## Statements of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

### 5G Connectivity – Statement of Significant Purchases and Sales

# NOTES TO THE AUDITED FINANCIAL STATEMENTS

## FOR THE YEAR ENDED 31 DECEMBER 2022

### 1. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted by the Company are as follows:

#### Basis of Preparation of Financial Statements

The financial statements have been prepared in accordance with accounting standards generally accepted in Ireland, Irish Statute comprising the Companies Act 2014 (as amended), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended and the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). The financial statements are prepared in accordance with Financial Reporting Standard ("FRS") 102: 'The financial reporting standard applicable in the UK and Republic of Ireland'. Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Chartered Accountants Ireland and issued by the Financial Reporting Council ("FRC").

The financial statements are prepared under the historical cost convention as modified by the revaluation of the financial assets and financial liabilities held at fair value through profit and loss. Valuation time is market close on the relevant dealing day. The dealing day is each business day or such other day as the Directors may determine and notify to the administrator and to the shareholders in advance. The Directors have made an assessment of the Company's ability to continue as a going concern and are satisfied that the Company has the resources to continue in business for the foreseeable future and at least 12 months from the date these financial statements were approved. Furthermore, the Directors are not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements are prepared on the going concern basis.

The format and certain wordings of the financial statements have been adapted from those contained in the Companies Act 2014 (as amended) and FRS 102 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund. The Company meets the criteria to avail of the exemption available to certain open-ended investment funds under FRS 102 not to prepare a cash flow statement.

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, such as taxation or going concern assumption are disclosed in the following notes. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ended 31 December 2022 and 31 December 2021 is included in Note 12 and relates to the determination of fair value of financial instruments with significant unobservable inputs.

#### Financial Assets and Financial Liabilities at Fair Value through Profit or Loss

##### (i) Classification

The Company has chosen to apply the recognition and measurement provisions of International Financial Reporting Standard 9 "Financial Instruments" ("IFRS 9"), and the disclosure and presentation requirements of FRS 102 to account for all the financial instruments. In accordance with IFRS 9, on initial recognition, the Company classifies financial assets as measured at amortised cost or fair value through profit or loss. A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss: (a) it is held within a business model whose objective is to hold assets to collect contractual cash flows; and (b) its contractual terms give rise on specified dates to cash flows that are SPPI (Solely payments of principal and interest). All other financial assets of the Portfolios are measured at fair value through profit or loss. The Company has classified its investments as financial assets or financial liabilities at fair value through profit or loss. All derivatives in a receivable position (positive fair value) are included in financial assets at fair value through profit or loss. All derivatives in a payable position (negative fair value) are included in financial liabilities at fair value through profit or loss.

Financial assets that are not at fair value through profit or loss include certain balances due from brokers and accounts receivable which are measured at amortised cost.

Financial liabilities that are not at fair value through profit and loss include certain balances due to brokers and accounts payable which are measured at amortised cost.

##### (ii) Initial Measurement

Purchases and sales of financial instruments are accounted for at trade date for financial statement purposes. Realised gains and losses on disposals of financial instruments are calculated using the first in first out method. Financial instruments categorised as financial assets at fair value through profit or loss are measured initially at fair value with transaction costs for such instruments being recognised directly in the Profit and Loss Account.

**FOR THE YEAR ENDED 31 DECEMBER 2022****1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Financial Assets and Financial Liabilities at Fair Value through Profit or Loss (continued)****(iii) Subsequent Measurement**

After initial measurement, the Company measures financial instruments classified as financial assets at fair value through profit or loss, at their fair values. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their official quoted market price on a recognised exchange or sourced from a reputable broker/counterparty in the case of non-exchange traded instruments, at the balance sheet date without any deduction for estimated future selling costs. In accordance with IFRS 9 the Company's securities and other assets are valued at the last traded price as at 31 December 2022 and 2021 to determine the Net Assets Attributable to Holders of Redeemable Participating Shares ("Net Assets").

However, the Directors may adjust the value of financial assets if it considers such adjustment is required to better reflect the fair value thereof. If a quoted official market price is not available on a recognised stock exchange or from a broker/counterparty, the probable realisation of value shall be calculated with care and in good faith in accordance with the Company's valuation policy. Such probable realisation values may be determined by the Administrator using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions. For more details on valuation policies for all security types please refer to "Fair Value of Investments" section in Note 12. Subsequent changes in the fair value of financial instruments at fair value through the profit or loss are recognised in the Profit and Loss Account.

**(iv) Derecognition of Financial Assets and Liabilities**

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or when the financial assets are transferred and the transfer qualifies for derecognition in accordance with IFRS 9. The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

**Real Estate Investment Trusts**

Units or shares in real estate investment trusts will be valued at the latest available Net Asset Value ("NAV") or, if listed or traded on a regulated market, at the last quoted trade price or the mid quotation or, if unavailable or unrepresentative, the latest available NAV as deemed relevant to the collective investment scheme.

**Investment Funds**

The fair value of any investment which is a unit of or participation in an investment fund is the latest available unaudited NAV of such unit or participation.

**Term Loans**

Certain Portfolios may invest in direct debt instruments which are interests in amounts owed by corporate, governmental, or other borrowers to lenders or lending syndicates. A Portfolio's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties ("Bank Loan"). A Bank Loan is often administered by a bank or other financial institution (the "Lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, a Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt by the lender of payments from the borrower. A Portfolio generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Portfolio may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement. When a Portfolio purchases assignments from lenders it acquires direct rights against the borrower of the loan.

The Portfolio may have difficulty trading assignments and participations to third parties. There may be restrictions on transfers and only limited opportunities may exist to sell such securities in secondary markets. As a result, the Portfolio may be unable to sell assignments or participations at the desired time or may be able to sell only at a price less than fair value.

The Portfolio may enter into a loan agreement for a certain committed amount, however the full amount of this commitment may not be drawn down by the borrower. These unfunded commitments represent the remaining obligation of the Portfolio to the borrower. At any point in time, up to the maturity date of issue, the borrower may demand the unfunded portion. The fair value of these unfunded loan commitments is included in Balance Sheet under "Income receivable and other assets".

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Participatory Notes**

The Portfolios may invest in participatory notes. Participatory notes which are fully paid up and have a zero strike price, exhibit the identical risk and return characteristics as in the case where the Portfolio had acquired the underlying equity directly.

**Asset Backed Securities and Mortgage Backed Securities**

Inputs used to value asset backed securities and mortgage backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and other market information, which may include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, and reference data, such as market research publications, when available.

**To Be Announced Securities**

The Portfolios may enter into To Be Announced ("TBA") purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Portfolio holds and maintains until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Portfolio may enter into offsetting contracts for the forward sale of other securities that they own. Income on the securities will not be earned until settlement date. Unsettled TBA purchase commitments are valued at the current market price.

The Portfolios may enter into TBA sale commitments to hedge their portfolio positions or to sell mortgage backed securities they own under delayed delivery arrangements. Proceeds of TBA sales commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction. Unsettled TBA sale commitments are valued at current market value, generally according to the procedures described previously in the accounting policies.

**Contingent Convertible Securities**

Contingent convertible securities ("CoCos") are a form of hybrid security that are intended to either convert into equity or have their principal written down upon the occurrence of certain triggers. The triggers are generally linked to regulatory capital thresholds or regulatory actions calling into question the issuer's continued viability as a going concern. The unique equity conversion or principal write-down features of CoCos are tailored to the issuer and its regulatory requirements. CoCos typically will be issued in the form of subordinated debt instruments in order to provide the appropriate regulatory capital treatment prior to a conversion. In addition, CoCos may have no stated maturity and may have fully discretionary coupons that can potentially be cancelled at the issuer's discretion or may be prohibited by the relevant regulatory authority from being paid in order to help the issuer absorb losses.

**Forward Currency Contracts**

A forward currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The market value of a forward currency contract fluctuates with changes in forward currency exchange rates. Forward currency contracts are marked to market daily and the change in value is recorded by the Portfolio as an unrealised gain or loss. Realised gains or losses equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed are recorded upon delivery or receipt of the currency or, if a forward currency contract is offset by entering into another forward currency contract with the same broker, upon settlement of the net gain or loss.

**Futures Contracts**

Futures contracts may include certain options on exchange-traded futures contracts. Initial margin deposits are made upon entering into futures contracts and are generally made in cash and cash equivalents. The fair value of futures contracts is based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. Gains or losses on open futures contracts are shown in the Schedule of Investments of each relevant Portfolio and as appropriate, on the Balance Sheet as financial assets/financial liabilities at fair value through profit or loss.

**Swap Contracts**

A swap contract is a privately negotiated agreement between a Portfolio and a counterparty to exchange or swap the return generated by one instrument for the return generated by another instrument. Some swap contracts are net settled. When entering into an over-the-counter ("OTC") swap contract and during the term of the transaction, the Portfolio and/or the swap counterparty may post or receive cash or securities as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Certain clearinghouses currently offer clearing for limited types of swaps. In a cleared swap transaction, a Portfolio typically enters into the transaction with a financial institution counterparty that is then cleared through a central clearinghouse. Upon acceptance of a swap by a central clearinghouse, the original swap is extinguished and replaced with a swap with the clearinghouse, thereby reducing or eliminating the Portfolio's exposure to the credit risk of the original counterparty.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Swap Contracts (continued)**

A Portfolio typically will be required to post specified levels of both initial and variation margin with the clearinghouse or at the instruction of the clearinghouse. The daily change in valuation is recorded as a receivable or payable for variation margin and settled in cash with the centrally clearing party.

*Interest Rate/Inflation Swaps*

A Portfolio may enter into interest rate or inflation swap contracts which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage a Portfolio's exposure to interest rates. Under the terms of both interest rate swaps and inflation swaps, a party agrees to pay the swap counterparty a fixed-rate payment in exchange for the other party paying the Fund a variable-rate payment. Interest rate swap and inflation swap contracts are marked-to-market daily based in some cases on quotations from counterparties and in other cases from pricing services and the change in value, if any is recorded as an unrealised gain or loss. Payments made or received are recorded as part of realised gains and losses. Some interest rate swaps can be considered as forward starting swaps. Accruals on forward starting swaps begin at a future date.

*Credit Default Swaps*

A credit default swap is a bilateral financial contract under which the protection buyer pays a fee, usually expressed in basis points per annum on the notional amount, in return for a payment by the protection seller contingent on the occurrence of a credit event, such as a bankruptcy, default, or restructuring, with respect to a referenced entity. The credit events and applicable settlement mechanism used to determine the contingent payment are negotiated between the counterparties at the time of trading.

Once the credit event has been declared, the protection buyer has the right to settle the contract. Settlement is usually physical, with the protection buyer having the right to deliver bonds of the reference entity up to the notional amount of the contract. In return, the protection buyer receives the par value of those obligations. Selling protection is the synthetic equivalent of buying a bond or alternative form of debt. Buying protection is the equivalent of synthetically shorting or hedging a bond or other credit exposure. Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the reference entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardised terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices change periodically, usually every six months, and for most indices, each name has an equal weight in the index.

The use of credit default swap contracts is restricted to the extent that the benefits to a Portfolio mirror that which could be obtained by direct investment in the underlying instruments and that the swaps do not expose a Portfolio to risks which it would not otherwise assume (other than the exposure to the credit default swap counterparty). The upfront payment received by a Portfolio, as protection seller, is recorded as a liability on the Portfolio's books. An upfront payment made by a Portfolio, as protection buyer, is recorded as an asset on the Portfolio's books. Payments received or paid by a Portfolio are recorded as realised gains or losses. Credit default swaps are valued using a pricing service provider. Where no pricing service provider is available, contracts may be marked-to-market daily based upon quotations received from counterparties or based upon calculations using valuation models and the change, if any, is recorded as an unrealised gain or loss. Payments received or paid as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses.

*Total Return Swaps*

Total return swaps involve commitments to pay fixed or floating rate interest in exchange for a market-linked return based on a notional amount. To the extent the total return of the reference security or index underlying the total return swap exceeds or falls short of the offsetting interest rate obligation, a Portfolio will receive a payment or make a payment to the counterparty, respectively. Certain risks may arise when entering into total return swap transactions, including counterparty default, liquidity or unfavorable changes in the value of the underlying reference security or index. Cash settlement in and out of the swaps may occur at a reset date or any other date, at the discretion of the Portfolio and the counterparty, over the life of the agreement, and is generally determined based on limits and thresholds established as part of an agreement between the Portfolio and the counterparty. For basket swaps, the cash flows may be denominated in various foreign currencies based on the local currencies of the positions within the swaps.

Changes in valuations, if any, are recorded as unrealised gains or losses. Payments received or made are recorded as realised gains or losses. The Company discloses outstanding total return swap contracts at the year end in the Portfolio of Investments. For the years ended 31 December 2022 and 31 December 2021, the fair value of total return swaps is disclosed in the Schedule of Investments and Balance Sheet as net unrealised gain or loss.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Swap Contracts (continued)***Volatility Swaps*

A volatility swap is an agreement between counterparties to exchange periodic payments based on the measured volatility of a reference security, index, currency or other reference investment over a specified time frame. One cash flow is typically based on the realised volatility of the reference investment as measured by changes in its price or level over the specified time period while the other cash flow is based on a specified rate representing expected volatility for the reference investment at the time the swap is executed, or the measured volatility of a different reference investment over the specified time period. The appreciation or depreciation on a volatility swap will typically depend on the magnitude of the reference investment's volatility, or size of the movements in its price, over the specified time period, rather than general directional increases or decreases in its price.

Volatility swaps are less standard in structure than other types of swaps and provide pure, or isolated, exposure to volatility risk of the specific underlying reference investment. Volatility swaps are typically used to speculate on future volatility levels, to trade the spread between realised and expected volatility, or to decrease the volatility exposure of investments held by the Portfolio.

*Variance Swaps*

Variance swap contracts involve an agreement by two parties to exchange cash flows based on the measured variance (or square of volatility) of a specified underlying asset. One party agrees to exchange a "fixed rate" or strike price payment for the "floating rate" or realised price variance on the underlying asset with respect to the notional amount. At inception, the strike price chosen is generally fixed at a level such that the fair value of the swap is zero. As a result, no money changes hands at the initiation of the contract. At the expiration date, the amount payable by one party to the other is the difference between the realised price variance of the underlying asset and the strike price multiplied by the notional amount. A receiver of the realised price variance would be entitled to receive a payment when the realised price variance of the underlying asset is greater than the strike price and would be obligated to make a payment when that variance is less than the strike price. A payer of the realised price variance would be obligated to make a payment when the realised price variance of the underlying asset is greater than the strike price and would be entitled to receive a payment when that variance is less than the strike price. This type of agreement is essentially a forward contract on the future realised price variance of the underlying asset.

*Correlation Swaps*

A Correlation Swap is a contract in which the option buyer receives the difference between the observed correlation and the strike correlation on a basket of assets, observed over a specified time interval. The correlation swap can be thought of as a forward contract on realised correlation. Its payoff is simply the difference between the realised correlation over the stated period and the strike times the notional of the contract. Due to the nature of the contract, as maturity approaches, the payoff is almost known since all the observations for calculating the correlation are almost known. Therefore, the model risk decreases as the contract moves toward maturity. For an outstanding contract, implied correlation needs to be computed for any future correlations that can be thought of as the market price of future correlation. The implied correlation or correlation mark can be backed out from observed correlation swap prices or from OTC dealer quotes.

**Options**

Option contracts may include certain options on exchange-traded futures contracts. When a Portfolio writes an option, an amount equal to the premium received by the Portfolio is recorded as a liability and the current fair value of the option written is subsequently adjusted by this amount. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities, indices, derivatives or foreign currencies purchased. Premiums received from written options which expire are treated as realised gains. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium paid on purchased call options exercised is added to the cost of the securities, indices, derivatives or foreign currency purchased. Premiums paid for the purchase of options which expire unexercised are treated as realised losses. Strike prices for Options on stock baskets are denominated in various foreign currencies based on the local currencies of the positions within the basket.

**Swaptions**

When a Portfolio writes a swaption, an amount equal to the premium received by the Portfolio is recorded as a liability and is subsequently adjusted to the current fair value of the swaption written. Premiums received from the written swaptions which expire unexercised are treated by the Portfolio on the expiration dates as realised gains. If a written call swaption is exercised, the premium is added to the proceeds from the sale of the underlying swap in determining the realised gain or loss. If a written put swaption is exercised, the premium reduces the cost basis of the swap purchased.

**FOR THE YEAR ENDED 31 DECEMBER 2022****1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Swaptions (continued)**

When a Portfolio purchases a swaption, an amount equal to the premium paid by the Portfolio is recorded as an asset and is subsequently adjusted to the current fair value of the swaption purchased. Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Portfolio has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been swapped.

**Repurchase and Reverse Repurchase Agreements**

A Portfolio may enter into reverse repurchase agreements under which it acquires securities from a seller (for example, a bank or securities dealer) who agrees, at the time of sale, to repurchase the security at a mutually agreed upon date and price, thereby determining the yield to the Portfolio during the term of the reverse repurchase agreement. The resale price reflects the purchase price plus an agreed upon market rate of interest which is unrelated to the coupon rate or maturity of the purchased security. The Portfolio may also enter into repurchase agreements under which it sells a security and agrees to repurchase it at a mutually agreed upon date and price.

**Contracts for Differences**

Contracts for differences are valued based on the closing market price of the underlying security converted into the base currency of the contract for differences, less any financing charges attributable to each contract which are booked separately. The current market value is shown in the Balance Sheet. On entering a contract for differences, a Portfolio may be required to pledge an amount of cash and/or other assets to the broker which is equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margins' are made or received by a Portfolio periodically, depending on the fluctuations in the value of the underlying security. During the period that the contract for differences is open, changes in the value of the contract are recognised as unrealised gains or losses and by marking to market at each valuation date in order to reflect the value of the underlying security. Realised gains or losses at the closure of the contract are equal to the difference between the value of the contract for differences at the time it was opened (including any financial charges) and the value at the time it was closed. Dividends (net of withholding taxes) attributable to open contracts for differences are deemed to be dividends receivable or payable at the end of the year.

**Offsetting Financial Instruments**

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

**Cash and Cash Equivalents**

Cash comprises current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held to meet short-term cash commitments rather than for investment or other purposes. Cash and cash equivalent assets are valued at their face value with interest accrued, where applicable, to the valuation point on the relevant dealing day, unless in the opinion of the Directors (in consultation with the Manager and the Administrator) an adjustment should be made to reflect the true value thereof.

*Company cash accounts*

A number of Company cash accounts are being operated by the Administrator, on behalf of the Company pursuant to the Central Bank of Ireland Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies. These cash accounts, held with Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depository") for collection of unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors for the Company are deemed assets of the Company. Any balances held on these cash accounts at the financial year end are reflected on the Aggregate Balance Sheets of the Company.

**Due from/to brokers**

Margin and collateral cash provided by the Portfolios to a counterparty in relation derivative financial instruments are recorded as Due from brokers in the Balance Sheet. Margin and collateral cash provided by the counterparty to a Portfolio in relation to derivative financial instruments are recorded as Due to brokers in the Balance Sheet. Margin cash is valued at fair value.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Foreign Currency Translation***Functional and Presentation Currency*

The functional and presentation currency of the Corporate Hybrid Bond, the Euro Bond Absolute Return, the Euro Opportunistic Bond, the European High Yield Bond, the European Sustainable Equity, the Macro Opportunities FX and the Ultra Short Term Euro Bond is EUR. The functional and presentation currency of the China A-Share Equity and the China Bond is CNY. The functional and presentation currency of the Japan Equity Engagement is JPY. The functional and presentation currency of all other Portfolios is US dollars. The base currency of the majority of net assets in the Company is US dollars and thus US dollars is deemed the most appropriate aggregate currency. For more details please refer to Note 15.

*Transactions and Balances*

Assets and liabilities, denominated in currencies other than the functional currency of the Portfolio are translated into the functional currency at the rate of exchange prevailing at the Balance Sheet date. Transactions in currencies other than the functional currency of the Portfolio are translated into the functional currency at the rate of exchange prevailing at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Profit and Loss Account in determining the result for the year.

Proceeds from subscriptions and amounts paid for redemptions of Redeemable Participating Shares in currencies other than the functional currency are translated into the functional currency at the rates prevailing on the dates of the transactions. The Balance Sheet is translated using exchange rates at the year end and the Profit and Loss Account and the Statement of Changes in Net Assets are translated at an average rate over the year.

**Income and Expense Recognition**

Dividend income is recognised in the Profit and Loss Account on the date upon which the relevant security is listed as "ex-dividend" to the extent that information thereof is reasonably available to the Portfolio. Dividend and interest income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Profit and Loss Account and net of any tax credits. Bank deposit interest is accounted for on a cash basis with other income being accounted for on an accrual basis.

Interest income is recognised in the Profit and Loss Account for all debt instruments classified as financial assets at fair value through profit or loss on an accrual basis.

**Realised Gains and Losses on Investments**

Realised gains and losses on disposals of financial assets at fair value through profit or loss are calculated on a first in first out basis. The associated foreign exchange movement between the date of purchase and the date of sale on the disposal of financial assets at fair value through profit or loss is included in net gain/(loss) on financial assets at fair value through profit or loss. Investment transactions are accounted for on trade date, the date at which the Portfolio commits to purchase or sell the asset.

**Taxation**

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B (1) of the Taxes Consolidation Act, 1997 as amended. On that basis, it is not therefore chargeable to Irish tax on its relevant income or relevant gains. However, Irish tax can arise on the happening of a chargeable event in the Company.

A chargeable event includes any distribution payments to shareholders or any encashment, redemption, or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares. No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (i) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997 as amended, are held by the Company, and
- (ii) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

There were no chargeable events during the year under review.

Capital gains, dividends and interest received (if any, on investments made) by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

**FOR THE YEAR ENDED 31 DECEMBER 2022****1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Taxation (continued)**

The Finance Act, 2010 provides that the Revenue Commissioners may grant approval for investment funds marketed outside of Ireland to make payments to non-resident investors without deduction of Irish tax where no relevant declaration is in place, subject to meeting the "equivalent measures". A Company wishing to receive approval must apply in writing to the Revenue Commissioners confirming compliance with the relevant conditions. As at 31 December 2022 and 2021 the Company had not applied for approval from the Revenue Commission.

The Company has reviewed the tax positions for the open tax years as of 31 December 2022 and 2021 and has determined that no provision for income tax and/or uncertain tax positions is required in the Company's financial statements.

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded.

The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment's domicile. As the Company assesses the probability for litigation and subsequent cash outflow with respect to taxes as remote, no contingent liability has been recognised.

**Redeemable Participating Shares**

Redeemable Participating Shares are redeemable at the shareholder's option and are classified as financial liabilities. Any distributions on these shares are recognised in the Profit and Loss Account as Finance Costs. The Redeemable Participating Shares can be put back to the Portfolio on any dealing day for cash equal to a proportionate share of the Portfolio's NAV. The Redeemable Participating Shares are carried at the redemption amount that is payable at the balance sheet date if the shareholder exercised the right to put the shares back to the Portfolio.

**Distribution Policy**

The Directors have determined to accumulate all net investment income and net realised capital gains attributable to the Accumulating Classes and therefore do not intend to declare dividends in respect of shares in such classes.

*Source of Distributions*

Pursuant to the Articles, the Directors may declare dividends, in respect of any shares out of net income (including dividend and interest income) and/or the excess of realised and unrealised capital gains over realised and unrealised losses in respect of investments of the Company (collectively "Net Income") and also out of capital. Dividends paid out of capital amount to a return or withdrawal of part of a shareholder's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the NAV of the relevant shares.

It is the current intention of the Directors, subject to any de minimis threshold, to declare and pay as a dividend at least 85% of the Net Income attributable to each of the Distributing Classes, other than (i) the (Weekly) Distributing Classes; (ii) the (Monthly) Distributing Classes; (iii) the (CG) Distributing Classes and (iv) such other Distributing Classes in a Portfolio which are specified in the relevant Supplement to pay dividends out of capital and Net Income. However, shareholders should note that the Directors may, in their discretion, decide not to make such declaration and payment in respect of a Distributing Class.

In respect of the (Weekly) Distributing Classes, the (Monthly) Distributing Classes and the (CG) Distributing Classes, the Directors intend to declare and pay a weekly, monthly or semi-annual dividend, respectively, attributable to the shares of each such class out of a combination of Net Income and capital, so that where Net Income during the relevant period is less than the amount declared, the balance will be paid of the capital represented by the relevant shares, which will enable the classes to distribute regular, set dividends. In the event that the Net Income attributable to the (Weekly) Distributing Classes, the (Monthly) Distributing Classes or the (CG) Distributing Classes exceeds the amount declared during the relevant period, the excess of Net Income over this amount will be retained in a distribution account in respect of the relevant shares and will form part of the dividend payable in respect of the succeeding distribution period. While the foregoing represents the Directors' current intention in respect of the declaration and payment of dividends in respect of the (Weekly) Distributing Classes, the (Monthly) Distributing Classes and the (CG) Distributing Classes, the Directors may in their discretion decide not to make such declaration and payment and there is no guarantee that any such dividends will be paid.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Distribution Policy (continued)***Frequency of Distributions*

Under normal circumstances, the Directors intend that dividends in respect of:

- (a) each of the (Weekly) Distributing Classes in all Portfolios shall be declared and paid on or prior to the last business day of each week;
- (b) each of the (Monthly) Distributing Classes in all Portfolios shall be declared on or prior to the last business day of each month and paid within three business days thereafter;
- (c) each of the (CG) Distributing Classes in all Portfolios shall be declared on a semi-annual basis and paid within thirty business days;
- (d) each of the other Distributing Classes of the China Bond, the Euro Bond Absolute Return, the Euro Opportunistic Bond, the Global Equity Megatrends and the Ultra Short Term Euro Bond shall be declared on a quarterly basis and paid within thirty Business Days in relation to the Net Income of such Distributing Classes for the previous quarter;
- (e) each of the other Distributing Classes of the CLO Income, the Commodities, the Corporate Hybrid Bond, the Emerging Market Debt - Hard Currency, the Emerging Market Debt - Local Currency, the Emerging Market Debt Blend, the Emerging Market Debt Sustainable Investment Grade Blend, the European High Yield Bond, the Event Driven, the Global Bond, the Global Diversified Income FMP – 2024, the Global Flexible Credit Income, the Global High Yield SDG Engagement, the Global High Yield Sustainable Action, the Global Investment Grade Credit, the Global Opportunistic Bond, the Global Real Estate Securities, the High Yield Bond, the Multi-Asset Income, the Short Duration Emerging Market Debt, the Short Duration High Yield SDG Engagement, the Strategic Income, the Sustainable Asia High Yield, the Sustainable Emerging Market Corporate Debt, the Sustainable Emerging Market Debt - Hard Currency, the US Equity Index PutWrite and the US Real Estate Securities shall be declared on a quarterly basis and paid within thirty business days;
- (f) each of the other Distributing Classes of the US Long Short Equity shall be declared on a semi-annual basis and paid within thirty business days;
- (g) each of the other Distributing Classes of the Next Generation Space Economy, the Uncorrelated Strategies, the Uncorrelated Trading, the US Equity, the US Large Cap Value, the US Multi Cap Opportunities, the US Small Cap and the US Small Cap Intrinsic Value shall be declared on an annual basis and paid within thirty business days; and
- (h) each of the other Distributing Classes of all other Portfolios shall be declared on an annual basis and paid within thirty business days in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December;
- (i) each of the (Monthly) Gross Income Distributing Classes in the Portfolios shall be declared on or prior to the last business day of each month and paid within three business days; and
- (j) each of the other (Gross) Income Distributing Classes in the Portfolios shall be declared on a quarterly basis and paid within thirty business days.

Subject to income being available for distribution, the Directors may also decide to declare and pay interim dividends in relation to any of the Distributing Classes. All Shares in issue in a Distributing Class on any date on which the Directors determine to declare a dividend in respect of such Distributing Class will be eligible for such dividend.

The Directors reserve the right to change the dividend policy of any class of shares at their discretion on prior notice to shareholders of the relevant class. Any dividend unclaimed after a period of six years from the date of its declaration of such dividend shall be forfeited and shall revert to the relevant Portfolio.

In line with the Central Bank of Ireland (the “CBI”) Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies published in March 2016, one or more Company cash accounts are being operated by the Administrator, on behalf of the Company, in accordance with the requirements of the CBI. Such Company cash accounts are designed to hold unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors. As at 31 December 2022, the amount held in these cash accounts was US\$ 1,424,081 (31 December 2021: US\$ 29,999,148). Any balances held on these cash accounts at the financial year end are reflected on the Aggregate Balance Sheets of the Company.

**FOR THE YEAR ENDED 31 DECEMBER 2022****4. BANK OVERDRAFT**

As at 31 December 2022 and 31 December 2021, all bank overdraft balances as disclosed in the Balance Sheet are held with Brown Brothers Harriman & Co.

**5. SHARE CAPITAL**

The authorised share capital of the Company is 500,000,040,000 shares of no par value divided into 40,000 Subscriber Shares of no par value and 500,000,000,000 Participating Shares of no par value. The Directors are empowered to issue up to 500,000,000,000 shares of no par value in the Company on such terms as they think fit.

The Company is an investment company with variable capital due to its ability to issue and redeem Shares on demand. The share capital of the Company is divided into different series of Shares with each series of Shares representing a separate investment portfolio of assets. The Portfolios manage capital in accordance with the UCITS Regulations and the investment objectives and policies applicable to such Portfolio as specified in this Prospectus and the relevant Supplement. The Portfolios are not subject to externally imposed capital requirements. While the Portfolios invest in transferable securities and other liquid financial assets, the Manager also employs an appropriate liquidity risk oversight process, which takes into account efficient portfolio management transactions employed by the Portfolios, in order that each Portfolio is able to comply with its stated redemption terms and conditions.

In order to mitigate potential liquidity risks, the Manager tailors its controls to different investment strategies, liquidity terms and historic client behaviour. As part of its risk oversight, the Manager may employ various liquidity tests, the results of which may lead to a variety of possible solutions, including adjusting asset composition, drawing on applicable overdraft or credit facilities or taking other appropriate actions that would maintain an acceptable level of liquidity. Any Portfolio specific arrangements will be reviewed by the Manager's risk function, portfolio managers of the relevant Portfolio, Chief Investment Officer of the Manager as well as the board of directors of the Manager and the Directors. The Manager's risk team stress-tests each Portfolio on a regular basis in the context of portfolio composition and current/potential market conditions. Stress scenarios are run at different hypothetical redemption levels and the ability of the Portfolios to meet redemption requests in an orderly fashion at these levels are evaluated. Should analysis reveal that any of the Portfolios have low liquidity coverage ratios, conversation and steps are taken by the Manager's risk team and the portfolio team to evaluate these risks and the best way to mitigate them. In addition, daily liquidity buffer reports are monitored to gauge the liquidity risk of each Portfolio. Furthermore, market liquidity factors are monitored in order to capture potential anomalies in market liquidity.

There were 2 Subscriber Shares in issue at 31 December 2022 and 31 December 2021. The Subscriber Shares entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on a winding-up. The Participating Shares entitle the holders to attend and vote at general meetings of the Company and to participate in the profits and assets of the Company.

The Subscriber shareholders are as follows:

Shareholder Name	Nominal Shareholding
Matsack Nominees Limited	1
Neuberger Berman Europe Limited	1

The minimum subscriptions and redemption limits in respect of each Portfolio are contained in the Company's Prospectus.

The capital of the Portfolios is represented by the net assets attributable to holders of redeemable participating shares. The amount of net assets attributable to holders of redeemable participating shares can change significantly on a monthly basis, as the Portfolios are subject to monthly subscriptions and redemptions at the discretion of shareholders.

The Portfolios' objectives for managing capital are:

- To invest the capital in investments meeting the investment objectives, investment policies, risk exposure and expected return indicated in its Prospectus;
- To achieve returns while safeguarding capital by using the investment strategies indicated in its Prospectus;
- To maintain sufficient liquidity to meet the expenses of the Portfolios, and to meet withdrawal requests as they arise; and
- To maintain sufficient size to make the operation of the Portfolios cost-efficient.

**FOR THE YEAR ENDED 31 DECEMBER 2022**
**6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES**

In respect of each Class, the Manager shall be entitled to a fee in respect of the management services provided by it to each Portfolio (the "Management Fee"). The Manager is also entitled to a fee of 0.025% in respect of the administrative support services it provides to the Company, this fee is capped at 0.20% per share class.

The maximum annual fee which the Company will be charged in respect of a Portfolio is 2.5% of its NAV, however the current Management Fee payable in respect of each Portfolio shall be disclosed in the relevant Supplement. The current Management Fee rates for each class are set out below.

The Management Fee accrues daily and is payable monthly in arrears at the end of each calendar month. The Manager will pay any Sub-Investment Managers or investment advisers appointed in respect of a Portfolio out of its Management Fee, unless otherwise specified in the Supplement for the relevant Portfolio. The Manager is also entitled to recover from the Company all out-of-pocket expenses suffered or incurred by it (or its delegates) in the performance of its duties and shall pay any such expenses recovered to the appropriate service provider.

**FOR THE YEAR ENDED 31 DECEMBER 2022****6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)**

Where applicable, a discount may be applied to the above fees.

The Manager may waive all or part of its fees in order to cap the Portfolios' Total Expense Ratios ("TERs"). These fee waivers are voluntary and may be discontinued by the Manager at any time without prior notice. Fees voluntarily waived are not subject to recovery by the Manager. A breakdown of the Portfolios' TERs is provided in Appendix I.

The Company will pay Administration Fees which shall not exceed 0.20% per annum of the NAV of the relevant Portfolio. The Administration Fee shall comprise of a fee payable to the Administrator in respect of the administration services which it provides for each Portfolio and a fee payable to the Manager in respect of the administrative support services which it provides for each Portfolio and will accrue monthly and be payable monthly in arrears.

The Company pays administration fees to the Administrator based on the value of month-end net assets of Uncorrelated Strategies and Uncorrelated Trading at the following rates:

Assets from US\$ 0 - US\$ 500 million	0.055%
Between US\$ 500 - US\$ 2,000 million	0.05%
Above US\$ 2,000 million	0.04%

The Company pays administration fees to the Administrator based on the value of month-end net assets of each of the remaining Portfolios administered by the Administrator at the following rates:

Assets from US\$ 0 - US\$ 25,000 million	0.008%
Above US\$ 25,000 million	0.005%

The above fees are subject to a minimum monthly fee of US\$ 4,000 per Portfolio and inclusive of four share classes per Portfolio. Any Portfolio which has in excess of four share classes will be charged a monthly fee of US\$ 150 per each additional share class.

In addition, the Administrator is entitled to a further fee in respect of transfer agency services provided to the Portfolios.

In respect of the B Shares, C Shares, E Shares, C1 Shares and C2 Shares in each Portfolio, the Manager and/or the relevant Distributor shall be entitled to a distribution fee at the annual rate of 1.00% of the NAV of the relevant Classes in respect of the distribution services provided to such Classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month. In respect of the M Shares in each Portfolio, the Manager and/or the relevant Distributor shall be entitled to a distribution fee at an annual rate expressed as a percentage of the NAV of the relevant Classes in respect of the distribution services provided to such Classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month. The rate of such distribution fee varies between Portfolios and is disclosed in the Supplement for each Portfolio. In respect of all other Classes, the Manager may pay the Distributor a fee (which shall be at normal commercial rates), in respect of its distribution services, which shall also be payable out of the Management Fee.

***Non-Affiliated Sub-Adviser fees***

The fees paid to the Non-Affiliated Sub-Advisers appointed by the Manager and/or the Sub-Investment Manager, with the exception of Green Court Capital Management Limited, will be paid out of the assets of the Portfolio. The aggregate fees paid to all advisers were between 0.65% and 1.50% of the NAV of the Portfolio. The aggregate adviser fee for the year ended 31 December 2022 was US\$ 1,622,785 (31 December 2021: US\$ 362,032).

**Performance Fees**

As at the year ended 31 December 2022 a performance fee is being calculated on US Long Short Equity, Global High Yield SDG Engagement, Event Driven, Uncorrelated Strategies and Uncorrelated Trading.

***Performance Fee paid to the Manager***

The Manager may be entitled to receive a performance fee (the "Performance Fee") payable out of the Portfolio's assets in respect of each PF Class in the relevant Portfolio. The Depositary shall verify the calculation of the Performance Fee. The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any Class of Shares. Performance fees are payable on realised and unrealised capital gains taking into account realised and unrealised losses at the end of the Calculation Period defined below for each applicable Portfolio. Consequently, performance fees may be paid on unrealised gains which may subsequently never be realised.

**FOR THE YEAR ENDED 31 DECEMBER 2022**

**6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)**

**Performance Fees (continued)**

*Performance Fee paid to the Manager (continued)*

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the NAV of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

If the Management Agreement is terminated before the end of a Calculation Period in any year the performance fee in respect of the then current Calculation Period will be calculated and paid as though the date of termination were the end of the relevant Calculation Period.

The performance fee will be accrued in the NAV on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption. Crystallised performance fees shall remain in the relevant Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Class.

The methodology used to calculate the Performance Fee for each applicable Portfolio is as follows:

**US Long Short Equity**

The Manager may be entitled to receive a performance fee payable out of the Portfolio’s assets in respect of each PF Class in the Portfolio.

Definitions

<p>Calculation Period</p>	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> <li>● in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December;</li> <li>● in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and</li> <li>● in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination.</li> </ul> <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
<p>Crystallisation</p>	<p>The point at which any Performance Fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.</p>
<p>High Water Mark</p>	<p>The greater of: (i) the initial offer price per Share; and (ii) the NAV per share at the end of any previous Calculation Period in respect of which a Performance Fee was paid.</p>

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in the event that the NAV per share at the end of the Calculation Period exceeds the High Water Mark for that particular PF Class.

The Performance Fee will be calculated on each Dealing Day and will be equal to 15% of the amount by which the percentage growth in the NAV per share over the Calculation Period exceeds that of the High Water Mark. The Performance Fee will be accrued on each Dealing Day and will form part of the NAV per share for each PF Class where applicable. Any Performance Fee accrual on a Dealing Day will be superseded by any accrual made on the following Dealing Day up to the last Dealing Day of the Calculation Period.

In all cases the NAV per share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

No Performance Fee will be paid until the NAV per share exceeds the High Water Mark and such fee is only payable on the outperformance of the NAV per share over the Hurdle Rate as described above.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

## Performance Fees (continued)

*Performance Fee paid to the Manager (continued)*

## US Long Short Equity (continued)

Methodology (continued)

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the NAV of their shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

The Performance Fee will be accrued in the NAV on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

For the year ended 31 December 2022, the Manager earned a performance fee of US\$ Nil (31 December 2021: US\$ 355,899).

## Global High Yield SDG Engagement

The Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio.

Definitions

Benchmark	ICE BofA Global High Yield Constrained Index in relevant class currency (as detailed below)
Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> <li>in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December;</li> <li>in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and</li> <li>in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination.</li> </ul> <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	The point at which any performance fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or converts all or part of its Shareholding.
Outperformance	The excess performance of the NAV per share over the performance of the Benchmark during the Calculation Period.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

## Performance Fees (continued)

*Performance Fee paid to the Manager (continued)*

## Global High Yield SDG Engagement (continued)

Methodology (continued)

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in respect of any Outperformance, i.e. the excess performance of the NAV per share over the performance of the Benchmark applicable to that particular PF Class during the Calculation Period. The Percentage Fee will be calculated on each Dealing Day and will be equal to 20% of the Outperformance applicable to that particular PF Class over the same period.

In all cases the NAV per share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

In the event that the performance of a PF Class over a Calculation Period is less than that of the Benchmark, no Performance Fee shall be payable in respect of that PF Class until such cumulative underperformance relative to its Benchmark has been recovered.

In the event that the PF Class has achieved Outperformance over a Calculation Period, a Performance Fee shall be payable in respect of that PF Class. Upon payment the Benchmark will be reset, this process ensures the NAV per share and the Benchmark start from the same place at the start of the calculation period. Accordingly for the next Calculation Period the commencing Benchmark value will equal the NAV in respect of the PF Class on which the Performance Fee was paid i.e. if the NAV were to equal 110 the commencing Benchmark Value would also equal 110.

Benchmark Indices

Classes	Index	Code
USD PF Classes	ICE BofA Global High Yield Constrained Index	HW0C select currency USD
EUR Hedged PF Classes	ICE BofA Global High Yield Constrained Index – EUR Hedged	HW0C select currency EUR
GBP Hedged PF Classes	ICE BofA Global High Yield Constrained Index – GBP Hedged	HW0C select currency GBP

Shareholders should note that, as the Performance Fee is payable on the outperformance over the Benchmark, they may be charged a Performance Fee where the NAV of their shares has declined but to a lesser extent than the Benchmark.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the NAV of their shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of a Calculation Period.

The Performance Fee will be accrued in the NAV on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued Performance Fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

There were no performance fees paid to the Manager by the Portfolio for the year ended 31 December 2022 and 31 December 2021.

**FOR THE YEAR ENDED 31 DECEMBER 2022**

**6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)**

**Performance Fees (continued)**

*Performance Fee paid to the Manager (continued)*

**Event Driven**

The Manager may be entitled to receive a performance fee payable out of the Portfolio’s assets in respect of each PF Class in the Portfolio. All Classes in the Portfolio are PF Classes.

Definitions

Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> <li>● in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December;</li> <li>● in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and</li> <li>● in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination.</li> </ul> <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	<p>The point at which any Performance Fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.</p>
High Water Mark	<p>The greater of: (i) the initial offer price per Share; and (ii) the NAV per share at the end of any previous Calculation Period in respect of which a Performance Fee was paid.</p>

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in the event that the Net Asset Value per Share at the end of the Calculation Period exceeds the High Water Mark (net of all costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder’s best interest) for that particular PF Class.

The Performance Fee will be calculated on each Dealing Day and will be equal to 20% of the amount by which the percentage growth in the Net Asset Value per Share over the Calculation Period exceeds that of the High Water Mark, with the exception of the 15 Classes, in respect of which the Performance Fee will be equal to 15% of the amount by which the percentage growth in the Net Asset Value per Share over the Calculation Period exceeds that of the High Water Mark.

The Performance Fee will be accrued on each Dealing Day and will form part of the Net Asset Value per Share for each PF Class where applicable. Any Performance Fee accrual on a Dealing Day will be superseded by any accrual made on the following Dealing Day up to the last Dealing Day of the Calculation Period.

In all cases the Net Asset Value per Share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

No Performance Fee will be paid until the Net Asset Value per Share exceeds the High Water Mark and such fee is only payable on the outperformance of the Net Asset Value per Share over the High Water Mark as described above.

## FOR THE YEAR ENDED 31 DECEMBER 2022

**6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)****Performance Fees (continued)**

*Performance Fee paid to the Manager (continued)*

**Event Driven (continued)**Methodology (continued)

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

The Performance Fee will be accrued in the Net Asset Value on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee and ensure that it is not open to the possibility of manipulation.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

For the year ended 31 December 2022, the Manager earned a performance fee of US\$ 89,185.

*Performance Fee paid to the advisers*

**Uncorrelated Strategies**

The advisers appointed by the Sub-Investment Manager ("Non-Affiliated Sub-Advisers") may be entitled to receive a performance fee (the "Adviser Performance Fee") payable out of the Portfolio's assets and as described more fully below. However, for the avoidance of doubt, no performance fees will be paid to the Sub-Investment Manager or an affiliate of the Sub-Investment Manager appointed to act as an adviser by the Sub-Investment Manager (an "Internal Adviser") on any portion of the Portfolio's assets which is managed by the Sub-Investment Manager or the Internal Adviser acting in the capacity of an adviser. All Classes in the Portfolio are PF Classes.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

## Performance Fees (continued)

*Performance Fee paid to the advisers (continued)*

## Uncorrelated Strategies (continued)

## Definitions

Allocated Portion	The part of the Portfolio for which a Non-Affiliated Sub-Adviser is responsible.
Calculation Period	The Calculation Period shall normally run from 1 January to 31 December in each year except that: <ul style="list-style-type: none"> <li>• in the case of the initial appointment of a Non-Affiliated Sub-Adviser, the Calculation Period will run from the date of appointment to 31 December;</li> <li>• in the case of the termination of a Non-Affiliated Sub-Adviser, the Calculation Period will terminate on the date of the termination; and</li> <li>• in the case of the termination of the Sub-Investment Management Agreement in any year, the Calculation Period will terminate on the date of the termination.</li> </ul>
Crystallisation	The point at which any Adviser Performance Fee becomes payable to the Non-Affiliated Sub-Adviser. Crystallisation in respect of a Non-Affiliated Sub-Adviser will occur either (i) at the end of the Calculation Period; (ii) due to the Sub-Investment Manager reducing the capital allocated to the relevant Allocated Portion (iii) termination of the appointment of that Non-Affiliated Sub-Adviser.
High Water Mark	In respect of a Non-Affiliated Sub-Adviser, the greater of: (i) the NAV of its Allocated Portion at its appointment; and (ii) the value that that Allocated Portion has achieved at the end of any previous Calculation Period in respect of which an Adviser Performance Fee was paid, adjusted for any subscriptions and/or redemptions affecting the Allocated Portion.

## Methodology

An Adviser Performance Fee is payable to a Non-Affiliated Sub-Adviser only with respect to the relevant Allocated Portion and only from the time that the Sub-Investment Manager appoints that Non-Affiliated Sub-Adviser to manage the Allocated Portion until such time, if ever, that the Non-Affiliated Sub-Adviser ceases to manage the Allocated Portion.

For each Calculation Period in which the net asset value of the Allocated Portion exceeds the High Water Mark, the Adviser Performance Fee payable will be equal to the increase in the Allocated Portion's net asset value above the High Water Mark, multiplied by the relevant Non-Affiliated Sub-Adviser's Adviser Performance Fee rate, as agreed with the Sub-Investment Manager, which shall not exceed 20%.

The Adviser Performance Fee will be calculated and accrued daily as at each Valuation Point. The Adviser Performance Fee is calculated on the unswung net asset value of the relevant Allocated Portion, i.e. before any adjustment for swing pricing (for more information on "swing pricing" please see the "Determination of Net Asset Value – Adjustments of Valuations and Swing Pricing" section of the Prospectus).

Portfolio expenses (excluding Management Fees) are allocated pro rata to each Allocated Portion and to the portion of the Portfolio's assets that are not allocated to a Non-Affiliated Sub-Adviser and the Adviser Performance Fee in respect of each Allocated Portion is calculated and paid after the deduction of the portion of such expenses which is attributable to the relevant Allocated Portion.

**FOR THE YEAR ENDED 31 DECEMBER 2022**
**6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)**
**Performance Fees (continued)**

*Performance Fee paid to the advisers (continued)*

**Uncorrelated Strategies (continued)**
Methodology (continued)

The Adviser Performance Fee will normally be payable to a Non-Affiliated Sub-Adviser in arrears within 30 Business Days of 31 December each year. However, in the event of the Crystallisation of an Adviser Performance Fee during a Calculation Period, the accrued Adviser Performance Fee in respect of such amounts will be payable within 30 Business Days of the end of the calendar quarter during which the Crystallisation occurred.

Crystallised Adviser Performance Fees shall remain in the Portfolio until paid to the Non-Affiliated Sub-Adviser and shall not participate in subsequent gains and losses of the Allocated Portion. Crystallised Adviser Performance Fees shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Allocated Portion, the Portfolio or the Company (other than Adviser Performance Fees payable to the on-Affiliated Sub-Adviser).

The Depositary shall verify the calculation of any Adviser Performance Fee.

Investors should note that, as the Adviser Performance Fee is calculated and may be payable to a Non-Affiliated Sub-Adviser with respect to the performance of its Allocated Portion and not the performance of the Portfolio as a whole, it is possible that the Portfolio could pay an Adviser Performance Fee to a Non-Affiliated Sub-Adviser in circumstances where the overall performance of the Portfolio as a whole is negative. This could occur where, for example, during a Calculation Period one Non-Affiliated Sub-Adviser's Allocated Portion performs well but the remaining Non-Affiliated Sub-Advisers' Allocated Portions perform negatively and the aggregate total of the negative performance exceeds that of the positive performance of the Non-Affiliated Sub-Adviser receiving the Adviser Performance Fee.

Adviser Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Adviser Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Non-Affiliated Sub-Advisers may charge research expenses to the Portfolio through the provision of an annual research budget for the Portfolio, as agreed with the Company.

Amounts of Performance Fees earned by Non-Affiliated Sub-Advisers during the years ended 31 December 2022 and 31 December 2021 are shown below.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

## Performance Fees (continued)

*Performance Fee paid to the Sub-Investment Manager*

## Uncorrelated Trading

The Sub-Investment Manager may be entitled to receive a performance fee payable out of the Portfolio's assets and as described more fully below. All Classes in the Portfolio are PF Classes.

## Definitions

Benchmark	ICE BofA 1- Month Deposit Offered Rate Constant Maturity Index in the relevant Class currency. The Benchmark is a widely used benchmark for short-term interest rates, providing an indication of the average rates at which banks could obtain wholesale, unsecured funding for set periods in particular currencies.
Calculation Period	The Calculation Period shall normally run from 1 January to 31 December in each year except that: <ul style="list-style-type: none"> <li>• in the case of the initial issue of Shares in each Class, the first Calculation Period will run from the date of issue to 31 December of the following year;</li> <li>• in the case of the termination of a Class, the Calculation Period will terminate on the date of the termination; and</li> <li>• in the case of the termination of the Sub-Investment Manager, the Calculation Period will terminate on the date of the termination.</li> </ul>
Crystallisation	The point at which any Performance Fee becomes payable to the Sub-Investment Manager. Crystallisation will occur (i) at the end of the Calculation Period; (ii) at the termination of the appointment of the Sub-Investment Manager; or (iii) on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.
Outperformance	The excess performance of the Net Asset Value per Share over the performance of the Benchmark during the Calculation Period.

## Methodology

For each Calculation Period, a Performance Fee in respect of each Class in issue becomes due in respect of any Outperformance, i.e. the excess performance of the Net Asset Value per Share (net of all costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder's best interest) over the performance of the Benchmark applicable to that particular Class during the Calculation Period. The Performance Fee will be calculated on each Dealing Day and will be up to 20% of the Outperformance applicable to that particular Class over the same period.

In the event that the performance of a Class over a Calculation Period is less than that of the Benchmark, no Performance Fee shall be payable in respect of that Class until such cumulative underperformance relative to its Benchmark has been recovered.

In the event that the Class has achieved Outperformance over a Calculation Period, a Performance Fee shall be payable in respect of that Class. Upon payment the Benchmark will be reset, this process ensures the Net Asset Value per Share and the Benchmark start from the same place at the start of the calculation period. Accordingly for the next Calculation Period, the commencing Benchmark value will equal the Net Asset Value in respect of the Class on which the performance fee was paid i.e. if the Net Asset Value were to equal 110 at the end of a Calculation Period in which a Performance Fee was paid, the Benchmark value at the start of the following Calculation Period would also equal 110.

Shareholders should note that, as the Performance Fee is payable on the outperformance over the Benchmark, they may be charged a Performance Fee where the Net Asset Value of their Shares has declined but to a lesser extent than the Benchmark.

FOR THE YEAR ENDED 31 DECEMBER 2022

6. MANAGEMENT, ADMINISTRATION, DISTRIBUTION AND DEPOSITARY FEES (CONTINUED)

Performance Fees (continued)

Performance Fee paid to the Sub-Investment Manager (continued)

Uncorrelated Trading (continued)

Methodology (continued)

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of a Calculation Period.

The Performance Fee will be calculated and accrued daily as at each Valuation Point. The Performance Fee is calculated on the unswung Net Asset Value per Share, i.e. before any adjustment for swing pricing (for more information on "swing pricing" please see the "Determination of Net Asset Value – Adjustments of Valuations and Swing Pricing" section of the Prospectus).

The Performance Fee will normally be payable to the Sub-Investment Manager in arrears within 30 Business Days of 31 December each year. However, in the event of the Crystallisation of the Performance Fee during a Calculation Period, the accrued Performance Fee in respect of such amounts will be payable within 30 Business Days of the end of the calendar quarter during which the Crystallisation occurred.

Crystallised Performance Fees shall remain in the Portfolio until paid to the Sub-Investment Manager and shall not participate in subsequent gains and losses of the Portfolio. Crystallised Performance Fees shall not be used or made available to satisfy redemptions or pay any fees and expenses of the Portfolio or the Company (other than Performance Fees payable to the Sub-Investment Manager).

The Depositary shall verify the calculation of any Performance Fee and ensure that it is not open to the possibility of manipulation.

Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

For the year ended 31 December 2022, the Sub-Investment Manager earned a performance fee of US\$ 1,351.

Depositary Fee

The Company pays the Depositary a fee in respect of trustee services for each Portfolio which shall not exceed 0.02% per annum of the NAV of the relevant Portfolio and which accrues monthly and is payable monthly in arrears. The Depositary is also entitled to reimbursement by the Company out of the assets of the Portfolio for safekeeping fees, transaction charges and reasonable out-of-pocket expenses ("Custody fees") incurred for the benefit of the Portfolio including the fees (which will not exceed normal commercial rates) and reasonable out-of-pocket expenses of any sub-custodian appointed by the Depositary.

Aggregate amounts incurred/(waived) by the Company during the year relating to management, distribution, administration, depositary and performance are shown below.

	31 December 2022	31 December 2021
	US\$	US\$
Management Fee	220,981,106	268,553,811
Distribution Fee	11,861,633	16,396,274
Administration Fee	21,323,731	26,257,740
Custody Fee	3,500,933	4,788,950
Depositary Fee	1,640,283	1,792,081
Performance Fee	75,968,663	17,237,002
Management Fee Waiver	(2,876,095)	(3,873,775)
Advisory Fee Waiver	(227,107)	(270,977)

**FOR THE YEAR ENDED 31 DECEMBER 2022****7. DIRECTORS' FEES AND EXPENSES**

The Directors are entitled to a fee as remuneration for their services at a rate to be determined from time to time by the Directors provided that the amount of remuneration payable to any Director in any one year in respect of the Company shall not exceed €75,000 (or €85,000, in the case of the chairperson of the Company) or such other amount as the Directors may from time to time determine. The Directors, and any alternate Directors, are also entitled to be paid all travelling, hotel and other expenses properly incurred by them in attending Directors or Shareholders meetings or any other meetings in connection with the business of the Company. All Pay As You Earn ("PAYE") paid on Directors Fees is included within total expenses. None of the Directors entered into a service contract with the Company nor is any such contract proposed and none of the Directors is an executive of the Company. The Directors who are also employees of Neuberger Berman Europe Limited will receive a nil fee for their services as directors of the Company.

The aggregate emoluments of the Directors (including expenses) for the year ended 31 December 2022 were US\$ 259,448 in total (31 December 2021: US\$ 270,968) of which US\$ 60,237 was outstanding at the year end (31 December 2021: US\$ 44,967).

As at 31 December 2022, Ms. Michelle Green and Mr. Alex Duncan were Directors and employees of Neuberger Berman Europe Limited ("NBEL"), the Sub-Investment Manager and Distributor of the Company. Until 15 February 2023, Ms. Michelle Green was also a Director of Neuberger Berman Asset Management Ireland Limited ("NBAMIL"), the Manager of the Company. Ms. Michelle Green and Mr. Alex Duncan voluntarily agreed to waive their entitlement to a fee in relation to their duties as Directors for the year ended 31 December 2022 (31 December 2021: same).

Directors' Fees are reported gross of Income Tax and no Benefit in Kind was earned by the Directors.

**8. AUDITORS' REMUNERATION**

Ernst & Young, Chartered Accountants remuneration (inclusive of expenses and value added tax ("VAT")) for work carried out for the Company in respect of the financial year is as follows:

		31 December 2022	31 December 2021
		US\$	US\$
Statutory audit fee:	- Ernst & Young (Ireland):	482,682	539,137
Other non-audit fees:	- Ernst & Young (Austria):	141,982	153
	- Ernst & Young (Switzerland):	126,681	166,417

**9. OTHER FEES AND EXPENSES**

Transaction costs are the costs incurred in the acquisition, issue or disposal of financial assets and liabilities. Transaction costs include fees and commissions paid to brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs. These costs are accounted for as they are incurred and are recognised as an expense for financial reporting purposes in the Profit and Loss Account.

The Company and the Portfolios also pay certain other costs, charges, fees and expenses incurred in its operation. These may include without limitation; fees and expenses incurred in relation to banking and brokerage in respect of the purchase and sale of Portfolio securities, taxes, insurance, the costs and expenses of maintaining its books of account and of preparing, printing, publishing and distributing (in such languages as may be necessary) prospectuses, supplements, annual and semi-annual reports and other documents or information to current and prospective shareholders (including the costs of electronic transmission techniques to distribute such documents or information), the expense of publishing price and yield information, in relevant media, the costs and expenses of obtaining authorisations or registrations of the Company or of any shares with the regulatory authorities in various jurisdictions, including any levy applied by the Central Bank of Ireland, the cost of listing and maintaining a listing of shares on any stock exchange, marketing and promotional expenses, the cost of convening and holding Directors and Shareholders meetings, the costs of exercising voting rights attached to the Company's investment in the best interest of the Shareholders, professional fees and expenses for legal, auditing and other consulting services, any and all expenses arising in respect of the termination or liquidation of the Company and such other costs and expenses (including non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any Portfolio. In connection with the registration of the Company or the shares for sale in certain jurisdictions, the Company pays the fees and expenses of paying agents, information agents and/or correspondent banks, such payments being made at normal commercial rates.

**FOR THE YEAR ENDED 31 DECEMBER 2022**
**9. OTHER FEES AND EXPENSES (CONTINUED)**

The Manager will directly pay for all research which it consumes, regardless of where the research originates. Sub-Investment Managers that are located outside the EU, which do not send any research that they receive into the EU, may charge research expenses to the relevant Portfolio through the provision of an annual research budget for each Portfolio.

For financial reporting purposes, organisation expenses are expensed to the Profit and Loss Account as they are incurred. For the purpose of calculating the NAV per share for shareholder dealing, organisation expenses are being amortised over the first two financial years of the lifetime of the Portfolio.

**10. RELATED PARTY TRANSACTIONS**

Under FRS 102 "Related Party Transactions", parties are related if any one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

Ms. Michelle Green and Mr. Alex Duncan are Directors of the Company and also Directors and employees of NBEL, the Manager (until 30 June 2021), Promoter (until 30 June 2021), Sub-Investment Manager (since 1 July 2021) and Distributor of the Company. Until 15 February 2023, Ms. Michelle Green is also a Director of NBAMIL, the Manager (since 1 July 2021) of the Company. Fees earned by NBEL and NBAMIL during the years ended 31 December 2022 and 31 December 2021 are shown in the table below. Please refer to Note 7 for details of Directors' Fees paid during the years ended 31 December 2022 and 31 December 2021.

Management and Performance Fees*	31 December 2022 US\$	31 December 2021 US\$
Management Fees Earned by NBEL	-	130,109,622

**12. FINANCIAL INSTRUMENT DISCLOSURES**

In pursuing its investment objectives the Company invests in transferable securities with the aim of spreading risk. Investments in equities and fixed income securities expose the Company to varying risks including market, liquidity and credit/counterparty risks. A description of the specific risks and the policies for managing these risks are included below. In addition, consequences of political, social, economic, diplomatic changes, or public health condition may have disruptive effects on market prices or fair valuations of foreign investments. Fair value is determined in accordance with the methodology outlined in the Statement of Significant Accounting Policies. The Schedules of Investments of the Portfolios at the year-end are representative of the type of investments held during the year.

**Market Risk**

Market risk embodies the potential for both losses and gains and includes price risk, interest rate risk and foreign currency risk.

All security investments present a risk of loss of capital. The Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. The Company's overall market positions are monitored on a daily basis by the Portfolio's Manager and are reviewed on a quarterly basis by the Board of Directors. The Company's equity and debt securities and trading derivative financial instruments are susceptible to market price risk arising from uncertainties about future prices of the instruments.

**(a) Price Risk**

Price risk is the risk that the fair values of securities decrease as a result of changes in the levels of the indices and the values of individual securities. The trading price risk exposure arises from the Company's investment portfolios.

The majority of the Company's investments are listed on recognised exchanges or traded on regulated markets as per the Prospectus. As at 31 December 2022 and 31 December 2021, a 10% increase in security prices would have increased the Net Assets and the Changes in Net Assets of each Portfolio as outlined in the table below. An equal change in the opposite direction would have decreased the Net Assets by an equal but opposite amount.

Portfolio	Currency	31 December 2022	% of Net Assets	31 December 2021	% of Net Assets

**FOR THE YEAR ENDED 31 DECEMBER 2022**
**12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**
**(a) Price Risk (continued)**

Other price risk is the risk that the value of the instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual instrument, its issuer or all factors affecting all instruments traded in the market. As the majority of the Company's financial instruments are carried at fair value with fair value changes recognised in the Profit and Loss Account changes in market conditions will directly affect Net Gain/(Loss) on Financial Assets and Liabilities at Fair Value through Profit or Loss.

Price risk is managed by the Manager by investing in a diversified range of securities in different markets.

The tables below summarise the relevant Portfolio's overall exposure to price risk.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (b) Foreign Currency Risk

The Net Asset Value per share of a Portfolio will be computed in the base currency of the relevant Portfolio, whereas the investments held for the account of that Portfolio may be acquired in other currencies. The base currency value of the investments of a Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. Positions are monitored on a daily basis and hedging strategies are used to ensure positions are maintained within established limits.

At 31 December 2022 and 31 December 2021, had the base currency of the relevant Portfolio strengthened by 5% in relation to all currencies, with all other variables held constant, Net Assets and the Change in Net Assets per the Profit and Loss Account would have (decreased) increased as outlined in the table below.

Portfolio	Currency	31 December 2022	% of Net Assets	31 December 2021	% of Net Assets

<sup>1</sup> Portfolio launched during the prior reporting year.

<sup>2</sup> Portfolio launched during the current reporting year and thus no comparative period presented.

\* Portfolio liquidated during the current or prior reporting year.

A 5% weakening of the base currency of the relevant Portfolio against the above currencies would have resulted in an equal but opposite effect on the above financial statement amounts to the amounts shown above, on the basis that all other variables remain constant. The foreign currency risk exposure has been calculated on the Net Assets of the Portfolio that are denominated in a currency which is not the base currency of the relevant Portfolio. The Manager deems 5% to be a reasonable rate for foreign currency shift.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (c) Interest Rate Risk

The Portfolios may hold investments in fixed interest bearing securities. Any change to the interest rate for particular securities may result in income either increasing or decreasing. Prices of securities held will be impacted by domestic rates of interest. The Portfolio's performance therefore will depend in part on its ability to anticipate and respond to such fluctuations in market interest rates. The Managers and Sub-Investment Managers manage this risk by way of duration and yield curve analysis to establish and monitor duration positioning and yield curve structure.

The Company has forty-nine Portfolios as at the year ended 31 December 2021. Of the Portfolios, eighteen are Portfolios where the majority of the assets and liabilities of the Portfolio is invested in equity securities and are non-interest bearing. As a result, these Portfolios are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

At year end, the Portfolios set out in the table below invested primarily in fixed income and floating rate instruments and are therefore exposed to the effects of fluctuations in the prevailing level of market interest rates on their respective financial position and cash flows.

Based on the Portfolios' compositions as at 31 December 2022 and 31 December 2021, had interest rates fallen by 0.50% with all other variables held constant, it is estimated that Net Assets and the Change in Net Assets per the Profit and Loss Account would have increased by approximately the values outlined in the table below. A 0.50% rise in rates would have resulted in an equal but opposite effect.

Portfolio	Currency	31 December 2022	% of Net Assets	31 December 2021	% of Net Assets

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (d) Credit/Counterparty Risk

Credit risk is the risk that an issuer or counterparty will be unable to meet a commitment that it has entered into with the Company. It is the Company's policy to enter into financial instruments with a diversity of creditworthy counterparties. Therefore, the Company does not expect to incur material credit losses on its financial instruments. The Manager performs assessments of the credit quality of trading counterparties used by the Company. This assessment includes, at minimum, an initial and annual credit review based on financial and/or third-party ratings data. Counterparties used for forwards and other OTC derivatives are subject to heightened monitoring, which includes in-depth credit reviews considering third-party ratings and/or factors such as capital adequacy, asset quality, management quality, earnings, and liquidity. The Manager also follows news regarding the financial sector to monitor industry trends as well as events that may directly impact specific counterparties.

The Company's maximum exposure to credit risk (not taking into account the value of any collateral or other security held) in the event that counterparties fail to perform their obligations as at 31 December 2022 and 31 December 2021 in relation to each class of recognised financial assets, other than derivatives, is the carrying amount of those assets as indicated in the Balance Sheet.

Transactions involving derivative financial instruments are usually with counterparties with whom the Portfolio has signed master netting agreements. Master netting agreements provide for the net settlement of contracts with the same counterparty in the event of default. The credit risk associated with derivative financial assets subject to a master netting arrangement is eliminated only to the extent that financial liabilities due to the same counterparty will be settled after the assets are realised. Risk is also managed by collateral being immediately available to the Company without recourse to counterparty in the event of default of counterparty.

Portfolios participating in Securities Lending Agreements are also open to counterparty risk. To minimise such risk, collateral in form of cash and/or highly-rated government debt is held, that is at least equivalent to 102% of the value of the lent securities. In accordance with the UCITS Regulations, collateral accepted for securities lending transactions must be transferred to the Depository of the Company and must be immediately available to the Portfolios, without recourse to the counterparty, in the event of a default by that entity. While it is intended that the value of the collateral received will be equal to or exceed the value of securities loaned at all times, in the event of a sudden upward market movement, there is a risk that the value of the collateral may fall below the value of the securities transferred. Please refer to Concentration Data in Appendix IV for detailed list of counterparties across securities lending transactions as at 31 December 2022.

Cash held via accounts opened on the books of Brown Brothers Harriman & Co. ("BBH") are obligations of BBH while cash held in accounts opened directly on the books of a third party cash correspondent bank, sub-custodian or a broker (collectively, "agency accounts") are obligations of the agent. Cash held via agency cash accounts are liabilities of the agent, creating a debtor/creditor relationship directly between the agent and the Company. Accordingly, while BBH is responsible for exercising reasonable care in the administration of such agency cash accounts where it has appointed the agent (i.e., in the case of cash correspondent banks and sub-custodians), it is not liable for their repayment in the event the agent, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment. As at 31 December 2022, all cash and bank balances held on overnight deposit were with third party institutions, as outlined in Note 3. Cash and Cash Equivalents, that have a long term credit rating which is investment grade as issued by Standard & Poor's (31 December 2021: same). BBH has a long term credit rating of A+ (31 December 2021: A+) as issued by Fitch.

The Depository must ensure that there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. As Depository, Brown Brothers Harriman Trustee Services (Ireland) Limited ("BBHTS") must ensure the ownership of each asset and the location of documents of title for each asset.

The key risk for the Company remains Credit Risk i.e. that the Manager buys a loan or bond of a particular issuer and it does not perform as expected and either defaults on a payment or experiences a significant drop in the secondary market value.

To mitigate this risk, the Manager carries out independent due diligence on each borrower, and has a focus on stable, performing credits that evidence strong track records through previous economic cycles. Additionally, the size of an issuer is also considered and the Manager continues to favour the larger issuers in the market, defined by having debt issuance greater than \$500m. These issuers tend to have broader syndicates, which can aid liquidity in the secondary market. As well as screening out the smaller issuers the Manager also excludes highly cyclical industries and companies with limited earning visibility from its Investment Process.

Once a particular investment has been made, the Manager monitors it. A range of relevant data is reviewed on an ongoing basis for each investment, including, but not limited to, key financial drivers, commodity prices, stock prices, regulatory developments, financial results, press releases and management commentary to identify any indicators of credit deterioration.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (d) Credit/Counterparty Risk (continued)

To manage this risk further, the Board ensures that the Manager operates in accordance with the investment limits and restrictions policy determined by the Board. The Directors monitor the implementation and results of the investment process with the Manager at each Board meeting and monitor risk factors in respect of each Portfolio.

The securities that BBH holds in custody include equities, fixed income securities, participatory notes, asset backed securities and REITS. All securities that BBH holds in custody (as global sub-custodian for and on behalf of BBHTS for further benefit of its underlying clients) are segregated from BBH's own assets, whether they are held in BBH's vault, in segregated accounts on the books of their sub-custodians, or in an account maintained at a central securities depository. BBH maintains segregated accounts per client on its own books as well as on the books of the sub-custodian in the local market, where this is possible. As Depository, BBHTS must also ensure non-cash assets are held on a fiduciary basis through BBH's network of global sub-custodians.

BBH's sub-custodians are required by contract with BBH and generally by operation of law to segregate the securities of custody clients from the general banking assets of the sub-custodian.

BBH performs both initial and ongoing due diligence reviews on the sub-custodians within its global custody network through its Network Management Group. Such reviews include an assessment of service level standards, management expertise, market information, custody operations, reporting and technology capabilities at the sub-custodian, as well as reviews in relation to their reputation and standing in the market and their ongoing commitment to providing custody services.

Service level agreements are put in place with each sub-custodian, as well as the usual contractual arrangements, and these are reviewed on a regular basis through service review meetings, including on-site due diligence meetings.

Regular financial analysis of all sub-custodians is carried out by BBH's Risk and Credit Group and is focused on the sub-custodian bank's capital adequacy, asset quality, earnings, liquidity and credit ratings as key indicators, amongst others. These reviews form part of BBH's routine assessment of a sub-custodian's financial strength and standing.

The Manager monitors the Company's risk in accordance with UCITS guidelines and reports to the Board of Directors on a periodic basis.

The Company invests in debt instruments that may receive a credit rating from a well-known rating agency. The credit ratings in the tables below are calculated as a percentage of fixed income securities, where there is a significant proportion of that Portfolio held as fixed income. A debt instrument is considered Investment Grade by Standard & Poor's and Fitch if its credit rating is BBB- or higher and by Moody's if its credit rating is Baa3 or higher. As at 31 December 2022 and 31 December 2021 the exposures by credit rating for each applicable Portfolio were as follows:

## FOR THE YEAR ENDED 31 DECEMBER 2022

**12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)****(e) Liquidity Risk**

The main liquidity risks of the Company are associated with the need to satisfy Shareholders' requests for redemptions. The Company is exposed to daily cash redemptions of Redeemable Participating Shares. Redeemable Participating Shares are redeemed on demand at the holder's option based on the relevant Portfolio's Net Asset Value per Share at the time of redemption. This risk is mitigated by the Company primarily investing in securities listed or traded on the recognised markets in OECD member states and other countries thus assets comprise principally of realisable securities, which can be readily sold. Additionally, if there are any collateral arrangements in place with a counterparty, this will limit the extent to which liabilities may be extended to the Company. Moreover, as outlined in Note 19, a committed liquidity facility is available to the Company.

*Financial Liabilities*

The maturity grouping is based on the remaining period from the end of the reporting period to the contractual maturity date. When the counterparty has a choice of when the amount is paid, the liability is allocated to the earliest on which the Company can be required to pay.

As at 31 December 2022 and 31 December 2021, the vast majority of liabilities of all Portfolios were payable in one month. Please refer to Schedules for Investments for details of maturity dates of derivative financial liabilities. Liabilities other than derivative financial liabilities are due within one month.

**(f) LIBOR Replacement Risk**

Many financial instruments use or may use a floating rate based on London Interbank Offered Rate ("LIBOR"), the offered rate at which major international banks can obtain wholesale, unsecured funding. LIBOR may be a significant factor in determining the Fund's payment obligations under a derivative investment, the cost of financing to the Fund or an investment's value or return to the Fund, and may be used in other ways that affect the Fund's investment performance. The United Kingdom's Financial Conduct Authority announced a phase out of the LIBOR. Although many LIBOR rates were phased out, a selection of widely used USD LIBOR rates will continue to be published through June 2023 in order to assist with the transition. The Portfolios may be exposed to financial instruments tied to LIBOR to determine payment obligations, financing terms, hedging strategies or investment value. The transition process away from LIBOR might lead to increased volatility and illiquidity in markets for, and reduce the effectiveness of new hedges placed against, instruments whose terms currently include LIBOR.

**(g) Fair Value of Investments**

FRS 102 Section 11.27 on "Fair Value: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities;

Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices);

Level 3 – Inputs for the asset or liability that are not based on observable market data (unobservable inputs). Pricing inputs are unobservable for the investment and include situations where there is little, if any market activity for the instrument. The inputs into the determination of fair value require significant management, judgement or estimation. As observable prices are not available for these securities, the Portfolios would have used valuation techniques to derive the fair value if applicable.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. For example, if a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measure is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement in considering the factors specific to the asset or liability.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (g) Fair Value of Investments (continued)

The determination of what constitutes “observable” requires judgement by the Directors in consultation with the Manager.

The value of the Portfolios’ investments in equity securities, exchange-traded funds, warrants, exchange-traded options purchased and written, for which market quotations are available, is generally determined by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing Price (“NOCP”) provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern Time, unless that price is outside the range of the “inside” bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

The value of participatory notes is determined by obtaining valuations from independent pricing services based on the underlying equity security and applicable exchange rate (Level 1 inputs).

The value of the Portfolios’ investments in debt securities is determined primarily by obtaining valuations from independent pricing services based on available mid quotations, or if quotations are not available, by methods which include various considerations based on security type (generally Level 2 inputs). If there is more than one quote security available, security is classified as Level 2. In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Portfolios:

*Corporate Bonds.* Inputs used to value corporate debt securities generally include relevant credit information, observed market movements, sector news, US Treasury yield curve or relevant benchmark curve, and other market information, which may include benchmark yield curves, reported trades, broker-dealer quotes, issuer spreads, comparable securities, and reference data, such as market research publications, when available (“Other Market Information”).

*Convertible Bonds.* Inputs used to value convertible bonds (including CoCos) generally include underlying stock data, conversion premiums, listed bond and preferred stock prices and Other Market Information, which may include benchmark curves, trade execution data, and sensitivity analysis, when available.

*U.S. Treasury Obligations.* Inputs used to value U.S. Treasury securities generally include quotes from several inter-dealer brokers and Other Market Information.

*U.S. Government Agency Securities.* Inputs used to value U.S. Government Agency securities generally include obtaining benchmark quotes and Other Market Information.

*Asset-Backed Securities and Mortgage-Backed Securities.* Inputs used to value asset-backed securities and mortgage-backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and Other Market Information.

*High Yield Securities.* Inputs used to value high yield securities generally include a number of observations of equity and credit default swap curves related to the issuer and Other Market Information.

*Emerging Markets Debt and Foreign Government Securities.* Inputs used to value emerging markets debt and foreign government securities generally include dealer quotes, bond market activity, discounted cash flow models, and other relevant information such as credit spreads, benchmark curves and Other Market Information.

*Collateralised Loan Obligations (CLOs).* The value of collateralised loan obligations is primarily determined by cash flow data, relevant loan pricing data and market color, and research from market participants and trading desks (Level 2 or 3 inputs).

The value of term loans is determined primarily by obtaining valuations from independent pricing services based on broker quotes (generally Level 2 or Level 3 inputs depending on the number of quotes available).

The value of futures contracts is determined by obtaining valuations from independent pricing services at the settlement price at the market close (Level 1 inputs).

The value of forward foreign currency contracts is determined by obtaining valuations from independent pricing services based on actual traded currency rates on independent pricing services’ networks, along with other traded and quoted currency rates provided to the pricing services by leading market participants (Level 2 inputs).

## FOR THE YEAR ENDED 31 DECEMBER 2022

**12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)****(g) Fair Value of Investments (continued)**

The value of credit default swaps is determined by obtaining valuations from independent pricing services using a model that considers a number of factors, which may include default probabilities, credit curves, recovery rates and cash flows (Level 2 inputs).

The value of inflation swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying inflation rates including forward inflation expectation rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying forward inflation curve and reference rate (Level 2 inputs).

The value of interest rate swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying rates including the local overnight index swap rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of total return swaps is determined by obtaining valuations from independent pricing services using the underlying asset and stated benchmark interest rate (Level 2 inputs).

The value of cross currency swaps is determined by obtaining valuations from independent pricing services based on present value of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of volatility swaps is determined primarily by obtaining valuations from independent pricing services and is based on a predetermined volatility level versus the actual amount of volatility realised over a period data of the reference asset (Level 2 inputs).

The value of variance swaps is determined primarily by obtaining valuations from independent pricing services and is based on the historical realised and expected future variance (or fair variance) of the reference asset (Level 2 inputs).

The value of correlation swaps is determined primarily by obtaining valuations from independent pricing services and is based on the difference in the realised correlation and a fixed correlation value (Level 2 inputs).

The value of contracts for difference ("CFD") is determined primarily by obtaining valuations from independent pricing services, which are based on references to the underlying asset and the stated reference rate (Level 2 inputs).

The value of swaptions is determined by obtaining valuations from independent pricing services or counterparty pricing source (Level 2 inputs).

Option contracts that are traded over-the-counter are generally valued on the basis of quotations provided by broker dealers or prices provided by independent pricing services who use a series of techniques including simulated pricing models and/or curve fitting (bootstrapping), which aids in determining the present value of the contracts. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, yield curves, credit curves, volatility surfaces, and exchange rates (Level 2 inputs).

Certificates of deposit are valued at amortized cost (Level 2 inputs).

Reverse repurchase agreements are evaluated at par, by pricing services (Level 2 inputs).

The Manager has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in non-exchange traded investment companies are valued using the respective fund's daily calculated net asset value ("NAV") per share (Level 2 inputs), when available.

If a valuation is not available from an independent pricing service, or if the Manager has reason to believe that the valuation received does not represent the amount a Portfolio might reasonably expect to receive on a current sale in an orderly transaction, the Manager seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level 3 inputs depending on the number of quotes available). If such quotations are not available, the security is valued using methods the Board of Directors has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security.

Inputs and assumptions considered in determining the fair value of a security based on Level 2 or Level 3 inputs may include, but are not limited to, the type of the security; the initial cost of the security; the existence of any contractual restrictions on the security's disposition; the price and extent of public trading in similar securities of the issuer or of comparable companies; quotations or evaluated prices from broker-dealers and/or pricing services; information obtained from the issuer and/or analysts; an analysis of the company's or issuer's financial statements; an evaluation of the inputs that influence the issuer and the market(s) in which the security is purchased and sold.

## FOR THE YEAR ENDED 31 DECEMBER 2022

## 12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

## (g) Fair Value of Investments (continued)

The value of the Portfolios' investments in foreign securities is generally determined using the same valuation methods and inputs as other Portfolio investments, as discussed above. Foreign security prices expressed in local currency values are normally translated from the local currency into US dollars using the exchange rates as of 4:00 p.m., Eastern Time on days the New York Stock Exchange ("NYSE") is open for business. The Board of Directors has approved the use of ICE Data Pricing & Reference Data LLC ("ICE") to assist in determining the fair value of foreign equity securities when changes in the value of a certain index suggest that the closing prices on the foreign exchanges may no longer represent the amount that a Portfolio could expect to receive for those securities or on days when foreign markets are closed and US markets are open. In each of these events, ICE will provide adjusted prices for certain foreign equity securities using a statistical analysis of historical correlations of multiple factors (Level 2 inputs). The Board of Directors has also approved the use of ICE to evaluate the prices of foreign debt securities as of the time as of which a Portfolio's share price is calculated. ICE utilizes benchmark spread and yield curves and evaluates available market activity from the local close to the time as of which a Portfolio's share price is calculated (Level 2 inputs) to assist in determining prices for certain foreign debt securities.

In the case of both foreign equity and foreign debt securities, in the absence of precise information about the market values of these foreign securities as of the time as of which a Portfolio's share price is calculated, the Board of Directors has determined on the basis of available data that prices adjusted or evaluated in this way are likely to be closer to the prices a Portfolio could realise on a current sale than are the prices of those securities established at the close of the foreign markets in which the securities primarily trade.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

The following tables show financial investments at the levels of fair value hierarchy:

Japan Equity Engagement	US\$ 1 = JPY 131.9450	US\$ 1 = JPY 115.1550	US\$ 1 = JPY 130.6254	US\$ 1 = JPY 109.7940
Macro Opportunities FX	US\$ 1 = EUR 0.93699	US\$ 1 = EUR 0.87935	US\$ 1 = EUR 0.94726	US\$ 1 = EUR 0.84567
Ultra Short Term Euro Bond	US\$ 1 = EUR 0.93699	US\$ 1 = EUR 0.87935	US\$ 1 = EUR 0.94726	US\$ 1 = EUR 0.84567

A notional currency adjustment of US\$ (304,151,197) (31 December 2021: US\$ (271,028,314)) arose from the translation of the opening Net Assets, the Profit and Loss Accounts and the Statements of Changes in Net Assets Attributable to Redeemable Participating Shares. The method of translation has no effect on the value of the net assets attributable to the individual Portfolios.

**FOR THE YEAR ENDED 31 DECEMBER 2022****16. SOFT COMMISSIONS ARRANGEMENTS**

The Manager and connected persons have entered into soft commission arrangements with brokers in respect of research products in limited instances, subject to its receiving best execution to support the investment decision process.

The types of research received includes all standard forms of research, including but not limited to current and historical data concerning particular companies, industries and the financial economy as a whole, as well as information and opportunities, risks and trends, and analysis involving special situations. The Manager considers these arrangements are to the benefit of the Portfolios and has satisfied itself that it obtains best execution on behalf of the Portfolios.

**17. SEGREGATED LIABILITY**

The Company has multiple Portfolios and further Portfolios may be created in the future. With the approval of the Company's Shareholders, by way of a special resolution passed on 3 November 2006, the Company adopted segregated liability between its Portfolios. As at that date, each Portfolio bears its own liabilities and none of the Company, any of the service providers appointed to the Company, the Directors, any receiver, examiner, liquidator nor will any other person have access to the assets of a Portfolio in satisfaction of a liability of any other Portfolio.

**18. EFFICIENT PORTFOLIO MANAGEMENT**

The Company may employ investment techniques and instruments relating to transferable securities and/or other financial instruments including financial derivative instruments under the conditions and within the limits laid down by the Central Bank, provided that such instruments are used for efficient portfolio management purposes (i.e. hedging, reducing risks or cost, or increasing capital or income returns) or investment purposes. Techniques and instruments utilised may only be used in accordance with the investment objectives of the relevant Portfolio.

At the discretion of the Manager or the Sub-Investment Manager, each Portfolio may enter into securities lending transactions ("Securities Lending Agreements"), subject to the conditions and limits set out in the Central Bank UCITS Regulations, in respect of each of the types of assets in which the Portfolio may invest, as described in the "Instruments/Asset Classes" section of the relevant Supplement for the Portfolio. Any such securities lending transactions may be used for efficient portfolio management purposes.

Securities Lending Agreements are transactions through which a Portfolio lends its securities to another party, the borrower, which is contractually obliged to return equivalent securities at the end of an agreed period. While securities are on loan, the borrower pays the Portfolio (i) a loan fee and (ii) any income from the securities.

The Company received, for each Portfolio that participated in Securities Lending Agreements, collateral that is at least equivalent to 102% of the value of the lent securities. Portfolios might only enter into Securities Lending Agreements under which (i) they are entitled at all times to request the return of the securities lent or to terminate any securities lending transactions and (ii) the transactions do not jeopardise the management of the Portfolio's assets in accordance with its investment policy. Unless otherwise specified in the relevant Supplement, the maximum proportion of a Portfolio's Net Asset Value that can be subject to Securities Lending Agreements is 50% and the expected proportion of a Portfolio's Net Asset Value that will be subject to Securities Lending Agreements is 0-10%.

The Company has appointed Brown Brothers Harriman & Co. (the "Lending Agent") to carry out the Securities Lending Agreements, notably the selection of counterparties, subject to the Company's pre-approval, and the management of the collateral. Portfolios entered into Securities Lending Agreements received all revenue generated from the Securities Lending Agreements, net of direct and indirect operational costs, which represented 90% of the total revenue generated. The remaining 10% was paid to the Lending Agent in consideration of the direct and indirect operational costs of the provision of its services and the guaranty that it provided. The Company left Securities Lending Program in July, securities lending income earned by the Portfolios during the relevant period is disclosed separately in the Profit and Loss Account.

As of 31 December 2022, the Company did not engaged in any securities lending.

**FOR THE YEAR ENDED 31 DECEMBER 2022**
**18. EFFICIENT PORTFOLIO MANAGEMENT (CONTINUED)**

As of 31 December 2021, the value of outstanding securities on loan and the value of collateral in the form of securities recorded by the Portfolios were as follows:

Portfolio	Currency	Value of Outstanding Securities on Loan	Value of Collateral	% of Collateral held
Corporate Hybrid Bond	EUR	8,635,753	9,069,372	105%
Emerging Market Debt - Hard Currency	USD	1,369,293	1,437,806	105%
Emerging Markets Equity	USD	917,277	963,656	105%
Emerging Markets Select Equity	USD	1,014,757	1,066,211	105%
Euro Bond Absolute Return	EUR	295,609	310,400	105%
European High Yield Bond	EUR	734,967	771,750	105%
Global High Yield SDG Engagement	USD	150,480	158,013	105%
High Yield Bond	USD	74,575,394	78,314,591	105%
Short Duration Emerging Market Debt	USD	511,815	537,514	105%
Short Duration High Yield SDG Engagement	USD	3,553,505	3,731,603	105%
Strategic Income	USD	12,819,976	13,464,004	105%
Ultra Short Term Euro Bond	EUR	10,227,006	10,739,879	105%
US Long Short Equity	USD	6,672,007	7,007,541	105%

During the year ended 31 December 2022, Corporate Hybrid Bond, Emerging Market Debt - Hard Currency, Emerging Market Debt Blend, High Yield Bond and Short Duration Emerging Market Debt engaged in reverse repurchase trading. Total interest income arising from reverse repurchase agreements for the year ended 31 December 2022 was US\$ 140,059. Total interest expense arising from reverse repurchase agreements for the year ended 31 December 2022 was US\$ (6,300). Direct and indirect costs associated with efficient portfolio management techniques are not readily identifiable.

During the year ended 31 December 2021, the Company did not engage in any repurchase trading.

**19. LOAN FACILITY**

At the board meeting dated 20 June 2016, arrangements have been made with The Bank of Tokyo Mitsubishi UFJ Ltd, together with a syndicate of other banks (collectively the "Lenders") to make available a committed liquidity facility, up to a maximum amount of US\$ 500,000,000 (the "Facility"), to the Company in respect of the Portfolios from the date of the execution of a credit agreement with the Bank and the proceeds of the Facility could only be used for temporary or emergency liquidity needs of the Portfolios. From 4 October 2018, the maximum amount of the committed liquidity facility was increased from US\$ 500,000,000 to US\$ 600,000,000. On 27 March 2020, the maximum amount of the committed liquidity facility was increased from US\$ 600,000,000 to US\$ 975,000,000. On 1 October 2020, the maximum amount of the committed liquidity facility was decreased from US\$ 975,000,000 to US\$ 750,000,000. On 30 September 2021, the maximum amount of the committed liquidity facility has been increased from US\$ 750,000,000 to US\$ 850,000,000. The Facility, in the amount of \$850,000,000, was renewed on 29 September 2022 for the period of 364 days for all Portfolios. For the year ended 31 December 2022, Event Driven did not participate in the Facility. The cost of the commitment fee has changed accordingly.

There were no loans outstanding under the Facility at 31 December 2022 and 31 December 2021. During the year ended 31 December 2022 and 31 December 2021, none of the Portfolios utilised the loan facility.

**FOR THE YEAR ENDED 31 DECEMBER 2022****20. UNFUNDED LOAN COMMITMENTS**

As of 31 December 2022, the Company had no unfunded loan commitments.

As of 31 December 2021, the Company had the following unfunded loan commitments:

Portfolio Name	Security Name	Unfunded Commitment USD	Fair Value USD
High Yield Bond	Service Logic Acquisition Inc	503,393	507,842
Short Duration High Yield SDG Engagement	Service Logic Acquisition Inc	131,500	132,662
Strategic Income	Intelsat Jackson Holdings S.A.	49,485	50,078
Strategic Income	Pro Mach Group Inc	55,031	55,568

**21. SIGNIFICANT EVENTS DURING THE YEAR**

Russia's invasion of Ukraine, and corresponding events in late February 2022, have had, and could continue to have adverse effects on commodities and European economic activity. Whilst the direct Company's exposure to Russia-Ukraine is limited, Management will continue to monitor any potential impact on the activities of the Company, including but not limited to the imposed Russian sanctions and the increase in associated macroeconomic and geopolitical risks.

In order to compare the quality and effectiveness of the services provided by the incumbent auditors with those of other audit firms, the Company in 2021 commenced a tender process for the appointment of its external auditor. The audit tender process concluded in 2022 and it resulted in the re-appointment of Ernst & Young as the Company's external auditor.

Economic and financial market uncertainties remain elevated, driven by higher sustained inflation and tightening monetary policy as Central Banks have increased base rates, along with the tightening of credit conditions as illustrated with recent events in the banking sector. These market conditions are contributing to additional volatility and fluctuation in market variables including but not limited to interest rates, foreign exchange, equity prices, commodity prices, widening credit spreads, implied volatilities and asset correlations. Management are actively monitoring events and any exposure to elevated risk sectors.

Neuberger Berman Sustainable Emerging Market Debt – Hard Currency Fund launched on 19 January 2022.

Neuberger Berman Commodities Fund launched on 9 February 2022.

With effect from 6 April 2022, Neuberger Berman Global High Yield Bond Fund's name was changed to Neuberger Berman Global High Yield SDG Engagement Fund.

A new Prospectus and Supplements to the Prospectus were noted by the Central Bank on 6 April 2022.

Neuberger Berman Next Generation Space Economy Fund launched on 10 May 2022.

Neuberger Berman Uncorrelated Trading Fund launched on 14 June 2022.

With effect from 19 August 2022, Neuberger Berman Global Flexible Credit Fund's name was changed to Neuberger Berman Global Flexible Credit Income Fund.

With effect from 3 October 2022, Neuberger Berman Emerging Market Corporate Debt Fund's name was changed to Neuberger Berman Sustainable Emerging Market Corporate Debt Fund.

Neuberger Berman Event Driven Fund launched on 26 October 2022.

A new Prospectus and Supplements to the Prospectus were noted by the Central Bank on 28 November 2022 covering the name change for Neuberger Berman Emerging Markets Sustainable Equity Fund to Neuberger Berman Emerging Markets Select Equity Fund, Neuberger Berman Global Thematic Equity Fund to Neuberger Berman Global Equity Megatrends Fund and Neuberger Berman Short Duration High Yield Bond Fund to Neuberger Berman Short Duration High Yield SDG Engagement Fund.

**FOR THE YEAR ENDED 31 DECEMBER 2022**

**21. SIGNIFICANT EVENTS DURING THE YEAR (CONTINUED)**

During the year the below Portfolios changed their SFDR classifications as follow:

- a) Portfolios moving from Article 9 to 8:
  - Neuberger Berman Global High Yield Sustainable Action Fund
  - Neuberger Berman Systematic Global Sustainable Value Fund
  - Neuberger Berman Global Sustainable Equity Fund
  - Neuberger Berman European Sustainable Equity Fund
- b) Portfolios moving from Article 8 to 6:
  - Neuberger Berman CLO Income Fund

Other than the above, there have been no significant events affecting the Company during the year.

**22. SIGNIFICANT EVENTS SINCE THE YEAR END**

A new Multi Strategy Supplement to the Prospectus was noted by the Central Bank on 3 January 2023 covering the change in Performance Fee calculation methodology on Neuberger Berman Uncorrelated Strategies Fund.

Neuberger Berman Uncorrelated Trading Fund plans to liquidate subsequent to 1st quarter of 2023.

Economic and financial market uncertainties remain elevated, driven by higher sustained inflation and tightening monetary policy as Central Banks have increased base rates, along with the tightening of credit conditions as illustrated with recent events in the banking sector. These market conditions are contributing to additional volatility and fluctuation in market variables including but not limited to interest rates, foreign exchange, equity prices, commodity prices, widening credit spreads, implied volatilities and asset correlations. Management are actively monitoring events and any exposure to elevated risk sectors.

<sup>+</sup> Calculated based on the average number of shares outstanding during the period.

<sup>++</sup> Ratios are net of expense waiver, where applicable. The net expense ratio includes both operational and non-operational expenses and any adjustments required to comply with appropriate accounting standards.

Where applicable, ratios have been annualised.

\* Share class launched during the current reporting year.

<sup>1</sup> Portfolio launched during the prior reporting year.

<sup>2</sup> Portfolio launched during the current reporting year and thus no comparative period presented.

FOR THE YEAR ENDED 31 DECEMBER 2022

26. DERIVATIVE CONTRACTS

The Manager of the Company is an affiliate of Neuberger Berman Group LLC, who is a registered investment adviser with the SEC in the United States. The information included here represents US GAAP equivalent disclosures that are provided in order to enable the Manager to avail of certain exemptions available to it under the SEC Custody Rule.

The Portfolios may transact in a variety of derivative instruments including swaptions, forward currency contracts, futures contracts, contracts for differences, reverse repurchase agreements, equity, index and currency options contracts, interest rate, credit default, cross currency, inflation and total return swap contracts.

Typically derivatives serve as components of the Portfolios' investment strategy and are utilised primarily to structure and hedge investments, to enhance performance and reduce risk to the Portfolios (the Company does not designate any derivative as a hedging instrument for hedge accounting purposes).

The Company uses financial derivative instruments to economically hedge its risks associated primarily with interest rate and foreign currency fluctuations. Derivatives may also be used for trading purposes where the Manager believes this would be more effective than investing directly in the underlying financial instruments.

Derivatives often reflect, at their inception only a mutual exchange of promises with little or no transfer of tangible consideration. However, these instruments frequently involve a high degree of leverage and are very volatile. A relatively small movement in the underlying of a derivative contract may have a significant impact on the profit or loss of the Company.

The Manager closely monitors the Portfolios' exposure under derivatives as part of the overall management of the Portfolios.

The Fair Value of these derivative instruments is included in the Balance Sheet with changes in Fair Value included in Net gain/(loss) on Financial Assets and Liabilities at Fair Value through Profit and Loss Account.

The Portfolios hold forward currency contracts some of which are specific to hedged share classes. Currency rate fluctuations that impact these forwards will only affect the net assets in the respective class and not the Portfolio as a whole. Refer to the Schedules of Investments for further information on class level forward currency contracts.

The notionals summarised in the table below are as at 31 December 2022 and 31 December 2021 and are indicative of the volume of derivative activity for the year/period. The notionals are not indicative of market risk or credit risk.

<sup>2</sup> Portfolio launched during the current reporting year and thus no comparative period presented.

**FOR THE YEAR ENDED 31 DECEMBER 2022****26. DERIVATIVE CONTRACTS (CONTINUED)****Credit-Risk-Related Contingent Features**

The Portfolios' derivative contracts are subject to International Swaps and Derivatives Association ("ISDA") Master Agreements which contain certain covenants and other provisions that may require the Company to post additional collateral on derivatives or terminate these agreements if the Company fails to maintain sufficient asset coverage for its contracts or its Net Assets decline by stated percentages or amounts. The Portfolios entered into credit default swaps as part of its investment strategies, to hedge against unfavourable changes in the value of investments and to protect against adverse movements in interest rates or credit performance with counterparties. The maximum potential amount the Portfolios could be required to pay as a seller of credit protection if a credit event occurs as at 31 December 2022 was US\$ 120,546,104 (31 December 2021: US\$ 17,700,000). The aggregate fair value of all credit default swaps as at 31 December 2022 was US\$ 4,166,005 (31 December 2021: US\$ (5,038,961)). There were no other derivative instruments with credit-risk-related contingent features held by the Company at 31 December 2022 and 31 December 2021.

**27. OFFSETTING FINANCIAL INSTRUMENTS**

The Manager of the Company is an affiliate of Neuberger Berman Group LLC, who is a registered investment adviser with the SEC in the United States. The information included here represents US GAAP equivalent disclosures that are provided in order to enable the Manager to avail of certain exemptions available to it under the SEC Custody Rule.

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

For financial reporting purposes, the Company does not offset derivative assets and derivative liabilities in the Balance Sheet. The following tables present the Company's OTC derivative and securities lending assets and liabilities by counterparty, net of amounts available for offset under a master netting agreement and net of the related collateral received by the Company for assets and pledged by the Company for liabilities as at 31 December 2022 and 31 December 2021.

(a) Collateral received (or pledged) is limited to an amount not to exceed 100% of the net amount of assets (or liabilities) in the tables presented above, for each respective counterparty.

(b) A Net Amount greater than zero represents amounts subject to loss as of 31 December 2022, in the event of a counterparty failure. A Net Amount less than zero represents amounts under collateralized to each counterparty as of 31 December 2022.

<sup>1</sup> Portfolio launched during the current reporting year and thus no comparative period presented.

<sup>2</sup> Portfolio launched during the prior reporting year.

**FOR THE YEAR ENDED 31 DECEMBER 2022**

**28. CLOSED FUNDS**

In addition to the funds detailed in this report, there are a number of terminated sub-funds that have not yet been de-authorized. A complete list of these funds is provided below. At the year ended 31 December 2022, one of these sub-funds, Lehman Brothers Commodity Plus Fund, held US\$1.84m (31 December 2021: US\$1.82m) in an account with the Depositary pending resolution of a disputed derivative transaction.

- Lehman Brothers Global Value Fund
- Lehman Brothers USA Value Fund
- Lehman Brothers European Value Fund
- Lehman Brothers Global Bond Fund
- Lehman Brothers US Bond Fund
- Lehman Brothers Emerging Markets Local Currency Bond Fund
- Lehman Brothers US Large Cap Value Fund
- Lehman Brothers Socially Responsible Investment Fund
- Lehman Brothers Commodity Plus Fund
- Lehman Brothers Alpha Select 2 Fund
- Lehman Brothers Alpha Select 4 Fund
- Lehman Brothers Global Real Estate Securities Fund
