# 獨立會計師報告

致瑞銀（盧森堡）股票基金投資人

## 查核意見

依本會計師之意見，此財務報表係依據盧森堡與財務報表編製相關之法律與規章之規定編製，足以真實及允當表達瑞銀（盧森堡）股票基金（下稱「本基金」）及其子基金截至 2024 年 11 月 30 日為止之財務狀況，以及截至該日止之年度（自 2023 年 12 月 1 日起至 2024 年 11 月 30 日）營運與淨資產之變動狀況。

## 本會計師查核內容

本財務報表包含：

- 截至 2024 年 11 月 30 日為止之本基金合併資產負債表以及各子基金資產負債表；
- 截至本會計年度為止之本基金合併損益表及各子基金損益表；
- 截至本會計年度為止之本基金合併淨資產變動表及各子基金淨資產變動表；
- 截至 2024 年 11 月 30 日為止各子基金之證券投資及其他淨資產報表；以及
- 財務報表附註（包括重大會計政策彙總）。

## 查核意見之基礎

本會計師係依照 2016 年 7 月 23 日頒布之審計行業法律及盧森堡金融業監管委員會(Commission de Surveillance du Secteur Financier, CSSF)所採行之國際審計準則(ISAs)執行查核工作。本會計師依照該規範之責任詳述於本查核報告「傘型基金查核會計師(Réviseur d'entreprises agréé)查核財務報表之責任」一節。

本會計師相信取得之查核證據係足夠且適當的，為查核意見提供基礎。

本會計師已依 CSSF 所採行之國際會計師倫理標準委員會之專業會計師倫理守則（含國際獨立性標準）(IESBA Code)及相關審查會計報表所要求的道德規範，與本基金保持超然獨立。本會計師已履行上述道德規範之其他道德責任。

## 其他資訊

本基金之管理公司董事會須對其他資訊負責。其他資訊包括年報內之資訊，但不包括財務報表及本會計師查核報告。

本會計師對財務報表之查核意見並不涵蓋其他資訊，本會計師亦不會對該等資訊表達任何形式之保證。

基於本會計師對財務報表之查核，本會計師之責任係閱讀其他資訊，並在此過程中，判斷該等資訊與財務報表或本會計師查核過程中所瞭解之情況，是否存在重大抵觸或有重大不實表達。若本會計師執行查核工作，認定其他資訊有重大不實表達，本會計師有報告之義務。就此，本會計師認為無須報告之情事。

---

## 本基金管理公司董事會對財務報表應負之責任

本基金管理公司董事會之責任係依照與財務報表編製相關之盧森堡法律與管理規範編製允當表達之財務報表，且維持與財務報表編製有關之必要內部控制，以確保財務報表未存有導因於舞弊或錯誤之重大不實表達。

於編製財務報表時，本基金管理公司董事會之責任亦包括評估本基金及其子基金繼續經營之能力、相關事項之揭露（如適用），以及繼續經營會計基礎之採用，除非管理公司董事會意圖清算本基金或其任一子基金或停止營業，或除清算或停業外別無實際可行之其他方案。

---

## 傘型基金查核會計師(réviseur d'entreprises agréé)查核財務報表之責任

本會計師查核財務報表之目的，係對財務報表整體是否無存有導因於舞弊或錯誤之重大不實表達取得合理確信，並出具包含本會計師查核意見之「傘型基金查核會計師」查核報告。合理確信係高度確信，惟依照2016年7月23日頒布之審計業法律及CSSF所採行之國際審計準則(ISAs)執行之查核工作無法保證必能偵出財務報表存有重大不實表達。重大不實表達可能導因於舞弊或錯誤。如不實表達之個別金額或彙總數可合理預期將影響財務報表使用者所作之經濟決策，則被認為具有重大性。

本會計師依照2016年7月23日頒布之審計行業法律及CSSF所採用之國際審計準則查核時，運用專業判斷及專業懷疑。本會計師亦執行下列工作：

- 辨別並評估財務報表導因於舞弊或錯誤之重大不實表達風險，對所評估之風險設計及執行適當之因應對策，並取得足夠及適切之查核證據以作為查核意見之基礎。因舞弊可能涉及共謀、偽造、故意遺漏、不實聲明或逾越內部控制，故未偵出導因於舞弊之重大不實表達之風險高於導因於錯誤者。
- 對與查核攸關之內部控制取得必要之瞭解，以設計當時情況下之查核程序，惟其目的非對本基金內部控制之有效性表示意見。
- 評估本基金管理公司董事會所採用會計政策之適當性，及其所作會計估計與相關揭露之合理性。
- 依據所取得之查核證據，對本基金管理公司董事會採用繼續經營會計基礎之適當性，以及使本基金或其任一子基金繼續經營之能力產生重大疑慮之事件或情況是否存在重大不確定性，作出結論。本會計師若認為該等事件或情況存在重大不確定性，則須於傘型基金查核會計師查核報告中提醒財務報表使用者注意財務報表之相關揭露，或於該等揭露係屬不適當時修正查核意見。本會計師之結論係以截至傘型基金查核會計師查核報告日所取得之查核證據為基礎。惟未來事件或情況可能導致本基金或其任一子基金不再具有繼續經營之能力。

- 評估財務報表（包含相關附註）之整體表達、結構及內容，以及財務報表是否允當表達相關交易及事件。

本會計師與治理單位溝通之事項，包括所計劃之查核範圍及時間，以及重大查核發現（包括於查核過程中所辨認之內部控制顯著缺失）。

#### **"U-X"**

#### **Additional characteristics:**

##### **Currencies**

The unit classes may be denominated in AUD, BRL, CAD, CHF, CZK, DKK, EUR, GBP, HKD, JPY, NOK, PLN, RMB, RUB, SEK, SGD, USD, NZD or ZAR. For unit classes issued in the currency of account of the subfund, this currency will not be included in the unit class name. The currency of account features in the name of the relevant subfund.

##### **“hedged”**

For unit classes with “hedged” in their name and with reference currencies different to the subfund’s currency of account (“**unit classes in foreign currencies**”), the risk of fluctuations in the value of the reference currency is hedged against the subfund’s currency of account. This hedging shall be between 95% and 105% of the total net assets of the unit class in foreign currency. Changes in the market value of the portfolio, as well as subscriptions and redemptions of unit classes in foreign currencies, can result in the hedging temporarily surpassing the aforementioned range. The Management Company and the Portfolio Manager will take all necessary steps to bring the hedging back within the aforementioned limits.

The hedging described has no effect on possible currency risks resulting from investments denominated in a currency other than the subfund’s currency of account.

##### **“Portfolio hedged”**

For unit classes with “portfolio hedged” in their name, the currency risk of the subfund’s investments is hedged against the reference currency of the unit class as follows: Systematically, between 95% and 105% of the proportion of investments in developed nation foreign currencies relative to the unit class’ total net assets is hedged, except where this is unfeasible or not cost-effective. Emerging market foreign currency investments are not hedged. Changes in the market value of the subfund’s investments, as well as subscriptions and redemptions of unit classes, can cause the hedge to temporarily exceed the range specified by the Portfolio Manager. The Management Company and the Portfolio Manager will take all necessary steps to bring the hedging back within the aforementioned limits. The hedging described is used to hedge the currency risk resulting from investments denominated in a currency other than the unit class’ reference currency, as described above.

##### **“BRL hedged”**

The Brazilian real (ISO 4217 currency code: BRL) may be subject to exchange control regulations and repatriation limits set by the Brazilian government. Prior to investing in BRL classes, investors should also bear in mind that the availability and tradability of BRL classes, and the conditions under which they may be available or traded, depend to a large extent on the political and regulatory developments in Brazil. The risk of fluctuations is hedged as described above under “hedged”. Potential investors

should be aware of the risks of reinvestment, which could arise if the BRL class has to be liquidated early due to political and/or regulatory circumstances. This does not apply to the risk associated with reinvestment due to liquidation of a unit class and/or the subfund in accordance with the section “Liquidation and merger of the Fund and its subfunds or unit classes”.

##### **“RMB hedged”**

Investors should note that the renminbi (ISO 4217 currency code: CNY), the official currency of the People’s Republic of China (the “**PRC**”), is traded on two markets, namely as onshore RMB (CNY) in mainland China and offshore RMB (CNH) outside mainland China.

Units in classes with “RMB hedged” in their name are units whose net asset value is calculated in offshore RMB (CNH).

Onshore RMB (CNY) is not a freely convertible currency and is subject to foreign exchange control policies and repatriation restrictions imposed by the PRC government. Offshore RMB (CNH), on the other hand, may be traded freely against other currencies, particularly EUR, CHF and USD. This means the exchange rate between offshore RMB (CNH) and other currencies is determined on the basis of supply and demand relating to the respective currency pair.

Convertibility between offshore RMB (CNH) and onshore RMB (CNY) is a regulated currency process subject to foreign exchange control policies and repatriation restrictions imposed by the PRC government in coordination with offshore supervisory and governmental agencies (e.g. the Hong Kong Monetary Authority).

Prior to investing in RMB classes, investors should bear in mind that the requirements relating to regulatory reporting and fund accounting of offshore RMB (CNH) are not clearly regulated. Furthermore, investors should be aware that offshore RMB (CNH) and onshore RMB (CNY) have different exchange rates against other currencies. The value of offshore RMB (CNH) can potentially differ significantly from that of onshore RMB (CNY) due to a number of factors including, without limitation, foreign exchange control policies and repatriation restrictions imposed by the PRC government at certain times, as well as other external market forces. Any devaluation of offshore RMB (CNH) could adversely affect the value of investors’ investments in the RMB classes. Investors should therefore take these factors into account when calculating the conversion of their investments and the ensuing returns from offshore RMB (CNH) into their target currency.

Prior to investing in RMB classes, investors should also bear in mind that the availability and tradability of RMB classes, and the conditions under which they may be available or traded, depend to a large extent on the political and regulatory developments in the PRC. Thus, no guarantee can be given that offshore RMB (CNH) or the RMB classes will be offered and/or traded in future, nor can there be any guarantee as to the conditions under which offshore RMB (CNH) and/or RMB classes may be made available or traded. In particular, since the currency of account of the relevant subfunds offering the RMB classes would be in a currency other than offshore RMB (CNH), the ability of the relevant subfund to make redemption

payments in offshore RMB (CNH) would be subject to the subfund's ability to convert its currency of account into offshore RMB (CNH), which may be restricted by the availability of offshore RMB (CNH) or other circumstances beyond the control of the Management Company.

The risk of fluctuations is hedged as described above under "hedged".

Potential investors should be aware of the risks of reinvestment, which could arise if the RMB class has to be liquidated early due to political and/or regulatory circumstances. This does not apply to the risk associated with reinvestment due to liquidation of a unit class and/or the subfund in accordance with the section "Liquidation and merger of the Fund and its subfunds or unit classes".

#### **"acc"**

The income of unit classes with "-acc" in their name is not distributed unless the Management Company decides otherwise.

#### **"dist"**

The income of unit classes with "-dist" in their name is distributed unless the Management Company decides otherwise.

#### **"qdist"**

Units in classes with "-qdist" in their name may make quarterly distributions, gross of fees and expenses. Distributions may also be made out of the capital (this may include, inter alia, realised and unrealised net gains in net asset value) ("**capital**"). Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to subscribe to accumulating (-acc) rather than distributing (-dist, -qdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation.

#### **"mdist"**

Units in classes with "-mdist" in their name may make monthly distributions, gross of fees and expenses. Distributions may also be made out of capital. Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to subscribe to accumulating (-acc) rather than distributing (-dist, -mdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation. The maximum entry costs for units in classes with "-mdist" in their name is 6%.

#### **"UKdist"**

The aforementioned unit classes can be issued as those with "UKdist" in their name. In these cases, the Management Company intends to distribute a sum which corresponds to 100% of the reportable income within the meaning of the **UK reporting fund** rules when the unit classes are subject to these reporting fund rules. The Management Company does not intend to make taxable values for these unit classes available in other countries, as they are intended for investors whose investment in the unit class is liable to tax in the UK.

#### **"2%", "4%", "6%", "8%"**

Units in classes with "2%" / "4%" / "6%" / "8%" in their name may make monthly (-mdist), quarterly (-qdist) or annual (-dist) distributions at the respective aforementioned annual percentage rates, gross of fees and expenses. The distribution amount is calculated based on the net asset value of the respective unit class at the end of the month (in the case of monthly distributions), financial quarter (in the case of quarterly distributions) or financial year (in the case of annual distributions). These unit classes are suitable for investors who wish for more stable distributions, unrelated to the past or expected returns or income of the respective subfund.

Distributions may thus also be made from the capital. Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore choose to invest in the accumulating (-acc) instead of the distributing (-dist, -qdist, -mdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist, -qdist, -mdist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation.

#### **"seeding"**

Units in classes with "seeding" in their name are only offered during a limited time period. Further subscriptions are prohibited after the end of this period, unless otherwise decided by the Management Company. However, units can still be redeemed in accordance with the conditions for unit redemptions. Unless otherwise decided by the Management Company, the smallest tradable unit, the initial issue price and the minimum subscription amount shall correspond to the characteristics of the unit classes listed above.

The Fund is subject to no restrictions with regard to the size of its net assets, the number of units, number of subfunds and duration.

The Fund is a single and undividable legal entity. With respect to the unitholders, each subfund is regarded as being separate from the others. The assets of a subfund can only be used to offset the liabilities which the subfund concerned has assumed.

The acquisition of Fund units implies acceptance of the management regulations by the unitholder.

There is no provision in the management regulations for a meeting of the unitholder.

The financial year of the Fund ends on the last day of November.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

**Responsibilities of the Board of Directors of the Management Company for the financial statements**

The Board of Directors of the Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Management Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Management Company is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Management Company either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

**Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Management Company;
- conclude on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

## Report of the Portfolio Manager

In the financial year from, 1 December 2023 to 30 November 2024, the biotech sector had positive returns, marking a recovery from the previous year which saw softer performance due to macroeconomic headwinds. An uptick in M&A and IPO activity this year bolstered the sector, underpinned by renewed optimism of a more favorable environment for innovation and growth. The prospect of lower interest rates and a more stable economic outlook also reinstated investor confidence in companies' ability to fund innovation, and larger pharmaceutical companies actively seeking acquisition opportunities further boosted sentiment in the biotech sector.

Against this backdrop, the subfund closed the financial year with a positive performance. During the period, the major positive contributors to absolute fund performance were underweight positions in Biogen, BioMarin, and an overweight in Guardant Health. Our main individual negative contributors were our overweight in Genmab, underweight in Natera, and overweight in Moderna.

## Report of the Portfolio Manager

For the year ending 30 November 2024, China markets posted strong gains. The market declined at the beginning of the year as investors were disappointed by the slow economic recovery and the lack of cohesive policy, until September 2024. Chinese equities then rallied after the government announced a package of supportive policy measures including rate cuts, potential fiscal stimulus and a call to stem the decline of the real estate market.

The fund's performance was flattish in absolute terms on a net of fees basis. Holdings in Consumer Discretionary and Financials contributed the most, while holdings in Health Care were the main detractor. On a stock level, Tencent Holdings and Meituan were the key contributors. On the other hand, NetEase, CSPC Pharmaceutical and Kweichow Moutai were the major drags on performance.

## Report of the Portfolio Manager

During the financial year, 1 year to 30 November 2024, the broader market had a positive return on a rally in tech companies involved in the AI supply chain, India continued to gain favor as its economy produced robust broad-based momentum, the Fed started cutting rates and China announced a “policy pivot” towards stronger policy support amid a moribund economy. Sector-wise, IT and Financials were the best performing.

The subfund posted a positive performance too in the reporting period, albeit slightly behind the broader market. IT and Financials were the key contributors while Health Care detracted. Market-wise, Taiwan, India and Malaysia added most to returns while China detracted most. Key stock contributors were TSMC, CIMB and Naspers while key detractors were Samsung Electronics, PDD and NetEase.

## Report of the Portfolio Manager

The financial year from 1 December 2023 to 30 November 2024 started with lingering geopolitical and economic uncertainties amid the outbreak of war in the Middle East. However, concerns soon faded thanks to mounting confidence in the downward course of inflation, which enabled the global rate cutting cycle to begin and buoyed equity markets.

The subfund posted a positive absolute performance over the financial year. Stock selection in the information technology and utilities sectors positively contributed, while financials and communication services detracted. We strongly benefited from our position in Euronext, the leading stock exchange company in Europe, which continues to execute well on its strategic plan. We like this investment as Euronext is a GDP+ grower with a strong balance sheet and is expecting to generate €3 billion cashflow over the next three years. We think Euronext's inexpensive valuation combined with management's focus on distributing cash to shareholders through dividends and buybacks makes the company an attractive investment opportunity. Deutsche Telekom, the German incumbent telecommunications operator, also positively contributed to performance, benefitting from the global rate cutting cycle. Three quarters of Deutsche Telekom's value is in the highly successful listed US subsidiary, T-Mobile, which gives us exposure to US growth at attractive valuations. On the other hand, Universal Music Group, a Dutch music entertainment business, negatively contributed to performance after subscription growth slowed. ASML, the leading supplier of lithography equipment to the semiconductor industry, was also a detractor, as the stock fell out of favor with investors over the summer following Intel's second quarter miss and capex cut, and then further disappointed investors by lowering their full-year revenue guidance from EUR 35-40 billion to EUR 30-35 billion. We met with Roger Dassen, ASML's CFO, post profit warning and came away reassured that the long-term structural growth story remains intact, although near-term headwinds and visibility are unusually low.

## Report of the Portfolio Manager

The financial year from 1 December 2023 to 30 November 2024 started with lingering geopolitical and economic uncertainties amid the outbreak of war in the Middle East. However, concerns soon faded thanks to mounting confidence in the downward course of inflation, which enabled the global rate cutting cycle to begin and buoyed equity markets.

The subfund posted a positive absolute performance over the financial year. Stock selection in the materials and utilities sectors positively contributed, while financials and consumer staples detracted. Notably, our holding in Nestlé, the world's largest food and beverage company, weighed on performance. Nestlé has faced a series of execution issues over the last year, which ultimately cumulated in a CEO change as the board works to address the long period of underperformance. ASML, the leading supplier of lithography equipment to the semiconductor industry, was also a detractor, as the stock fell out of favor with investors over the summer following Intel's second quarter miss and capex cut, and then further disappointed investors by lowering their full-year revenue guidance from EUR 35-40 billion to EUR 30-35 billion. We met with Roger Dassen, ASML's CFO, post profit warning and came away reassured that the long-term structural growth story remains intact, although near-term headwinds and visibility are unusually low. On the other hand, we strongly benefited from our holding in Galderma, a skincare company which launched its initial public offering earlier this year. We also benefited from our position in Anglo American, a diversified metal ore mining company, which rallied following an attempted takeover from BHP in April. While the deal did not materialize, we held the name as we think the business is attractively valued using our baseline long-term commodity price forecasts. Anglo American also recently opted to demerge its South African coal assets following considerable shareholder pressure. This transaction will allow Anglo to focus on the production of metals that will be in demand during the transition away from fossil fuels towards clean energy such as copper and platinum. We recently met with Anglo's CFO, John Heasley, for a progress update on their ongoing transformation which remains on-track.

## Report of the Portfolio Manager

The reporting period, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and the start of falling interest rates. The majority of equity indices were positive over the period, due to a narrowly based market recovery driven by US mega-caps, as the 'flight to safety' and surge in artificial intelligence (AI) drove the share prices of these Mega Cap tech stocks higher. This extreme concentration has persisted, with some of the largest companies composing a higher proportion of the major market indices than at any other point in the past few decades.

The subfund had a positive performance in absolute terms during the financial year. Stock selection in Financials and Industrials contributed positively; while stock selection in Energy and Real Estate detracted the most.

## Report of the Portfolio Manager

The reporting period, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and the start of falling interest rates. The majority of equity indices were positive over the period, due to a narrowly based market recovery driven by US mega-caps, as the 'flight to safety' and surge in artificial intelligence (AI) drove the share prices of these Mega Cap tech stocks higher. This extreme concentration has persisted, with some of the largest companies composing a higher proportion of the major market indices than at any other point in the past few decades.

The subfund had a positive performance in absolute terms during the financial year. Stock selection in Financials and Information Technology contributed positively; while stock selection in Materials and Energy detracted the most.

## Report of the Portfolio Manager

For the financial year ending 30 November 2024, Greater China markets posted strong gains. The market declined at the beginning of the year as investors were disappointed by the slow economic recovery and the lack of cohesive policy, until September 2024. Chinese equities then rallied after the government announced a package of supportive policy measures including rate cuts, potential fiscal stimulus and a call to stem the decline of the real estate market.

The fund delivered a positive performance in absolute terms on a net of fees basis. Holdings in IT and Financials contributed the most, while holdings in Health Care and Consumer Staples were the main detractors. On a stock level, TSMC, Tencent Holdings and Meituan were the key contributors. On the other hand, Netease, CSPC Pharmaceutical and Kweichow Moutai were the major drags on performance.

## Report of the Portfolio Manager

During the financial year, from 1 December 2023 to 30 November 2024, the Japanese equity market rose in yen terms. Projected corporate earnings were consistently revised upward, reflecting the normalization of the economy. A perception that Japan was going through an inflection point from the 30 plus years of deflation to inflation penetrated widely among investors, which helped the valuations of the market to expand.

The subfund posted a positive performance during the financial year. Our preference for quality Japanese companies in areas such as entertainment, banks, and staffing agencies worked well. We continued to focus on companies with a sustainable business model and compelling valuations.

## Report of the Portfolio Manager

In the financial year, from 1 December 2023 to 30 November 2024, European Mid Cap equity markets provided investors with a positive performance. Even though economic activity continued to contract, abating inflation and interest rate cuts supported investor expectations of a gradual soft landing. Industrials, Communication Services and Financials were the strongest performing sectors over the financial year, while Energy and Materials lagged the market.

The subfund performed positively during the financial year and was helped by positive stock selection within the Financials and Health Care sectors, while stock selection in Industrials, Communication Services and Consumer Discretionary detracted from performance. At the individual stock level positive relative contributors included 3i Group, Rolls Royce, and Erste Group, whilst detractors included Aker BP, Infrastructure Wireless Italiane, and Barry Callebaut.

## Report of the Portfolio Manager

The financial year, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and falling interest rates. The narrow market leadership which began in 2023 persisted into the year, with the 'flight to safety' and surge in AI driving the share prices of mega cap stocks higher. Against this backdrop, the subfund posted a positive (absolute) performance during the financial year, but underperformed its benchmark.

On a relative basis, stock selection and sector allocation were headwinds to performance over the financial year. Stock selection in Information Technology and Energy detracted, while stock selection in Consumer Discretionary and Industrials added value. In terms of sector allocation, our overweight in Consumer Staples and underweight in Utilities detracted, while our slight overweight in Health Care and underweight in Information Technology detracted from performance.

## Report of the Portfolio Manager

The financial year, from 1 December 2023 to 30 November 2024 generally saw an equity market rally as recession fears receded driven by cooling inflation and falling interest rates. The narrow market leadership which began in 2023 persisted into the year, with the 'flight to safety' and surge in AI driving the share prices of Mega Cap stocks higher. Against this backdrop, the subfund posted a positive (absolute) performance during the financial year, but underperformed its benchmark.

On a relative basis, stock selection detracted from performance, while sector allocation contributed positively. Selection was positive within Health Care and Communication Services, but was offset by negative selection within Consumer Staples and Consumer Discretionary. In terms of sector allocation, our overweight in Information Technology and underweight in Utilities added value, while our underweight in Industrials and allocation to cash detracted from performance.

## Report of the Portfolio Manager

In the financial year, from 1 December 2023 to 30 November 2024, the healthcare sector had positive returns, though lagged the broader market. Performance within the sector was marked with high dispersion, with stocks exposed to the obesity opportunity set leading the advance, while other stocks in the sector significantly underperformed as they struggled to maintain the pace of growth from Covid-related demand. The sector underperformed also in Q4 of 2024 as post-election concerns around President-elect Trump's key healthcare appointments rekindled investor fears.

In the financial year, the subfund's performance was positive. Key contributors to absolute performance included our overweights in Sandoz, Philips, and Intuitive Surgical. On the other hand, overweights in Moderna, DexCom, and Genmab detracted from performance.

## Report of the Portfolio Manager

During the financial year from 1 December 2023 to November 2024, the technology sector continued its strong performance which started earlier in 2023 as enthusiasm around artificial intelligence (AI) persisted. Slowing inflation also added to optimism that central banks were nearing the end of their rate hiking cycles, which provided further support to longer duration assets. Over the reporting period, Information Technology was the top performing sector in the market. From an industry group perspective, Semiconductors & Semiconductor Equipment had the highest returns, followed by Technology Hardware & Equipment; as many of these companies benefited from AI tailwinds.

The subfund had a positive absolute performance over the reporting period. Key contributors to absolute performance included our underweight in Adobe, and our positions in AMD and Broadcom. On the other hand, positions in WolfSpeed, Ubisoft Entertainment, and Intel detracted from performance.

## Report of the Portfolio Manager

The reporting period, from 1 December 2023 to 30 November 2024, generally saw an equity market rally as recession fears receded and inflation showed signs of cooling, reinforcing the view that markets are approaching the end of the rate hiking cycle. The majority of equity indices were positive over the period, due to ongoing optimism around AI which provided support to growth expectations. Growth stocks outperformed value in a narrowly based market recovery driven by US megacaps, as the 'flight to safety' and surge in AI drove the share prices of these Mega Cap tech stocks higher. This extreme concentration persisted into 2024, with some of the largest companies composing a higher proportion of the major market indices than at any point in the past few decades.

The subfund had a positive performance during the financial year. Stock selection in Consumer Staples and the lack of Energy exposure contributed positively; while stock selection in Information Technology and Consumer Discretionary detracted the most.

# Notes to the Financial Statements

## Note 1 – Summary of significant accounting policies

The financial statements have been prepared in accordance with the generally accepted accounting principles for investment funds in Luxembourg. The significant accounting policies are summarised as follows:

### a) Calculation of the net asset value

The net asset value and the issue and redemption price per unit of each subfund or unit class are expressed in the reference currency of the subfund or unit class concerned and are calculated every business day by dividing the overall net assets of the subfund attributable to each unit class by the number of units in circulation in this unit class of the subfund.

In this context, “business day” refers to normal bank business days in Luxembourg (i.e. each day on which the banks are open during normal business hours) with the exception of individual non-statutory rest days in Luxembourg and days on which exchanges in the main countries in which the subfund invests are closed or 50% or more subfund investments cannot be adequately valued.

The percentage of the net asset value attributable to each unit class of a subfund changes each time units are issued or redeemed. It is determined by the ratio of the units in circulation in each unit class to the total number of subfund units in circulation, taking into account the fees charged to that unit class.

### b) Valuation principles

- Liquid assets (whether in the form of cash and bank deposits, bills of exchange, cheques, promissory notes, expense advances, cash dividends and declared or accrued interest still receivable) are valued at face value, unless this value is unlikely to be fully paid or received, in which case their value is determined by deducting an amount deemed appropriate to arrive at their real value.

- Securities, derivatives and other assets listed on a stock exchange are valued at the most recent market prices available. If these securities, derivatives or other assets are listed on several stock exchanges, the most recently available price on the stock exchange that represents the major market for this asset shall apply.

In the case of securities, derivatives and other assets not commonly traded on a stock exchange and for which a secondary market among securities traders exists with pricing in line with the market, the Management Company may value these securities, derivatives and other investments based on these prices. Securities, derivatives and other investments not listed on a stock exchange, but traded on another regulated market that operates regularly and is recognised and open to the public, are valued at the most recently available price on this market.

- Securities and other investments not listed on a stock exchange or traded on another regulated market, and for which no appropriate price can be obtained, are valued by the Management Company according to other principles chosen by it in good faith on the basis of probable market prices.

- Derivatives not listed on a stock exchange (OTC derivatives) are valued on the basis of independent pricing sources. If only one independent pricing source is available for a derivative, the plausibility of the valuation obtained will be verified using calculation models that are recognised by the Management Company and the Fund’s auditor, based on the market value of that derivative’s underlying.
- Units of other undertakings for collective investment in transferable securities (UCITS) and/or undertakings for collective investment (UCIs) are valued at their last known asset value.
- Money market instruments not traded on a stock exchange or on another regulated market open to the public will be valued on the basis of the relevant curves. Curve-based valuations are calculated from interest rates and credit spreads. The following principles are applied in this process: The interest rate nearest the residual maturity is interpolated for each money market instrument. Thus calculated, the interest rate is converted into a market price by adding a credit spread that reflects the creditworthiness of the underlying borrower. This credit spread is adjusted if there is a significant change in the borrower’s credit rating.
- Securities, money market instruments, derivatives and other assets denominated in a currency other than the relevant subfund’s currency of account, and not hedged by foreign exchange transactions, are valued using the average exchange rate (between the bid and ask prices) known in Luxembourg or, if none is available, using the rate on the most representative market for that currency.
- Term and fiduciary deposits are valued at their nominal value plus accumulated interest.
- The value of swaps is calculated by an external service provider and a second independent valuation is provided by another external service provider. Such calculations are based on the net present value of all cash flows (both inflows and outflows). In some specific cases, internal calculations (based on models and market data made available by Bloomberg) and/or broker statement valuations may be used. The valuation method depends on the security in question and is chosen pursuant to the applicable UBS valuation policy.

The Management Company is authorised to apply other generally recognised and verifiable valuation criteria in good faith to arrive at an appropriate valuation of the net assets if a valuation in accordance with the foregoing provisions proves unfeasible or inaccurate.

Due to fees and charges as well as the buy-sell spreads for the underlying investments, the actual costs of buying and selling assets and investments for a subfund may differ from the last available price or, if applicable, the net asset value used to calculate the net asset value per unit. These costs have a negative impact on the value of a subfund and are termed “dilution”. To reduce the effects of dilution, the Board of Directors may at its own discretion make a dilution adjustment to the net asset value per unit (swing pricing).

Units are issued and redeemed based on a single price: the net asset value per unit. To reduce the effects of dilution, the net asset value per unit is nevertheless adjusted on valuation days as described below; this takes place irrespective of whether the subfund is in a net subscription or net redemption position

on the relevant valuation day. If no trading is taking place in a subfund or class of a subfund on a particular valuation day, the unadjusted net asset value per unit is applied. The Board of Directors has discretion to decide under which circumstances such a dilution adjustment should be made. The requirement to carry out a dilution adjustment generally depends on the scale of subscriptions or redemptions of units in the relevant subfund. The Board of Directors may apply a dilution adjustment if, in its view, the existing unitholders (in the case of subscriptions) or remaining unitholders (in the case of redemptions) could otherwise be put at a disadvantage. The dilution adjustment may take place if:

- (a) a subfund records a steady fall (i.e. a net outflow due to redemptions);
- (b) a subfund records a considerable volume of net subscriptions relative to its size;
- (c) a subfund shows a net subscription or net redemption position on a particular valuation day; or
- (d) In all other cases in which the Board of Directors believes a dilution adjustment is necessary in the interests of the unitholders.

When a valuation adjustment is made, a value is added to or deducted from the net asset value per unit depending on whether the subfund is in a net subscription or net redemption position; the extent of the valuation adjustment shall, in the opinion of the Board of Directors, adequately cover the fees and charges as well as the buy-sell spreads. In particular, the net asset value of the respective subfund will be adjusted (upwards or downwards) by an amount that (i) reflects the estimated tax expenses, (ii) the trading costs that may be incurred by the subfund, and (iii) the estimated bid-ask spread for the assets in which the subfund invests. As some equity markets and countries may show different fee structures on the buyer and seller side, the adjustment for net inflows and outflows may vary. Generally speaking, adjustments shall be limited to a maximum of 2% of the relevant applicable net asset value per unit. Under exceptional circumstances (e.g. high market volatility and/or illiquidity, extraordinary market conditions, market disruptions etc.), the Board of Directors may decide to apply temporarily a dilution adjustment of more than 2% of the relevant applicable net asset value per unit in relation to each subfund and/or valuation date, provided that the Board of Directors is able to justify that this is representative of prevailing market conditions and is in the unitholders' best interest. This dilution adjustment shall be calculated according to the procedure specified by the Board of Directors. Unitholders shall be informed through the normal channels whenever temporary measures are introduced and once the temporary measures have ended. The net asset value shall be calculated separately for each class of the subfund. However, dilution adjustments affect the net asset value of each class to the same degree in percentage terms. The dilution adjustment is made at subfund level and relates to capital activity, but not to the specific circumstances of each individual investor transaction.

For all subfunds the Swing Pricing methodology is applied. If there were Swing Pricing adjustments to the net asset value at the end of the year, this can be seen from the three-year comparison of the net asset value information of the subfunds.

The issue and redemption price per unit represents the adjusted net asset value.

As some of the Fund's subfunds may be invested in markets that are closed at the time their assets are valued, the Management Company may – by way of derogation to the aforementioned provisions – allow the net asset value per unit to be adjusted in order to more accurately reflect the fair value of these subfunds' assets at the time of valuation. In practice, the securities in which the subfunds are invested are generally valued on the basis of the latest available prices at the time of calculating the net asset value per unit, as described above. There may, however, be a substantial time difference between the close of the markets in which a subfund invests and the time of valuation.

As a result, developments that may influence the value of these securities and that occur between the closure of the markets and the time of valuation are not generally taken into account in the net asset value per unit of the subfund concerned. If, as a result of this, the Management Company deems that the most recently available prices of the securities in a subfund's portfolio do not reflect their fair value, it may allow the net asset value per unit to be adjusted in order to reflect the assumed fair value of the portfolio at the time of valuation. Such an adjustment is based on the investment policy determined by the Management Company and a number of practices. If the value is adjusted as described above, this will be applied consistently to all unit classes in the same subfund.

The Management Company reserves the right to apply this measure to the relevant subfunds of the Fund whenever it deems this to be appropriate.

Evaluating assets at fair value calls for greater reliability of judgement than evaluating assets for which readily available market quotations can be referred to. Fair-value calculations may also be based on quantitative models used by price reporting providers to determine the fair value. No guarantee can be given that the Fund will be in a position to accurately establish the fair value of an asset when it is about to sell the asset around the time at which the Fund determines the net asset value per unit. As a consequence, if the Fund sells or redeems units at the net asset value at a time when one or more participations are valued at fair value, this may lead to a dilution or increase in the economic participation of the existing unitholders.

If necessary, additional valuations may be made throughout the day. Such new valuations shall apply for subsequent issues and redemptions of units.

#### **c) Net realized gain (loss) on sales of securities**

The realized gains or losses on the sales of securities are calculated on the basis of the average cost of the securities sold.

#### **d) Valuation of forward foreign exchange contracts**

The unrealized gain (loss) of outstanding forward foreign exchange contracts is valued on the basis of the forward exchange rates prevailing at valuation date.

### e) Valuation of financial futures contracts

Financial futures contracts are valued based on the latest available published price applicable on the valuation date. Realized gains and losses and the changes in unrealized gains and losses are recorded in the statement of operations. The realized gains and losses are calculated in accordance with the FIFO method, i.e. the first contracts acquired are regarded as the first to be sold.

### f) Valuation on options

Outstanding options traded on a regulated market are valued on the settlement price or the last available market price of the instruments.

Options which are not listed on an official stock exchange (OTC options) are marked to market based upon daily prices obtained from Bloomberg option pricer functionality and checked against third party pricing agents.

The realized gains or losses on options and the change in unrealized appreciation or depreciation on options are disclosed in the statement of operations and in the changes in net assets respectively under the positions realized gains (losses) on options and Unrealized appreciation (depreciation) on options.

### g) Conversion of foreign currencies

Bank accounts, other net assets and the valuation of the investments in securities held denominated in currencies other than the currency of account of the different subfunds are converted at the mid closing spot rates on the valuation date. Income and expenses denominated in currencies other than the currency of the different subfunds are converted at the mid closing spot rates at payment date. Gain or loss on foreign exchange is included in the statement of operations.

The cost of securities denominated in currencies is other than the currency of account of the different subfunds is converted at the mid closing spot rate prevailing on the day of acquisition.

### h) Accounting of securities' portfolio transactions

The securities' portfolio transactions are accounted for the bank business day following the transaction dates.

### i) Combined financial statements

The combined financial statements of the Fund are expressed in EUR. The various items of the combined statement of net assets, the combined statement of operations and the combined statement of changes in net assets as at 30 November 2024 of the Fund are equal to the sum of the corresponding items in the financial statements of each subfund converted into EUR at the following exchange rates.

The following exchange rates were used for the conversion of the combined financial statements as at 30 November 2024:

#### Exchange rates

EUR 1	=	JPY	158.572832
EUR 1	=	USD	1.056200

### j) Receivable on securities sales, Payable on securities purchases

The position "Receivable on securities sales" can also include receivables from foreign currency transactions. The position "Payable on securities purchases" can also include payables from foreign currency transactions.

Receivables and payables from foreign exchange transactions are netted.

### k) Income recognition

Dividends, net of withholding taxes, are recognized as income on the date upon which the relevant securities are first listed as "ex-dividend". Interest income is accrued on a daily basis.

The aforementioned flat fee shall be used as follows:

1. In accordance with the following provisions, a maximum flat fee based on the net asset value of the Fund is paid from the Fund's assets for the management, administration, portfolio management and distribution of the Fund (if applicable), as well as for all Depositary tasks, such as the safekeeping and supervision of the Fund's assets, the processing of payment transactions and all other tasks listed in the "Depositary and Main Paying Agent" of the sales prospectus. This fee is charged to the Fund's assets pro rata temporis upon every calculation of the net asset value, and is paid on a monthly basis (maximum flat management fee). The relevant maximum flat management fee will not be charged until the corresponding unit classes have been launched. An overview of the maximum flat management fees can be found under "The subfunds and their special investment policies" of the sales prospectus. The actual maximum rate applied to the flat management fee can be found in the annual and semi-annual reports.

This fee is shown in the Statement of Operations as "Flat fee".

2. The maximum flat management fee does not include the following fees and additional expenses, which are also taken from the Fund assets:
  - a) all other Fund asset management expenses for the sale and purchase of assets (bid-ask spread, market-based brokerage fees, commissions, fees, etc.); As a rule, these expenses are calculated upon the purchase or sale of the respective assets. In derogation hereto, these additional expenses, which arise through the sale and purchase of assets in connection with the settlement of the issue and redemption of units, are covered by the application of the swing pricing principle pursuant to the section titled "Net asset value, issue, redemption and conversion price" of the sales prospectus;
  - b) fees of the supervisory authority for the establishment, modification, liquidation and merger of the Fund, as well as all charges payable to the supervisory authorities and any stock exchanges on which the subfunds are listed;
  - c) auditor's fees for the annual audit and for authorisations in connection with creations, alterations, liquidations and mergers within the Fund, as well as any other fees paid to the audit firm for services provided in relation to the administration of the Fund and as permitted by law;
  - d) fees for legal consultants, tax consultants and notaries in connection with the creation, registration in distribution countries, alteration, liquidation and merger of the Fund, as well as for the general safeguarding of the interests of the Fund and its investors, insofar as this is not expressly prohibited by law;
  - e) costs for publishing the Fund's net asset value and all costs for notices to investors, including translation costs;
  - f) costs for the Fund's legal documents (prospectuses, KID, annual and semi-annual reports, and other documents legally required in the countries of domiciliation and distribution);
  - g) costs for the Fund's registration with any foreign supervisory authorities (if applicable), including fees payable to the foreign supervisory authorities, as well as translation costs and fees for the foreign representative or paying agent;
  - h) expenses incurred through use of voting or creditors' rights by the Fund, including fees for external advisers;
  - i) costs and fees related to any intellectual property registered in the Fund's name, or to the Fund's rights of usufruct;
  - j) all expenses arising in connection with any extraordinary measures taken by the Management Company, Portfolio Manager or Depositary to protect the interests of the investors;
  - k) if the Management Company participates in class action suits in the interests of investors, it may charge expenses arising in connection with third parties (e.g. legal and Depositary costs) to the Fund's assets. Furthermore, the Management Company may bill for all administrative costs, provided these are verifiable, and disclosed and accounted for in the Fund's published total expense ratio (TER).

These commissions and fees are shown in the Statement of Operations as "Other commissions and fees".

3. The Management Company may pay trailer fees for the distribution of the Fund.

For unit class F, an additional fee will also be charged; this shall be determined via a separate contract between the investor and UBS Asset Management Switzerland AG or one of its authorised distribution partners.

For unit class "I-B", a fee is charged to cover the costs of fund administration (comprising the costs of the Management Company, the administrative agent and the Depositary). The costs for asset management and distribution are charged outside of the Fund under a separate contract concluded directly between the investor and UBS Asset Management Switzerland AG or one of its authorised representatives.

Costs relating to the services performed for unit classes I-X, K-X and U-X for asset management, fund administration (comprising the costs of the Management Company, the administrative agent and the Depositary) and distribution are covered by the compensation to which UBS Asset Management Switzerland AG is entitled under a separate contract with the investor.

Costs relating to the services to be performed for unit classes "K-B" for asset management purposes are covered by the compensation to which UBS Asset Management Switzerland AG or one of its authorised distribution partners is entitled under a separate contract with the investor.

All costs that can be attributed to individual subfunds will be charged to these subfunds.

Costs that can be allocated to unit classes will be charged to those unit classes. Costs pertaining to some or all subfunds/unit classes will be charged to those subfunds/unit classes in proportion to their respective net asset values.

With regard to subfunds that may invest in other UCIs or UCITS under the terms of their investment policies, fees may be incurred both at the level of the subfund as well as at the level of the relevant target fund. The management fees (excluding performance fees) of the target fund in which the assets of the subfund are invested may amount to a maximum of 3%, taking into account any trailer fees.

Should a subfund invest in units of funds that are managed directly or by delegation by the Management Company itself or by another company linked to the Management Company through common management or control or through a substantial direct or indirect holding, no issue or redemption charges may be charged to the investing subfund in connection with these target fund units.

Details on the Fund's ongoing costs (or ongoing charges) can be found in the KIDs.

## Note 3 – Taxe d'abonnement

The Fund is subject to Luxembourg law. In accordance with current legislation in the Grand Duchy of Luxembourg, the Fund is not subject to any Luxembourg withholding, income, capital gains or wealth taxes. From the total net assets of each subfund, however, a tax of 0.05% p.a. ("taxe d'abonnement") payable to the Grand Duchy of Luxembourg is due at the end of every quarter (reduced taxe d'abonnement amounting to 0.01% p.a. for unit classes F, I-A1, I-A2, I-A3, I-A4, I-B, I-X and U-X). This tax is calculated on the total net assets of each subfund at the end of every quarter. In the event that the conditions to benefit from the reduced 0.01% rate are no longer satisfied, all units in classes F, I-A1, I-A2, I-A3, I-A4, I-B, I-X and U-X may be taxed at the rate of 0.05%.

Subfunds may benefit from reduced taxe d'abonnement rates ranging from 0.01% to 0.04% p.a. for the portion of net assets that are invested into environmentally sustainable economic activities as defined in Article 3 of EU Regulation 2020/852 of 18 June 2020.

#### b) Transactions in Units of the Fund

Connected persons may invest in a new subfund/unitclass for the purpose of providing seed capital (“Direct Investment”), with the intent of remaining invested until the subfund/unitclass has substantial net assets. Such investments are at arm’s length and comply with all late trading/market timing prevention requirements. As of 30 November 2024, the Management Company and its affiliates / persons had not contributed any seed capital to the subfunds / unit classes registered in Hong Kong.

The payment of distributions must not result in the net assets of the Fund falling below the minimum amount for Fund’s assets laid down by law. If distributions are made, payment will be effected within four months of the end of the financial year.

The Management Company is authorized to pay interim dividends and to suspend the payment of distributions.

An income equalisation amount will be calculated so that the distribution corresponds to the actual income entitlement.

## Note 7 – Soft commission arrangements

If permitted by the laws governing the Portfolio Manager, the Portfolio Manager and its affiliates may enter into soft commission arrangements with certain brokers which they engage in security transactions on behalf of the subfunds under which certain goods and services used to support investment decision making will be received without a direct payment in return. Such commissions are defined as soft dollars by the Hong Kong Securities and Futures Commission. This is only done when the transaction execution is consistent with the best execution standards, and it has been determined in good faith that the brokerage fee is reasonable in relation to the value of the execution and/or brokerage services provided by the broker.

Goods and services received solely included research services. The relative costs or benefits of research received from brokers are not allocated among particular clients or funds because it is believed that the research received is, in the aggregate, of assistance in fulfilling the Portfolio Manager and its affiliates’ overall responsibilities to their clients or funds they manage. The amounts of transactions executed with brokers having soft commission arrangements in place and the related

commissions that have been paid by the subfunds for these transactions are as follows:

Furthermore, there are securities that have defaulted in the past where no pricing quotes exists. These securities have been fully written off by the Fund. They are monitored by the management company that will allocate any return that might still arise (ie dividend) to the subfunds. They are not shown within the portfolio but separately in this note.

## Note 13 – Subsequent events

There were no events after the year-end that require adjustment to or disclosure in the Financial Statements.

## Note 14 – Applicable law, place of performance and authoritative language

The Luxembourg District Court is the place of performance for all legal disputes between the unitholders, the Management Company and the Depositary. Luxembourg law applies. However, in matters concerning the claims of investors from other countries, the Management Company and/or the Depositary can elect to make themselves and the Fund subject to the jurisdiction of the countries in which the Fund units were bought and sold.

The English version of these financial statements is the authoritative version and only this version was audited by the auditor. However, in the case of units sold to investors from the other countries in which Fund units can be bought and sold, the Management Company and the Depositary may recognize approved translations (i.e. approved by the Management Company and the Depositary) into the languages concerned as binding upon themselves and the Fund.

## Note 15 – OTC-Derivatives and Securities Lending

If the Fund enters into OTC transactions, it may be exposed to risks related to the creditworthiness of the OTC counterparties: when the Fund enters into futures contracts, options and swap transactions or uses other derivative techniques it is subject to the risk that an OTC counterparty may not meet (or cannot meet) its obligations under a specific or multiple contracts. Counterparty risk can be reduced by depositing a security. If the Fund is owed a security pursuant to an applicable agreement, such security shall be held in custody by the Depositary in favour of the Fund. Bankruptcy and insolvency events or other credit events with the OTC counterparty, the Depositary or within their subdepository/correspondent bank network may result in the rights or recognition of the Fund in connection with the security to be delayed, restricted or even eliminated, which would force the Fund to fulfill its obligations in the framework of the OTC transaction, in spite of any security that had previously been made available to cover any such obligation.

The Fund may lend portions of its securities portfolio to third parties. In general, lendings may only be effected via recognized clearing houses such as Clearstream International or Euroclear, or through the intermediary of prime financial institutions that specialise in such activities and in the modus specified by them. Collateral is received in relation to securities lent. Collateral is composed of high quality securities in an amount typically at least equal to the market value of the securities loaned.

UBS Europe SE, Luxembourg Branch acts as securities lending agent.

## Risk management

Risk management in accordance with the commitment approach is applied pursuant to the applicable laws and regulatory provisions.

## Leverage

The leverage for UCITS using the value-at-risk approach is defined pursuant to the applicable ESMA directives as the total of the notional values of the derivatives used by the respective subfund. According to this definition, leverage may result in artificially increased leverage amounts, as some derivatives that can be used for hedging purposes may be included in the calculation. Consequently, this information does not necessarily reflect the precise actual leverage risk that the investor is exposed to.

# Appendix 4 – Remuneration Policy (unaudited)

The Board of Directors of UBS Asset Management (Europe) S.A. (the “Management Company” or the “AIFM”) has adopted a remuneration framework (the “Framework”) whose objectives are:

on one hand; to ensure that the remuneration framework is in line with the applicable laws and regulations, and more specifically with provisions defined under

- (i) the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment in Transferable Securities as amended from time to time (the “UCITS Law”) transposing the UCITS Directive 2009/65/EC (the “UCITS Directive”) as amended by Directive 2014/91/EU (the “UCITS V Directive”);
- (ii) the Alternative Investment Fund Managers Directive (“AIFMD”) 2011/61/EU, transposed into the Luxembourg AIFM Law dated from 12 July 2013, as amended from time to time;
- (iii) the ESMA’s guidelines on sound remuneration policies under the UCITS Directive - ESMA/2016/575 and ESMA’s guidelines on sound remuneration policies under the AIFMD - ESMA/2016/579 both published on 14 October 2016;
- (iv) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector issued on 1 February 2010;
- (v) the Directive 2014/65/EU on markets in financial instruments (MiFID II);
- (vi) the Commission Delegated Regulation 2017/565/EU of 25 April 2016 supplementing Directive 2014/65/EU (MiFID II Level 2);
- (vii) Regulation (EU) 2019/2088 of the European parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (“SFDR”);
- (viii) the CSSF Circular 23/841, transposing the ESMA Guidelines on certain aspects of the MiFID II remuneration requirements (ESMA 35-43-3565) (MiFID ESMA Guidelines).

and on the other hand, to comply with the Total Reward Principles of UBS Group.

The Framework is meant not to encourage excessive risk taking, to contain measures to avoid conflicts of interest, to be consistent with, and promote, sound and effective risk management, including sustainability risk where applicable, and to be consistent with the UBS Group business strategy, objectives and values.

More details about the Framework of the Management Company/the AIFM, which describes, but not limited to, how remuneration and benefits are determined, are available at <https://www.ubs.com/ame-regulatorydisclosures>.

The Framework is subject to an annual review by the control functions of the Management Company/the AIFM after review and update by the Human Resources department; and is approved by the Board of Directors of the Management Company/the AIFM. Last approval by the Board of Directors took place on 25 September 2024. No material change was made to the Framework.

## Application of the requirements and remuneration disclosure

In accordance with the Article 151 of the UCITS Law and Article 20 of the AIFM Law, the Management Company/the AIFM is required to disclose at least annually certain information concerning its remuneration framework and the practices for its Identified Staff.

The Management Company/the AIFM complies with the UCITS Directive/AIFMD principles in a way and to the extent that is appropriate to its size, internal organisation and the nature, scope and complexity of its activities.

Considering the total size of funds under management, both UCITS and AIFs although a significant portion is not complex or risky investment, the Management Company/the AIFM judges that the proportionality principle may not be applicable at the level of the company but at the level of the Identified Staff.

By application of the proportionality principle for the Identified Staff, the following requirements on pay-out processes for Identified Staff are not applied:

- The payment of variable remuneration in instruments related mainly to the funds in relation to which they perform their activities;
- Deferral requirements;
- Retention periods;
- Incorporation of ex-post risk factors (i.e. malus or clawback arrangements).

# Appendix 4 – Remuneration Policy (unaudited)

The deferral requirements remain however applicable when the annual variable remuneration of Identified Staff exceeds the de minimis threshold adopted by the Management Company or where an employee's total annual compensation is exceeding the threshold defined under the UBS Group Compensation Framework; the variable compensation will be treated in line with the plan rules defined under the UBS Group Compensation Framework.

## Remuneration of Management Company/AIFM staff

The aggregate amounts of total remuneration, split into fixed and variable, paid by the Management Company/the AIFM to its staff and its Identified Staff during the financial year ended as at 31 December 2023 are as follows:

EUR 1 000	Fixed remuneration	Variable remuneration	Total remuneration	No of beneficiaries
All staff	12 161	2 787	14 948	104
- whereof Identified Staff	6 794	2 159	8 953	44
- thereof Senior Management*	1 937	677	2 614	10
- thereof Other Identified Staff	4 857	1 482	6 339	34

\* Senior Management includes the CEO, the Conducting Officers, the Head of Compliance, the Branch Managers and the Independent Director.

## Remuneration of the delegates' identified staff

As market or regulatory practice develops the Portfolio Manager(s) may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made and in case of changes to the identified staff and/or in case of change in the number of subfunds over the year, this may result in disclosures in relation to the Fund not being comparable to the disclosures made in the prior year.

For the year ending 31 December 2023, the aggregate total remuneration paid by the delegated Investment Manager to its Identified Staff in relation to the Fund amounted to EUR 4 180 611, of which EUR 3 847 044 represented the variable remuneration (9 beneficiaries).

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

### 1.4 “Exposure to companies active in the fossil fuel sector”:

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

### 1.10 “Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises”:

- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM’s Stewardship Committee are excluded

### 1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed “Sustainability Exclusion Policy” in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

### 1.3 “GHG intensity of investee companies”

- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either absolute or relative to a benchmark

When assessing “do no significant harm” (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria.

The following PAI indicators are additionally part of this signal:

1.7 “Activities negatively affecting bio-diversity-sensitive areas”

1.13 “Board gender diversity”

1.15. “GHG Intensity”

1.16. “Investee countries subject to social violations”

Information on consideration of PAIs on sustainability factors is also available in the sub-fund’s annual report.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. At present, the following PAI indicators are considered by means of exclusions from the investment universe:

### 1.4 “Exposure to companies active in the fossil fuel sector”:

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

### 1.10 “Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises”:

The link to the Sustainability Exclusion Policy can be found in the section headed “Sustainability Exclusion Policy” in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

### 1.3 “GHG intensity of investee companies”

- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either absolute or relative to a benchmark

When assessing “do no significant harm” (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

The exclusions include thermal coal mining and thermal coal-based energy production & oil sands, the portfolio manager selects investments based upon a lower absolute or relative scope 1+2 carbon intensity. UBS Asset Management does not invest in companies involved in controversial weapons i.e. cluster munitions, anti-personnel mines, chemical and biological weapons, or companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons.

The Portfolio Manager employs a proprietary ESG Risk Dashboard, the Dashboard allows equity and credit analysts to quickly identify companies with significant ESG risks via the "UBS ESG Risk Signal". This clear, actionable signal serves as starting point for more in-depth analysis of the underlying sources of these risks and the links to their investment cases.

*Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action will be excluded from the investment universe.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

1.4 "Exposure to companies active in the fossil fuel sector":

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":

- Companies violating the United Nations Global Compact UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded

1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed “Sustainability Exclusion Policy” in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

## 1.3 “GHG intensity of investee companies”

- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either absolute or relative to a benchmark

When assessing “do no significant harm” (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

## 1.7 “Activities negatively affecting bio-diversity-sensitive areas”

## 1.13 “Board gender diversity”

## 1.15. “GHG Intensity”

## 1.16. “Investee countries subject to social violations”

Information on consideration of PAIs on sustainability factors is also available in the sub-fund’s annual re-port.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

### 1.4 “Exposure to companies active in the fossil fuel sector”:

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

### 1.10 “Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises”:

- Companies violating the United Nations Global Compact (UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM’s Stewardship Committee are excluded

### 1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed “Sustainability Exclusion Policy” in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

### 1.3 “GHG intensity of investee companies”

- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either absolute or relative to a benchmark

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

When assessing “do no significant harm” (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

1.7 “Activities negatively affecting bio-diversity-sensitive areas”

1.13 “Board gender diversity”

1.15. “GHG Intensity”

1.16. “Investee countries subject to social violations”

Information on consideration of PAIs on sustainability factors is also available in the sub-fund’s annual re-port.

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Portfolio Manager applied exclusions to the investment universe of the financial product. The link to the Sustainability Exclusion Policy can be found in the main body of the Sales Prospectus.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

### 1.4 “Exposure to companies active in the fossil fuel sector”:

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

### 1.10 “Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises”:

- Companies violating the United Nations Global Compact (UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM’s Stewardship Committee are excluded

### 1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed “Sustainability Exclusion Policy” in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

### 1.3 “GHG intensity of investee companies”

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either absolute or relative to a benchmark.

When assessing “do no significant harm” (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

1.7 “Activities negatively affecting bio-diversity-sensitive areas”

1.13 “Board gender diversity”

1.15. “GHG Intensity”

1.16. “Investee countries subject to social violations”

Information on consideration of PAIs on sustainability factors is also available in the sub-fund’s annual report.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Companies violating the United Nations Global Compact (UNGC) principles, who do not demonstrate credible corrective action were excluded from the investment universe.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

### 1.4 “Exposure to companies active in the fossil fuel sector”:

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded
- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

### 1.10 “Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises”:

- Companies violating the United Nations Global Compact UNGC principles which do not demonstrate credible corrective action as determined by UBS-AM’s Stewardship Committee are excluded

### 1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% owner-ship stake) of such a company.

The link to the Sustainability Exclusion Policy can be found in the section headed “Sustainability Exclusion Policy” in the main body of the Sales Prospectus.

The following PAI indicator is considered by virtue of the promoted characteristics:

### 1.3 “GHG intensity of investee companies”

- The Portfolio Manager selects investments based upon a low scope 1+2 carbon intensity, either absolute or relative to a benchmark

When assessing “do no significant harm” (DNSH), we consider selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual

# Appendix 5 – Sustainable Finance Disclosure Regulation (Regulation (EU) 2019/2088) (unaudited)

thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria. The following PAI indicators are additionally part of this signal:

1.7 “Activities negatively affecting bio-diversity-sensitive areas”

1.13 “Board gender diversity”

1.15. “GHG Intensity”

1.16. “Investee countries subject to social violations”

Information on consideration of PAIs on sustainability factors is also available in the sub-fund’s annual re-port.
