或無實際之替代方案而必須如此外，基金董事會應負責評估基金及其任何子基金繼續持續經營之能力，於適用時揭露與持續經營相關之事項，並採用持續經營會計基礎。

會計師對查核財務報表的責任

就（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）

[譯註：該基金未於台灣註冊登記，故略譯。]

就基金及其旗下各子基金（除（盧森堡）法盛國際基金 I- Natixis Multi Alpha Fund（清算中）外）

本事務所的目標是對財務報表整體是否不存在重大不實陳述（無論是由於詐欺或錯誤）取得合理確信，並出具包括本事務所意見的查核報告。合理確信是高度的確認，但不能保證凡依照 2016 年 7 月 23 日法規及 CSSF 於盧森堡所採用的國際審計準則所進行的查核總能發現重大錯誤陳述之存在。不實陳述可能來自於詐欺或錯誤，倘若就個別或累計而言，能夠合理預期其會影響財務報表使用者基於此等財務報表所作的經濟決定，該不實陳述就被認為是重大的。

根據 2016 年 7 月 23 日法規及 CSSF 於盧森堡所採用的國際審計準則，本事務所在整個查核過程中，實施專業判斷並保持專業上之懷疑。本事務所同時也：

- 辨別並評估財務報表存在重大不實陳述（無論是由於詐欺或錯誤）的風險，設計和執行查核程序以應對這些風險，以及獲取充足和適當的查核證據，作為本事務所表達意見的基礎。由於詐欺可能涉及串謀、偽造、蓄意遺漏、虛假陳述，或忽視內控，因此，未能發現因詐欺而導致的重大不實陳述之風險高於未能發現因錯誤而導致的重大不實陳述之風險；
- 對與查核有關的內部控制予以了解，以便設計在該情況適當的查核程序，但目的並非對基金內部控制的有效性發表意見；
- 評估本基金董事會所採用會計政策的適當性及會計預估和相關揭露的合理性；
- 對本基金董事會採用持續經營會計基礎的適當性作出結論，及根據所獲得的查核證據，確定是否存在與事件或情況有關的重大不確定性，從而可能導致對基金或其任何子基金持續經營能力產生重大疑慮。如果本事務所認為存在重大不確定性，則有必要在查核報告中提請使用者注意財務報表中的相關揭露，倘若相關的揭露不足，則本事務所應當修改本事務所的意見。本事務所的結論是基於截至查核報告日所取得的查核證據。然而，未來的事件或情況可能導致基金或其任何子基金不能持續經營；
- 評價整體財務報表的表達、結構和內容，包括揭露，以及財務報表是否公允表述各項交易和事件。

本事務所與管理層溝通一些事項，其中包括對於查核的規畫範圍和時間安排，以及重大查核發現等，包括本事務所在查核過程中發現的任何內部控制重大缺失。

PricewaterhouseCoopers, Société cooperative
由下列人員代表之

盧森堡，2023 年 4 月 12 日

Fanny Sergent

Audited Annual Report As at December 31, 2022

No subscriptions should be made on the basis of the financial report alone. Subscriptions should only be made on the basis of the current Prospectus supplemented by the latest Annual Report and the latest Semi-Annual Report, if published thereafter.

Performance data shown represents past performance and is not a guarantee of future results. More recent performance may be lower or higher. Principal value and returns fluctuate over time (including as a result of currency fluctuations) so that Shares, when redeemed, will be worth more or less than their original cost. Performance shown is net of all Fund expenses, but does not include the effect of sales charges or correspondent bank charges, and assumes reinvestment of distributions. If such charges were included, returns would have been lower. Performance for other Share classes will be more or less depending on differences in fees and sales charges. For periods when certain Share classes were unsubscribed or not yet created (the "inactive Share classes"), performance is imputed using the actual performance of the Fund's active Share class which has been determined by the management company as having the closest characteristics to such inactive Share class and adjusting it based on the difference in TERs and, where applicable, converting the net asset value of the active Share class into the currency of quotation of the inactive Share class. The quoted performance for such inactive Share class is the result of an indicative calculation.

Unless otherwise indicated, all defined terms used herein shall have the same meaning as set out in the Prospectus of the Umbrella Fund.

Natixis International Funds (Lux) I

Report to the Shareholders

Natixis Asia Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(26.89)%
MSCI AC Asia ex Japan IMI Index	(19.76)%

The Fund underperformed its Reference Index in the 12 months ended 31 December 2022. The Fund is down (-26.89%), underperforming its reference index (-19.76%). Stock selection is the key driver for Fund performance.

Natixis Asia Equity Fund is a high conviction Fund managed with a Responsible Quality Growth at a Reasonable Price ("GARP") investment philosophy. We invest in companies that are characterized by having high growth potential, excellent quality and priced reasonably. ESG criteria is systematically taken into consideration in our approach and is part of the quality analysis we make when we select companies for the portfolio.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

DNCA Emerging Europe Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(40.67)%
MSCI EM Europe IMI Index	(63.34)%

The year 2022 was a challenging and an unstable year to say the least, characterized by a war in Ukraine, the resurgence of inflation, more elevated interest rates and a tense geopolitical environment. The invasion of Ukraine have had many implications, from the suspension of Russian equities listing to rising commodity prices and financial markets volatility.

Despite the funds being substantially down in absolute terms over the year (-37% performance net of fees in Euro), the relative performance of +24% versus its benchmark, the MSCI Emerging Europe IMI (-61%), has been strong due its significant underweight position in Russia going into the crisis.

On top of the geographical allocation, stock picking in high quality defensive stocks such as Jeronimo Martins and Dino Polska in Poland, BIM and Coca-Cola Icecek in Turkey as well as Jumbo in Greece all have a beneficial impact on the performance of the fund through the year.

The Board of Directors

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Natixis Pacific Rim Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(5.00)%
MSCI Pacific Free ex Japan Index	(5.86)%

The Fund outperformed its Reference Index in the 12 months ended 31 December 2022. The Fund is down (-5.00%), outperforming its Reference Index (-5.86%). Stock selection is the key driver for Fund performance.

Natixis Pacific Rim Equity Fund is a high conviction Fund managed with a Responsible Quality Growth at a Reasonable Price ("GARP") philosophy. This Fund invests in a selection of best-in-class growth companies, targeting leaders in key growth segments in Pacific Rim markets universe. ESG criteria is taken into consideration in our approach and is part of the quality analysis we make when we select companies for the portfolio.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Harris Associates Global Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(17.58)%
MSCI World Index	(18.14)%

The portfolio outperformed its benchmark for the year, returning -17.58% compared to the MSCI World Index that returned -18.14%.

Stock selection drove relative outperformance, while country weightings detracted from relative results during the period. Stock selection in Germany and the Netherlands produced the strongest relative performance. Relative performance was pulled back most by stock selection in Switzerland and exposure to Mexico.

Absolute collective performance was positive in three of 15 invested countries: India (+22.9%), Australia (+11.4%) and Japan (+8.5%). Holdings in Mexico (-50.8%), Italy (-48.4%) and South Korea (-31.9%) supplied the largest negative absolute returns for the year.

The top five stocks that helped performance for the year were Glencore (Switzerland), NOV (U.S.), Bayer (Germany), Parker-Hannifin (U.S.) and Howmet Aerospace (U.S.).

The five stocks that hindered performance most for the year were Credit Suisse Group (Switzerland), Alphabet (U.S.), General Motors (U.S.), Continental (Germany) and Charter Communications (U.S.).

The portfolio finished the year holding 46 securities throughout a variety of countries. Over the past 12 months, we initiated positions in Amazon (U.S.), Kering (France), KKR (U.S.), Parker-Hannifin (U.S.), Pinterest (U.S.) St. James's Place (U.K.) and Warner Bros Discovery (U.S.). We eliminated our positions in Citigroup (U.S.), Compass Group (U.K.), Continental (Germany), Envista Holdings (U.S.), General Dynamics (U.S.), Humana (U.S.), Incitec Pivot (Australia), Keurig Dr Pepper (U.S.), Toyota Motor (Japan) and Vitesco Technologies Group (Germany).

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Harris Associates U.S. Value Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(13.35)%
S&P 500 Index	(18.11)%

The portfolio outperformed its benchmark for the year, returning (-13.35%) compared to the S&P 500 Index that returned (-18.11%).

Stock selection drove relative outperformance, while sector weightings detracted from results compared with the benchmark for the year. Holdings in technology and financials delivered the largest positive relative performance. A greater-than-benchmark in communication services and less-than-benchmark in energy made these sectors the largest overall detractors for the period.

In terms of absolute performance, five of 10 invested sectors produced positive collective returns for the year, led by energy (+75.9%), consumer staples (+18.8%) and health care (+16.3%). Communication services (-38.3%), materials (-25.3%) and consumer discretionary (-23.8%) declined the most.

The top five stocks that helped performance for the year were Lamb Weston, CDK Global, Oracle, Halliburton and ConocoPhillips.

The five stocks that hindered performance most for the year were Alphabet, Meta Platforms, Charter Communications, Amazon and Netflix.

The portfolio finished the year holding 52 securities across a variety of industries. Over the past 12 months, we initiated positions in American Express, BellRing Brands, CBRE Group, Capital One Financial, ConocoPhillips, EOG Resources, Forunte Brands Innovations, Goldman Sachs, Intercontinental Exchange, Masco, MasterBrand, Oracle, Parker-Hannifin, Pinterest, TE Connectivity, Warner Bros Discovery and Workday. We eliminated our positions in Bunge, CDK Global, Constellation Brands, DXC Technology, General Dynamics, Halliburton, Humana, Huntington Ingalls, Keurig Dr Pepper, NOV, Philip Morris International, Post Holdings, Regeneron Pharmaceuticals and T-Mobile US.

The Board of Directors

Luxembourg, April 12, 2023

Please see past performance disclosure on cover page.

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Loomis Sayles Global Emerging Markets Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(23.64)%
MSCI EM Index	(20.09)%

The Fund underperformed its Reference Index.

India was the largest country contributor to relative returns; Russia was the largest detractor. Security selection in Industrials was the largest sector contributor to relative returns; security selection in Financials (particularly Russian financial companies) was the largest detractor.

Kingdee International Software, Cholamandalam Investment & Finance Co. and LG Energy Solution were the largest company contributors to absolute returns; TCS Group, MercadoLibre and Taiwan Semiconductor Manufacturing were the largest detractors.

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Loomis Sayles Global Growth Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(26.17)%
MSCI ACWI	(18.36)%

The Fund underperformed its Reference Index in the 12-month period ended 31 December 2022.

Alnylam Pharmaceuticals, Trip.com, Vertex Pharmaceuticals, Novo Nordisk and Novartis were the largest positive contributors during the year. Stock selection in the healthcare, energy, consumer staples, industrials and financials sectors, along with our allocations in the healthcare and industrials sectors, contributed positively to relative performance.

Amazon, Meta Platforms, Alphabet, Tesla and Adyen were the largest detractors during the year. Stock selection in the communication services and consumer discretionary sectors, along with our allocations in the communication services, energy, consumer discretionary, financials, information technology and consumer staples sectors, detracted from relative performance.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

Report to the Shareholders (continued)

Loomis Sayles Sakorum Long Short Growth Equity Fund⁽¹⁾

Activities Report for the period from September 27, 2022 to December 31, 2022

Period Performance	
Fund I/A (USD)	4.98%

The Fund launched on September 27, 2022 and as such does not have a full fiscal year of performance. For the inception-to-date period ending December 31, 2022, the Fund had a positive return.

During the brief period, the Fund's long positions in Boeing, Oracle and Novo Nordisk contributed the most to performance. The Fund's long positions in Amazon and Tesla and a short position in a specialty electronics retailer detracted the most from performance.

The Board of Directors

Luxembourg, April 12, 2023

Please see past performance disclosure on cover page.

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

DNCA Europe Smaller Companies Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (EUR)	(30.50)%
MSCI Europe Small Cap Index	(22.50)%

Year 2022 was characterized by a war in Ukraine, the resurgence of inflation and more elevated interest rates.

The Fund (class I/A (EUR): (-30.50%) net of fees) has underperformed the benchmark Msci Europe small cap (-22.50%) because of the Fund style (quality-growth): higher interest rates means lower price/earning ratios. The Fund had not enough financials, materials and utilities, but this was corrected month after month and the fund has over performed in the second half.

The best contributors to the performance are Ipsos, Bank of Ireland and GTT. The worst detractors are CINT, Future and S4 Capital.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Thematics AI and Robotics Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(31.07)%
MSCI ACWI	(18.36)%

The Fund posted its first annual negative performance both in absolute terms and relative to its Reference Index, the MSCI ACWI. The strategy was mostly impacted by the macroeconomic environment and resulting Central Banks' policy shift that turned radically hawkish to tame high and persistent inflation. All segments of the portfolio contributed negatively, notably Consumer & Services Automation, Supply Chain and Office Automation. At a stock level, only four stocks contributed positively: AutoStore & Emerson Electric (Factory Automation), PTC (Design Software) and Hologic (Medical Automation), illustrating the widespread decline in the technology-related and "growth" parts of the market.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

The Board of Directors

Luxembourg, April 12, 2023

Report to the Shareholders (continued)

Thematics Climate Selection Fund⁽¹⁾

Activities Report for the period from October 18, 2022 to December 31, 2022

Period Performance	
Fund I/A (USD)	9.53%
MSCI ACWI Climate Paris Aligned Index	7.24%

Since its launch mid-October 2022, the Thematics Climate Selection Fund outperformed its Reference Index, the MSCI ACWI Climate Paris Aligned Index. 2022 saw a ramp up of climate policies at the global level while the macroeconomic environment was more favorable for markets towards the end of the year. In this context, most stocks in the portfolio delivered positive returns over the period, with Siemens, Signify and Equinix being the top contributors, while the main detractor was Alphabet.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

19

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Thematics Meta Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(28.71)%
MSCI ACWI	(18.36)%

In 2022, Thematics Meta Fund underperformed the MSCI ACWI, its Reference Index. The macroeconomic environment, with high and persistent inflation, subsequent shift from central banks towards rapidly restrictive monetary policies and knock - on effects on future growth prospects were not conducive to a favorable background for growth stocks, which the Fund is predominantly tilted towards. Of the five themes it is exposed to, Thematics Water Fund was the most resilient, given its exposure to more defensive plays, whilst the four other ones, Thematics Subscription Economy Fund, Thematics Wellness Fund, Thematics AI and Robotics and Thematics Safety Fund, weighed on performance.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Thematics Safety Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(34.70)%
MSCI World Index	(18.14)%

The Fund underperformed its Reference Index, the MSCI World Index. The Connect subsegment was the most negative as it experienced a significant derating led by the market rotation. The Shop subsegment performed well supported by a recovery in spending and relatively low valuations. The Real-World segment was underpinned by strong industrial activity, a buoyant labor market, an improvement of the supply chain and strong pricing power. The Eat subsegment faced a tough COVID-related comparison. The Move subsegment was impacted by supply chain issues and the Covid policy in China, whilst both the Live and Work subsegments benefited from sustained industrial activity and strong labor markets.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

The Board of Directors

Luxembourg, April 12, 2023

Please see past performance disclosure on cover page.

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Thematics Subscription Economy Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(28.07)%
MSCI ACWI	(18.36)%

In 2022, with energy, materials and banks (all structurally absent from the theme) outperforming global markets, the Fund underperformed its reference index, the MSCI ACWI. All segments contributed negatively to the performance, with B2C and B2B online being the two biggest detractors. At single stocks level, HealthEquity strived thanks its positive correlation to interest rates while T-Mobile proved resilient in a highly uncertain year. Both Anaplan and Homeserve were also among the best performers after being taken out by Thoma Bravo and Brookfield respectively. On the negative side, the dating applications owner Match suffered on the back of slowing consumer spending and FX while Clarivate sold off on the back of management change and bad execution.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Thematics Water Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(20.51)%
MSCI ACWI	(18.36)%

2022 saw a small underperformance versus its Reference Index, the MSCI ACWI. All segments finished down, despite individual Waste Management and Concessions / Utility positions performing well. War, inflation and rate hikes impacted valuations, with price-sensitive investors seeking cheaper stocks which included SJW and Essential among US Utilities, Sabesp (Brazil) and Clean Harbors in 'Waste Management', a segment that performed well. Beneficiaries of future infrastructure stimulus such as US Consultants Aecom and Tetra Tech also outperformed. 2022 saw a lot of M&A, and the Fund benefitted from the May takeover of Homeserve (UK). With increasing pressure on consumers, construction-related and consumer stocks were among the weakest performers along with broader industrial companies exposed to higher input costs and energy costs.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

The Board of Directors

Thematics Wellness Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(29.31)%
MSCI ACWI	(18.36)%

In 2022, the Fund underperformed its Reference Index, the MSCI ACWI. Following interest rate hikes, value stocks outperformed growth ones. Therefore, the “Body” segment outperformed the “Mind” one due to its exposure to more defensive stocks, especially within Monitoring and Support (Merck, Hologic, P&G) while Exercise and Nutrition lagged, as spending is more discretionary in nature and stocks tend to be more expensive (Puma, HelloFresh, Oatly). Within “Mind”, Relaxation outperformed (Lululemon being the main driver), while both Companionship and Open-Air suffered from their exposure to high growth stocks (Match, Yeti, Freshpet).

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

Vaughan Nelson Global Smid Cap Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(21.14)%
MSCI ACWI Smid Cap Index	(18.72)%

During the fiscal year ended December 31, 2022, the first quarter was marked a news cycle dominated by Russia's invasion of Ukraine and NATO's response. These events further supported inflationary pressures and are an additional headwind to economic growth.

As we entered midyear, risk assets faced continued pressure from accelerating inflation, decelerating economic growth, and tightening financial conditions. Inflationary pressures in the U.S. moved from goods to services and housing. Interest rates have shifted higher and the yield curve flattened with the M2 money supply decelerating. Equity markets were driven by exceptional U.S. dollar strength as the Federal Reserve tightened financial conditions by aggressively increasing interest rates and shrinking their Balance Sheet. Risk assets faced pressure from accelerating inflation, decelerating economic growth, and tightening financial conditions. The U.S. dollar accelerated the exportation of U.S. inflation to the rest of the world, forcing nearly all global central banks to follow the U.S. Federal Reserve in raising interest rates.

Closing out 2022, peaking inflationary conditions and a rapid increase in non-U.S. interest rates, relative to rates in the U.S., drove a broad-based decline in the U.S. dollar and pushed global equity markets higher during the quarter. A selloff in equities largely reflected the impact of higher interest rates increasing cost of capital, which drove a decline in valuation multiples.

As a result of buys and sells and market action, the portfolio is overweight Industrials, Information Technology, Financials while underweight Real Estate, Utilities, Consumer Staples, Consumer Discretionary, Communication Services, Energy, Health Care and Materials.

During the year, the portfolio experienced negative absolute and negative relative performance. The portfolio outperformed the market in Information Technology, Financials and Communication Services. These sectors were offset by Health Care, Industrials, Energy, Utilities, Real Estate, Materials, Consumer Discretionary and Consumer Staples.

We anticipate that expiring monetary and fiscal stimulus, coupled with the current level of interest rates, will drive a deceleration in inflation close to the U.S. Federal Reserve's inflation target. However, tighter policy conditions will lead to an earnings recession and likely an economic recession in most developed markets. Should weakening economic and financial conditions force policy makers to re-stimulate the economy, we could see inflationary pressures begin to re-accelerate.

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Vaughan Nelson U.S. Select Equity Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(17.17)%
Russell 3000 Value Index	(18.11)%

During the fiscal year ended December 31, 2022, capital markets signaled recessionary conditions as a greater concern than inflation. The recessionary concern was evidenced by the rapid decline in commodity prices, flattening yield curves, widening credit spreads and an inverted Eurodollar futures curve. In prior slowdowns, the market and economy were quickly supported by the Federal Reserve's action that loosened financial conditions. Unlike past cycles, the Federal Reserve continued to tighten financial conditions despite the recessionary warnings.

The resulting tighter financial conditions forced global equity and fixed income markets to reduce investment positions and leverage, driving nearly all asset classes lower. Equity markets repriced valuation multiples in line with the higher cost of capital but have not yet priced a potential earnings recession.

The 4Q22 recovery in equity markets was driven by peaking inflationary conditions and the rapid increase in non-U.S. interest rates relative to U.S. interest rates, which triggered a broad-based decline in the U.S. dollar. The 2022 bear market in equities reflects the impact of higher interest rates increasing the cost of capital and thereby decreasing equity valuations. The next challenge for markets will be digesting declining earnings expectations for 2023. The largest reduction in earnings expectations should occur during the first two quarters of 2023. A second half recovery will be contingent on the interplay between the rapid deceleration in inflation and whether the higher interest rates lead to excessive economic and market weakness.

As a result of buys and sells and market action, the portfolio is overweight Materials, Utilities, Consumer Staples and Consumer Discretionary while underweight Information Technology, Industrials, Energy, Health Care, Financials, Communication Services and Real Estate.

During the year, the portfolio experienced negative absolute and positive relative performance. The portfolio outperformed the market in Information Technology, Consumer Discretionary, Financials, Materials, Communication Services, Real Estate and Utilities. These sectors were offset by Industrials, Consumer Staples, Health Care and Energy.

With the current level of interest rates and expiring monetary and fiscal stimulus, we anticipate that by 3Q23, the trajectory of inflation will be on pace to meet the Federal Reserve's inflation target. However, we anticipate the tighter financial conditions and expiring monetary and fiscal stimulus will lead to an earnings recession and likely an economic recession. Should weakening economic and financial conditions force policy makers to restimulate the economy, we could see inflationary pressures begin to reaccelerate.

WCM China Growth Equity Fund⁽¹⁾

Activities Report for the period from November 30, 2022 to December 31, 2022

Period Performance	
Fund I/A (USD)	0.91%
MSCI China A Onshore Index	1.80%

Since inception, the WCM China Growth Equity Fund underperformed the MSCI China A Onshore Index. Attribution analysis reveals the majority of underperformance can be attributed to sector allocation.

From an allocation perspective, Consumer Staples (overweight) was the largest contributor to relative performance, followed by Energy (no weight) and Materials (underweight). On the flipside, Financials (no weight) detracted from relative performance, as did Information Technology (overweight) and Communication Services (no weight).

For selection, Consumer Discretionary was the best performing sector relative to the benchmark, followed by Materials and Industrials. On the flipside, Information was the worst performing sector relative to the benchmark.

The Board of Directors

Luxembourg, April 12, 2023

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(17.96)%
Bloomberg Barclays Capital Global Aggregate Credit Index	(16.96)%

The Fund underperformed its Reference Index.

Spread sector allocation was the primary detractor from relative performance driven mostly by risk-adjusted overweights to the financial other, banking and insurance sectors.

An underweight to sovereigns and supranationals contributed positively to relative performance, in particular, the avoidance of Russian sovereign and quasi-sovereign bonds.

Security specific selections within the technology, utility other and consumer cyclical sector detracted from relative performance.

Duration and yield curve positioning contributed modestly to excess returns during the year.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

Report to the Shareholders (continued)

Loomis Sayles Short Term Emerging Markets Bond Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(8.25)%

The Fund had a negative absolute return.

Credit spread widening and company-specific credit events contributed to negative returns. In addition, the substantial increase in US Treasury yields also contributed to negative returns. Losses from spread widening and changes in yields were only partially offset by income.

Mexico was the largest country detractor. In China, the Fund's exposure to real estate and telecom/media/technology companies were negative contributors. Russian and Ukrainian holdings contributed to negative returns. Turkey was a positive contributor to returns, particularly financials.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

Loomis Sayles Strategic Alpha Bond Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(8.54)%
3 Month USD Libor Index	2.42%

High yield corporates were the main detractor, in particular, consumer cyclicals and non-cyclicals, communications and banking.

Investment grade corporate bonds detracted, in particular banking, finance companies and communications.

Exposure to securitized assets including Commercial mortgage-backed securities (CMBS), Non-Agency Residential MBS (NARMBS) and Asset-backed securities (ABS) detracted from performance.

Duration and non-US dollar currency exposure contributed, in particular a short position in 10-year US Treasury interest rate futures aided performance.

Global Credit bolstered return primarily through Argentinian banking sovereigns and Colombian Peso forwards.

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Loomis Sayles U.S. Core Plus Bond Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	(13.12)%
Bloomberg Barclays U.S. Aggregate Bond Index	(13.01)%

The Fund underperformed its Reference Index, after fees. Before fees, relative performance was positive.

Yield curve positioning was the largest contributor to relative returns, approximately one-third of that contribution from being short duration overall, and approximately two-thirds from positioning along the curve.

Investment Grade was the largest contributor to relative return due to the shorter duration nature of the holdings.

Non-U.S. dollar contributed to relative returns.

High yield, which is not held in the index, contributed modestly to relative returns.

Dollar-pay emerging markets bonds were detractors as spreads widened, particularly in sovereign holdings.

The Board of Directors

Luxembourg, April 12, 2023

Please see past performance disclosure on cover page.

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Loomis Sayles Asia Bond Plus Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/DIVM (USD)	(18.78)%
JPMorgan Asia Credit Index - Non-Investment Grade Index	(15.09)%

The Fund underperformed its Reference Index.

Credit selection was the primary detractor from relative returns; the Fund's positioning in Chinese property, underweight metals & mining (coal-related credits) and overweight real estate and utilities were among the largest detractors. In the Fund's "Plus" regions, exposure to a Ukrainian consumer company, an oil and gas company the sovereign in Ghana and a position in a South African TMT holding detracted.

The Fund benefitted from underweights in Sri Lanka, Hong Kong and the Philippines. In the Fund's "Plus" regions, positions in the Pakistan sovereign and a quasi-sovereign Turkish financial and a Georgian TMT and utilities name contributed.

On the new EU Sustainable Finance Disclosure Regulation (SFDR), certain information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in the SFDR (Unaudited) appendix of the annual report.

Ostrum Euro High Income Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (EUR)	(11.43)%
BofA Merrill Lynch Euro High Yield BB-B Rated Constrained Index	(11.29)%

For the Q1, the Euro High Yield strategy delivered a net performance of (-4.15%) during the first quarter of the year, outperforming its benchmark by +66bps. The strategy suffered from the global spread widening following the Russian invasion of Ukraine. The strategy delivered a net performance of (-12.91%) during the Q2, underperforming its benchmark by 2.23%. It was one of the worst quarters for euro high yield credit ever. The strategy suffered from the global spread widening and from the massive correction on the real estate sector. The Q3 remained extremely volatile with a strong credit spread tightening up to mid-August. The strategy benefitted from the rebound on the real estate sector. The Euro High Yield strategy delivered a net performance of (+5.98%) during the Q4, overperforming its benchmark by (+1.19%). After a very painful year for financial markets, Q4 brought a bit of relief with a significant spread tightening in credit. The strategy benefitted from its overweight on the banking sector, notably AT1's.

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

Ostrum Global Inflation Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (EUR)	(17.77)%
Bloomberg Barclays World Government Inflation-Linked Bond Index	(18.94)%

In 2022, Ostrum Global Inflation Fund (Return Net of fees I/A (EUR) share class) posted negative returns

(-17.77%), however, in relative terms, the Fund outperformed its reference index (-18.94%).

Performance is explained by a global context of central banks' hiking rates, ambitioning to contain higher inflation prints that resulted from higher energy prices and supply chain bottlenecks. In the United States, inflation averaged 8% in 2022 and in the Eurozone the average was 8.4%. Considering that main central banks (Federal Reserve, European Central Bank...) target 2% inflation over the medium term, the bias will remain to tightening policies in 2023.

The Board of Directors

Luxembourg, April 12, 2023

Natixis International Funds (Lux) I

Report to the Shareholders (continued)

ASG Managed Futures Fund

Activities Report for the year ended December 31, 2022

1 Year Performance	
Fund I/A (USD)	26.59%
Credit Suisse Managed Futures Liquid Index and/or SG Trend Index	22.13%

For the 12 months that ended December 31, 2022, the Class I/A (USD) shares of the ASG Managed Futures Fund returned 26.59%. Although the Fund does not seek to track any particular index, one index that may be used for performance analysis is the SG Trend Index as it reflects a peer group of diversified, primarily trend-following investment managers. The Fund underperformed this benchmark, which returned 27.35% over the same period. The Credit Suisse Managed Futures Liquid Index may also be used as a benchmark for performance analysis; this benchmark returned 22.13% over the same period. It is important to note that there are material differences between the Fund and these benchmarks.

The Fund uses a set of proprietary quantitative models to identify trends in global stock, fixed income, currency and commodity markets. When the Fund takes on a "long" exposure to a market, that exposure generally profits as the price of the underlying security rises but suffers losses when its price falls; when it takes on a "short" exposure, that exposure generally suffers losses as the price of the underlying security rises but profits as its price falls. The Fund uses derivative instruments, such as futures and forward contracts, to capture these exposures.

For the 12-month period that ended December 31, 2022, the Fund's performance benefited from several strong macroeconomic trends in global markets, especially in fixed income.

In fixed income, bond prices declined over the year due to central bank interventions, which included multiple rate hikes. The Fund's short positions provided gains, particularly in international developed markets. The largest gains came from the French 10-Year Notes (OAT) and British Gilt, as well as from German bonds. Short positions in the U.S., especially debt contracts with shorter maturities (2-, 5-, and 10-Year Notes), also provided strong gains. Short positions in short-term interest rate markets also contributed positively. The U.S. dollar generally strengthened over the year; the Fund had gains from its short positions in foreign currencies (long USD), particularly during the third quarter. The largest gains came from the Japanese yen, euro, and British pound. Long positions in commodities also provided positive performance in 2022, with the largest gains coming from being long in energy markets during the first half of the year. Equities detracted across the board as these markets were prone to reversals throughout the year, with losses concentrated in long positions in both international developed markets and U.S. markets, especially the S&P 500.

During 2022, all three model types contributed positively to performance, with the Adaptive and Basic Multi-Trend approaches outperforming the Short-Horizon models.

In order to control inflation, the Federal Reserve implemented a series of rate hikes, raising the target rate from 0.00 – 0.25% to a range of 4.25 – 4.50%. As a result, the contribution from the Fund's cash portfolio was 1.40%. The Fund's portfolio is adjusted on a daily basis to reflect market trends as well as to control risk. The Fund's realized volatility in 2022 was 13.6%, which is consistent with our risk management objectives. We continue to scale the size of the Fund's positions to manage portfolio risk.

Audit report

To the Shareholders of
Natixis International Funds (Lux) I

Disclaimer of Opinion for Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

We were engaged to audit the financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation), which comprise:

- the statement of net assets as at 31 December 2022;
- the statement of investments as at 31 December 2022;
- the statement of changes in net assets for the year then ended; and
- the notes to the financial statements, including a summary of significant accounting policies.

We do not express an opinion on the accompanying financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation). Because of the significance of the matter described in the "Basis for disclaimer of opinion" section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements.

Opinion for the Fund and for each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

We have audited the financial statements of Natixis International Funds (Lux) I (the "Fund") and of each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) which comprise:

- the statement of net assets as at 31 December 2022;
- the statement of investments as at 31 December 2022;
- the statement changes in net assets for the year then ended; and
- the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Disclaimer of Opinion for Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

As at 31 December 2022, Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) invests in H2O Moderato SP and H2O Global Strategies ICAV - H2O Fidelio for an amount of respectively 75,104 USD and 59,454 USD (representing respectively 56.06% and 44.38% of the net asset value as at 31 December 2022 of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)). These investments are included in the caption "Investments portfolio at market value". We were not able to obtain sufficient and appropriate audit evidence with regards to the valuation of these investments as at 31 December 2022.

As a result, we were not able to determine whether any adjustments to the valuation of these investments as at 31 December 2022 and any related effect on the statement of changes in net assets were necessary.

Basis for Opinion for the Fund and for each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (“Law of 23 July 2016”) and with International Standards on Auditing (“ISAs”) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (“CSSF”). Our responsibilities under the Law of 23 July 2016 and ISAs are further described in the « Responsibilities of the “Réviseur d’Entreprises Agréé” for the Audit of the Financial Statements » section of our report. We are also independent of the Fund and of each of its sub-funds referred to in the “Opinion” section above, in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board of Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements of the Fund and of each of its sub-funds referred to in the “Opinion” paragraph above, and have fulfilled our other ethical responsibilities under these ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion for the Fund and each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation).

Other Information with regard to the Fund and each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the “Réviseur d’Entreprises Agréé” thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard for the Fund and each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation).

Responsibilities of the Board of Directors of the Fund for the Financial Statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’Entreprises Agréé” for the Audit of the Financial Statements

For Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

Our responsibility is to conduct an audit of the Fund's financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) in accordance with the Law of 23 July 2016 and with International Standards on Auditing as adopted for Luxembourg by the CSSF and to issue an audit report of the “Réviseur d’Entreprises Agréé”. However, because of the matter described in the “Basis for disclaimer of opinion” section of our report of the “Réviseur d’Entreprises Agréé”, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation).

We are independent of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board of Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant for conducting our audit of the financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation), and have fulfilled our other ethical responsibilities under these ethical requirements.

For the Fund and for each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “Réviseur d’Entreprises Agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "Réviseur d'Entreprises Agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "Réviseur d'Entreprises Agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report of Independent Auditors

To the Board of Directors of Natixis International Funds (Lux) I

Disclaimer of Opinion for Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

We were engaged to audit the accompanying financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation), which comprise the statement of net assets and the statement of investments as of 31 December 2022, and the related statement of changes in net assets for the year then ended, including the related notes.

We do not express an opinion on the accompanying financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation). Because of the significance of the matter described in the "Basis for disclaimer of opinion" section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements.

Opinion for the Fund and for each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

We have audited the accompanying financial statements of Natixis International Funds (Lux) I (the "Fund") and each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation), which comprise the statement of net assets and the statement of investments as of 31 December 2022, and the related statements of changes in net assets for the year then ended, including the related notes (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund and each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) as of 31 December 2022, and the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Disclaimer of Opinion for Natixis International Funds (Lux) I – Natixis Multi Alpha Fund (in liquidation)

As at 31 December 2022, Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) invests in H2O Moderato SP and H2O Global Strategies ICAV - H2O Fidelio for an amount of respectively 75,104 USD and 59,454 USD (representing respectively 56.06% and 44.38% of the net asset value as at 31 December 2022 of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)). These investments are included in the caption "Investments portfolio at market value". We were not able to obtain sufficient and appropriate audit evidence with regards to the valuation of these investments as at 31 December 2022.

As a result, we were not able to determine whether any adjustments to the valuation of these investments as at 31 December 2022 and any related effect on the statement of changes in net assets were necessary.

Basis for Opinion for the Fund and for each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of the Board of Directors of the Fund for the Financial Statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern for at least, but not limited to, twelve months from the end of the reporting period, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the Financial Statements**For Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)**

Our responsibility is to conduct an audit of the Fund's financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) in accordance with the Law of 23 July 2016 and with US GAAS and to issue an auditor's report. However, because of the matter described in the "Basis for disclaimer of opinion" section of our report, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation).

We are independent of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation) in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant for conducting our audit of the financial statements of Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation), and have fulfilled our other ethical responsibilities under these ethical requirements.

For the Fund and for each of its sub-funds except the sub-fund Natixis International Funds (Lux) I - Natixis Multi Alpha Fund (in liquidation)

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit;
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed;
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by the Board of Directors of the Fund, as well as evaluate the overall presentation of the financial statements;
- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022

Note 1 – GENERAL

Natixis International Funds (Lux) I (the “Umbrella Fund”) is a *Société Anonyme* qualifying as *Société d’Investissement à Capital Variable* incorporated under the laws of the Grand Duchy of Luxembourg on December 1, 1995 and is currently governed by Part I of the Luxembourg Law of December 17, 2010 on Undertakings for Collective Investment, as amended, implementing the Directive 2009/65/EC of the European Parliament and of the Council of July 13, 2009 (“UCITS Directive”), as amended.

The registered office of the Umbrella Fund is located at 80, route d’Esch, L-1470 Luxembourg. The Umbrella Fund is registered with the Luxembourg *Registre de Commerce et des Sociétés* under B 530 23.

Natixis International Funds (Lux) I is an umbrella fund and as such provides investors access to a diversified management expertise through a range of several separate sub-funds each having its own objective and policy.

As at December 31, 2022 shares are offered in thirty-seven sub-funds (each, a “Fund”):

- Natixis Asia Equity Fund,
- DNCA Emerging Europe Equity Fund,
- Natixis Pacific Rim Equity Fund,
- Harris Associates Global Equity Fund,
- Harris Associates U.S. Value Equity Fund,
- Loomis Sayles Global Emerging Markets Equity Fund,

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022 (continued)

Note 1 – GENERAL (continued)

On July 22, 2021, the Natixis Multi Alpha Fund ceased operations but the liquidation was not completed by December 31, 2022.

The Umbrella Fund has appointed Natixis Investment Managers S.A. (the "Management Company") as its management company and delegated to the Management Company all powers related to the investment management, administration and distribution of the Umbrella Fund with effect on April 30, 2006.

Natixis Investment Managers S.A. is a *Société Anonyme* incorporated under Luxembourg law on April 25, 2006 for an unlimited period of time and licensed as a management company under Chapter 15 of the Luxembourg Law of December 17, 2010 on Undertakings for Collective Investment, as amended. Since July 22, 2014 Natixis Investment Managers S.A. is also authorised by the CSSF to act as an alternative investment fund manager under Chapter 2 of the law of July 12, 2013 on alternative investment fund managers.

Investors have the flexibility to convert between Funds.

The Umbrella Fund has been established for an unlimited period of time.

Note 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Presentation of financial statements

The financial statements are prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investment.

Cross-Funds investments were not eliminated from the combined figures. At December 31, 2022, the total of cross-funds investments amounts to EUR 48,034,887 and therefore the total combined NAV at year-end without cross-investments would amount to EUR 10,312,640,523.

b) Method of calculation

The value of each Fund's assets shall be determined as follows:

- a. *Securities and money market instruments traded on exchanges and Regulated Markets* – last market price, unless the Umbrella Fund believes that an occurrence after the publication of the last market price and before any Fund next calculates its net asset value will materially affect the security's value. In that case, the security may be fair valued at the time the Administrative Agent determines its net asset value by or pursuant to procedures approved by the Umbrella Fund. The value of Indian securities shall be determined by using the closing price (defined as the weighted average price of all trades executed during the last 30 minutes of a trading session).
- b. *Securities and money market instruments not traded on a Regulated Market (other than short-term money market instruments)* – based upon valuations provided by pricing vendors, which valuations are determined based on normal, institutional-size trading of such securities using market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders.
- c. *Short-term money market instruments (with remaining maturities of 60 days or less)* – amortized cost (which approximates market value under normal conditions).
- d. *Futures, options and forwards* – unrealised gain or loss on the contract using current settlement price. When a settlement price is not used, future and forward contracts will be valued at their fair value as determined pursuant to procedures approved by the Umbrella Fund, as used on a consistent basis.
- e. *Shares of open-ended funds* – last published net asset value.

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022 (continued)

Note 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Method of calculation (continued)

- f. *Cash on hand or deposit, bills, demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued and not yet received* – full amount, unless in any case such amount is unlikely to be paid or received in full, in which case the value thereof is arrived at after the Umbrella Fund or its agent makes such discount as it may consider appropriate in such case to reflect the true value thereof.
- g. *Credit Default Swaps (CDS), Credit Default Index Swaps (CDX), Interest Rate Swaps (IRS), Total Return Rate Swaps (TRRS) and Inflation Swaps (INF)* – Swaps are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty. Realised appreciation/(depreciation) and change in unrealised appreciation/(depreciation) resulting there from are included in the statement of changes in net assets respectively under the heading “Net realised appreciation/(depreciation) on swaps” and “Change in net unrealised appreciation/(depreciation) on swaps”.
- h. *Swaptions* – when the Fund writes a swaption, an amount equal to the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current fair value of the swaption written. Premiums received from the written swaptions which expire unexercised are treated by the Fund on the expiration dates as realised gains.

When the Fund purchases a swaption, an amount equal to the premium paid by the Fund is recorded as an asset and is subsequently adjusted to the current fair value of the swaption purchased. Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses.

- i. *To Be Announced securities* - the Fund may purchase or sell debt securities in a “To Be Announced” “(TBA)” transactions, which delivery or payment to occur at a later date beyond the normal settlement period. TBA securities resulting from these transactions are included in the Statement of Investments. At the time that the Fund enters into a commitment to purchase or sell a security, the transaction is recorded and the value of the security is reflected in the Fund’s net asset value. The price of such security and the date that the security will be delivered and paid for are fixed at the time the transaction is negotiated. The value of the security may vary with market fluctuations.
- j. *Repurchase agreements* – the Fund may enter into repurchase agreement transactions and may act either as purchaser or seller in repurchase agreement transactions or a series of continuing repurchase transactions under restrictions described in Prospectus. Securities that are the subject of repurchase agreement are included in the Statement of Investments. Changes in unrealised appreciation / (depreciation) as a result thereof are included in the statement of changes in net assets respectively under “Net realised appreciation / (depreciation) on sales of investments” and “Change in net unrealised appreciation / (depreciation) on repurchase agreement”.
- k. *Time deposit* – the Fund may invest in time deposit with credit institutions. Such deposits may be withdrawn at any time and must have maturity of less than twelve (12) months. The value of time deposits shall be determined by using amortized cost.
- l. *All other assets* – fair market value as determined pursuant to procedures approved by the Umbrella Fund’s Board of Directors.

c) Foreign exchange translation

The value of all assets and liabilities not expressed in the Reference Currency of a Fund will be converted into the Reference Currency of such Fund at rates last quoted by any major bank.

The exchange rate used as at December 31, 2022:

1 EUR = 1.067250 USD

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022 (continued)

Note 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Swing Pricing Adjustment

The price at which Shares may be subscribed for or redeemed at is the net asset value per Share. Shares are “single priced” such that the same Share price applies whether investors are subscribing or redeeming on any full bank business day (unswung NAV). However, large subscriptions, redemptions and/or conversions in and/or out of a Fund on a same full bank business day, may cause the Fund to buy and/or sell underlying investments and the value of these investments may be affected by bid/offer spreads, trading costs and related expenses including transaction charges, brokerage fees, and taxes. This investment activity may have a negative impact on net asset value per Share called “dilution”. In such circumstances, for certain Funds, the Management Company will, on an automatic and systematic basis, apply a “swing pricing” mechanism as part of its daily valuation policy in order to take into account the dilution impacts and to protect the Shareholders’ interests. This means that, if on any full bank business day, the aggregate transactions in Shares of a Fund exceed a threshold determined by the Management Company (the “Swing Threshold”), the net asset value of the Fund may be adjusted by an amount, not exceeding 2% of the relevant net asset value (the “Swing Factor”), in order to reflect both the estimated fiscal charges and dealing costs that may be incurred by the Fund and the estimated dealing spread of the assets in which the Fund invests/disinvests.

The Swing Factor will have the following effect on subscriptions or redemptions:

1) on a Fund experiencing levels of net subscriptions on a full bank business day (i.e. subscriptions are greater in value than redemptions) (in excess of the Swing Threshold) the net asset value per Share will be adjusted upwards by the Swing Factor; and

2) on a Fund experiencing levels of net redemptions on a full bank business day (i.e. redemptions are greater in value than subscriptions) (in excess of the Swing Threshold) the net asset value per Share will be adjusted downwards by the Swing Factor.

In such event, the official net asset value per Share, as published, will have been adjusted to take account of the swing price mechanism (swung NAV). Net asset values and the net asset values per share in the Statement of Net Assets are unswung.

During the year ended December 31, 2022, Natixis Asia Equity Fund, Natixis Pacific Rim Equity Fund, DNCA Europe Smaller Companies Fund, Ostrum Euro High Income Fund, Ostrum Global Inflation Fund and Ostrum Short Term Global High Income Fund applied swing pricing adjustments.

As of December 31, 2022, none of the Funds net asset values per share were swung.

Additional information about the swing pricing mechanism and the Funds concerned may be obtained at im.natixis.com or at the registered office of the Management Company.

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022 (continued)

Note 3 – FEES PAID TO THE MANAGEMENT COMPANY

The Management Company is entitled to receive from the Funds a Management Fee calculated and payable monthly in arrears. The Management Fee due to each Share class and for each month shall be calculated as follows:

$$\text{Management Fee} = \frac{(\text{Value} \times \text{Rate of Management Fee}) \times D_{\text{month}}}{D_{\text{year}}}$$

Where:

“Value” means the average daily net asset value of all Shares issued in each Fund during the relevant month;

“Rate of Management Fee” shall be calculated according to the following formula:

$$\text{Rate of Management Fee}_{\text{Share class}} = \text{TER}_{\text{Share class}} - \text{Administration Expenses}_{\text{Share class}}$$

Rate of Management Fee_{Share class} means the applicable Rate of Management Fee for the relevant Share class; expressed as an annualized percentage;

TER_{Share class} means the Total Expense Ratio of the relevant Share class as disclosed in the current Prospectus; expressed as an annualized percentage; and

Administration Expenses_{Share class} means the total operating expenses owed, and forecasted to be owed, by the relevant Fund to service providers, government regulators and agencies for services and benefits rendered to the relevant Share class; expressed as an annualized percentage.

The Rate of Management Fee accrued to a Share class can never be greater than its Total Expense Ratio, as disclosed in the current Prospectus;

D_{month} shall be the number of calendar days during such month; and

D_{year} shall be the number of calendar days during the applicable calendar year.

Note 4 – PERFORMANCE FEES

In consideration of the services provided by the respective Management Company (and the relevant Delegated investment Manager) in relation to the Funds, the Management Company may be entitled to receive a performance fee (“Performance Fee”), in addition to a management fee. Various methodologies may be used to calculate a Performance Fee, as described below, and details of which methodology is being used for each Fund is specified in each relevant section of the Funds.

The Performance Fee is calculated on the basis of the net asset value per Share after deducting all expenses, costs and fees (but before Performance Fee), and adjusting for subscriptions and redemptions/conversions during the relevant period so that these will not affect the Performance Fee payable.

Performance Fee Methodology #1: Performance Fees on absolute returns with a High-Water Mark

The Management Company shall receive a Performance Fee when the relevant Fund outperforms the High-Water Mark by the end of the Observation Period.

The Performance Reference Period is the whole life of the Fund (i.e. no reset).

On each calculation day of the net asset value of the relevant Share Class during the Observation Period, when the Valued Asset is higher than the High-Water Mark, a Performance Fee is accrued by applying the Performance Fee Rate to the difference between the Valued Asset and the Reference Asset.

If, over the Observation Period, the Valued Asset is higher than the High-Water Mark the accrued performance fee is crystallized and shall be payable within three months to the Management Company.

If, over the Observation Period, the Valued Asset of the Fund is lower than the High-Water Mark, the Performance Fees will be zero.

Natixis International Funds (Lux) I
Notes to the Financial Statements
As at December 31, 2022 (continued)

Note 4 – PERFORMANCE FEES (continued)

Performance Fee Methodology #2: Performance Fees using a Reference Rate

The Management Company shall receive a Performance Fee when the relevant Fund outperforms the Reference rate by the end of the Observation Period.

The Performance Reference Period is equal to 5 years on a rolling basis.

If, over the Observation Period, the Valued Asset of the Fund, which corresponds on each valuation day to the portion of the net assets corresponding to a particular class of Share before deducting the Performance Fee to the said Share class, is higher than the Reference Asset, which corresponds to the portion of the Fund's net assets related to a particular share class on the preceding valuation day before deducting the Performance Fee to the said Share class, the actual Performance Fee will be accrued with the applicable percentage of Performance fee Rate, applied on the difference between these two assets. The Performance Fee is calculated and accrued on each valuation day.

If, over the Observation Period, the Valued Asset of the Sub-Fund is lower than the Reference Asset, the Performance Fees will be zero.

Any underperformance of the Valued Asset of the Fund compared to the Reference Asset at the end of the relevant Observation Period should be clawed back before any Performance Fee becomes payable over years on a rolling basis, i.e. the Management Company should look back at the past 5 years for the purpose of compensating underperformances.

A reset will be implemented if:

- (i) an underperformance is not compensated and no longer relevant as this successive period of five years has elapsed,
- (ii) a Performance Fee is paid at any time during this successive period of five years.

In case the Valued Asset of the Fund has overperformed the Reference Asset on the last valuation day of the Observation Period, the Management Company should be able to crystallise the accrued Performance Fee over the Observation Period (subject to any clawback as indicated above). Such crystallized Performance Fee shall be payable within three months to the Management Company.

In case of negative performance of the Fund, no Performance Fee will be payable even where the Fund outperforms the Reference Rate.

For the Loomis Sayles Sakorum Long Short Growth Equity Fund, the applicable methodology for the Performance Fee is the performance fees on absolute returns with High-Water Mark (Methodology #1):

Share Class Type	Performance Fee rate	High-Water Mark	Observation Period
S1	20%	(No reset during the whole life of the Share Class/Fund)	<ul style="list-style-type: none"> ▪ First Observation Period: from the first valuation day of each Share Class to the last valuation day of December (with a minimum period of twelve months) ▪ Thereafter: from the first valuation day of January to the last valuation day of December of the following year

As at December 31, 2022, Loomis Sayles Sakorum Long Short Growth Equity Fund paid the following Performance Fee:

Class	Currency	Performance Fee	% of Class Net Assets
I/A (USD)	USD	37	1.19
N/A (USD)	USD	37	1.18
N1/A (USD)	USD	38	1.19
R/A (USD)	USD	36	1.14
RE/A (USD)	USD	35	1.12
S/A (USD)	USD	38	1.19
S1/A (USD)	USD	38	1.21
S2/A (USD)	USD	19	0.60

As at December 31, 2022, Thematics Climate Selection Fund paid the following Performance Fee:

Class	Currency	Performance Fee	% of Class Net Assets
I/A (USD)	USD	17	0.53
I/A (EUR)	USD	17	0.53
R/A (USD)	USD	16	0.49
R/A (EUR)	USD	16	0.49

Detailed description of the Performance Fees is disclosed in the prospectus.

Note 5 – DISTRIBUTION FEES

The fees paid out of the Fund's assets to cover marketing and selling fund shares may cover advertising costs, compensating brokers and others who sell the Fund's shares, payments for printing and mailing prospectuses to new investors, and providing sales literature to prospective investors.

Note 6 – OTHER CHARGES

Other Charges mainly composed of Broker fees, Soute to Management Company and Legal Expenses.

Note 7 – TAXATION

The Umbrella Fund is not subject to any Luxembourg tax on interest or dividends received by any Fund, any realised or unrealised capital appreciation of Fund assets or any distribution paid by any Fund to Shareholders. The Umbrella Fund is not subject to any Luxembourg stamp tax or other duty payable on the issuance of Shares. The Umbrella Fund is subject to the Luxembourg *taxe d'abonnement* of 0.01% per year of each Fund's net asset value with respect to class "I" Shares, class "S" Shares, class "S1", class "S2" Shares, class "EI" Shares and class "Q" Shares and of 0.05% per year of each Fund's net asset value with respect to class "R" Shares, class "RE" Shares, class "RET" Shares, class "C" Shares, class "CW" Shares,

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022 (continued)

Note 7 – TAXATION (continued)

class “CT” Shares, class “F” Shares, class “N” Shares, class “N1” Shares, class “SN1” Shares and class “P” Shares. These taxes are payable quarterly on the basis of the value of the aggregate net assets of the Funds at the end of the relevant calendar quarter. No tax is due on the assets held by the Umbrella Fund in other UCITS that are already subject to subscription tax in Luxembourg.

Note 8 – TOTAL EXPENSE RATIO

As at December 31, 2022 the amount of expenses (in %) to be incurred annually by each Fund including the remuneration to the Management Company, the depositary, the independent auditors, the outside counsels, the other professionals and the administrative expenses are:

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022 (continued)

Note 8 – TOTAL EXPENSE RATIO (continued)

- (1) See Note 1.
- (2) DH Share class types are duration hedged Share classes. Further details regarding duration hedging methodology are in Prospectus. Please note that on January 30, 2017 ESMA published an Opinion (ESMA Opinion n°34-43-296) on Share Classes of UCITS which will impact duration hedged Share classes. In compliance with ESMA's opinion, the available duration hedged Share classes in the Ostrum Global Inflation Fund is closed to new investors after Cut-Off Time on this last subscription date July 30, 2017 and is closed to additional investment(s) from existing shareholders after Cut-Off Time on the last subscription date July 30, 2018.
- (3) No investment management fee is charged by the Management Company on this Share class. However, this Share class will pay other expenses such as administrative fees and depositary fees. Q Share class of Natixis Multi Alpha Fund, Natixis ESG Conservative Fund, Natixis ESG Dynamic Fund and Natixis ESG Moderate Fund will also pay management fees up to the Maximum Indirect Management Fee that may be charged to the Fund when investing in other UCITS and/or other UCIs.
- (4) This Share class closes permanently to new subscriptions and switches upon satisfying a certain level of subscription in the Share class determined by the Management Company.
- (5) This Share Class is reserved for the Fund's early investors and closes permanently to new subscriptions and switches upon the occurrence of certain events set at the discretion of the Management Company.
- (6) Maximum Indirect Management Fee is defined as the maximum level of management fees, excluding performance fees, that may be charged to the Fund when investing in other UCITS and/or UCIs.

The Total Expense Ratio by Share class, as indicated in each Fund's description, does not necessarily include all the expenses linked to the Fund's investments (such as brokerage fees, Luxembourg tax d'abonnement, expenses linked to withholding tax reclaims) that are paid by such fund.

If the total real expenses paid by each Fund exceed the Total Expense Ratio, the Management Company will support the difference and the corresponding income will be presented under the "Other income" and the corresponding "Other assets" caption; if the total real expenses paid by each Fund are lower than the Total Expense Ratio, the difference will be paid to the Management Company and the corresponding charge will be presented under the "Other charges" caption and the corresponding "Other liabilities" caption. At December 31, 2022, total real expenses were lower than total expenses ratio for 6 Sub-Funds for an amount of EUR 291,561; at December 31, 2022, total real expenses exceeded the Total Expense Ratio for 7 Sub-Funds for an amount of EUR 640,607.

Note 9 – NET UNREALISED APPRECIATION/(DEPRECIATION) ON FORWARD FOREIGN EXCHANGE CONTRACTS

Natixis ESG Dynamic Fund	EUR	21,196
Natixis ESG Moderate Fund	EUR	7,467

(1) See Note 1.

Note 15 – CO-MANAGEMENT OF ASSETS

For the purpose of effective management, the Investment Manager may choose, subject to the Management Company's prior approval, that the assets of certain Funds (the "Participating Funds") within the Umbrella Fund be co-managed. In such cases, the assets (or a portion thereof) of the Participating Funds will be managed in common. Co-managed assets are referred to as a "pool", notwithstanding the fact that such pools are used solely for internal management purposes. The pools do not constitute separate entities and are not directly accessible to investors. Each of the Participating Funds shall have its own assets (or a portion thereof) allocated to the relevant pool(s). Each Participating Fund will remain entitled to its specific assets. Where the assets of a Participating Fund are managed using this technique, the assets attributable to each Participating Fund will initially be determined by reference to its initial allocation of assets to such a pool and will change in the event of additional allocations or withdrawals.

The entitlement of each Participating Fund to the co-managed assets applies to each and every line of investments of such pool. Additional investments made on behalf of the Participating Funds shall be allotted to such funds in accordance with their respective entitlements whereas assets sold shall be levied similarly on the assets attributable to each Participating Fund.

As of December 31, 2022, the Umbrella Fund co-manages the assets of certain Funds within the Umbrella Fund utilising the following pools:

Asset Pool	Participating Funds
Thematics AI and Robotics Pool.....	Thematics AI and Robotics Fund Thematics Meta Fund
Thematics Safety Pool.....	Thematics Safety Fund Thematics Meta Fund
Thematics Water Pool.....	Thematics Water Fund Thematics Meta Fund
Thematics Subscription Economy Pool.....	Thematics Subscription Economy Fund Thematics Meta Fund
Thematics Wellness Pool.....	Thematics Wellness Fund Thematics Meta Fund

Note 16 – 144A RULE

144A is an SEC rule that modifies the two year lock up requirement on private placement securities that are without SEC registration. 144A allows debt or equity private placements to trade to and from qualified institutional investors. 144A securities are often called "restricted securities".

Note 19 – LIQUIDATED SUB-FUNDS (continued)

Harris Associates Concentrated U.S. Equity Fund liquidated on April 9, 2021. The liquidated Sub-Fund retained cash to pay post liquidation invoices to miscellaneous service providers. As at December 31, 2022, Harris Associates Concentrated U.S. Equity Fund held USD 58,182.

Note 20 – SIGNIFICANT EVENTS DURING THE YEAR

A new prospectus entered into force in February 2022. The main changes implemented in this prospectus may be summarised as follows:

- The change of name from Harris Associates U.S. Equity Fund into Harris Associates U.S. Value Equity Fund became effective January 14, 2022;
- Amendment to the investment policy of the Loomis Sayles Global Growth Equity Fund and the Loomis Sayles U.S. Growth Equity Fund in order to include ESG (i.e. Environmental, Social and Governance) criteria as part of the investment strategy of the Funds;
- Creation of the Transparency of environmentally sustainable investments in relation to Regulation (EU) 2020/852 (the "Taxonomy Regulation") disclosure for Thematics AI and Robotics Fund, Thematics Meta Fund, Thematics Safety Fund, Thematics Subscription Economy Fund, Thematics Water Fund and Thematics Wellness Fund;

A new prospectus entered into force in September 2022. The main changes implemented in this prospectus may be summarised as follows:

- Addition of new Funds: Loomis Sayles Sakorum Long Short Growth Equity Fund, Thematics Climate Selection Fund and WCM China Growth Equity Fund;
- Creation of CT share class in the Harris Associates Global Equity Fund;
- Creation of CW and CT share classes in the Thematics AI and Robotics Fund and Thematics Water Fund and amendments in Minimum Initial Investment in S1 and S classes;
- Creation of CW share class in the Thematics Meta Fund, Thematics Safety Fund and Thematics Wellness Fund and amendments in Minimum Initial Investment in S1 and S classes;
- Creation of CW share class in the Thematics Subscription Economy Fund and amendments in Minimum Initial Investment in S class;
- Amendment to the investment objective and policy of the Natixis Pacific Rim Equity Fund, WCM Select Global Growth Equity Fund, Loomis Sayles Asia Bond Plus Fund, Loomis Sayles Global Credit Fund, Loomis Sayles Sustainable Global Corporate Bond Fund and Loomis Sayles Short Term Emerging Markets Bond Fund in order to include ESG (i.e. Environmental, Social and Governance) criteria as part of the investment strategy of the Funds;
- Amendment to the investment policy of Thematics AI and Robotics Fund, Thematics Meta Fund, Thematics Subscription Economy Fund, Thematics Safety Fund, Thematics Water Fund, Thematics Wellness Fund and Vaughan Nelson U.S. Select Equity Fund;
- Decrease of TER for CT share class in the Thematics Subscription Economy Fund;
- Decrease of TER and amendment in Minimum Initial Investment for S share class and creation of EI class in the Vaughan Nelson Global Smid Cap Equity Fund;
- Decrease of TER for S share class and creation of S1 class in the Vaughan Nelson U.S. Select Equity Fund;
- Decrease of TER and amendment in Minimum Initial Investment for S share class in the WCM Global Emerging Markets Equity Fund and WCM Select Global Growth Equity Fund;
- Amendment in Minimum Holding for S2 and S classes in the Loomis Sayles Emerging Markets Bond Total Return Fund;
- Decrease of TER for CT share class in the Loomis Sayles Global Credit Fund;
- Addition to Principal Risk section in the Chinese Investments via QFII;
- Addition to Charges and Expenses section in the Performance Fee;
- Creation of CT share class in the Harris Associates U.S. Value Equity Fund;
- Amendment to the Subscriptions and Redemptions section of the Loomis Sayles Global Emerging Markets Equity Fund.

Market disruptions associated with current geopolitical events have had a global impact, and uncertainty exists as to their implications. Such disruptions can adversely affect assets of the Funds and thus their performance. The Sub-Funds will continue to be monitored to evaluate these recent events and the potential impact.

Natixis International Funds (Lux) I

Notes to the Financial Statements

As at December 31, 2022 (continued)

Note 20 – SIGNIFICANT EVENTS DURING THE YEAR (continued)

Loomis Sayles Global Growth Equity Fund and Loomis Sayles U.S. Growth Equity Fund became article 8 funds as defined in the Regulation (EU) 2019/2088 (“SFDR”) on 14 January 2022.

Amendment to the articles of association during an extraordinary general meeting of shareholders held on 11 January 2022.

There have been no other significant events affecting the Umbrella Fund during the year ended December 31, 2022.

Note 21 – SUBSEQUENT EVENTS

Effective March 1, 2023, Joseph Pinto resigned from his role as the director of the Management Company.

There are no other subsequent events to be disclosed as at December 31, 2022.

Natixis International Funds (Lux) I

Additional Information (Unaudited)

SAVINGS DIRECTIVE

The Law of June 21, 2005, (the "Law") has implemented into Luxembourg law the Council Directive 2003/48/EC on the taxation of savings income in the form of interest payments (the "Savings Directive"). It seeks to ensure that individuals residents in an EU Member State who receive interest payments from another Member State are taxed in the Member State in which they are resident for the tax purposes.

The Savings Directive targets payments in the form of interest payments from debt claims ("Taxable Income") made in a member state of the European Union (a "Member State") to individuals ("Beneficiaries") residing in another Member State. Under the Savings Directive, Member States are required to provide the tax authorities of the Beneficiary's Member State with details on payments of Taxable Income made and the identity of the respective Beneficiaries ("Exchange of Information"). For a transitional period some countries (amongst which Luxembourg) have however applied a withholding tax system instead of an exchange of information. Although the territorial scope of the Directive is limited to the EU arrangements and agreements have been concluded with 7 dependent or associated territories – Aruba, British Virgin Islands, Curaçao, Guernsey, Isle of Man, Jersey, Montserrat and Sint Maarten – and 5 third countries – *Switzerland, Liechtenstein, San Marino, Monaco and Andorra* – to ensure a level playing field.

However, on 24 March 2014, the Council of the European Union adopted a Council Directive which, *inter alia*, amends and broadens the scope of the EU Savings Directive to include notably (i) payments made through certain intermediate structures (whether or not established in a EU Member State) for the ultimate benefit of an European Union resident individual, and (ii) a wider range of income similar to interest.

Luxembourg confirmed amendments to the EU Savings Directive and provide the required information on interest payments to the tax authorities of other EU Member States under the automatic information exchange as of 1 January 2015 and abolish the withholding tax system. Luxembourg, to that effect, adopted the law dated 25 November 2014 abolishing the withholding tax system as from 1 January 2015 and replacing it by the automatic exchange of information. The amended EU Savings Directive transposed by Member States before 1 January 2016.

Dividends distributed by the Umbrella Fund will fall into the scope of the Savings Directive if more than 15% of the relevant portfolio's assets are invested in debt claims (as defined in the Law). Redemption proceeds realised by shareholders on the disposal of shares will fall into the Scope of the Savings Directive if more than 40% of the relevant fund assets are invested in debt claims.

The Umbrella Fund is authorised to reject any application for shares if the applying investor does not provide the Umbrella Fund with complete and satisfactory information required by the Law.

Appendix II

Additional Information (Unaudited) (continued)

INFORMATION ON GLOBAL MARKET RISK EXPOSURE

The Management Company monitored the global market risk exposure of the Funds for the year ended December 31, 2022 utilizing the commitment approach except for the ASG Managed Futures Fund and Loomis Sayles Sakorum Long Short Growth Equity Fund where the absolute Value at Risk (VaR) approach was used.

VaR

During the year, the model utilized to calculate the absolute VaR is an historical model based on a 99% confident level for a holding period of 20 days and an observation period of 500 days.

- The ASG Managed Futures Fund's global exposure is limited by a VaR limit of 20%. From January 1, 2022 to December 31, 2022, based on Natixis Investment Managers S.A. internal model, the low, high and average monthly VaR of the ASG Managed Futures Fund were 3.40%, 14.15% and 6.40%, respectively.
- The Loomis Sayles Sakorum Long Short Growth Equity Fund's global exposure is limited by a VaR limit of 20%. From September 29, 2022 (launch) to December 31, 2022, based on Natixis Investment Managers S.A. internal model, the low, high and average monthly VaR of the Loomis Sayles Sakorum Long Short Growth Equity Fund were 10.07%, 12.56% and 11.16%, respectively.

Leverage

The Investment Managers do not utilize bank borrowing or efficient portfolio management transactions. However, the use of derivatives results in leverage. The level of leverage is calculated as the sum of the notional amounts of the derivatives used.

- As such, the level of leverage for the ASG Managed Futures Fund strategy from January 1, 2022 to December 31, 2022 averaged 473.80% of its net assets based on daily input data.
- As such, the level of leverage for the Loomis Sayles Sakorum Long Short Growth Equity Fund strategy from September 27, 2022 (launch) to December 31, 2022 averaged 192.31% of its net assets based on daily input data.

Natixis International Funds (Lux) I

Appendix III

Additional Information (Unaudited) (continued)

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and Total Return Rate Swaps.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at December 31, 2022 Loomis Sayles Global Emerging Markets Equity Fund and Loomis Sayles Sakorum Long Short Growth Equity Fund held Total Return Rate Swaps as type of instruments under the scope of the SFTR.

a. Global Data

The amount of assets across all SFTs as at December 31, 2022 is as follows:

Loomis Sayles Global Emerging Markets Equity Fund

Asset type	Amount	% of NAV
Total Return Rate Swaps	\$ (1,647,031)	(2.98)%

Loomis Sayles Sakorum Long Short Growth Equity Fund

Asset type	Amount	% of NAV
Total Return Rate Swaps	\$ (381,729)	(0.81)%

b. Data on reuse of collateral

There was no collateral reuse during the year ended December 31, 2022.

There was no cash collateral reinvestment during the year ended December 31, 2022.

c. Concentration data

As at December 31, 2022 there are no collateral securities and commodities received in respect of Total Return Rate Swaps.

The ten largest counterparties across all SFTs and Total Return Rate Swaps as at December 31, 2022 are as follows:

Loomis Sayles Global Emerging Markets Equity Fund

Security type	Counterparty	Amount
Total Return Rate Swaps	Goldman Sachs	\$(1,446,540)
	Morgan Stanley	\$ (200,491)

Loomis Sayles Sakorum Long Short Growth Equity Fund

Security type	Counterparty	Amount
Total Return Rate Swaps	Morgan Stanley	\$ (381,729)

d. Safekeeping of collateral received

There were no security and cash collaterals received for Total Return Rate Swaps as at December 31, 2022.

Natixis International Funds (Lux) I

Appendix III (continued)

Additional Information (Unaudited) (continued)

e. Safekeeping of collateral granted

The following cash collateral was granted for Total Return Rate Swaps as at December 31, 2022:

Loomis Sayles Global Emerging Markets Equity Fund

Collateral type	Counterparty	Amount
Cash	Goldman Sachs	\$ 2,170,000
	Morgan Stanley	\$ 290,000

f. Returns/Costs

Return and cost for each type of SFTs and Total Return Rate Swaps for the year ended December 31, 2022 is as follows:

Total Return Rate Swaps

Loomis Sayles Global Emerging Markets Equity Fund

Returns*	Amount	% of overall returns**
To Fund	\$ 471,495	100%
Costs*	Amount	% of overall returns**
To Fund	\$ 1,182,782	100%

Total Return Rate Swaps

Loomis Sayles Sakorum Long Short Growth Equity Fund

Returns*	Amount	% of overall returns**
To Fund	\$ 3,145,776	100%
Costs*	Amount	% of overall returns**
To Fund	\$ 381,729	100%

* Returns (costs) are identified as the realised gains (losses), change in unrealised gains (losses) and interest received (paid) on Total Return Rate Swaps during the reporting period.

** All returns from OTC derivative transactions will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio's manager or any other third parties.

Natixis International Funds (Lux) I

Appendix III (continued)

Additional Information (Unaudited) (continued)

g. Aggregate Transaction Data

The aggregate transaction data for collateral positions (including cash) across all SFTs and Total Return Rate Swaps as at December 31, 2022 is as follows:

Loomis Sayles Global Emerging Markets Equity Fund

Collateral type	Maturity	Amount
Cash	N/A	\$ 2,460,000

Country in which counterparties for Total Return Rate Swaps are established:

Loomis Sayles Global Emerging Markets Equity Fund

Counterparty	Country
Goldman Sachs	United States of America
Morgan Stanley	United States of America

The settlement and clearing mechanisms for SFTs and Total Return Rate Swaps as at December 31, 2022 as follows:

Loomis Sayles Global Emerging Markets Equity Fund

Settlement and clearing	Amount
Bilateral	\$ 2,460,000

Natixis International Funds (Lux) I

Appendix IV

Additional Information (Unaudited) (continued)

Remuneration disclosure for Natixis International Funds (Lux) I Annual Report

Natixis Investment Managers S.A. as the Management Company of the Fund (the "Management Company") has implemented a Remuneration Policy that is designed to promote sound and effective risk management and to discourage taking excessive risks for both the Management Company itself and for the funds it manages. The Policy is reviewed on an annual basis.

Further details on the remuneration policy are available by referring to the following website <https://www.im.natixis.com/intl/regulatory-information> and a paper copy of such details is available on request and without charge.

As at December 31, 2022, the Fund did not have any employees and the remuneration policy applied only to members of the Management Company's board of directors or senior management as more fully described below.

The below tables sets out the proportion of the total fixed and variable remuneration of the staff identified as "Material Risk Takers" of the Management Company attributable to all the funds it manages, taking into account UCITS and non-UCITS. The amount has been proportioned to the total net assets of the fund and the number of staff of the Management Company.

The organization of the Management Company does not allow such amounts to be identified per fund managed. The figures below therefore show the amount of the remunerations on a pro-rata basis compared to the total assets under management. The portion of total remuneration paid or payable to Identified Staff of entities to whom the Management Company has delegated portfolio management functions (the "Delegate(s)") is also set out below.

Total remuneration paid by Natixis Investment Managers, S.A. to its' staff identified as 'Material Risk Takers' (including the identified staff of the delegate(s)) in the year ending December 31, 2022 is as follows:

Identified Staff of the Management Company

Fixed Remuneration	€ 1,801,888
Variable Remuneration	€ 2,521,326
Total	€ 4,323,214
Number of beneficiaries:	13

Identified Staff of the delegate(s)

Fixed Remuneration	€ 2,153,320
Variable Remuneration	€ 7,331,821
Total	€ 9,485,141
Number of beneficiaries:	98

Fixed remuneration is inclusive of 2022 base salary and variable remuneration consists of both cash and deferred components of incentive awards.

The following Sub-funds to Funds promote environmental and/or social characteristics but do not have a sustainable investment objective and, as such, fall within the scope of Article 8 of the Sustainable Finance Disclosure Regulation: Natixis Asia Equity Fund, DNCA Europe Smaller Companies Fund, Loomis Sayles Global Growth Equity Fund, Loomis Sayles U.S. Growth Equity Fund, Thematics AI and Robotics Fund, Thematics Meta Fund, Thematics Subscription Economy Fund, Loomis Sayles Sustainable Global Corporate Bond Fund, Natixis ESG Conservative Fund, Natixis ESG Dynamic Fund and Natixis ESG Moderate Fund.

Natixis Asia Equity Fund

This financial product promotes environmental and social characteristics. The holdings have been selected on the basis of a proprietary ESG model using ESG considerations including (but not limited to) the following criteria:

- Environmental criteria: environmental footprint along the production chain and the product lifecycle, responsible supply chain, energy and water consumption, management of CO₂ and waste emission,
- Social criteria: ethics and working conditions all along the production chain, employee treatment – e.g. safety, welfare, diversity, employee representation, wages – and quality of products or service offered,
- Governance criteria: capital structure and protection of minority interest, board and management, management compensation, accounting usage and financial risk, ethics.

However, the underlying investments of this financial product do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and their portfolios alignment with such Taxonomy Regulation are not calculated.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Natixis Asia Equity Fund**
 Legal entity identifier: 549300RD5RSNRI3UXN43

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

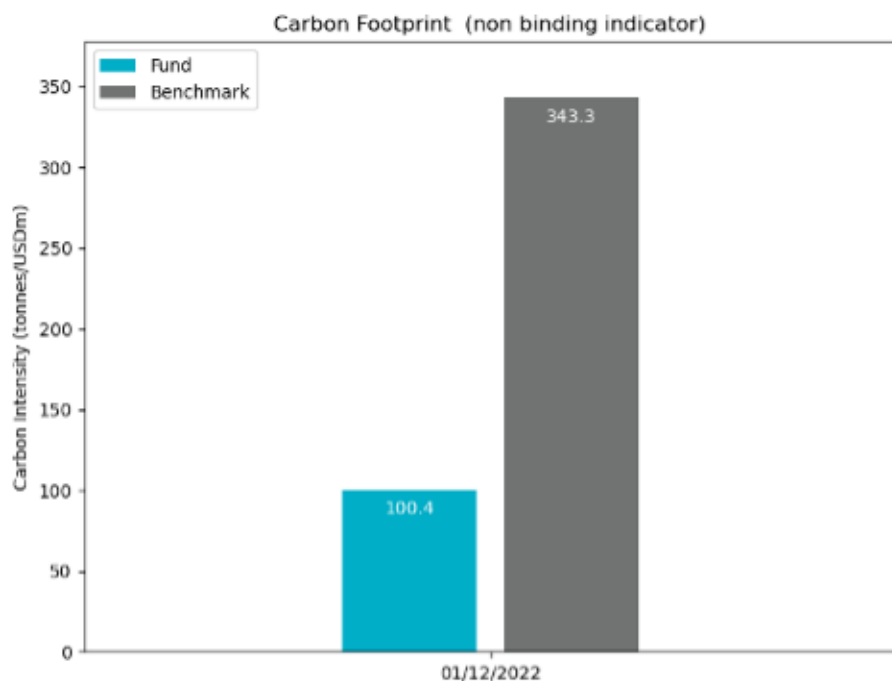

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund has promoted the environmental & social characteristics of investing in best-in-class companies based on a proprietary ESG assessment while excluding companies that were considered as being controversial. No reference benchmark has been designated for the purpose of attaining the E/S Characteristics promoted by the Fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

As of 31st of December 2022, the fund has zero exposure to companies involved in tobacco sector, anti-personal mines/cluster munition or companies generating more than 30% of revenue from thermal coal-based business. It also doesn't have exposure to companies which are restricted by internal rules based on UNGC and OECD Principles. Furthermore, the fund has zero exposure in companies with ESG scores below 10 points out of a maximum of 20 points. In addition, with those sustainability indicators, we are following the average carbon footprint of the fund. As of 31st of December 2022, the carbon footprint of the fund was 100.4t/USDm, which is below its benchmark index MSCI Asia AC ex Japan IMI with a carbon footprint of 343.3t/USDm.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Exclusion list was implemented based on PAI 4, 10, 14.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, we follow NIM restrictive list which is prepared taking into account OECD guidelines on multinational enterprise and the UN guiding principles on business and human rights

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has considered the following principal adverse impacts on sustainability factors:

- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons): Exclusion of companies involved in cluster munitions and anti-personnel mines (PAI 14)
- Exposure to companies active in the fossil fuel sector: Exclusion of companies deriving revenues in excess of 30% from coal or coal related businesses (PAI 4)
- Violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises: exclusion of worst offenders (exclusion list based on international

standards – i.e. U.N. Global Compact and OECD Principles Of Corporate Governance) (PAI 10)

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

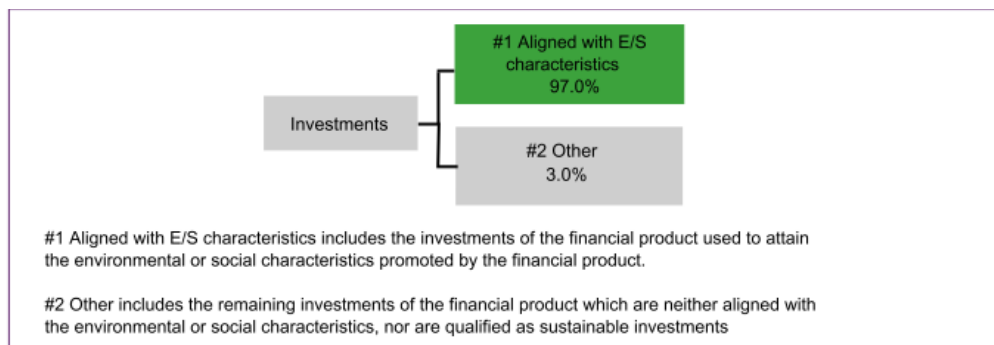

What was the proportion of sustainability-related investments?

97%

● **What was the asset allocation?**

As on 31st of December 2022, 97% of its NAV was invested in companies that quality as aligned with E/S characteristics. The fund had c.3% of its NAV in cash.

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

As of 31st of December 2022, the fund is mainly invested in consumer discretionary, information technology, financials, communication services, industrials consumer staples.

● **To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund does not currently commit to invest in any “sustainable investment” within the meaning of the Taxonomy Regulation. However, the position will be kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

Yes :

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As on 31st of December 2022, the fund invested in cash and cash equivalents (3%) that are not aligned with the E/S characteristics and do not have minimum environmental or social safeguard.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We continue to assess the sustainability characteristics of the investee company through engagement on areas which might lead to deterioration of the ESG profile. We update the ESG worksheet, and scores accordingly post engagement.

How did this financial product perform compared to the reference benchmark?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager managed the fund in accordance with its objectives to promote environmental characteristics, as evidenced by the following measurements. . 66.4% of the fund's investments by weight (compared with a target of 50%) were aligned with the SDS Scenario by 2050, resulting in the overall portfolio having a potential temperature increase 1.5 degrees Celsius. Additionally, 32% of the fund's investments by weight (compared with a target of 25%) ranked in the top quartile of their respective GICS sector for GHG emissions.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

As mentioned in the previous paragraph, the Investment Manager managed the fund in accordance with its objectives to promote environmental characteristics, as evidenced by the following measurements. As of 31/12/2022, 66.4% of the fund's investments by weight (compared with a target of 50%) were aligned with the SDS Scenario by 2050, resulting in the overall portfolio having a potential temperature increase 1.5 degrees Celsius. Additionally, 32% of the fund's investments by weight (compared with a target of 25%) ranked in the top quartile of their respective GICS sector for GHG emissions.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to its investment process, the Investment Manager considered the PAI of the fund's investments on sustainability factors by monitoring and analysing the fund's portfolio holdings against the following mandatory indicators set out in Table 1 of Annex 1 of Commission Delegated Regulation (EU) 2022/1288 (the "SFDR RTS") when managing the fund:

- GHG Emissions;
- Carbon footprint; and
- GHG intensity of investee companies.

The above listed PAI indicators were taken into consideration by the Investment Manager in various ways as part of its ongoing management of the fund, including through the Investment Manager's ongoing engagement with the issuers, the assessment of issuers in which the fund invests against the sustainability indicators outlined above, and the application of exclusions.

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

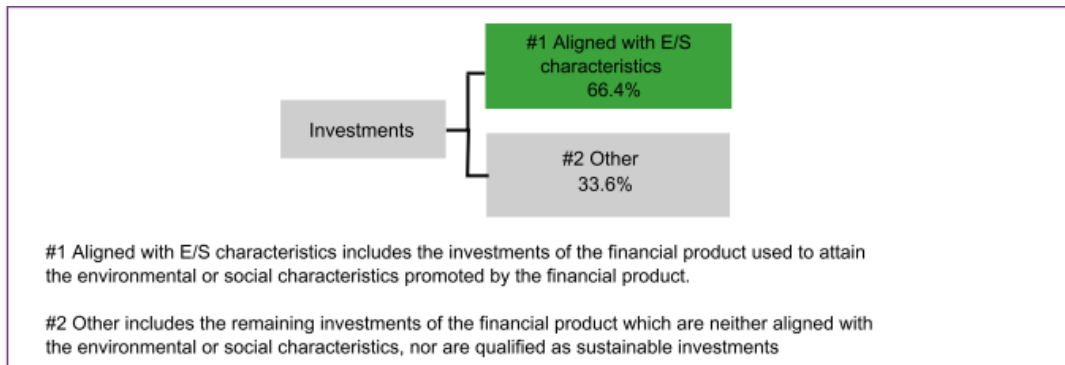

What was the proportion of sustainability-related investments?

Not applicable

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

The fund strictly respected its objectives as 66.4% (compared with target of 50%) of the fund's NAV was invested in investments which meet the sustainability indicators outlined above.

● **In which economic sectors were the investments made?**

The fund was overweight in the communication services, consumer discretionary, industrials, information technology, and healthcare sectors and underweight in the consumer staples, energy, and financials sectors. The fund had no positions in the materials, real estate or utilities sectors.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) shows the green investments made by investee companies, e.g. relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

- Yes :
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 33.6% of the fund's NAV of equity securities of companies which did not meet the sustainability indicators was in a combination of one or more of the following: (i) securities which do not meet the sustainability indicators; (ii) derivatives entered into for the purposes of hedging and liquidity management; (iii) other liquidity management tools, such as money market instruments, cash and cash equivalents.

In relation to the equity securities of companies which did not meet the sustainability indicators, such investments were subject to the investment process which the Investment Manager follows for the fund, meaning that the principal adverse impacts of such investments were considered by the Investment Manager and that such investments met the other minimum standards outlined in the binding elements.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager followed seven-steps in its research framework structured around Quality, Growth, and Valuation which includes financial analysis, qualitative non-financial; and qualitative and quantitative environmental, social and governance (“ESG”), to develop forward-looking valuation models. ESG considerations were integrated into each step of the Investment Manager’s seven-step research framework and were integral to the analysis of business models, competitive advantages, operating efficiency, corporate management integrity, profitable growth and valuation. The majority of material ESG considerations, including ESG risks and opportunities, were embedded in the analysis of Quality criteria. Any company failing to meet the Quality criteria was eliminated from the fund’s investment universe, regardless of the Growth or Valuation profile of the company.

In addition to good governance standards, as a minimum safeguard, each issuer was reviewed with respect to the UN Global Compact Principles (“UN GCP”) before investment and any stock held in the fund was reviewed on a quarterly basis.

Where risks and opportunities were identified, the Investment Manager engaged with company management to raise awareness, encourage change and escalate concern when decisions – financial, non-financial and/or ESG matters – could affect, in the opinion of the Investment Manager, the company’s ability to generate long-term shareholder value. In addition, the Investment Manager practiced active ownership and expressed concerns or support for management decisions through proxy votes.

Sustainable Finance Disclosure Regulation (continued)

Loomis Sayles U.S. Growth Equity Fund

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Loomis Sayles U.S. Growth Equity Fund**

Legal entity identifier: 549300P7R6EWBRKW3R85

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager managed the fund in accordance with its objectives to promote environmental characteristics, as evidenced by the following measurements. 82.3% of the fund's investments by weight (compared with a target of 50%) were aligned with the SDS Scenario by 2050, resulting in the overall portfolio having a potential temperature increase 1.5 degrees Celsius. Additionally, 42% of the fund's investments by weight (compared with a target of 25%) ranked in the top quartile of their respective GICS sector for GHG emissions.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

As mentioned in the previous paragraph, the Investment Manager managed the fund in accordance with its objectives to promote environmental characteristics.

As of 31/12/2022, 82.3% of the fund's investments by weight (compared with a target of 50%) were aligned with the SDS Scenario by 2050, resulting in the overall portfolio having a potential temperature increase 1.5 degrees Celsius. Additionally, 42% of the fund's investments by weight (compared with a target of 25%) ranked in the top quartile of their respective GICS sector for GHG emissions.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not Applicable

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Not Applicable

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to its investment process, the Investment Manager considered the PAI of the fund’s investments on sustainability factors by monitoring and analysing the fund’s portfolio holdings against the following mandatory indicators set out in Table 1 of Annex 1 of Commission Delegated Regulation (EU) 2022/1288 (the “SFDR RTS”) when managing the fund:

- GHG Emissions;
- Carbon footprint; and
- GHG intensity of investee companies.

The above listed PAI indicators were taken into consideration by the Investment Manager in various ways as part of its ongoing management of the fund, including through the Investment Manager’s ongoing engagement with the issuers, the assessment of issuers in which the fund invests against the sustainability indicators outlined above, and the application of exclusions.

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Not applicable

● What was the asset allocation?

The fund strictly respected its objectives as 82.3% (compared with target of 50%) of the fund's NAV was invested in investments which meet the sustainability indicators outlined above.

● In which economic sectors were the investments made?

The fund was overweight in the communication services, financials, healthcare, and industrials sectors and underweight in the consumer discretionary, consumer staples, energy, and information technology sectors. The fund had no positions in the materials, real estate or utilities sectors.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

- Yes :
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 17.7% of the fund's NAV of equity securities of companies which did not meet the sustainability indicators were in a combination of one or more of the following: (i) securities which do not meet the sustainability indicators; (ii) derivatives entered into for the purposes of hedging and liquidity management; (iii) other liquidity management tools, such as money market instruments, cash and cash equivalents.

In relation to the equity securities of companies which did not meet the sustainability indicators, such investments were subject to the investment process which the Investment Manager follows for the fund, meaning that the principal adverse impacts of such investments were considered by the Investment Manager and that such investments met the other minimum standards outlined in the binding elements.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager followed seven-steps in its research framework structured around Quality, Growth, and Valuation which includes financial analysis, qualitative non-financial; and qualitative and quantitative environmental, social and governance (“ESG”), to develop forward-looking valuation models. ESG considerations were integrated into each step of the Investment Manager’s seven-step research framework and were integral to the analysis of business models, competitive advantages, operating efficiency, corporate management integrity, profitable growth and valuation. The majority of material ESG considerations, including ESG risks and opportunities, were embedded in the analysis of Quality criteria. Any company failing to meet the Quality criteria was eliminated from the fund’s investment universe, regardless of the Growth or Valuation profile of the company.

In addition to good governance standards, as a minimum safeguard, each issuer was reviewed with respect to the UN Global Compact Principles (“UN GCP”) before investment and any stock held in the fund was reviewed on a quarterly basis.

Where risks and opportunities were identified, the Investment Manager engaged with company management to raise awareness, encourage change and escalate concern when decisions – financial, non-financial and/or ESG matters – could affect, in the opinion of the Investment Manager, the company’s ability to generate long-term shareholder value. In addition, the Investment Manager practiced active ownership and also expressed concerns or support for management decisions through proxy votes.

Sustainable Finance Disclosure Regulation (continued)

DNCA Europe Smaller Companies Fund

This financial product promotes environmental and social characteristics. However, the underlying investments of these financial products do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and their portfolios alignment with such Taxonomy Regulation are not calculated.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to Morgan Stanley Capital International Europe Small Cap Index ("MSCI Europe Small Cap Index"). In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **DNCA Europe Smaller Companies Fund**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.0% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The characteristics promoted by the fund are governance, environment, social and societal criteria.

The management of the fund relies on the proprietary analysis tool on environment, social and governance: ABA (Above and Beyond Analysis). As part of the promotion of such characteristics, the fund principally considered the following ESG matters:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- Environment: GHG emissions, air borne pollution, water borne pollution, water consumption, land use
- Social: Excessive CEO Compensation, gender inequality, health and safety issues, child labour
- Governance: Monitoring corruption and bribery, tax avoidance
- Global ESG quality rating
In this way, the investment process and resulting stock picking use internal scoring with respect to both corporate responsibility and sustainability of companies based on an extra-financial analysis through a proprietary tool developed internally by the asset management company, using the "best in universe" method (screening of the investment universe based on the corporate responsibility criteria, regardless of the sectorial activity). There may be a sector bias.

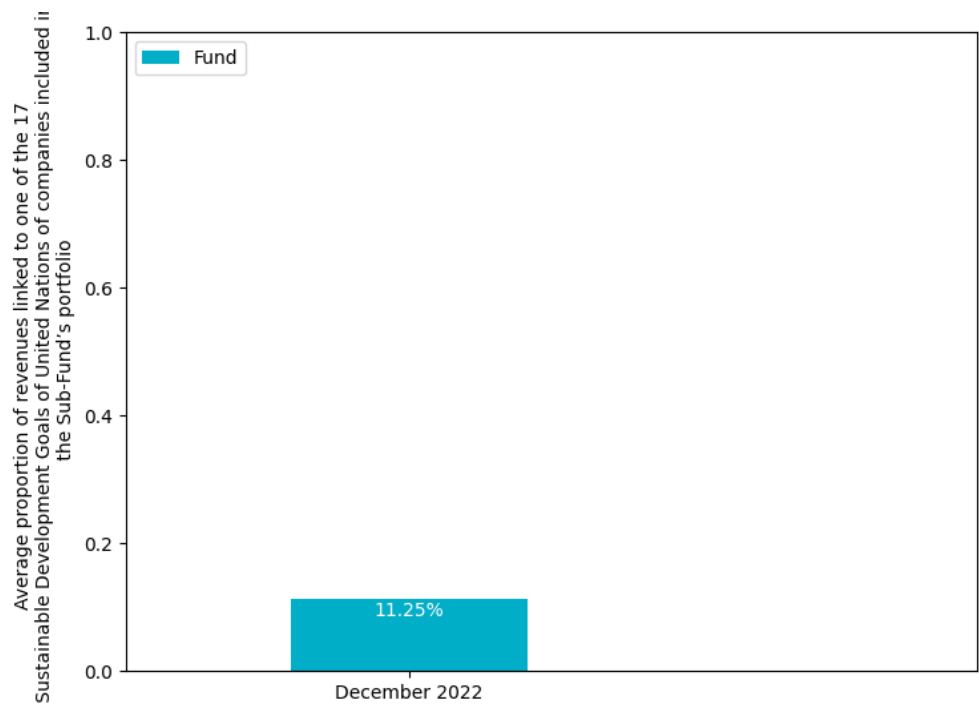

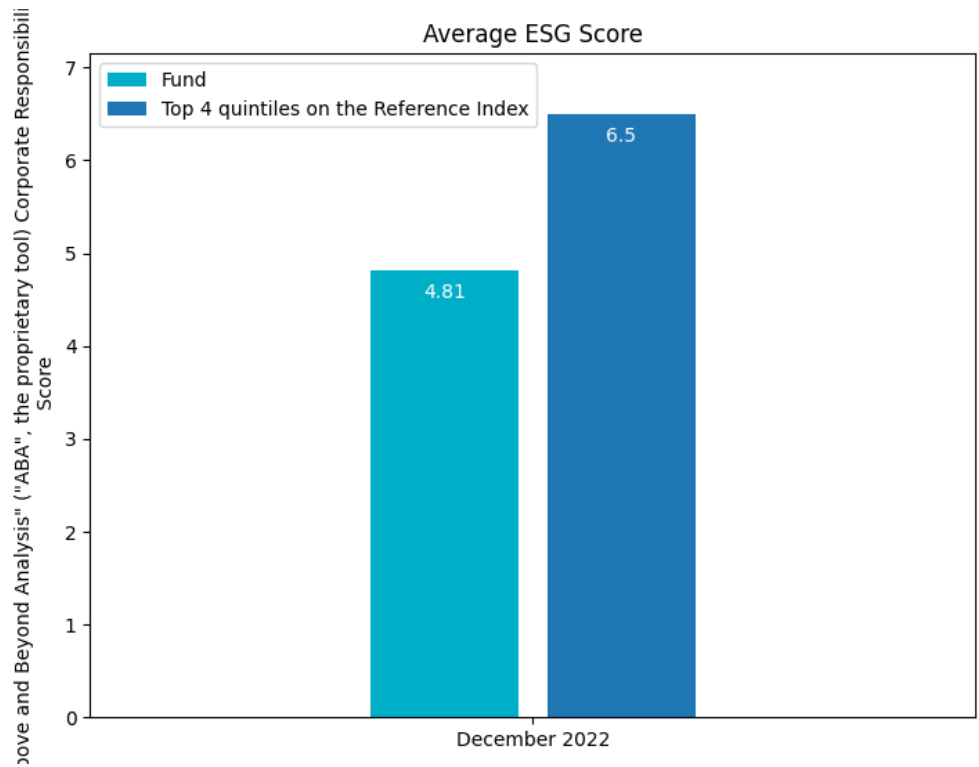

The fund does not use a benchmark for the purpose of attaining the ESG Characteristics promoted by the fund.

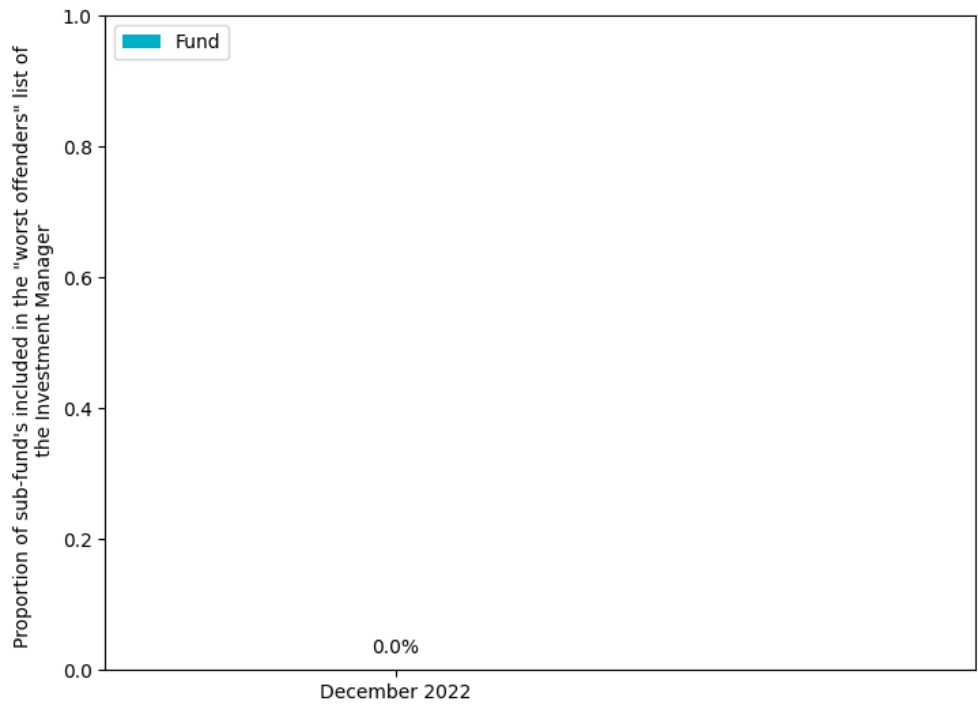

● ***How did the sustainability indicators perform?***

The sustainability indicators of the fund are:

- The "Above and Beyond Analysis" ("ABA", the proprietary tool) Corporate Responsibility Score: the main sustainability indicator used by the fund is the ABA scoring based on the Corporate Responsibility and divided into four pillars: shareholder responsibility, environmental responsibility, employer responsibility, societal responsibility.
- The Transition to a Sustainable Economy exposure: the Management Company completes this analysis by an assessment of companies' exposure to "Transition to a Sustainable Economy". This exposure is calculated among five pillars: demographic transition, healthcare transition, economic transition, lifestyle transition and ecologic transition.
- Exposure to UN Sustainable Development Goals: the Management Company assesses for each company the part of revenues linked to one of the 17 Sustainable Development Goals of the United Nations.
- Carbon data: carbon footprint (t CO₂/m\$ invested) of the fund's portfolio.
- Carbon intensity (t CO₂/m\$ revenues) of the funds' portfolio.
- Please note that the results as of the 31st of December 2022 for the carbon footprint intensity are not available yet, and will be provided through the monthly client Factsheet of the fund as soon as possible
- The proportion of the fund's portfolio in the "worst offenders" list of the Management Company; this list is consisted of the issuers most at risk from a social responsibility point of view. This list is established based on major controversies, after analysis by members of the SRI team, and after validation by the Sustainable Investment Monitoring Committee.

Please find hereafter the results as of 31st of December 2022

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The fund does not have as its objective a sustainable investment and have a minimum proportion of 0% of sustainable investments

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund does not have as its objective a sustainable investment and have a minimum proportion of 0% of sustainable investments

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund takes into account the principal adverse impacts on sustainability factors.

- The Principal Adverse Impact analysis is part of the Corporate Responsibility Rating
- The Management Company is implementing an Adverse Impact on Sustainability Policy, measuring the PAI. The Policy first intends to monitor the contributions to climate change (CO2 emissions, CO2 intensity, implied temperature) in the context of the "Climate Trajectory" objectives.

Further information may be found in the annual report in respect of the fund.

What were the top investments of this financial product?

The displayed country is the country of risk

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

What was the proportion of sustainability-related investments?

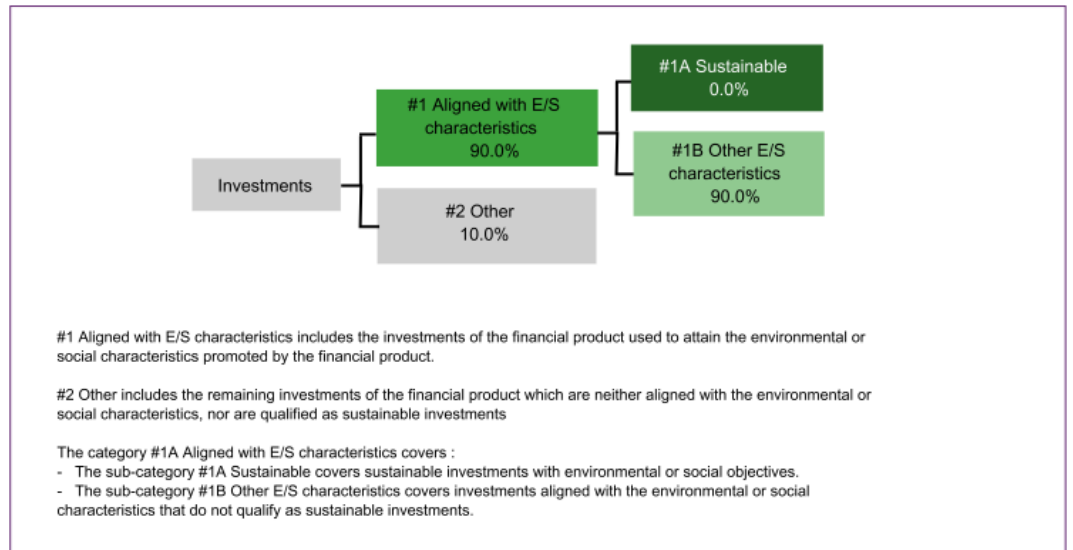

As of the 31st of December 2022, the fund has invested 80% minimum of its net assets in investments aligned with the environmental and social characteristics it promotes. The remaining portion of the fund's investment portfolio (#2 Other) consisted of financial derivative instruments for hedging and/or efficient portfolio management purposes as well as deposits at sight, money market funds, money market instruments and other deposits for liquidity purposes.

● **What was the asset allocation?**

The fund intended to invest 90% minimum of the portfolio in "investments with environmental and social characteristics" which were not considered as Sustainable Investments.

The fund did not intend to invest in Sustainable Investments, as of the 31st of December 2022, the minimum parts of "environment", "social", "taxonomy" and "environment outside taxonomy" investments are all 0%.

Asset allocation describes the share of investments in specific assets.

● **In which economic sectors were the investments made?**

As of the 31st of December 2022, the main sectors were:

- Industrial Goods and Services
- Insurance
- Media
- Banks
- Health Care
- Industrial Goods and Services
- Automobiles and Parts
- Construction and Materials
- Food, Beverage and Tobacco

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

This fund promotes environmental and social characteristics but does not commit to make investments in taxonomy-aligned environmentally sustainable activities. As of 31st of December 2022, the minimum proportion of the fund’s investments in taxonomy-aligned environmentally sustainable activities (including investments in enabling and transitional activities) amounted to 0%.

- **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

Yes :

In fossil gas In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The fund may use derivatives for hedging and investment purposes without seeking overexposure. The fund may invest in cash or cash equivalents. There were no specific environmental or social safeguards linked to the use of derivatives.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In line with the fundamental approach of the management team, the investment process was based on the following three stages:

- Selection of the investment universe combining a financial (quantitative and micro-economic) and extra-financial (qualitative) approach with two successive steps:
- The selection of issuers pursuant to the financial approach described above,
- The exclusion of issuers which have a high-risk profile in terms of corporate responsibility (rating below 2/10 in the ESG proprietary tool) or exposed to major controversies. This extra-financial filter excludes a minimum of 20% of issuers based on the extra-financial analysis describes before
- Structuration of the portfolio with a macroeconomic approach.
- Build the portfolio taking into consideration the regulatory constraints and the investment process in order to establish the final selection

The ABA scoring: proprietary tool of analysis and Corporate Responsibility Rating Corporate responsibility is a useful information's pool used to anticipate companies' risks especially looking at the interplay with their stakeholders: employees, supply chains, clients, local communities, and shareholders..., regardless of the sector of activities.

The ABA analysis of corporate responsibility is broken down into four pillars:

- Shareholders responsibility (board of directors and general management, accounting practices and financial risks, etc.),
- Environmental responsibility (environmental footprint of the production chain and product life cycle or responsible supply, energy consumption and water consumption, company CO2 emissions and management of waste, etc.),
- Responsibility towards workers ethics and working conditions of the production chain, treatment of employees – safety, well-being, diversity, employee representation, wages, quality of products or services sold, etc.) and,
- Societal responsibility (Product quality, safety and traceability, respect of local communities and human rights, etc.
- This in-depth analysis, combining qualitative and quantitative research, leads to a rating out of 10.

Furthermore, the DNCA Finance Team is implementing an engagement policy with many companies, focusing especially on companies with an unfavourable or strongly diminishing Responsibility score, or with an accumulation of controversies, or with an unfavourable policy and actions regarding the climate change.

The engagement process, which aims to serve the ESG objectives of the product, is carried out in several steps:

- 1) Identify targets for proactive and reactive engagement among issuers in DNCA Finance's investments, following on from the alert system set up as part of sustainability risk and negative impact management.
- 2) Implement an engagement plan for the identified engagement targets, monitor the engagement process and measure the results.
- 3) Integrate the results of engagement actions into investment decisions.

DNCA Finance's proactive engagement aims to encourage companies to develop better transparency and management of their ESG issues, through an ongoing dialogue. The reactive engagement process is an escalation process that relies on the alert mechanism in place for sustainability risk and negative impact management. The engagement actions can include requests for corrective actions and the possible decision to disinvest ("worst offenders"). DNCA Finance also participates in collective initiatives for coordinated and/or collaborative actions to promote best practices on systemic or transversal topics, concerning certain issuers, ESG issues likely to generate sustainability risks and/or negative sustainability impacts, and compliance with the principles of the Task Force on Climate related Financial Disclosure (TCFD) and the Task Force on Nature related Financial Disclosure (TNFD).

The ESG processes used within the framework of the fund's management strategy (ABA scoring, management of exclusions, management of sustainability risks, management of negative impacts, etc.) are included in the asset management company's internal control plan, and as such are subject to effective control of their

application, both at the first level (operational) and at the second level (Internal Control and Compliance).

Thematics AI and Robotics Fund

This financial product promotes environmental and social characteristics. Pursuant to the Taxonomy Regulation, this financial product invests in economic activity that contributes to environmental objectives and is subject to the disclosure requirements of Article 8 of the Regulation (EU) 2019/2088 ("SFDR"). This financial product promotes the following environmental objectives set out in the Article 8 of the Taxonomy Regulation: (i) climate change mitigation, (ii) climate change adaptation and (iii) protection and restoration of biodiversity and ecosystems. The taxonomy framework was not yet applicable in 2021 and as such the Sub-Fund cannot report on its degree of alignment.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to the Morgan Stanley Capital International All Country World ("MSCI ACWI") Index. In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index is used as a representative of the broad market for financial purpose and does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has invested in companies exposed to the global structural trend around artificial intelligence and robotics. It aims to promote ESG through selecting companies exposed to the scope of the theme, avoiding companies exposed to controversial activities, non-compliant companies to global sustainability standards and norms, exposed to high with negative outlook to severe ESG controversies, maintaining better ESG score than the Investable Universe, and actively voting and engaging with investee companies. No reference benchmark has been designated for the purpose of attaining the E/S characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Unless stated otherwise, data are as of 31/12/2022:

1. Percentage of Fund's asset under management that contributes to the themes and meet the materiality or leadership criteria is 100% excluding cash.
2. Percentage of the Fund's assets under management of issuers generating more than 5% of revenue from harmful and/or controversial activities is 0%.
3. Percentage of the Fund's assets under management of issuers whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour is 0%.
4. Percentage of the Fund's assets under management that are subject to ESG analysis by Investment Managers is 100%.
5. Portfolio ESG score's outperforms the ESG score of the Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring.

6.

1. Percentage of the Fund's assets under management of newly invested issuers that has already high with a negative outlook and/or severe ESG controversies at the time of investment is 0%
2. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and are capped to 2% is 0 which is below the maximum 5.
3. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and, within a 6-month time frame:
 - are not engaged or,
 - are engaged but do not demonstrate sufficient performance improvement,
 - is 0.

7.

1. Total percentage of submitted votes in 2022 is 100% which is above the minimum 95%.
 2. Percentage of submitted votes according to the sustainability-principled policy in 2022 is 100% which is above the minimum 95%.
8. Percentage of invested issuers covered by targeted engagement is 9% which is above the minimum 5%.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not Applicable

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Non applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Non applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-

compliant companies or those exposed to high or severe risk level ESG controversies.

- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.
- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Largest investments	Sector	% Assets	Country
KLA CORP UW USD	Semiconductor Equipment	3.30%	United States
ASML HOLDING NA EUR	Semiconductor Equipment	3.23%	Netherlands

What was the proportion of sustainability-related investments?

Not applicable.

● *What was the asset allocation?*

E/S aligned: 95.57%

Cash: 4.43%

● *In which economic sectors were the investments made?*

The Fund invested in all economic sectors except energy sector.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

● *Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?*

Yes :

In fossil gas In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Asset allocation describes the share of investments in specific assets.

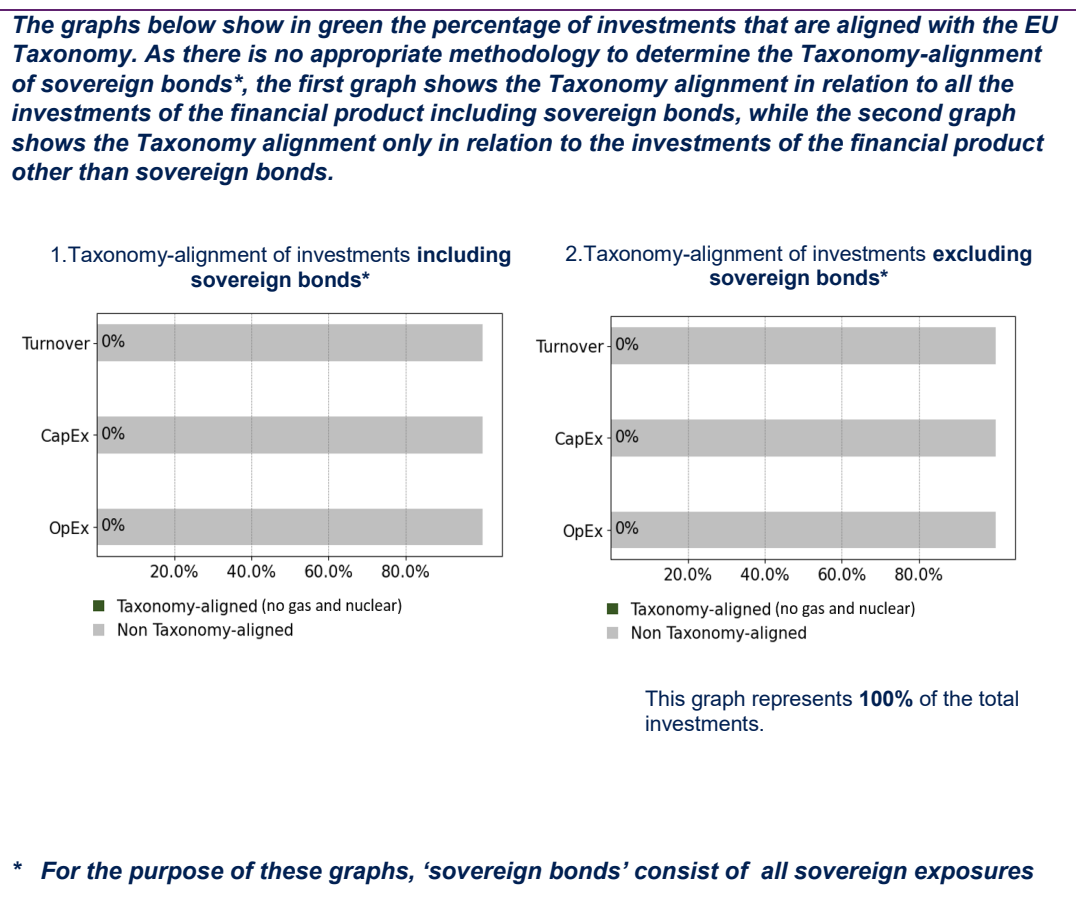

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) shows the green investments made by investee companies, e.g. relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash investment for liquidity purposes. This investment does not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We have followed the investment strategy:

1. Positive thematic screening

The Investment Managers have selected securities:

- contributing to the theme's sub-segments that in turn contribute to 1 or more of the following sustainability targets: resource use optimisation, climate mitigation and resilience, health and safety, improved healthcare quality and access, and smart home and cities.
- that have met the materiality or leadership requirement of the themes.
 - Materiality means: the issuer must at least generate 20% of the revenue and/or profits from the relevant products.
 - Leadership requirements: the issuer's products must be, in the opinion of the Investment Managers, leader in the industry, innovative or with the potential to become disruptive.

2. Activity-based exclusion

The Investment Manager have excluded securities that have exposure to harmful and controversial activities, such as coal, conventional oil and gas, non-conventional weapons etc. For more information, please refer to our exclusion policy under: <https://www.thematics-am.com/en-FR/being-responsible/reports-and-publications>.

3. Behaviour-based exclusion

In addition, the Investment Managers have systematically excluded securities whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour, in particular on environmental protection, human rights, labour rights, and business ethics. These standards include the UN Global Compact Principles, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles for Business and Human Rights, and the International Labour Conventions. The screening is informed by third-party data.

4. In the final portfolio construction phase, the Investment Managers have carried out an ESG analyses using its proprietary ESG assessment guided by established materiality frameworks, such as but not limited to, Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). The Investment Managers have scored individual companies across the 11 different materials environmental, social, and governance indicators drawing from a range of resources, including desktop research, company engagement from at least two third-party rating agencies (ISS and Sustainalytics). The total ESG score has carried an equal weight (25%) as other investment criteria (i.e.

Quality, Trading Risk and Management) and has impacted the security's inclusion and final weight of the investment.

5. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager have ensured that the Fund will have a better ESG rating than its Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring. The coverage has been above 90%.
6. Companies exposed to high with negative outlook and/or severe level controversies have been excluded. No company was already in the portfolio and became exposed to high with negative outlook and/or severe ESG controversies.
7. The Investment Managers have intended to exercise 100% of the voting rights on the issuers of the securities held in the portfolios managed, and in compliance with its sustainability principled-based voting policy.
8. The Investment Managers have engaged with a certain percentage of issuers each year.

How did this financial product perform compared to the reference benchmark?

Not applicable

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Appendix V (continued)

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Thematics Meta Fund

This financial product promotes environmental and social characteristics. Pursuant to the Taxonomy Regulation, this financial product invests in economic activity that contributes to environmental objectives and is subject to the disclosure requirements of Article 8 of the Regulation (EU) 2019/2088 ("SFDR"). This financial product promotes the following environmental objectives set out in the Article 8 of the Taxonomy Regulation: (i) climate change mitigation, (ii) climate change adaptation, (iii) transition to a circular economy and (iv) protection and restoration of biodiversity and ecosystems. The taxonomy framework was not yet applicable in 2021 and as such the Sub-Fund cannot report on its degree of alignment.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to the Morgan Stanley Capital International All Country World ("MSCI ACWI") Index. In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index is used as a representative of the broad market for financial purpose and does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

3. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and, within a 6-month time frame:
 - are not engaged or,
 - are engaged but do not demonstrate sufficient performance improvement,
 - is 0.

7.

1. Total percentage of submitted votes in 2022 is 100% which is above the minimum 95%.
2. Percentage of submitted votes according to the sustainability-principled policy in 2022 is 100% which is above the minimum 95%.
8. Percentage of invested issuers covered by targeted engagement is 8% which is above the minimum 5%.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments aim to contribute globally to the universal provision of clean water, water pollution prevention and control, and sustainable use and protection of all water resources; promotion of good health and well-being; and safety and protection of people's health, lives, and assets.

The Investment Manager assess a sustainable investment's contribution to the sustainable investment objectives based on a dedicated thematic screening methodology. This methodology assesses whether sustainable investments enable decent and meaningful work, responsible and sustainable consumption, resource-efficient circular economy, climate mitigation and resilience, and improved access to education and other basic services. The thematic screening methodology further assesses whether the sustainable investment meets the materiality or leadership requirement, where the materiality requirements entail that the sustainable investments must at least generate 20% of the revenue/profits from relevant products and the leadership requirements entail that sustainable investment's products

must be a leader in the industry, innovative or with the potential to become disruptive. Lastly, sustainable investments will be required to comply with all the elements listed in the description of the investment strategy further below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investment did not cause significant harm to other E/S objectives through employing a combination of binding strategies across the end-to-end investment process. The Fund considered the EU SFDR's PAIs at different stages of its investment process, through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement. To demonstrate this, the Fund reports in an annual basis on the following: exposure to adverse activities covered in the PAI, such as coal and weapons; breach of the international norms and standards, including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights; exposure to high and severe level ESG controversies with negative outlook; the Fund's ESG risk score vs its investable universe; and its performance data on its sustainability principles-based voting and engagement.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global

Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.

- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.
- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In an annual basis, the Fund reports on its exposure to non-compliant companies to the above standards.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.

- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.
- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

What was the proportion of sustainability-related investments?

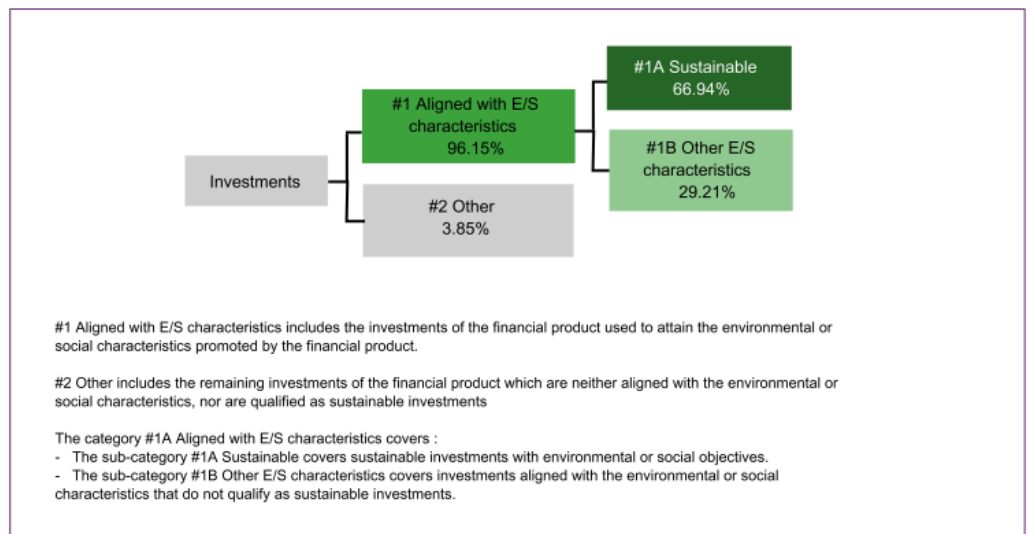

The Fund committed to a minimum sustainable investments of 50%. As of 31/12/2022, the actual investment was 66.94%

● *What was the asset allocation?*

E/S aligned: 96.15%

Sustainable investments: 66.94%, of which, 12.98% in environmental sustainable investments and 53.96% in social sustainable investments.

Cash: 3.85%

● *In which economic sectors were the investments made?*

The Fund invested in all economic sectors except energy sector.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

- Yes :
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

53.96

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash investment for liquidity purposes. This investment does not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We have followed the investment strategy:

1. Positive/Sustainable thematic screening

The Investment Managers have selected securities:

- contributing to the theme’s sub-segments that in turn contribute to 1 or more of the following sustainability targets: water usage efficiency, sustainable water withdrawals, water treatment technologies, advanced water management technologies; hazardous waste management, pollution monitoring; water supply and water delivery infrastructure; resource use optimisation, climate mitigation and resilience, health and safety, improved healthcare quality and access, and smart home and cities; food and health safety, data privacy and consumer protection, improved and safe access to digital economy, safe mobility and transport systems, personal and industrial safety systems, and other advanced security systems; Improve access to products and services for physical and mental health and well-being, improve access to products and services for basic human needs including food, healthcare and education, and enable decent and meaningful work; responsible and sustainable consumption, resource-efficient circular economy, climate mitigation and resilience, and improved access to education and other basic services.
- that have met the materiality or leadership requirement of the themes.
 - Materiality means: the issuer must at least generate 20% of the revenue and/or profits from the relevant products.

- Leadership requirements: the issuer's products must be, in the opinion of the Investment Managers, leader in the industry, innovative or with the potential to become disruptive.

2. Activity-based exclusion

The Investment Manager have excluded securities that have exposure to harmful and controversial activities, such as coal, conventional oil and gas, non-conventional weapons etc. For more information, please refer to our exclusion policy under: <https://www.thematics-am.com/en-FR/being-responsible/reports-and-publications>.

3. Behaviour-based exclusion

In addition, the Investment Managers have systematically excluded securities whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour, in particular on environmental protection, human rights, labour rights, and business ethics. These standards include the UN Global Compact Principles, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles for Business and Human Rights, and the International Labour Conventions. The screening is informed by third-party data.

4. In the final portfolio construction phase, the Investment Managers have carried out an ESG analyses using its proprietary ESG assessment guided by established materiality frameworks, such as but not limited to, Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). The Investment Managers have scored individual companies across the 11 different materials environmental, social, and governance indicators drawing from a range of resources, including desktop research, company engagement from at least two third-party rating agencies (ISS and Sustainalytics). The total ESG score has carried an equal weight (25%) as other investment criteria (i.e. Quality, Trading Risk and Management) and has impacted the security's inclusion and final weight of the investment.
5. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager have ensured that the Fund will have a better ESG rating than its Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring. The coverage has been above 90%.
6. Companies exposed to high with negative outlook and/or severe level controversies have been excluded. No company was already in the portfolio and became exposed to high with negative outlook and/or severe ESG controversies.
7. The Investment Managers have intended to exercise 100% of the voting rights on the issuers of the securities held in the portfolios managed, and in compliance with its sustainability principled-based voting policy.
8. The Investment Managers have engaged with a certain percentage of issuers each year.

Sustainable Finance Disclosure Regulation (continued)

Thematics Subscription Economy Fund

This financial product promotes environmental and social characteristics. Pursuant to the Taxonomy Regulation, this financial product invests in economic activity that contributes to environmental objectives and is subject to the disclosure requirements of Article 8 of the Regulation (EU) 2019/2088 ("SFDR"). This financial product promotes the following environmental objectives set out in the Article 8 of the Taxonomy Regulation: (i) climate change mitigation, (ii) climate change adaptation, (iii) transition to a circular economy and (iv) protection and restoration of biodiversity and ecosystems. The taxonomy framework was not yet applicable in 2021 and as such the Sub-Fund cannot report on its degree of alignment.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to the Morgan Stanley Capital International All Country World ("MSCI ACWI") Index. In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index is used as a representative of the broad market for financial purpose and does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Thematics Subscription Economy Fund**

Legal entity identifier: 549300FSLUEG4G4YTX88

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has invested in companies exposed to the global structural trend around subscription economy. It aims to promote ESG through selecting companies exposed to the scope of the theme, avoiding companies exposed to controversial activities, non-compliant companies to global sustainability standards and norms, exposed to high with negative outlook to severe ESG controversies, maintaining better ESG score than the Investable Universe, and actively voting and engaging with investee companies. No reference benchmark has been designated for the purpose of attaining the E/S characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Unless stated otherwise, data are as of 31/12/2022:

1. Percentage of Fund's asset under management that contributes to the themes and meet the materiality or leadership criteria is 100% excluding cash.
2. Percentage of the Fund's assets under management of issuers generating more than 5% of revenue from harmful and/or controversial activities is 0%.
3. Percentage of the Fund's assets under management of issuers whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour is 0%.
4. Percentage of the Fund's assets under management that are subject to ESG analysis by Investment Managers is 100%.
5. Portfolio ESG score's outperforms the ESG score of the Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring.

6.

1. Percentage of the Fund's assets under management of newly invested issuers that has already high with a negative outlook and/or severe ESG controversies at the time of investment is 0%

2. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and are capped to 2% is 0 which is below the maximum 5.
 3. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and, within a 6-month time frame:
 - are not engaged or,
 - are engaged but do not demonstrate sufficient performance improvement,
 - is 0.
- 7.
1. Total percentage of submitted votes in 2022 is 100% which is above the minimum 95%.
 2. Percentage of submitted votes according to the sustainability-principled policy in 2022 is 100% which is above the minimum 95%.
8. Percentage of invested issuers covered by targeted engagement is 11% which is above the minimum 5%.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not Applicable

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

Non applicable

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Non applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- I. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- II. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.
- III. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-

renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.

- IV. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

What was the proportion of sustainability-related investments?

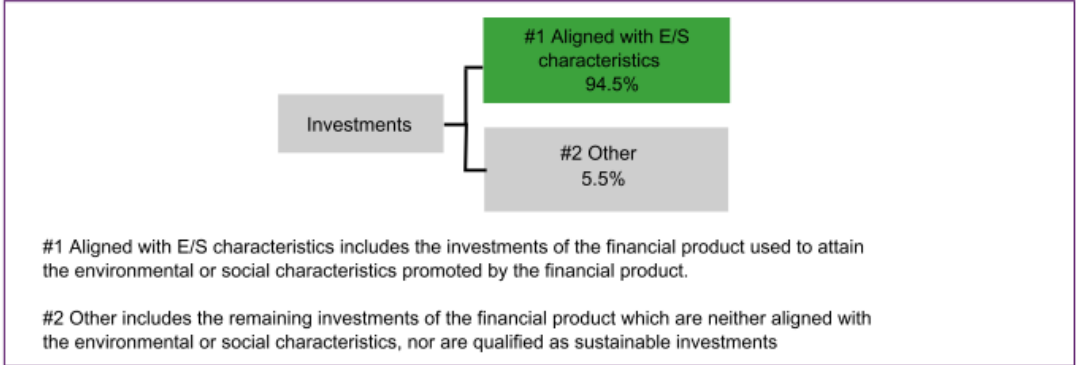

Not applicable.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

E/S aligned: 94.5%

Cash: 5.5%

● **In which economic sectors were the investments made?**

The Fund invested in all economic sectors except energy sector.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

- Yes :
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash investment for liquidity purposes. This investment does not follow any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

We have followed the investment strategy:

1. Positive thematic screening

The Investment Managers have selected securities:

- contributing to the theme’s sub-segments that in turn contribute to 1 or more of the following sustainability targets: responsible and sustainable consumption, resource-efficient circular economy, climate mitigation and resilience, and improved access to education and other basic services.
- that have met the materiality or leadership requirement of the themes.
 - Materiality means: the issuer must at least generate 20% of the revenue and/or profits from the relevant products.
 - Leadership requirements: the issuer’s products must be, in the opinion of the Investment Managers, leader in the industry, innovative or with the potential to become disruptive.

2. Activity-based exclusion

The Investment Manager have excluded securities that have exposure to harmful and controversial activities, such as coal, conventional oil and gas, non-conventional weapons etc. For more information, please refer to our exclusion policy under: <https://www.thematics-am.com/en-FR/being-responsible/reports-and-publications>.

3. Behaviour-based exclusion

In addition, the Investment Managers have systematically excluded securities whose behaviour and overall performance are considered non-compliant to

established global sustainability norms and principles governing corporate behaviour, in particular on environmental protection, human rights, labour rights, and business ethics. These standards include the UN Global Compact Principles, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles for Business and Human Rights, and the International Labour Conventions. The screening is informed by third-party data.

4. In the final portfolio construction phase, the Investment Managers have carried out an ESG analyses using its proprietary ESG assessment guided by established materiality frameworks, such as but not limited to, Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). The Investment Managers have scored individual companies across the 11 different materials environmental, social, and governance indicators drawing from a range of resources, including desktop research, company engagement from at least two third-party rating agencies (ISS and Sustainalytics). The total ESG score has carried an equal weight (25%) as other investment criteria (i.e. Quality, Trading Risk and Management) and has impacted the security's inclusion and final weight of the investment.
5. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager have ensured that the Fund will have a better ESG rating than its Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring. The coverage has been above 90%.
6. Companies exposed to high with negative outlook and/or severe level controversies have been excluded. No company was already in the portfolio and became exposed to high with negative outlook and/or severe ESG controversies.
7. The Investment Managers have intended to exercise 100% of the voting rights on the issuers of the securities held in the portfolios managed, and in compliance with its sustainability principled-based voting policy.
8. The Investment Managers have engaged with a certain percentage of issuers each year.

Sustainable Finance Disclosure Regulation (continued)

WCM Select Global Growth Equity Fund

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **WCM Select Global Growth Equity Fund**

Legal entity identifier: 549300WBPAT73SBXE926

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted social characteristics of favouring companies that exhibit sound corporate cultures, excluding companies materially deficient according to the Investment Manager’s corporate culture rating criteria, and actively engaging with companies on these social issues. The Fund also promoted environmental characteristics of avoiding companies that are considered as controversial through for example the application of certain fossil fuel screens and exclusions. No reference benchmark has been designated for the purpose of attaining the E/S characteristics promoted by the Fund. We met these objectives of the fund in 2022.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The fund follows the following exclusion indicators and all were at 0%:

- Companies classified under the below industries/sub-industries as defined by the Global Industry Classification Standard (“GICS”) classification
- Oil and Gas Drilling
- Coal Consumable Fuels
- Oil and Gas Exploration and/or Production
- Tobacco
- Companies that have direct exposure to power generation (i.e., Utilities) via fossil fuel combustion
- Companies that have direct involvement in the production and/or distribution of controversial weapons, namely antipersonnel landmines, cluster munitions, biological and chemical weapons
- Companies which fail to meet the Investment Manager’s corporate culture internal rating criteria

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not Applicable

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Not Applicable

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

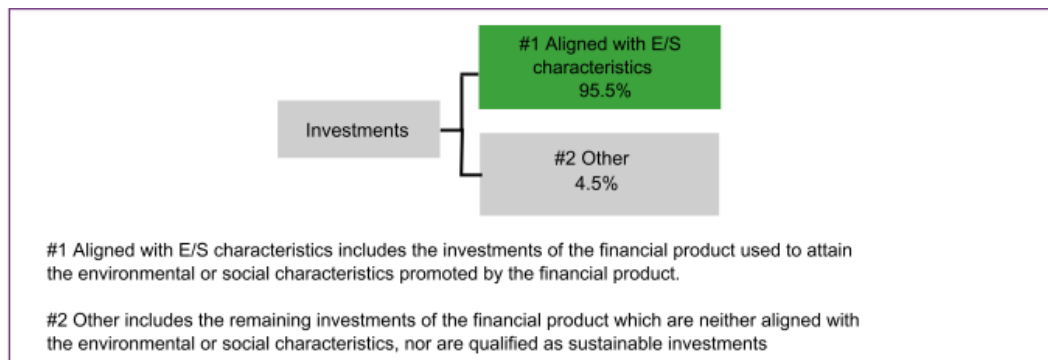

What was the proportion of sustainability-related investments?

Not Applicable

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

The asset allocation included 95.5% invested in public equities aligned with E/S characteristics and 4.5% invest in cash or cash equivalents as of December 31, 2022.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **In which economic sectors were the investments made?**

The fund invested in the following GICS sectors throughout 2022: Communication Services, Consumer Discretionary, Financials, Health Care, Industrials, Information Technology, and Materials.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

Yes :

In fossil gas In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

As the Fund does not commit to invest any "sustainable investment" within the meaning of the Taxonomy Regulation, the minimum share of investments in transitional and enabling activities within the meaning of the Taxonomy Regulation is therefore also set at 0%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

— see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash management is used for liquidity and passive management purposes. Then the fund may include cash positions (which are not aligned with the E/S characteristics) and are not subject to the application of any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment team analyzed all portfolio companies and tested for the presence of material deficiencies across select human capital factors. No material deficiencies were discovered. In addition, the investment team and various company management teams held 43 ESG-related meetings over the course of the year, and two of those were engagements to promote social factors, including employee well-being and mental health, labor relations, corporate culture, stewardship, and strategic CEO succession planning.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.0% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager managed the fund in accordance with its objective to promote the environmental characteristics of climate change impact reduction (the "E/S Characteristic"). As of 31st of December 2022, the Investment Manager invested 15% of the fund's Net Asset Value in these E/S Characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

As mentioned in the previous paragraph, as of 31st of December 2022, the Investment Manager invested 15% of its fund's Net Asset Value in the E/S Characteristics noted above. Of the 15%, 4% of the Fund met the climate change mitigation indicator, 10% met the renewable energy usage indicator, and 1% met the leaders in climate change mitigation indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not Applicable

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the principal adverse impacts (“PAI”) of the Fund’s investments on sustainability factors by monitoring and analysing the following principal adverse impact indicators when managing the Fund:

- GHG emissions (Scope 1 2 and Total GHG Emissions (also Scope 1 2));
- Carbon footprint;
- GHG intensity of investee companies;
- GHG intensity of investee countries;
- Exposure to companies active in the fossil fuel sector;
- Share of non-renewable energy consumption and production;
- Energy consumption intensity per high impact climate sector;
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons);
- Investments in companies without carbon emission reduction initiatives;
- Number of identified cases of severe human rights issues and incidents;
- Share of bonds not certified as green under a future EU act setting up an EU Green Bond Standard; and
- Average political stability score.

The above listed principal adverse impact indicators were taken into consideration by the Investment Manager in various ways as part of its ongoing management of the Fund, including through the assessment of issuers against the sustainability indicators outlined above.

What was the proportion of sustainability-related investments?

Not Applicable

● What was the asset allocation?

The Investment Manager met its objective to invest a minimum of 5% of the fund's Net Asset Value in investments which promote the E/S Characteristics. As of 31st of December 2022, the Investment Manager had invested 15% of its fund's Net Asset Value in investments which met the sustainability indicators outlined above.

● In which economic sectors were the investments made?

To achieve the portfolio's E/S characteristics, we made investments in green bonds, high renewable energy-consuming corporate issuers and climate change mitigation leaders sourced from the Banking, REIT, Communications and Technology industries.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) shows the green investments made by investee companies, e.g. relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

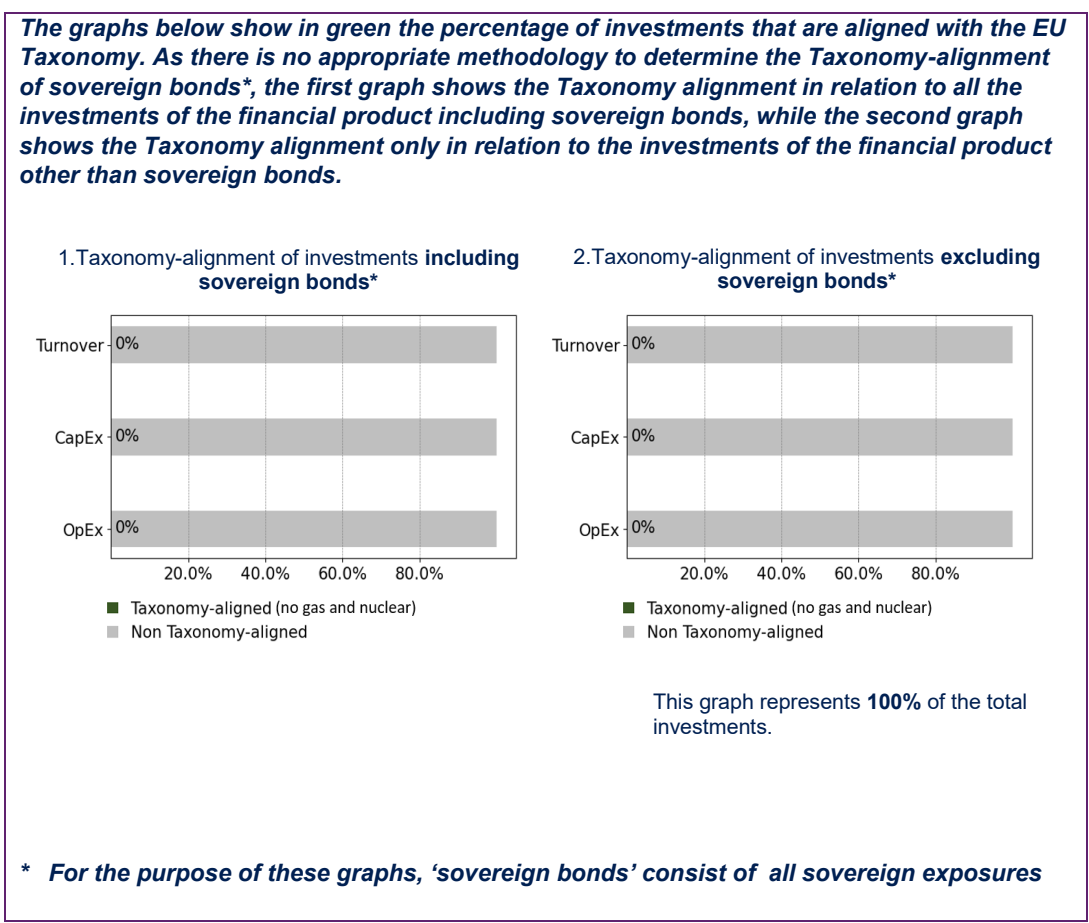

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

- **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

Yes : In fossil gas In nuclear energy

No

- **What was the share of investments made in transitional and enabling activities?**

Not Applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 85% of the Fund's NAV that did not meet the sustainability indicators was held in a combination of one or more of the following: (i) securities which did not align with the E/S Characteristics as they did not meet the sustainability indicators; (ii) derivatives entered into for the purposes of hedging and liquidity management; (iii) other liquidity management tools, such as money market instruments, cash and cash equivalents.

In relation to the securities of companies which did not align with the E/S characteristics, such investments were subject to the minimum environmental and social safeguards in the investment process the Investment Manager follows for the Fund, including that the principal adverse impacts of such investments were considered by the Investment Manager.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As in previous periods, we used our ESG integration, negative exclusion lists, and positive selection process to source an investment portfolio that met the E/S characteristic criteria during the time period. In specifically taking action to meet the three key indicators to address the E/S characteristic criteria, we executed the following processes: 1)Green bonds: Investments were made in issuances of green bonds where the Investment Manager verified that the use of proceeds of those bonds was to promote climate change mitigation, 2)Renewable energy usage (% of renewable energy utilised): Investments were made in issuers where at least 50% of the power that they used was generated by renewable resources, and 3)Leaders in climate change mitigation: Investments were made in issuers which the Investment Manager determined to be leaders in climate change mitigation.

How did this financial product perform compared to the reference benchmark?

Appendix V (continued)

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Loomis Sayles Sustainable Global Corporate Bond Fund

This financial product promotes environmental and social characteristics. However, the underlying investments of these financial products do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and their portfolios alignment with such Taxonomy Regulation are not calculated.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to Bloomberg Barclays Global Aggregate-Corporate Bond Index TR USD. In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index is used as a representative of the broad market for financial purpose and does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

Environmental and/or Social Characteristics promoted by the Sub-Fund

This Sub-Fund promoted environmental or social characteristics, but did not have as its objective a sustainable investment. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. The intention is, accordingly, for the Sub-Fund to qualify as a "light green" fund under Article 8 SFDR.

The Sub-Fund promoted the environmental characteristic of climate change mitigation (the "Characteristic"), by investing a proportion of its assets in the debt securities of issuers which aligned with this characteristic.

Sustainability indicators used to measure the extent to which the Sub-Fund promoted the Characteristic

The delegated investment manager of the Sub-Fund, Loomis, Sayles & Company, L.P. (the "Investment Manager") has identified the following sustainability indicators against which measured the extent to which the Sub-Fund's investments promoted the Characteristic during the period:

1. Green bonds;

Investments were made in issuances of green bonds where the Investment Manager verified that the use of proceeds of those bonds promoted climate change mitigation.

2. Renewable energy usage (% of renewable energy utilised);

Investments were made in issuers where at least 50% of the power that they use is generated by renewable sources.

3. Leaders in climate change mitigation

Investments were made in issuers which the Investment Manager determined to be leaders in climate change mitigation.

An issuer was viewed as a leader in climate change mitigation by the Investment Manager if it met the following criteria:

(a) it was given a score of 1 (Industry leader) for the E pillar of in the internal proprietary scoring process; and

(b) 50% or more of the material ESG "indicators" which make up the E Pillar score for the issuers associated industry were related to climate change mitigation (i.e. the issuer will have scored a 1 for all of the climate change mitigation indicators); and

Natixis International Funds (Lux) I

Appendix V (continued)

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Loomis Sayles Sustainable Global Corporate Bond Fund (continued)

(c) the issuer scored 7 or above by MSCI for at least 3 out of 4 of the following KPIs:

- Carbon Emissions Score;
- Greenhouse Gas Mitigation Score;
- Carbon Emissions Relative Performance to Peers;
- Low Carbon Transition Score.

How the Characteristic was promoted by the Sub-Fund

The Investment Manager promoted the Characteristic by identifying investments which meet the investment objective, strategy and restrictions set out in the Supplement to the Prospectus relating to the Sub-Fund.

As a key component of the Sub-Fund's investment decision making process, the Investment Manager employed the following approach when selecting securities:

- i. *Creation of a composite score*: The Investment Manager utilized a proprietary ESG framework to analyse data sourced from external providers and internal analysis conducted via in-house industry-specific materiality maps (based on the Sustainable Accounting Standards Board (SASB)'s materiality matrix) that generated individual scores for each issuer against specified environmental, social and governance ("ESG") criteria. The ESG scores have 3 Pillars: Environmental, Social and Governance, that were weighted based on industry materiality. Each Pillar score is comprised of material ESG "indicators" that have a corresponding weight, linked to materiality. The indicator scores add up to give an issuer a score for a specific Pillar. The individual Pillar scores were then aggregated to calculate the industry-relative ESG score of an issuer on a descending scale of 1 (above industry average); 2 (industry average); and 3 (below industry average).
- ii. *Screening of the investment universe*: The Investment Manager excluded the following from the Sub-Fund's investment universe:
 - (a) the majority of issuers which have a composite ESG score of 3. The Sub-Fund was only permitted to invest up to 10% of its Net Asset Value in these issuers. Only issuers which showed improvement on their material ESG issues, as confirmed by active engagement, will be invested into;
 - (b) any issuers on the Norges Bank exclusion list¹. This list contains issuers which Norges Bank's Executive Board, based on recommendations by the Council on Ethics and/or Norges Bank Investment Management, has decided to remove from its investment universe on the basis of issues such as, but not limited to: production of nuclear weapons; production of coal or coal-based energy; production of tobacco; unacceptable greenhouse gas emissions; severe environmental damage; gross corruption and violations of human rights;
 - (c) any issuers that are flagged by MSCI as having been involved in a recent severe controversy that fails one or more of the Ten Principles outlined in the UN Global Compact (UNGC). UNGC focuses on four key areas: human rights, labour; environment; and corruption; and
 - (d) any issuers identified by the ISS-Ethix Controversial Weapons Screening assessment as conducting business activities in the production or distribution of cluster munitions and anti-personnel mines.

Natixis International Funds (Lux) I

Appendix V (continued)

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Loomis Sayles Sustainable Global Corporate Bond Fund (continued)

- iii. *Security selection among the refined investment universe:* The Investment Manager then further analysed the remaining investment universe against additional ESG considerations based on data obtained from external providers and internal analysis that enabled the Investment Manager to identify and select issuers which:
- (a) promote the Characteristic;
 - (b) follow good governance practices (such as fair and equitable wages; fair working conditions; product risk management and disclosure practices; diversity among board composition; independent directors).

In relation to step iii (Identify and select issuers which promote one or more of the Characteristics and which follow good corporate governance practices), this was achieved by using the sustainability indicators outlined above to assess whether the issuer promotes the Characteristic.

- iv. *Portfolio monitoring:* was undertaken to ensure the portfolio holdings promoted the Characteristics and/or the general ESG standards of the Sub-Fund. After review, if a portfolio security no longer satisfied the above criteria, the Investment Manager engaged the issuer to:
- (a) Raise awareness to make the issuer aware of ESG deficiencies;
 - (b) Determine if the change is structural or temporary, driven by internal or external factors, and whether it is intentional or negligent;
 - (c) Encourage corrective actions; and
 - (d) Determine whether portfolio exclusion is required.

As well as making investments that promoted the Characteristic, the Investment Manager constructed a portfolio of investments which had a carbon footprint that is at least 25% lower than that of the Bloomberg Barclays Global Aggregate-Corporate Bond Index TR USD.

External data sources used by the Sub-Fund

The Investment Manager used the following data and/or research as part of its proprietary ESG process:

- MSCI ESG Ratings (vendor for universe screening data);
- Sustainalytics;
- ISS ESG Transition Scenario Alignment Analysis Tool;
- ISS-Ethix Controversial Weapons Screening;
- International Energy Agency (IEA);
- Company reports;
- Financial news outlets including but not limited to Bloomberg, Reuters, the Financial Times, Economist and Wall Street Journal; and
- Broker research.

ESG data received from third parties as well as issuers may be incomplete, inaccurate or unavailable from time to time. As a result, there is a risk that the Investment Manager may incorrectly assess a security or issuer, resulting in the incorrect direct or indirect inclusion or exclusion of a security in the portfolio of the Sub-Fund.

Using multiple data sources reduces this risk but does not eliminate it. In addition, using fundamental internal analysis also allows the Investment Manager to directly question data directly with issuers.

Over time and as industry and relevant resources develop, the Investment Manager may (1) change, amend or revise the sustainability indicators which it uses to rate investments; and/or (2) choose to utilise alternative data sources in its due diligence and ratings processes.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Loomis Sayles Sustainable Global Corporate Bond Fund**

Legal entity identifier: 549300CQ5JKUI2PFCN78

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.0% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the period 01 January 2022 to 31 December 2022, a stated aim of the fund was to promote the environmental characteristic of climate change mitigation (the "E/S Characteristic") against certain specified sustainability indicators outlined below. As of 31st of December 2022, the Investment Manager invested 12% of the fund's Net Asset Value in investments which met the sustainability indicators linked to the E/S Characteristic.

Although not a change in investment process, the Investment Manager recently enhanced the fund's Annex II SFDR disclosure to provide further detail around the existing E/S Characteristic and to describe certain additional E/S Characteristics to be promoted by the fund, including seeking alignment with the following United Nation's Sustainable Development Goals ("SDGs"): Clean Water & Sanitation (SDG6); Affordable & Clean Energy (SDG7); Industry, Innovation & Infrastructure (SDG9); Responsible Consumption & Production (SDG12); Climate Action (SDG13); and Life on Land (SDG15). These additional E/S Characteristics and the existing E/S Characteristic are collectively referred to as the "Enhanced E/S Characteristics". In order to provide disclosure that is fair, clear, and not misleading, the Investment Manager believes it is appropriate to also provide reporting consistent with the Enhanced E/S Characteristics. Were the Investment Manager to measure the percentage of the fund's Net Asset Value invested in investments which meet the additional sustainability indicators outlined below and therefore promote the Enhanced E/S Characteristics, the percentage of the fund's Net Asset Value deemed to be promoting the Enhanced E/S Characteristics promoted by the fund as of 31st of December 2022 would be 95%

● ***How did the sustainability indicators perform?***

As mentioned in response to the previous question, as of 31st of December 2022, the Investment Manager invested 12% of its fund's Net Asset Value in investments which promoted the E/S Characteristic of climate change mitigation. Of that 12%, 3% of the Fund's NAV was in green bonds, 8% of NAV met the renewable energy usage indicator, and 1% of NAV met the leaders in climate change mitigation indicator.

As mentioned above, the Investment Manager recently revised the fund's Annex II SFDR disclosure to provide further detail around the Enhanced E/S Characteristics to be promoted by the fund. The Investment Manager has identified the following additional sustainability indicators against which it will measure the extent to which the Fund's investments promote the Enhanced E/S Characteristics (in addition to the original indicators of investments in green bonds, renewable energy usage, and leaders in climate change mitigation):

- The Fund's overall performance against the Bloomberg Global Aggregate Corporate Index in relation to overall greenhouse gas emissions: The Investment Manager will manage the fund so that its greenhouse gas emissions are at least 25% lower than that of the Bloomberg Global Aggregate Corporate Index.
- The fund will not invest in any issuer which derives 10% or more of its revenue from thermal coal-based power generation or from the mining or sale of thermal coal.

The Investment Manager will deem an investment to be aligned with and/or to be furthering one or more of the identified SDGs and hence as qualifying as sustainable investment if:

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

- it is a green bond which has been issued in accordance with the ICMA Green Bond Principles; or
- greater than 15% of the issuer's revenue relates to the furtherance of one or more SDGs; or
- based on a qualitative assessment, the Investment Manager views the issuer's business operations to be materially aligned with one or more SDGs.

In order to provide disclosure that is fair, clear, and not misleading, the Investment Manager believes it is appropriate to also provide reporting consistent with the Enhanced E/S Characteristics. Were the Investment Manager to measure the percentage of the fund's Net Asset Value invested in investments which meet the additional sustainability indicators outlined above and therefore promote the Enhanced E/S Characteristics, the percentage of the fund's Net Asset Value deemed to be promoting the Enhanced E/S Characteristics as of 31st of December 2022 would be 95%, which reflects the portion of the portfolio included in its weighted average carbon intensity (as the portion of the investment portfolio comprising cash and cash equivalents, derivatives, and other instruments cannot be measured against the sustainability indicators). In this connection, the fund was 41% below the Bloomberg Global Aggregate Corporate Index on weighted average carbon intensity as of 31st of December 2022.

With respect to the fund's other sustainability indicators relating to its Enhanced E/S Characteristics, as of 31st of December 2022, were the Investment Manager to measure the percentages of the fund's Net Asset Value invested in investments which meet the additional sustainability indicators outlined above would be as follows: 3% of the Fund's NAV was in green bonds, 8% of NAV met the renewable energy usage indicator, and 1% of NAV met the leaders in climate change mitigation indicator; and 0% of the Fund's Net Asset Value was invested in any issuer which derives 10% or more of its revenue from thermal coal based power generation or from the mining or sale of thermal coal. Lastly, the percentage of the fund's Net Asset Value aligned with the identified SDGs and, therefore, in investments which the Investment Manager would deem to be sustainable investments as of 31st of December 2022, would have been 59%.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As of 31st December 2022, the pre-contractual disclosures for the fund did not include any undertakings that the fund would invest any percentage of its assets in sustainable investments (as defined in Article 2(17) SFDR).

As mentioned above, the Investment Manager recently enhanced the fund's disclosure to provide further detail around additional sustainability indicators against which alignment with the SDGs may be measured. Were the

Investment Manager to use these additional sustainability indicators to measure the percentage of the fund's Net Asset Value aligned with these SDGs, the percentage of the fund's Net Asset Value aligned with these SDGs and, therefore, in investments which the Investment Manager would deem to be sustainable investments as of 31st of December 2022, would have been 59%.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable for this reporting period

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable for this reporting period

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable for this reporting period

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the principal adverse impacts (“PAI”) of the Fund’s investments on sustainability factors by monitoring and analysing the following principal adverse impact indicators when managing the Fund:

- GHG emissions (Scope 1 2 and Total GHG Emissions (also Scope 1 2));
- Carbon footprint;

- GHG intensity of investee companies;
- GHG intensity of investee countries;
- Exposure to companies active in the fossil fuel sector;
- Share of non-renewable energy consumption and production;
- Energy consumption intensity per high impact climate sector;
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons);
- Investments in companies without carbon emission reduction initiatives;
- Number of identified cases of severe human rights issues and incidents;
- Share of bonds not certified as green under a future EU act setting up an EU Green Bond Standard; and
- Average political stability score.

The above listed principal adverse impact indicators were taken into consideration by the Investment Manager in various ways as part of its ongoing management of the fund, including through the assessment of issuers against the sustainability indicators outlined above.

The displayed country is the country of risk

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

What was the proportion of sustainability-related investments?

Not Applicable for this reporting period.

However, as mentioned above, the Investment Manager recently enhanced the fund's disclosure to provide further detail around additional sustainability indicators against which alignment with the SDGs may be measured. Were the Investment Manager to use these additional sustainability indicators to measure the percentage of the fund's Net Asset Value aligned with these SDGs, the percentage of the fund's Net Asset Value aligned with these SDGs and, therefore, in investments which the Investment Manager would deem to be sustainable investments as of 31st of December 2022, would have been 59%.

● What was the asset allocation?

The Investment Manager met its objective to invest a minimum of 5% of the fund's Net Asset Value in investments which promote the E/S Characteristic. As of 31st of December 2022, the Investment Manager had invested 12% of the fund's Net Asset Value in investments which met the sustainability indicators outlined above.

Were the Investment Manager to measure the percentage of the fund's Net Asset Value invested in investments which meet the additional sustainability indicators outlined above and therefore promote the Enhanced E/S Characteristics, the percentage of the fund's Net Asset Value deemed to be promoting the Enhanced E/S Characteristics promoted by the fund as of 31st of December 2022 would be 95%, as portions of the investment portfolio comprising cash and cash equivalents and derivatives cannot be measured against the sustainability indicators.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category #1A Aligned with E/S characteristics covers :

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

● ***In which economic sectors were the investments made?***

To achieve the portfolio's E/S characteristics, we made investments in green bonds, high renewable energy-consuming corporate issuers and climate change mitigation leaders sourced from the Banking, REIT, Communications and Technology industries.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

Yes :

In fossil gas In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) shows the green investments made by investee companies, e.g. relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not Applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 88% of the Fund's NAV that did not meet the sustainability indicators was held in a combination of one or more of the following: (i) securities which did not

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

align with the E/S Characteristic as originally described in the fund's Annex II SFDR disclosure in 2022; (ii) derivatives entered into for the purposes of hedging and liquidity management; (iii) other liquidity management tools, such as money market instruments, cash and cash equivalents.

In relation to the securities of companies which did not align with the E/S characteristic, such investments were subject to the minimum environmental and social safeguards in the investment process the Investment Manager follows for the Fund, including that the principal adverse impacts of such investments were considered by the Investment Manager.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As in previous periods, we used our ESG integration, negative exclusion lists, and positive investment selection process to source an investment portfolio that met the E/S Characteristic and related sustainability indicators during the time period. In specifically taking action to meet the three key indicators aligned with promoting the E/S Characteristic, we executed the following processes:

- 1) Green bonds: Investments were made in issuances of green bonds where the Investment Manager verified that the use of proceeds of those bonds was to promote climate change mitigation,
- 2) Renewable energy usage (% of renewable energy utilised): Investments were made in issuers where at least 50% of the power that they used was generated by renewable resources, and
- 3) Leaders in climate change mitigation: Investments were made in issuers which the Investment Manager determined to be leaders in climate change mitigation.

Sustainable Finance Disclosure Regulation (continued)

Loomis Sayles Short Term Emerging Markets Bond Fund

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Loomis Sayles Short Term Emerging Markets Bond Fund

Legal entity identifier: 549300D4282RMBS1HP28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.0% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager managed the fund in accordance with its objectives to promote the environmental characteristics of climate change mitigation and the transition to a circular economy and the social characteristic of financial inclusion (the "E/S Characteristics"). As of 31st of December 2022, the Investment Manager invested 20% of the fund's Net Asset Value in these E/S Characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- **How did the sustainability indicators perform?**

As mentioned in the previous paragraph, as of 31st of December 2022, the Investment Manager invested 20% of its fund's Net Asset Value in the E/S Characteristics noted above. Of the 20%, 12% of the Fund met the climate change mitigation indicator, 6% met the financial inclusion indicator, and 3% met the transition to circular economy indicator.

- **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

- **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not Applicable

- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the investment process, the Investment Manager considered the principal adverse impacts (“PAI”) of the Fund’s investments on sustainability factors by monitoring and analysing the following principal adverse impact indicators when managing the Fund:

- GHG emissions (Scope 1, 2 and GHG Emissions);
- Carbon footprint;
- GHG intensity of investee companies;
- GHG intensity of investee countries;
- Share of non-renewable energy consumption and production;
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons);
- Investments in companies without carbon emission reduction initiatives;
- Breakdown of coal energy consumption;
- Number of identified cases of severe human rights issues and incidents;
- Share of bonds not certified as green under a future EU act setting up an EU Green Bond Standard;
- Non-cooperative tax jurisdictions; and
- Violations of the UN Global Compact principles and Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises.

The above listed principal adverse impact indicators were taken into consideration by the Investment Manager in various ways as part of its ongoing management of the Fund, including through the assessment of issuers against the sustainability indicators outlined above, the Investment Manager’s engagement with issuers, and the application of exclusions.

What was the proportion of sustainability-related investments?

Not Applicable

Asset allocation describes the share of investments in specific assets.

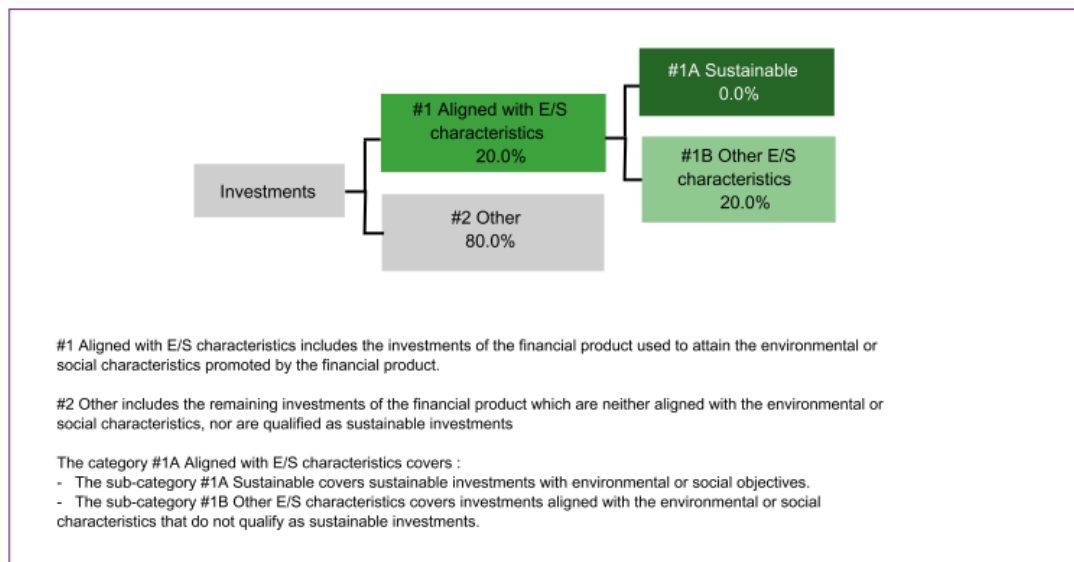

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the asset allocation?

The Investment Manager exceeded its objective to invest a minimum of 10% of the fund's Net Asset Value in investments which promote the E/S Characteristics. As of 31st of December 2022, the Investment Manager had invested 20% of its fund's Net Asset Value in investments which met the sustainability indicators outlined above.

In which economic sectors were the investments made?

Investments were made across the following sectors: Consumer, Financial, Industrial, Oil Gas, TMT, and Utilities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable

- Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?

Yes :

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 80% of the Fund's NAV that did not meet the sustainability indicators was held in a combination of one or more of the following: (i) securities which did not align with the E/S Characteristics as they did not meet the sustainability indicators and (ii) cash.

In relation to the securities of companies which did not align with the E/S characteristics, such investments were subject to the minimum environmental and social safeguards in the investment process the Investment Manager follows for the Fund, including that the principal adverse impacts of such investments were considered by the Investment Manager.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As a key component of the Fund's investment decision making process, the Investment Manager employed the following bottom-up approach when selecting securities during the reference period:

Step 1: Screening Exclusions

As a matter of course, amongst other things, the Investment Manager excluded from the potential investment universe any investment in issuers which:

- derive any portion of their revenue from the manufacture, distribution and/or sale of cluster munitions;
- derive any portion of their revenue from the manufacture, distribution and/or sale of controversial weapons;
- any issuers which are flagged by MSCI for very severe controversies on environmental, social and governance issues;
- any issuers that are flagged by MSCI as failing to comply with the standards set out in the United Nations Guiding Principles for Business and Human Rights and/or the International Labour Organization;

- derive more than 5% of their revenue from the production and/or distribution of tobacco;
- derive more than 10% of their revenue from the extraction of thermal coal;
- any issuers in the utilities sector that derive more than 30% of their power generation from thermal coal without a measurable carbon transition plan;
- if corporates, have been rated a “3” for governance; and
- have been given an MSCI rating of CCC.

In relation to the exclusion of issuers with an MSCI rating of CCC, the Fund may make investments in such issuers to the extent that the Investment Manager obtains public information which contradicts the MSCI ESG rating given to an investment, and the Investment Manager is satisfied that the score assigned to that investment should be revised accordingly.

Step 2: Bottoms Up Fundamental Analysis

The Investment Manager carried out bottom-up research on the remaining issuers in the investment universe. As part of the bottom-up research process, the Investment Manager uses a proprietary ESG framework to analyse and evaluate the material E, S and G factors of over 90% of the remaining issuers in the investment universe, using proprietary materiality maps, based on SASB. Each issuer is then given a rating on a 1 (best) to 3 (worst) scale for each E, S and G “pillar”. Both an issuer’s credit rating and its ESG rating are factored into the Investment Manager’s investment decision making process.

Step 3: Security Selection

Based on credit rating and ESG risk profile, the Investment Manager identified issuers with attractive valuations for potential investment. Any opportunities offered by specific Environmental (E) and Social (S) factors are also identified in the security selection phase. The Investment Manager assessed these opportunities to determine whether an issuer: (i) promoted the Characteristics using certain specified sustainability indicators and associated thresholds; and (ii) followed good corporate governance practices.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.0% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Manager managed the fund in accordance with its objectives to promote the environmental characteristics of climate change mitigation and the transition to a circular economy and the social characteristic of financial inclusion (the "E/S Characteristics"). As of 31st of December 2022, the Investment Manager invested 16% of the fund's Net Asset Value in these E/S Characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

As mentioned in the previous paragraph, as of 31st of December 2022, the Investment Manager invested 16% of its fund's Net Asset Value in the E/S Characteristics noted above. Of the 16%, 12% of the Fund met the climate change mitigation indicator, 3% met the financial inclusion indicator, and 1% met the transition to circular economy indicator.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not Applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not Applicable

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not Applicable

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In addition to the investment process, the Investment Manager considered the principal adverse impacts (“PAI”) of the Fund’s investments on sustainability factors by monitoring and analysing the following principal adverse impact indicators when managing the Fund:

- GHG emissions (Scope 1, 2 and GHG Emissions);
- Carbon footprint;
- GHG intensity of investee companies;
- GHG intensity of investee countries;
- Share of non-renewable energy consumption and production;
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons);
- Investments in companies without carbon emission reduction initiatives;
- Breakdown of coal energy consumption;
- Number of identified cases of severe human rights issues and incidents;
- Share of bonds not certified as green under a future EU act setting up an EU Green Bond Standard;
- Non-cooperative tax jurisdictions; and
- Violations of the UN Global Compact principles and Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises.

The above listed principal adverse impact indicators were taken into consideration by the Investment Manager in various ways as part of its ongoing management of the Fund, including through the assessment of issuers against the sustainability indicators outlined above, the Investment Manager’s engagement with issuers, and the application of exclusions.

Not Applicable

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The 84% of the Fund's NAV that did not meet the sustainability indicators was held in a combination of one or more of the following: (i) securities which did not align with the E/S Characteristics as they did not meet the sustainability indicators and (ii) cash.

In relation to the securities of companies which did not align with the E/S characteristics, such investments were subject to the minimum environmental and social safeguards in the investment process the Investment Manager follows for the Fund, including that the principal adverse impacts of such investments were considered by the Investment Manager.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As a key component of the Fund's investment decision making process, the Investment Manager employed the following bottom-up approach when selecting securities during the reference period:

Step 1: Screening Exclusions

As a matter of course, amongst other things, the Investment Manager excluded from the potential investment universe any investment in issuers which:

- derive any portion of their revenue from the manufacture, distribution and/or sale of cluster munitions;
- derive any portion of their revenue from the manufacture, distribution and/or sale of controversial weapons;
- any issuers which are flagged by MSCI for very severe controversies on environmental, social and governance issues;
- any issuers that are flagged by MSCI as failing to comply with the standards set out in the United Nations Guiding Principles for Business and Human Rights and/or the International Labour Organization;

- derive more than 5% of their revenue from the production and/or distribution of tobacco;
- derive more than 10% of their revenue from the extraction of thermal coal;
- any issuers in the utilities sector that derive more than 30% of their power generation from thermal coal without a measurable carbon transition plan;
- if corporates, have been rated a “3” for governance; and
- have been given an MSCI rating of CCC.

In relation to the exclusion of issuers with an MSCI rating of CCC, the Fund may make investments in such issuers to the extent that the Investment Manager obtains public information which contradicts the MSCI ESG rating given to an investment, and the Investment Manager is satisfied that the score assigned to that investment should be revised accordingly.

Step 2: Bottoms Up Fundamental Analysis

The Investment Manager carried out bottom-up research on the remaining issuers in the investment universe. As part of the bottom-up research process, the Investment Manager uses a proprietary ESG framework to analyse and evaluate the material E, S and G factors of over 90% of the remaining issuers in the investment universe, using proprietary materiality maps, based on SASB. Each issuer is then given a rating on a 1 (best) to 3 (worst) scale for each E, S and G “pillar”. Both an issuer’s credit rating and its ESG rating are factored into the Investment Manager’s investment decision making process.

Step 3: Security Selection

Based on credit rating and ESG risk profile, the Investment Manager identified issuers with attractive valuations for potential investment. Any opportunities offered by specific Environmental (E) and Social (S) factors are also identified in the security selection phase. The Investment Manager assessed these opportunities to determine whether an issuer: (i) promoted the Characteristics using certain specified sustainability indicators and associated thresholds; and (ii) followed good corporate governance practices.

<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.0% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund has promoted environmental or social and governance (ESG) criteria through the Investment Manager’s proprietary ESG qualitative assessment “Conviction Narrative”, and avoided investments in companies that derive more than 25% of their revenue from the production of energy generated by coal or from the production of coal according to the Investment Manager’s coal exclusion policy.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

As of 31st of December 2022, The sustainability indicators were :

- percentage of underlying investments that derive more than 25% of their revenue from the production of energy generated by coal or from the production of coal : 0%,
- percentage of underlying investments with the French SRI label or an european equivalent label : 95.6%
- percentage of investments (monetary funds excluded) with high, medium, basic or low ESG rating : please refer to the line graph below

- percentage of investments in money market funds with a high, medium or basic ESG rating that have the French SRI label or an european equivalent label: please refer to the line graph below

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not Applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not Applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principle adverse impacts on sustainability factors (PAIs) have been taken into account in the Investment Manager’s fund selection processes “Conviction Narrative”. The Investment Manager will select the underlying funds that have defined clear exclusionary policies such as:

- Worst offender (10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises),
- Controversial weapon (14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) exclusion policies.

For the coal exclusion policy, underlying funds selected must exclude companies in line with the Investment Manager’s coal exclusion policy (1. GHG emissions, 2. Carbon footprint, 3. GHG intensity of investee companies).

What was the proportion of sustainability-related investments?

Not applicable

● What was the asset allocation?

As of the 31st of December 2022, the alignment with the E/S characteristics of the fund as defined in the pre-contractual appendix of the funds was 99.8%

● In which economic sectors were the investments made?

As of the 31st of December 2022, the fund exclusively invested in other funds (ie : bond funds, equity funds...)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund does not currently commit to invest in any “sustainable investment” within the meaning of the EU Taxonomy. However, the position will be kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

Asset allocation

describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

Yes :

In fossil gas In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy
- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

As the Fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The fund invested in cash up to 0.2%

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

ESG characteristics are taken into account by selecting funds through a qualitative ESG analysis proprietary to the management company (so-called "Conviction Narrative" method) and excluding funds that invest in companies with more than 25% of revenue comes from coal-generated power generation or coal production.

Thus, before each investment, the manager ensures that the selected funds have been reviewed from an ESG perspective through the "Conviction Narrative" analysis and complies with the carbon policy of Natixis Investment Managers International (25% threshold).

How did this financial product perform compared to the reference benchmark?

Sustainable Finance Disclosure Regulation (continued)

Natixis ESG Dynamic Fund

This financial product promotes environmental and social characteristics. However, the underlying investments of these financial products do not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and their portfolios alignment with such Taxonomy Regulation are not calculated.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to a composite index of 45% MSCI World Index Net Return, 35% MSCI Europe Index Net Return, 10% FTSE MTS Eurozone Government Bond Index and 10% Bloomberg Barclays Euro Aggregate Corporate Index Net Return. In practice, the portfolio of the Sub-Fund is likely to include constituents of the index (directly and indirectly), however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index does not intend to be consistent with the environmental or social characteristics promoted by the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The fund invested in cash up to 0.4%

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

ESG characteristics are taken into account by selecting funds through a qualitative ESG analysis proprietary to the management company (so-called "Conviction Narrative" method) and excluding funds that invest in companies with more than 25% of revenue comes from coal-generated power generation or coal production.

Thus, before each investment, the manager ensures that the selected funds have been reviewed from an ESG perspective through the "Conviction Narrative" analysis and complies with the carbon policy of Natixis Investment Managers International (25% threshold).

How did this financial product perform compared to the reference benchmark?

Not Applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*
Not Applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
Not Applicable

- *How did this financial product perform compared with the reference benchmark?*
Not Applicable

- *How did this financial product perform compared with the broad market index?*
Not Applicable

Natixis International Funds (Lux) I

Appendix V (continued)

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Article 9 Sub-Funds

The following Sub-Funds promote environmental and/or social characteristics and have a sustainable investment objective and, as such, fall within the scope of Article 9 of the Sustainable Finance Disclosure Regulation: Thematics Safety Fund, Thematics Water Fund and Thematics Wellness Fund.

Thematics Climate Selection Fund

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Thematics Climate Selection Fund**

Legal entity identifier: 549300BZYHMQ58ASOQ37

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 96.0% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.0%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

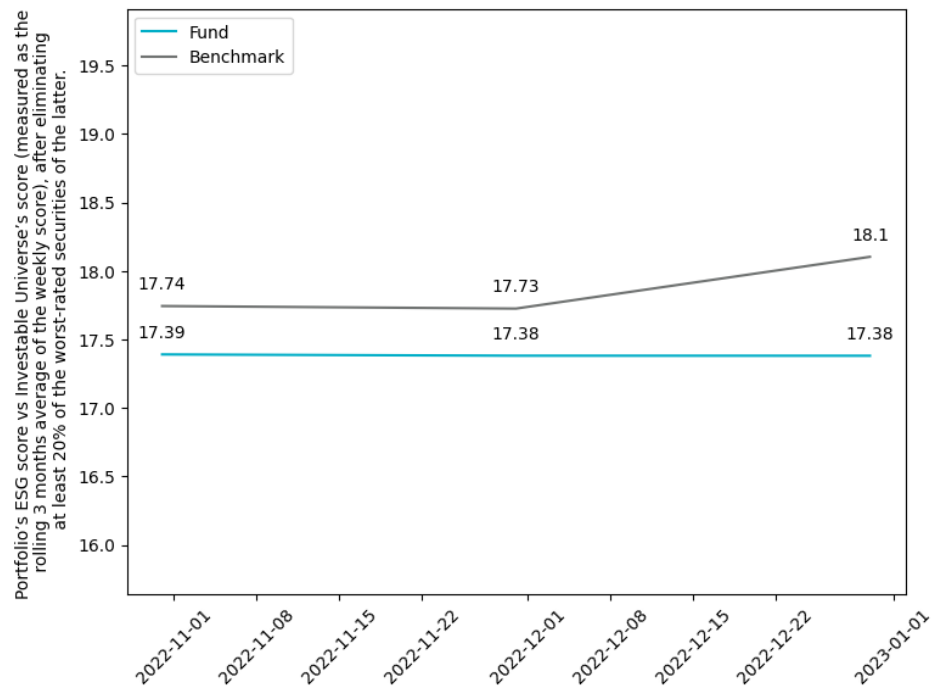

The Fund has contributed to the climate transition through investments in Paris Agreement-aligned companies which are supported by long term secular growth drivers.

A reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

● **How did the sustainability indicators perform?**

Unless stated otherwise, data are as of 31/12/2022:

1. The portfolio's implied temperature rise metric provided by external provider is 1.5 degrees which is below the maximum 2 degrees.
2. Percentage of Fund's asset under management that contributes to the themes and meet the materiality or leadership criteria is 100% excluding cash.
3. Percentage of the Fund's assets under management of issuers generating more than 5% of revenue from harmful and/or controversial activities is 0%.
4. Percentage of the Fund's assets under management of issuers whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour is 0%.
5. Percentage of the Fund's assets under management that are subject to ESG analysis by Investment Managers is 100%.
6. Portfolio ESG score's outperforms the ESG score of the Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

7.

1. Percentage of the Fund's assets under management of newly invested issuers that has already high with a negative outlook and/or severe ESG controversies at the time of investment is 0%
2. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and are capped to 2% is 0 which is below the maximum 5.
3. Number of already invested issuers that becomes exposed to high and/or severe ESG controversies and, within a 6-month time frame:
 - are not engaged or,
 - are engaged but do not demonstrate sufficient performance improvement,
 - is 0.

8.

1. Total percentage of submitted votes in 2022 is 100% which is above the minimum 95%.
 2. Percentage of submitted votes according to the sustainability-principled policy in 2022 is 100% which is above the minimum 95%.
9. Due to the recent launch of the fund, the percentage of invested issuers covered by targeted engagement will be disclosed in the next periodic report.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investment did not cause significant harm to other E/S objectives through employing a combination of binding strategies across the end-to-end investment process. The Fund considered the EU SFDR's PAIs at different stages of its investment process, through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement. To demonstrate this, the Fund reports in an annual basis on the following: exposure to adverse activities covered in the PAI, such as coal and weapons; breach of the international norms and standards, including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights; exposure to high and severe level ESG controversies with negative outlook; the Fund's ESG risk score vs its investable universe; and its performance data on its sustainability principles-based voting and engagement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.
- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.
- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for

Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In an annual basis, the Fund reports on its exposure to non-compliant companies to the above standards.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk

management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.

- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.
- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
THERMO FISHER UN USD	Life Sciences Tools & Services	5.04%	United States
MERCK & CO UN USD	Pharmaceuticals	3.50%	United States
EQUINIX INC UW USD	Specialized Reits	3.30%	United States

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

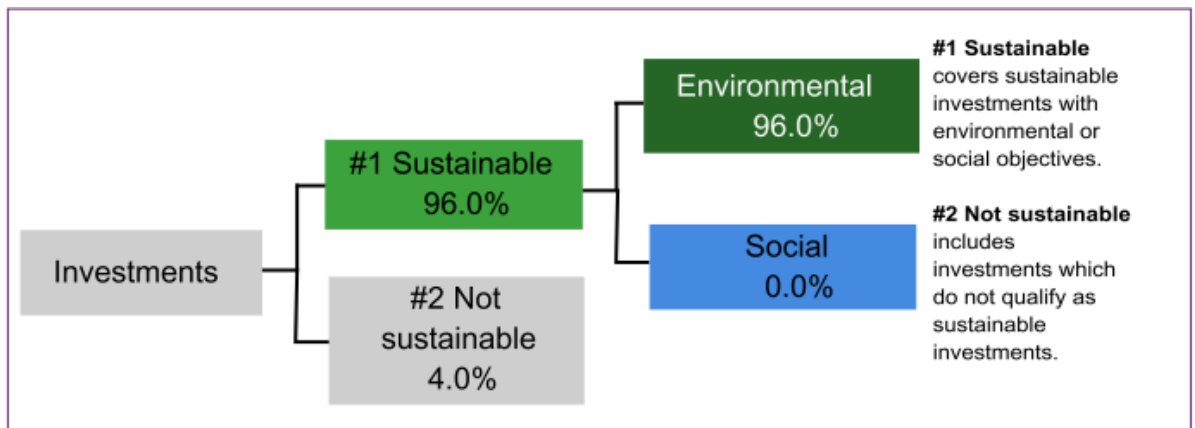

What was the proportion of sustainability-related investments?

The Fund committed to a minimum sustainable investment of 90%. As of 31/12/2022, the actual investment was 96%.

● *What was the asset allocation?*

Sustainable investments: 96%

Cash: 4%

● *In which economic sectors were the investments made?*

The Fund invested in all economic sectors except energy sector.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

- Yes :
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

Not applicable

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As of 31/12/2022, the share of sustainable investment with an environmental objective was 96.0%

What was the share of socially sustainable investments?

Not Applicable

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Cash investment for liquidity purposes. This investment does not follow any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

We have followed the investment strategy:

1. Sustainable thematic screening

The Investment Managers have selected securities:

- aligned with the Paris agreement: decarbonization pathway aligned with temperature below 2 degrees.
- contributing to the theme's sub-segments that in turn contribute to 1 or more of the following sustainability targets: water usage efficiency, sustainable water withdrawals, water treatment technologies, advanced water management technologies; hazardous waste management, pollution monitoring; water supply and water delivery infrastructure; resource use optimization, climate mitigation and resilience, health and safety, improved healthcare quality and access, and smart home and cities; food and health safety, data privacy and consumer protection, improved and safe access to digital economy, safe mobility and transport systems, personal and industrial safety systems, and other advanced security systems; Improve access to products and services for physical and mental health and well-being, improve access to products and services for basic human needs including food, healthcare and education, and enable decent and meaningful work; responsible and sustainable consumption, resource-efficient circular economy, climate mitigation and resilience, and improved access to education and other basic services.
- that have met the materiality or leadership requirement of the themes.

- Materiality means: the issuer must at least generate 20% of the revenue and/or profits from the relevant products.
- Leadership requirements: the issuer's products must be, in the opinion of the Investment Managers, leader in the industry, innovative or with the potential to become disruptive.

2. Activity-based exclusion

The Investment Manager have excluded securities that have exposure to harmful and controversial activities, such as coal, conventional oil and gas, non-conventional weapons etc. For more information, please refer to our exclusion policy under: <https://www.thematics-am.com/en-FR/being-responsible/reports-and-publications>.

3. Behaviour-based exclusion

In addition, the Investment Managers have systematically excluded securities whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour, in particular on environmental protection, human rights, labour rights, and business ethics. These standards include the UN Global Compact Principles, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles for Business and Human Rights, and the International Labour Conventions. The screening is informed by third-party data.

4. In the final portfolio construction phase, the Investment Managers have carried out an ESG analyses using its proprietary ESG assessment guided by established materiality frameworks, such as but not limited to, Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). The Investment Managers have scored individual companies across the 11 different material environmental, social, and governance indicators drawing from a range of resources, including desktop research, company engagement from at least two third-party rating agencies (ISS and Sustainalytics). The total ESG score has carried an equal weight (25%) as other investment criteria (i.e. Quality, Trading Risk and Management) and has impacted the security's inclusion and final weight of the investment..
5. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager have ensured that the Fund will have a better ESG rating than its Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring. The coverage has been above 90%.
6. Companies exposed to high with negative outlook and/or severe level controversies have been excluded. No company was already in the portfolio and became exposed to high with negative outlook and/or severe ESG controversies.

7. The Investment Managers have intended to exercise 100% of the voting rights on the issuers of the securities held in the portfolios managed, and in compliance with its sustainability principled-based voting policy.
8. The Investment Managers have engaged with a certain percentage of issuers each year.

How did this financial product perform compared to the reference sustainable benchmark?

As of 31/12/2022, the Fund's implied temperature is below 1.5C, whereas the reference index's is between 1.5 et 2 C.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

The MSCI ACWI Climate Paris Aligned Index is based on the (broad-market) MSCI ACWI Index, its parent index, and includes large and midcap securities across 23 Developed Markets and 27 Emerging Markets countries. It is constructed following an optimization-based approach and aim to exceed the minimum technical requirements laid out in the draft EU Delegated Act, while aligning with the recommendations of the TCFD. The index is designed to align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a “self-decarbonization” rate of 10% year on year. The index aims to reduce exposure to physical risk arising from extreme weather events by at least 50% and shift index weight from “brown” to “green” using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies. Furthermore, the index also aims to increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks. Finally, the index seeks to reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions and increase the weight of companies with credible carbon reduction targets through the weighting scheme while achieving both a modest tracking error and a low turnover.

Appendix V (continued)

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Thematics Safety Fund

This financial product promotes environmental and social characteristics. The sustainable investment objective of the Sub-Fund is to contribute to the safety and protection of people's health, assets, data, and goods, while generating long term growth of capital through an investment process systematically including sustainability considerations.

This financial product has social sustainable investments as its objective, it does therefore not currently commit to investing in any "sustainable investment" within the meaning of the Taxonomy Regulation. Accordingly, this financial product does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and its portfolio alignment with such Taxonomy Regulation is not calculated.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to the Morgan Stanley Capital International World ("MSCI World") Index. In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index is used as a representative of the broad market for financial purpose and does not intend to be consistent with the sustainable investment objective of the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Thematics Safety Fund**

Legal entity identifier: 549300ZORMPGQM0BCW58

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● <input checked="" type="checkbox"/> Yes	●● <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 96.67%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Fund has contributed to the protection of assets, data, goods and people's health.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

Unless stated otherwise, data are as of 31/12/2022:

1. Percentage of Fund's asset under management that contributes to the themes and meet the materiality or leadership criteria is 100% excluding cash.
2. Percentage of the Fund's assets under management of issuers generating more than 5% of revenue from harmful and/or controversial activities is 0%.
3. Percentage of the Fund's assets under management of issuers whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour is 0%.
4. Percentage of the Fund's assets under management that are subject to ESG analysis by Investment Managers is 100%.
5. Portfolio ESG score's outperforms the ESG score of the Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring.

6.
 1. Percentage of the Fund's assets under management of newly invested issuers that has already high with a negative outlook and/or severe ESG controversies at the time of investment is 0%
 2. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and are capped to 2% is 0 which is below the maximum 5.
 3. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and, within a 6-month time frame:
 - are not engaged or,
 - are engaged but do not demonstrate sufficient performance improvement,
 - is 0.
7.
 1. Total percentage of submitted votes in 2022 is 100% which is above the minimum 95%.
 2. Percentage of submitted votes according to the sustainability-principled policy in 2022 is 100% which is above the minimum 95%.
 8. Percentage of invested issuers covered by targeted engagement is 13% which is above the minimum 5%.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investment did not cause significant harm to other E/S objectives through employing a combination of binding strategies across the end-to-end investment process. The Fund considered the EU SFDR's PAIs at different stages of its investment process, through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement. To demonstrate this, the Fund reports in an annual basis on the following: exposure to adverse activities covered in the PAI, such as coal and weapons; breach of the international norms and standards, including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights; exposure to high and severe level ESG controversies with negative outlook; the Fund's ESG risk score vs its investable universe; and its performance data on its sustainability principles-based voting and engagement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.
- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.
- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In an annual basis, the Fund reports on its exposure to non-compliant companies to the above standards.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.
- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the

Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.

- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Largest investments	Sector	% Assets	Country
API GROUP UN USD	Construction & Engineering	3.98%	United States
RENTOKIL LN GBp	Environmental & Facilities Services	3.65%	United Kingdom

What was the proportion of sustainability-related investments?

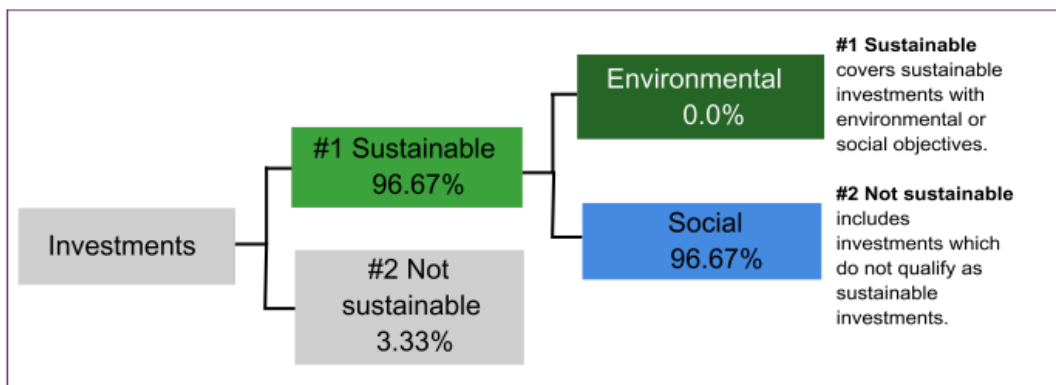

The Fund committed to a minimum sustainable investments of 90%. As of 31/12/2022, the actual investment was 96.67%

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

Sustainable investments: 96.67%

Cash: 3.33%

● **In which economic sectors were the investments made?**

The Fund invested in all economic sectors except energy sector.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

- Yes :
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) shows the green investments made by investee companies, e.g. relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

96.67

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Cash investment for liquidity purposes. This investment does not follow any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

We have followed the investment strategy:

1. Sustainable thematic screening

The Investment Managers have selected securities:

- contributing to the theme’s sub-segments that in turn contribute to 1 or more of the following sustainability targets: food and health safety, data privacy and consumer protection, improved and safe access to digital economy, safe mobility and transport systems, personal and industrial safety systems, and other advanced security systems.
- that have met the materiality or leadership requirement of the themes.
 - Materiality means: the issuer must at least generate 20% of the revenue and/or profits from the relevant products.
 - Leadership requirements: the issuer’s products must be, in the opinion of the Investment Managers, leader in the industry, innovative or with the potential to become disruptive.

2. Activity-based exclusion

The Investment Manager have excluded securities that have exposure to harmful and controversial activities, such as coal, conventional oil and gas, non-conventional weapons etc. For more information, please refer to our exclusion policy under: <https://www.thematics-am.com/en-FR/being-responsible/reports-and-publications>.

3. Behaviour-based exclusion

In addition, the Investment Managers have systematically excluded securities whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour, in particular on environmental protection, human rights, labour rights, and business ethics. These standards include the UN Global Compact Principles, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles for Business and Human Rights, and the International Labour Conventions. The screening is informed by third-party data.

4. In the final portfolio construction phase, the Investment Managers have carried out an ESG analyses using its proprietary ESG assessment guided by established materiality frameworks, such as but not limited to, Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). The Investment Managers have scored individual companies across the 11 different materials environmental, social, and governance indicators drawing from a range of resources, including desktop research, company engagement from at least two third-party rating agencies (ISS and Sustainalytics). The total ESG score has carried an equal weight (25%) as other investment criteria (i.e. Quality, Trading Risk and Management) and has impacted the security's inclusion and final weight of the investment.
5. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager have ensured that the Fund will have a better ESG rating than its Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring. The coverage has been above 90%.
6. Companies exposed to high with negative outlook and/or severe level controversies have been excluded. No company was already in the portfolio and became exposed to high with negative outlook and/or severe ESG controversies.
7. The Investment Managers have intended to exercise 100% of the voting rights on the issuers of the securities held in the portfolios managed, and in compliance with its sustainability principled-based voting policy.
8. The Investment Managers have engaged with a certain percentage of issuers each year.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

- **How did the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Appendix V (continued)

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Thematics Water Fund

Pursuant to the Taxonomy Regulation, this financial product invests in economic activity that contributes to environmental objectives and is subject to the disclosure requirements of Article 9 of the Regulation (EU) 2019/2088 ("SFDR").

This financial product contributes to the following environmental objectives set out in the Article 9 of the Taxonomy Regulation: (i) climate change mitigation, (ii) climate change adaptation, (iii) transition to circular economy, (iv) sustainable use and protection of water and marine resources, (v) pollution prevention and control, (vi) protection and restoration of biodiversity and ecosystems. The Taxonomy framework was not yet applicable in 2021 and as such the Sub-Fund cannot report on its degree of alignment.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to the Morgan Stanley Capital International All Country World ("MSCI ACWI") Index. In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index is used as a representative of the broad market for financial purpose and does not intend to be consistent with the sustainable investment objective of the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Thematics Water Fund**

Legal entity identifier: 549300Z5CQ07UZVGXX17

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input type="checkbox"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective : 61.63% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> It made sustainable investments with a social objective : 34.83%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund has contributed globally to the universal provision of clean water, water pollution prevention and control, and sustainable use and protection of all water resources.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

● **How did the sustainability indicators perform?**

Unless stated otherwise, data are as of 31/12/2022:

1. Percentage of Fund's asset under management that contributes to the themes and meet the materiality or leadership criteria is 100% excluding cash.
2. Percentage of the Fund's assets under management of issuers generating more than 5% of revenue from harmful and/or controversial activities is 0%.
3. Percentage of the Fund's assets under management of issuers whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour is 0%.
4. Percentage of the Fund's assets under management that are subject to ESG analysis by Investment Managers is 100%.
5. Portfolio ESG score's outperforms the ESG score of the Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

NB: a change of methodology has been performed during the exercise 2022. From July 2022, the Sustainalytics score has been used in replacement of the ISS score (that has been used from January to June 2022).

Therefore, the graph is only referring to the July-December period with the Sustainalytics score.

6.

1. Percentage of the Fund's assets under management of newly invested issuers that has already high with a negative outlook and/or severe ESG controversies at the time of investment is 0%
2. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and are capped to 2% is 0 which is below the maximum 5.
3. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and, within a 6 month time frame:
 - are not engaged or,
 - are engaged but do not demonstrate sufficient performance improvement,
 - is 0.

7.

1. Total percentage of submitted votes in 2022 is 100% which is above the minimum 95%.
2. Percentage of submitted votes according to the sustainability-principled policy in 2022 is 100% which is above the minimum 95%.
3. Percentage of invested issuers covered by targeted engagement in 2022 is 6% which is above the minimum 5%.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investment did not cause significant harm to other E/S objectives through employing a combination of binding strategies across the end-to-end investment process. The Fund considered the EU SFDR's PAIs at different stages of its investment process, through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement. To demonstrate this, the Fund reports in an annual basis on the following: exposure to adverse activities covered in the PAI, such as coal and weapons; breach of the international norms and standards,

including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights; exposure to high and severe level ESG controversies with negative outlook; the Fund's ESG risk score vs its investable universe; and its performance data on its sustainability principles-based voting and engagement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.
- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its

investable universe, demonstrating outperformance in terms of ESG risk management.

- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In an annual basis, the Fund reports on its exposure to non-compliant companies to the above standards.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- i. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.

- ii. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.

- iii. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.

- iv. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Largest investments	Sector	% Assets	Country
DANAHER CORP UN USD	Life Sciences Tools & Services	3.97%	United States

ECOLAB INC UN USD	Specialty Chemicals	2.13%	United States

What was the proportion of sustainability-related investments?

The Fund committed to a minimum sustainable investment of 90%. As of 31/12/2022, the actual investment was 96.45%

● *What was the asset allocation?*

Sustainable investments: 96.45%

Of which, 61.63% in environmental sustainable investments and 34.83% in social sustainable investments.

Cash: 3.55%

● *In which economic sectors were the investments made?*

The Fund invested in all economic sectors except energy sector.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) shows the green investments made by investee companies, e.g. relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

- **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

Yes :

In fossil gas In nuclear energy

No

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As of 31/12/2022, the proportion of sustainable investment with an environmental objective was 61.63%.

What was the share of socially sustainable investments?

As of 31/12/2022, the proportion of socially sustainable investment was 34.83%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Cash investment for liquidity purposes. This investment does not follow any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

We have followed the investment strategy:

1. Sustainable thematic screening

The Investment Managers have selected securities:

- contributing to the theme’s sub-segments that in turn contribute to 1 or more of the following sustainability targets: water usage efficiency, sustainable water withdrawals, water treatment technologies, advanced water management technologies; hazardous waste management, pollution monitoring; water supply and water delivery infrastructure.
- that have met the materiality or leadership requirement of the themes.
 - Materiality means: the issuer must at least generate 20% of the revenue and/or profits from the relevant products.
 - Leadership requirements: the issuer’s products must be, in the opinion of the Investment Managers, leader in the industry, innovative or with the potential to become disruptive.

2. Activity-based exclusion

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The Investment Manager have excluded securities that have exposure to harmful and controversial activities, such as coal, conventional oil and gas, non-conventional weapons etc. For more information, please refer to our exclusion policy under: <https://www.thematics-am.com/en-FR/being-responsible/reports-and-publications>.

3. Behaviour-based exclusion

In addition, the Investment Managers have systematically excluded securities whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour, in particular on environmental protection, human rights, labour rights, and business ethics. These standards include the UN Global Compact Principles, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles for Business and Human Rights, and the International Labour Conventions. The screening is informed by third-party data.

4. In the final portfolio construction phase, the Investment Managers have carried out an ESG analyses using its proprietary ESG assessment guided by established materiality frameworks, such as but not limited to, Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). The Investment Managers have scored individual companies across the 11 different materials environmental, social, and governance indicators drawing from a range of resources, including desktop research, company engagement from at least two third-party rating agencies (ISS and Sustainalytics). The total ESG score has carried an equal weight (25%) as other investment criteria (i.e. Quality, Trading Risk and Management) and has impacted the security's inclusion and final weight of the investment.
5. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager have ensured that the Fund will have a better ESG rating than its Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring. The coverage has been above 90%.
6. Companies exposed to high with negative outlook and/or severe level controversies have been excluded. No company was already in the portfolio and became exposed to high with negative outlook and/or severe ESG controversies.
7. The Investment Managers have intended to exercise 100% of the voting rights on the issuers of the securities held in the portfolios managed, and in compliance with its sustainability principled-based voting policy.
8. The Investment Managers have engaged with a certain percentage of issuers each year.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

- *How did the reference benchmark differ from a broad market index?*

Not applicable

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

Not applicable

- *How did this financial product perform compared with the reference benchmark?*

Not applicable

- *How did this financial product perform compared with the broad market index?*

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Natixis International Funds (Lux) I

Additional Information (Unaudited) (continued)

Sustainable Finance Disclosure Regulation (continued)

Thematics Wellness Fund

This financial product promotes environmental and social characteristics. The sustainable investment objective of the Sub-Fund is to foster healthy living and promote wellbeing for all at all ages, while generating long term growth of capital through an investment process systematically including sustainability considerations.

This financial product has social sustainable investments as its objective, it does therefore not currently commit to investing in any "sustainable investment" within the meaning of the Taxonomy Regulation. Accordingly, this financial product does not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the Taxonomy Regulation and its portfolio alignment with such Taxonomy Regulation is not calculated.

The Sub-Fund is not managed relative to a specific index. However, for indicative purposes only, the Sub-Fund's performance may be compared to the Morgan Stanley Capital International All Country World Index ("MSCI ACWI"). In practice, the portfolio of the Sub-Fund is likely to include constituents of the index, however, the Sub-Fund is unconstrained by the reference index and may therefore significantly deviate from it.

The reference index is used as a representative of the broad market for financial purpose and does not intend to be consistent with the sustainable investment objective of the Sub-Fund.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Thematics Wellness Fund**
 Legal entity identifier: 549300MOTBR5LW941E36

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
●● <input checked="" type="checkbox"/> Yes	●● <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : 0.0% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective : 97.82%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Fund has fostered healthy living and promoted wellbeing for all at all ages

No reference benchmark has been designated for the purpose of attaining the sustainable investment objectives.

● **How did the sustainability indicators perform?**

Unless stated otherwise, data are as of 31/12/2022:

1. Percentage of Fund's asset under management that contributes to the themes and meet the materiality or leadership criteria is 100% excluding cash.
2. Percentage of the Fund's assets under management of issuers generating more than 5% of revenue from harmful and/or controversial activities is 0%.
3. Percentage of the Fund's assets under management of issuers whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour is 0%.
4. Percentage of the Fund's assets under management that are subject to ESG analysis by Investment Managers is 100%.
5. Portfolio ESG score's outperforms the ESG score of the Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

6.
 1. Percentage of the Fund's assets under management of newly invested issuers that has already high with a negative outlook and/or severe ESG controversies at the time of investment is 0%
 2. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and are capped to 2% is 0 which is below the maximum 5.
 3. Number of already invested issuers that becomes exposed to high with a negative outlook and/or severe ESG controversies and, within a 6 month time frame:
 - are not engaged or,
 - are engaged but do not demonstrate sufficient performance improvement,
 - is 0.
7.
 1. Total percentage of submitted votes in 2022 is 100% which is above the minimum 95%.
 2. Percentage of submitted votes according to the sustainability-principled policy in 2022 is 100% which is above the minimum 95%.
8. Percentage of invested issuers covered by targeted engagement is 7% which is above the minimum 5%.

● ***How did the sustainable investments not cause significant harm to any sustainable investment objective?***

The sustainable investment did not cause significant harm to other E/S objectives through employing a combination of binding strategies across the end-to-end investment process. The Fund considered the EU SFDR's PAIs at different stages of its investment process, through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement. To demonstrate this, the Fund reports in an annual basis on the following: exposure to adverse activities covered in the PAI, such as coal and weapons; breach of the international norms and standards, including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights; exposure to high and severe level ESG controversies with negative outlook; the Fund's ESG risk score vs its investable universe; and its performance data on its sustainability principles-based voting and engagement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- I. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- II. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.
- III. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score vs its investable universe, demonstrating outperformance in terms of ESG risk management.
- IV. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In an annual basis, the Fund reports on its exposure to non-compliant companies to the above standards.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated above, the Fund considered the EU SFDR's PAIs, and other ESG criteria, at different stages of its investment process through its 4 sustainability approaches: exclusion, norms-based assessment, ESG integration, voting and engagement.

- I. The Fund excludes companies with the following PAIs: those with exposure to illegal and controversial weapons; generates more than 5% of revenue from fossil fuels; in violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; and companies in the energy sector whose GHG intensity are not aligned with the Paris Agreement. In addition to these PAIs, the Fund also exclude companies with more than 5% revenue exposure to the following activities: conventional oil and gas, unconventional oil and gas, conventional weapons and small arms, and tobacco. In an annual basis, the Fund reports on its exposure to these indicators.
- II. In our behaviour/norms-based exclusion, the following PAIs are considered: we exclude companies which lack processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises; and Activities negatively affecting biodiversity sensitive area. In addition, the Fund also exclude companies that are exposed to high and severe risk level of ESG controversies with negative outlook [that have no sufficient risk management]. In an annual basis, the Fund reports on its exposure to non-compliant companies or those exposed to high or severe risk level ESG controversies.
- III. In our ESG integration, where we score companies across material ESG indicators, the following PAIs are considered: GHG emissions and intensity; carbon footprint; energy consumption intensity per high impact climate sector; Activities negatively affecting biodiversity sensitive areas; emissions to water; hazardous waste ratio; board gender diversity; share of non-renewable energy consumption and production; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its ESG risk score

vs its investable universe, demonstrating outperformance in terms of ESG risk management.

- IV. Post investment, we vote based on sustainability principles and target companies for formal engagement, including those who lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and companies which lack disclosures and governance on GHG emissions and intensity; carbon footprint; and unadjusted gender pay-gap. In an annual basis, the Fund reports on its voting data and engagement results to demonstrate its votes in alignment with sustainability principles, as well as how it voted on proposals on related issues, such as climate and pay gaps.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31/12/2022

Largest investments	Sector	% Assets	Country
HOLOGIC INC UW USD	Health Care Equipment	3.72%	United States
MERCK & CO UN USD	Pharmaceuticals	3.41%	United States
TRACTOR UW USD	Specialty Stores	3.25%	United States
SPROUTS UW USD	Food Retail	3.09%	United States
LABORATORY CP UN USD	Health Care Services	3.06%	United States
ESSILORLUXOTTICA FP	Apparel Accessories & Luxury Goods	3.00%	France
THERMO FISHER UN USD	Life Sciences Tools & Services	2.93%	United States
UNITEDHEALTH UN USD	Managed Health Care	2.85%	United States
KERRY GROUP-A ID EUR	Packaged Foods & Meats	2.71%	Ireland
AMPLIFON SPA IM EUR	Health Care Distributors	2.68%	Italy
LULULEMON ATH UW USD	Apparel Accessories & Luxury Goods	2.61%	Canada
PROCTER & UN USD	Household Products	2.61%	United States
PLANET UN USD	Leisure Facilities	2.61%	United States
ZOETIS INC UN USD	Pharmaceuticals	2.60%	United States
DANAHER CORP UN USD	Life Sciences Tools & Services	2.58%	United States

What was the proportion of sustainability-related investments?

The Fund committed to a minimum sustainable investment of 90%. As of 31/12/2022, the actual investment was 97.82%

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

Sustainable investments: 97.82%

Cash: 2.18%

● **In which economic sectors were the investments made?**

The Fund invested in all economic sectors except energy sector.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

● **Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy¹?**

- Yes :
- In fossil gas In nuclear energy
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) shows the green investments made by investee companies, e.g. relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- **What was the share of investments made in transitional and enabling activities?**

Not applicable

- **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

Not applicable

- **What was the share of socially sustainable investments?**

As of 31/12/2022, the proportion of socially sustainable investment was 97.82%.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Cash investment for liquidity purposes. This investment does not follow any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

We have followed the investment strategy:

1. Sustainable thematic screening

The Investment Managers have selected securities:

- contributing to the theme’s sub-segments that in turn contribute to 1 or more of the following sustainability targets: Improve access to products and services for physical and mental health and well-being, improve access to products and services for basic human needs including food, healthcare and education, and enable decent and meaningful work.
- that have met the materiality or leadership requirement of the themes.
 - Materiality means: the issuer must at least generate 20% of the revenue and/or profits from the relevant products.
 - Leadership requirements: the issuer’s products must be, in the opinion of the Investment Managers, leader in the industry, innovative or with the potential to become disruptive.

2. Activity-based exclusion

The Investment Manager have excluded securities that have exposure to harmful and controversial activities, such as coal, conventional oil and gas, non-conventional weapons etc. For more information, please refer to our exclusion policy under: <https://www.thematics-am.com/en-FR/being-responsible/reports-and-publications>.

3. Behaviour-based exclusion

In addition, the Investment Managers have systematically excluded securities whose behaviour and overall performance are considered non-compliant to established global sustainability norms and principles governing corporate behaviour, in particular on environmental protection, human rights, labour rights, and business ethics. These standards include the UN Global Compact Principles, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles for Business and Human Rights, and the International Labour Conventions. The screening is informed by third-party data.

4. In the final portfolio construction phase, the Investment Managers have carried out an ESG analyses using its proprietary ESG assessment guided by established materiality frameworks, such as but not limited to, Sustainability Accounting Standards Board (SASB) and Global Reporting Initiative (GRI). The Investment Managers have scored individual companies across the 11 different materials environmental, social, and governance indicators drawing from a range of resources, including desktop research, company engagement from at least two third-party rating agencies (ISS and Sustainalytics). The total ESG score has carried an equal weight (25%) as other investment criteria (i.e. Quality, Trading Risk and Management) and has impacted the security's inclusion and final weight of the investment.
5. In order to measure the effectiveness of the ESG approach implemented, the Investment Manager have ensured that the Fund will have a better ESG rating than its Investable Universe (measured as the rolling 3 months average of the weekly score), after eliminating at least 20% of the worst-rated securities of the latter, based on external third-party ESG risk scoring. The coverage has been above 90%.
6. Companies exposed to high with negative outlook and/or severe level controversies have been excluded. No company was already in the portfolio and became exposed to high with negative outlook and/or severe ESG controversies.
7. The Investment Managers have intended to exercise 100% of the voting rights on the issuers of the securities held in the portfolios managed, and in compliance with its sustainability principled-based voting policy.
8. The Investment Managers have engaged with a certain percentage of issuers each year.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

- **How did the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.
