Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

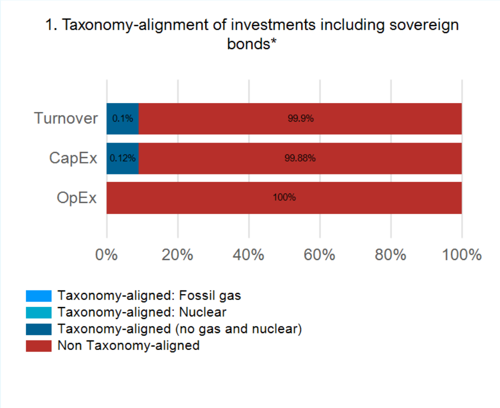
☒ No

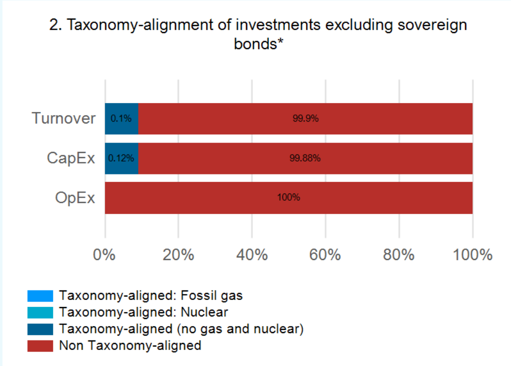
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.6%
Opex - 0%
Capex - 0.1%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.6%
Opex - 0%
Capex - 0.1%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 22.93 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 30.02 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Europe Equity Fund

Legal entity identifier:
549300NM9ZITQTY7GU39

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 76.15% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 98.98 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 76.15 % of the fund invested in sustainable investments;
iv) 36.86 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 1.29 % of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
vi) 38% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 99.92% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 66.77% of the fund was invested in sustainable investments;
iv) 30.72% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 1.35% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
vi) 34.70% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 76.15 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Nestle SA	Consumer Staples	5.35%	CH
Roche Holding AG	Healthcare	4.64%	CH
Unilever	Consumer Staples	4.5%	GB
ASML Holding	Information Technology	4.33%	NL
Danone SA	Consumer Staples	4.25%	FR
AstraZeneca	Healthcare	4%	GB
RELX	Industrials	3.9%	GB
AXA SA (A)	Financials	3.62%	FR
BNP Paribas SA	Financials	3.4%	FR
LVMH Moet Hennessy Louis Vuitton SE	Consumer Discretionary	3.25%	FR
ING Groep	Financials	3.09%	NL
SAP SE	Information Technology	3.04%	DE
Cie de Saint-Gobain	Industrials	2.88%	FR
Air Liquide SA (A)	Materials	2.74%	FR
AIB Group	Financials	2.5%	IE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

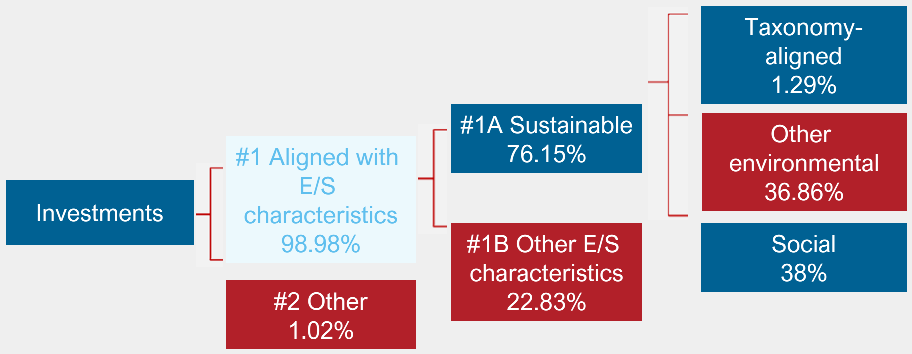
Asset allocation describes the share of investments in specific assets.

The fund invested 76.15 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 98.98 % of its assets in securities of issuers with favourable ESG characteristics;
2. 76.15 % in sustainable investments of which 1.29 % have an environmental objective (which is aligned with the EU Taxonomy), 36.86 % have an environmental objective (which is not aligned with the EU Taxonomy) and 38 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 99.92% of its assets in securities of issuers with favourable ESG characteristics;
2. 66.77% in sustainable investments of which 1.35% have an environmental objective (which is aligned with the EU Taxonomy), 30.72% have an environmental objective (which is not aligned with the EU Taxonomy), and 34.7% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	1.65%
Consumer Discretionary	Textiles & Apparel	4.01%
	Speciality Retail	1.47%
	Hotels Restaurants & Leisure	0.96%
Consumer Staples	Food Products	6.9%
	Personal Products	4.48%
Energy	Oil, Gas & Consumable Fuels	4.18%
Financials	Commercial Banks	9.84%
	Insurance	5.98%

Healthcare	Life Sciences Tools & Services	3.84%
	Health Care Equipment & Supplies	2.31%
	Pharmaceuticals	10.29%
Industrials	Machinery	4.52%
	Professional Services	4.06%
	Building Products	3.25%
	Trading Companies & Distributors	1.59%
	Airlines	1.36%
	Electrical Equipment	1.31%
Information Technology	Semiconductor Equipment & Products	5.62%
	Software	3.28%
	Communications Equipment	1.92%
Materials	Chemicals	4.9%
	Paper & Forest Products	1.88%
Open Ended Fund	Closed Ended Cash Fund	2.82%
Real Estate	Equity - Common Stock - Real Est Mgt & Dev - Real	0.79%
Utilities	Electric Utilities	4.22%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.29% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

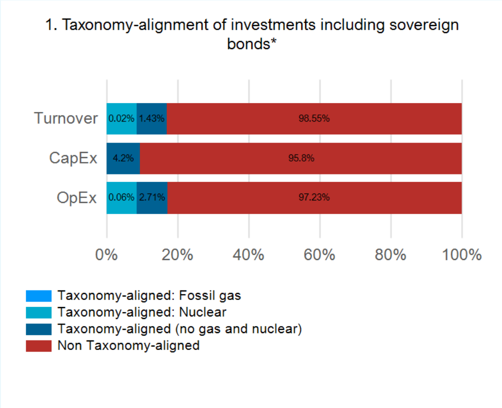
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

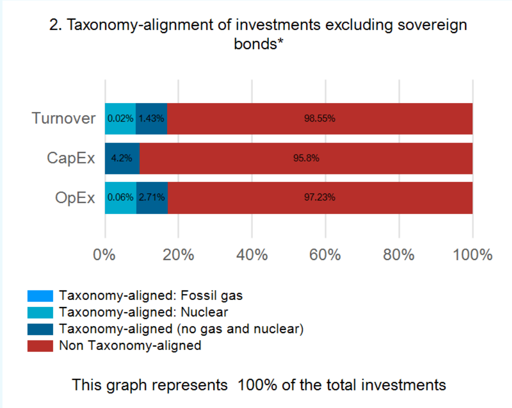
to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.81%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.1%
Opex - 1.7%
Capex - 2.7%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.1%
Opex - 1.7%
Capex - 2.7%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 36.86 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 38 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.16% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 89.01 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 39.16 % of the fund invested in sustainable investments;
iv) 21.69 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 15.98% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 85.87% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 36.92% of the fund was invested in sustainable investments;
iv) 17.24% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 17.66% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 39.16 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Fidelity Institutional Liquidity Fund - A-ACC-EUR	Open Ended Fund	3.64%	IE
Oakley Capital Investments	Closed Ended Fund	2.01%	BM
VZ Holding AG	Financials	1.92%	CH
Premier Foods	Consumer Staples	1.67%	GB
ASR Nederland	Financials	1.57%	NL

Intermediate Capital Group	Financials	1.41%	GB
Elopak (A)	Materials	1.37%	NO
JTC	Financials	1.35%	GB
IG Group Holdings	Financials	1.34%	GB
Rexel SA (A)	Industrials	1.34%	FR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation describes the share of investments in specific assets.

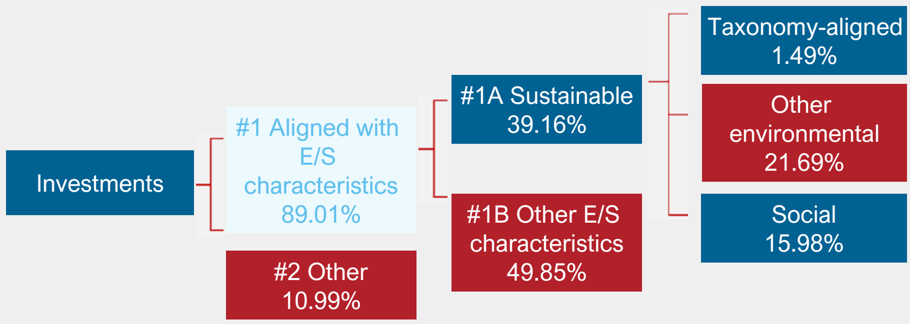
What was the proportion of sustainability-related investments?

The fund invested 39.16 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 89.01 % of its assets in securities of issuers with favourable ESG characteristics;
2. 39.16 % in sustainable investments of which 1.49 % have an environmental objective (which is aligned with the EU Taxonomy), 21.69 % have an environmental objective (which is not aligned with the EU Taxonomy) and 15.98 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 85.87% of its assets in securities of issuers with favourable ESG characteristics;
2. 36.92% in sustainable investments of which 2.02% have an environmental objective (which is aligned with the EU Taxonomy), 17.24% have an environmental objective (which is not aligned with the EU Taxonomy), and 17.66% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Closed Ended Fund	Closed End Fund	1.93%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.49% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

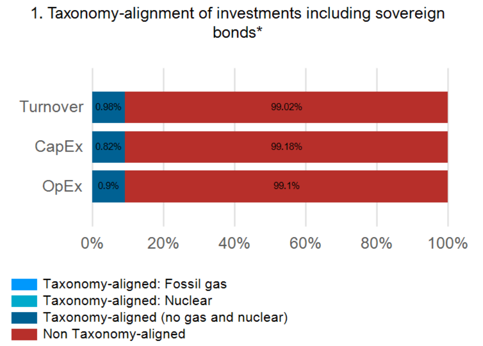
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

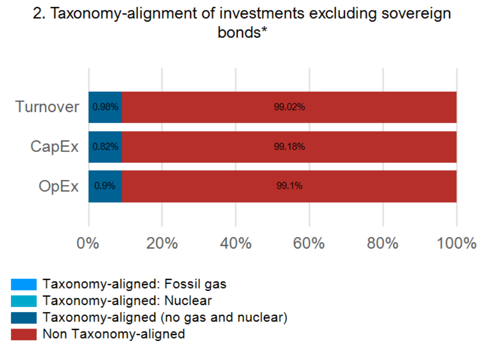
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.97%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.6%
Opex - 1%
Capex - 0.7%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.6%
Opex - 1%
Capex - 0.7%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 21.69 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 15.98 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Sustainable Eurozone Equity Fund

Legal entity identifier:
549300BAPCX6D0E0Z219

Sustainable investment objective

Did this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 57.82%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 41.05%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund was uplifted to an Article 9 in August 2023. The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
(c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.
No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained above.The following data

is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 98.87 % of the fund invested in sustainable investments;
ii) 4.26% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
iii) 53.56 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
iv) 41.05% of the fund invested in sustainable investments with a social objective.
v) 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country

Real Estate	Equity - Common Stock - Real Estate - Office Reits	1.17%
Utilities	Independent Power Producers & Energy Traders	2.62%
	Electric Utilities	1.47%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 4.26% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

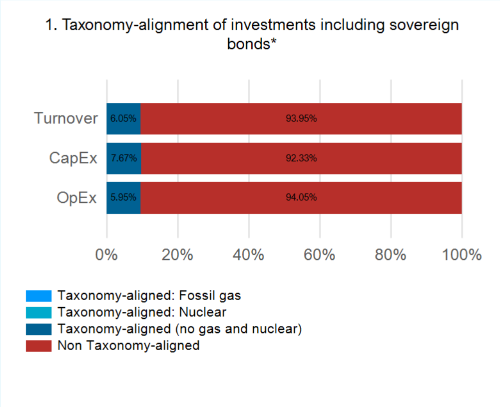
Transitional activities are activities for which low-carbon alternatives

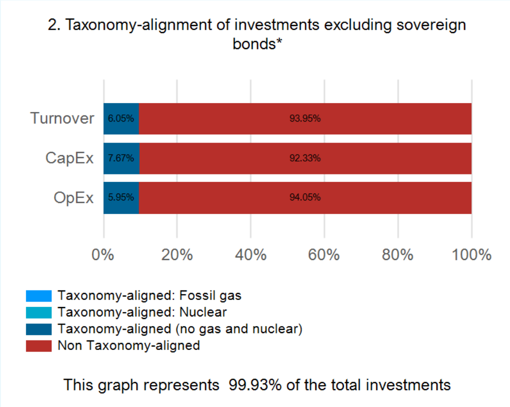
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 4.08%; Transitional Activity: 0.11%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 53.56 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 41.05 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:
1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Future Connectivity Fund

Legal entity identifier:
2549000BDP4X7X1C9A86

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:__%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.49% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:__%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 94.04 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 62.49 % of the fund invested in sustainable investments;
iv) 50.62 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 11.22% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 92.65% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 46.55% of the fund was invested in sustainable investments;
iv) 31.4% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 14.95% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 62.49 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Salesforce	Information Technology	3.09%	US
Alphabet	Information Technology	3.08%	US
Electronic Arts	Consumer Discretionary	3.06%	US
T-Mobile US	Communication Services	3.04%	US
SAP SE	Information Technology	3%	DE
Autodesk	Information Technology	2.98%	US
Amazon.com	Consumer Discretionary	2.89%	US
Accenture (A)	Information Technology	2.88%	IE
NXP Semiconductors	Information Technology	2.86%	NL
Amadeus IT Group SA (A)	Consumer Discretionary	2.75%	ES
Sony Group	Consumer Discretionary	2.73%	JP
Motorola Solutions	Information Technology	2.68%	US
Samsung Electronics	Information Technology	2.58%	KR
PTC	Information Technology	2.55%	US
QUALCOMM	Information Technology	2.37%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

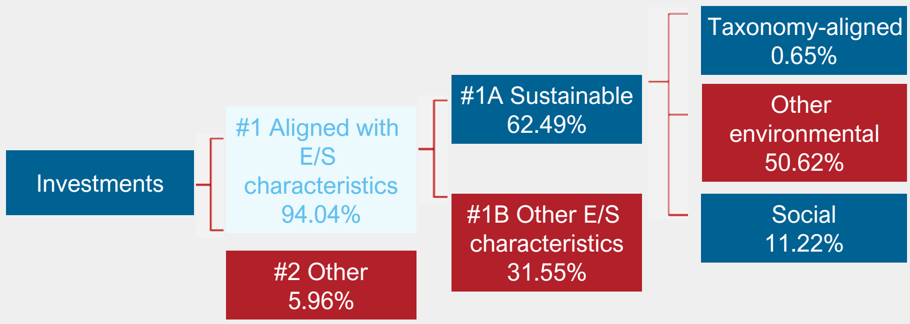
Asset allocation describes the share of investments in specific assets.

The fund invested 62.49 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 94.04 % of its assets in securities of issuers with favourable ESG characteristics;
2. 62.49 % in sustainable investments of which 0.65 % have an environmental objective (which is aligned with the EU Taxonomy), 50.62 % have an environmental objective (which is not aligned with the EU Taxonomy) and 11.22 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 92.65% of its assets in securities of issuers with favourable ESG characteristics;
2. 46.55% in sustainable investments of which 0.2% have an environmental objective (which is aligned with the EU Taxonomy), 31.4% have an environmental objective (which is not aligned with the EU Taxonomy), and 14.95% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	3.63%
	Media	1.53%
Consumer Discretionary	Multiline Retail	7.14%
	Media	5.38%
	Hotels Restaurants & Leisure	2.95%
	Household Durables	1.1%
Financials	Diversified Financial Services	1.73%
Healthcare	Health Care Technology	1.43%
Industrials	Professional Services	5.19%
Information Technology	Communications Equipment	7.31%
	Internet Software & Services	5.88%
	Computers & Peripherals	5.08%
	It Services	3.16%
	Software	26.7%
	Semiconductor Equipment & Products	20.98%
	Electronic Equipment Instruments & Components	0.61%
Open Ended Fund	Closed Ended Cash Fund	0.39%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.65% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

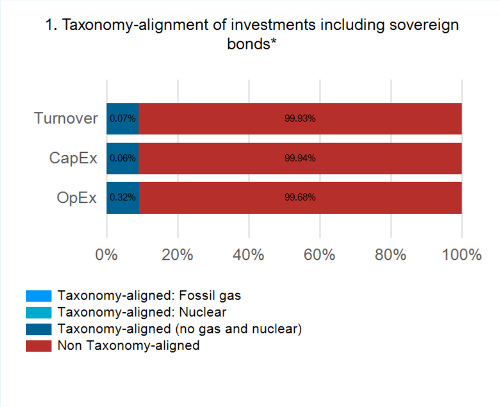
☐ In fossil gas ☐ In nuclear energy

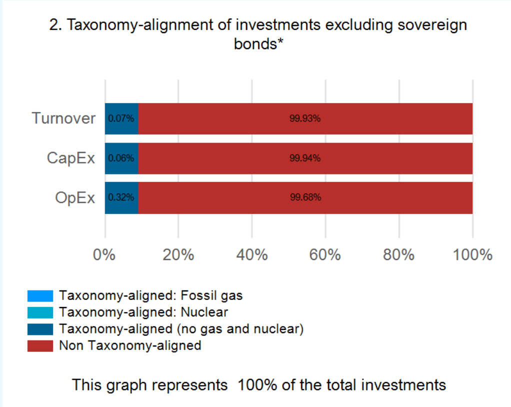
☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.07%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.4%
Opex - 1.1%
Capex - 0.3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.4%
Opex - 1.1%
Capex - 0.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 50.62 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 11.22 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Global Equity Fund

Legal entity identifier:
254900R7XPBV37D85Z68

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 41.07%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 55.85%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals (“SDGs”); or
(c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet’s oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.
No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained above. The following data is a quarterly average of the month's end day throughout the fund's reporting reference period.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 96.92 % the percentage of the fund invested in sustainable investments;
ii) 39.48 % the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy;
iii) 55.85% the percentage of the fund invested in sustainable investments with a social objective; and
iv) 0% the percentage of the fund with exposure to investments that undertake activities that are excluded in accordance with the Exclusions.
The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

During the prior reference period the performance of the sustainability indicators the fund used to measure the attainment of the sustainable investment was:
i) 97.87% of the fund invested in sustainable investments;
ii) 38.75% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
iii) 54.5% of the fund invested in sustainable investments with a social objective; and
iv) 0% of the fund invested in securities of issuers with exposure to the Exclusions

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.59% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

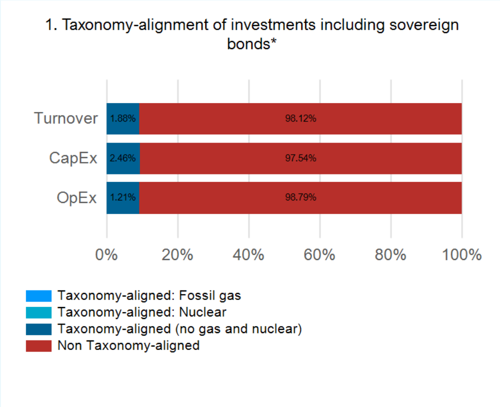
☒ No

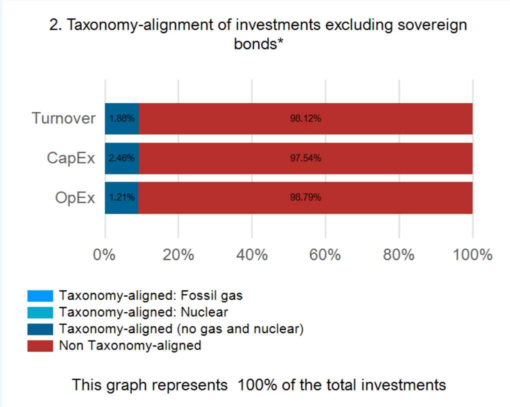
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.81%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period the share of the fund made in Enabling Activity was: 2.05%; Transitional Activity was: 0.01%, measured by Turnover.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 39.48 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 55.85 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:
1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

An Index has not been designated as a reference benchmark to determine whether this financial.

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 95.26% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities,excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 97.58 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 95.26 % of the fund invested in sustainable investments;
iv) 94.7% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 95.26 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives;or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be ‘sustainable investments’ unless Fidelity's fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
UnitedHealth Group	Healthcare	9.04%	US
Thermo Fisher Scientific	Healthcare	5.7%	US

Sonova Holding AG	Healthcare	2.55%	CH
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	2.53%	IE
Regeneron Pharmaceuticals	Healthcare	2.45%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

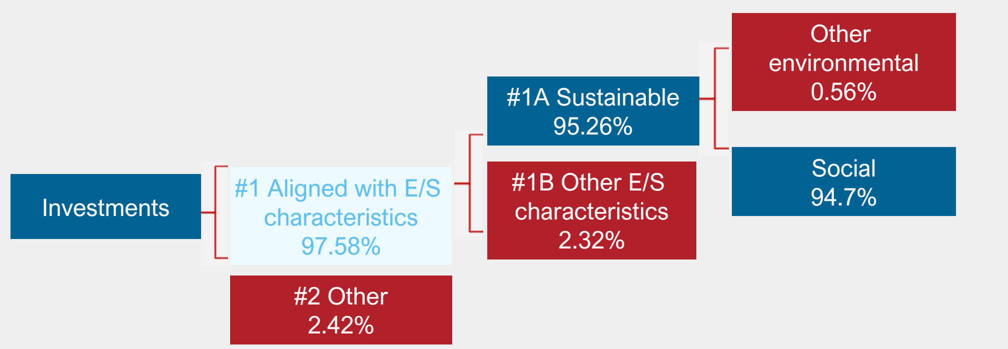
Asset allocation describes the share of investments in specific assets.

The fund invested 95.26 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 97.58 % of its assets in securities of issuers with favourable ESG characteristics;
2. 95.26 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 0.56 % have an environmental objective (which is not aligned with the EU Taxonomy) and 94.7 % have a social objective.

The Asset allocation for the prior reference period was not applicable as this is the first reporting period for the Fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Household Durables	0.83%
Consumer Staples	Personal Products	1.52%
Healthcare	Biotechnology	6.86%
	Pharmaceuticals	28.07%
	Health Care Equipment & Supplies	26.04%
	Health Care Providers & Services	20.96%
	Life Sciences Tools & Services	14.99%
Open Ended Fund	Closed Ended Cash Fund	1.22%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

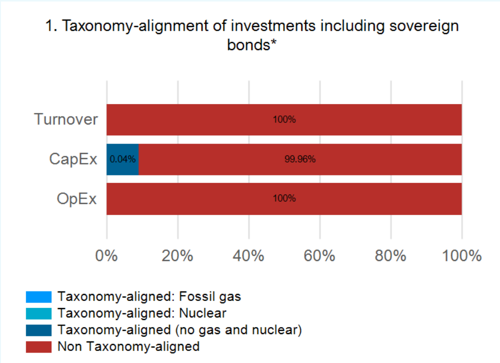
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

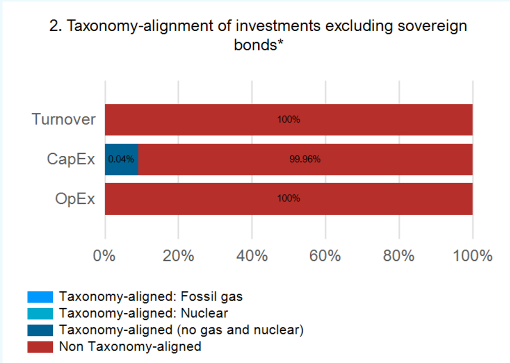
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 99.95% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0.56 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 94.7 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Japan Equity Fund

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.44% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 92.79 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 56.44 % of the fund invested in sustainable investments;
iv) 33.21 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 22.82% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 89.13% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 54.97% of the fund was invested in sustainable investments;
iv) 27.60% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
iv) 27.26% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 56.44 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

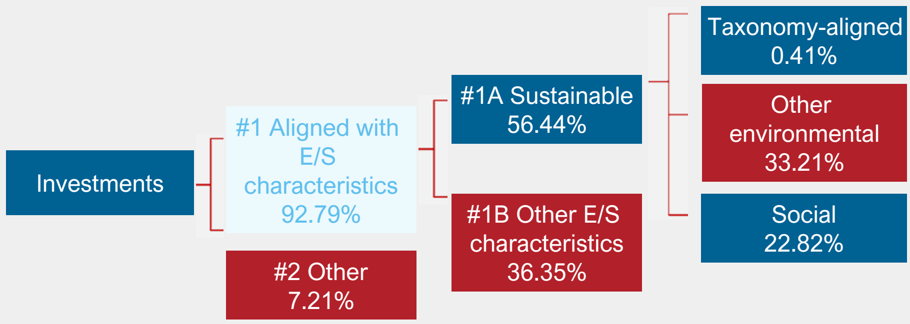
Asset allocation describes the share of investments in specific assets.

The fund invested 56.44 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 92.79 % of its assets in securities of issuers with favourable ESG characteristics;
2. 56.44 % in sustainable investments of which 0.41 % have an environmental objective (which is aligned with the EU Taxonomy), 33.21 % have an environmental objective (which is not aligned with the EU Taxonomy) and 22.82 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 89.13% of its assets in securities of issuers with favourable ESG characteristics;
2. 54.97% in sustainable investments of which 0.12% have an environmental objective (which is aligned with the EU Taxonomy), 27.6% have an environmental objective (which is not aligned with the EU Taxonomy), and 27.26% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.72%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.41% in sustainable investments with an environmental objective aligned with the EU Taxonomy.This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

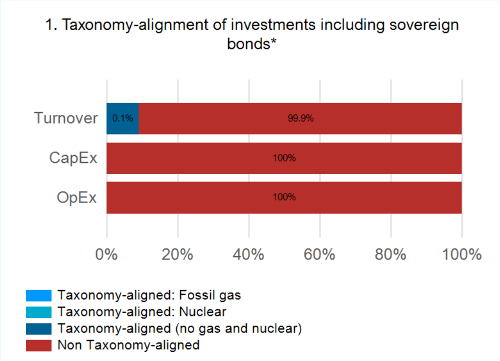
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

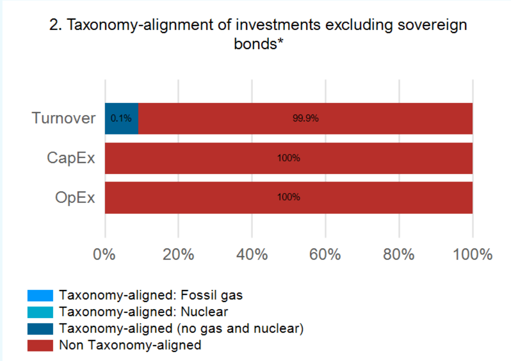
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 99.6% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.09%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.1%
Opex - 0%
Capex - 0%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.1%
Opex - 0%
Capex - 0%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 33.21 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 22.82 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 9(1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable US Equity Fund

Legal entity identifier:
549300J1XTC50ZY0Z742

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective:** 31.39%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective:** 65.91%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The fund was uplifted to an Article 9 in August 2023. The fund aimed to achieve capital growth over the long term by investing in sustainable investments. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contribute to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which have set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which would be considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The Investment Manager selected issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs. The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.
No reference benchmark has been designated for the purpose of attaining the sustainable investment objective. Where the fund invested in sustainable investments with environmental objectives, this contributed towards the climate change mitigation environmental EU Taxonomy objective. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained above.The following data

is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 97.3 % the percentage of the fund invested in sustainable investments;
ii) 30.58 % the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy;
iii) 65.91% the percentage of the fund invested in sustainable investments with a social objective; and
iv) 0% the percentage of the fund with exposure to investments that undertake activities that are excluded in accordance with the Exclusions.
The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do not significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Microsoft	Information Technology	8.33%	US
UnitedHealth Group	Healthcare	4.88%	US

Elevance Health	Healthcare	2.72%	US
Stryker	Healthcare	2.69%	US

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

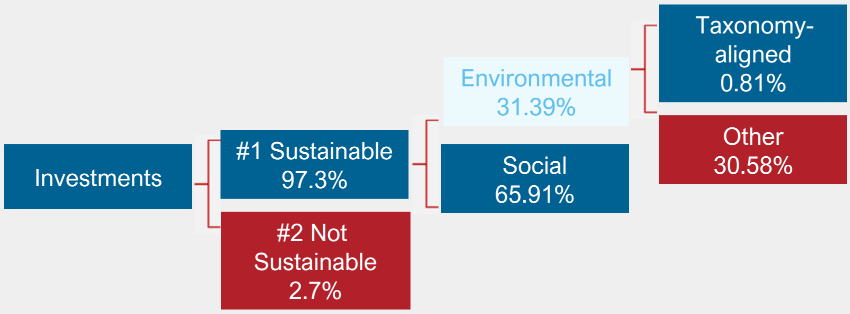
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 97.3 % in sustainable investments.

What was the asset allocation?

The fund invested in 97.3 % in sustainable investments of which 0.81 % have an environmental objective (which is aligned with the EU Taxonomy), 30.58 % have an environmental objective (which is not aligned with the EU Taxonomy) and 65.91 % have a social objective.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Auto Components	6.05%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.81% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

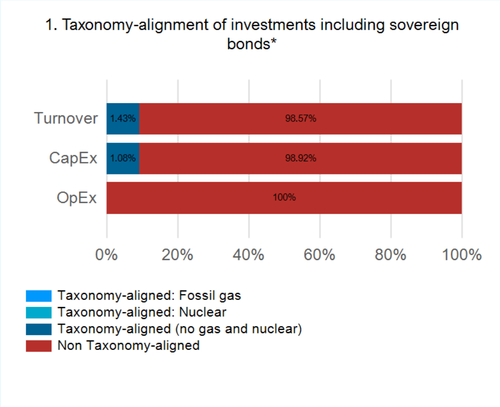
☒ No

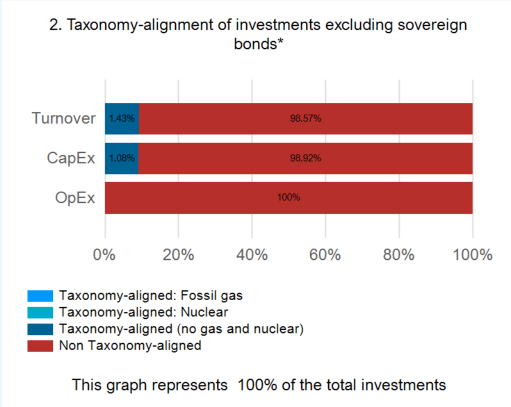
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.91%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The fund was uplifted to an Article 9 fund in August 2023. This question is not applicable as this is the fund's first reporting period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The fund invested 30.58 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 65.91 % in sustainable investments with a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund took the following actions to meet the sustainable investment objective:
1. The fund made sustainable investments.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative ESG characteristics.
3. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.93% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities,excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 94.16 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 63.93 % of the fund invested in sustainable investments;
iv) 39.65 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 4.68 % of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
vi) 19.6% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 88.67% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 57.24% of the fund was invested in sustainable investments;
iv) 32.05% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 4.65% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
vi) 20.54% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 63.93 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Service Corp International/US	Consumer Discretionary	5.09%	US
STERIS	Healthcare	4.88%	US

Xylem NY	Industrials	4.16%	US
Arcadis	Industrials	4.15%	NL
Severn Trent	Utilities	3.89%	GB
Veolia Environnement SA	Utilities	3.74%	FR
Waste Management	Industrials	3.74%	US
American Water Works	Utilities	3.52%	US
Cia de Saneamento Basico do Estado de Sao Paulo SABESP	Utilities	3.32%	BR
Ebara	Industrials	3.21%	JP
Entegris	Information Technology	3.08%	US
Crown Holdings	Materials	3.05%	US
Horiba	Information Technology	2.88%	JP
Kurita Water Industries	Industrials	2.68%	JP

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

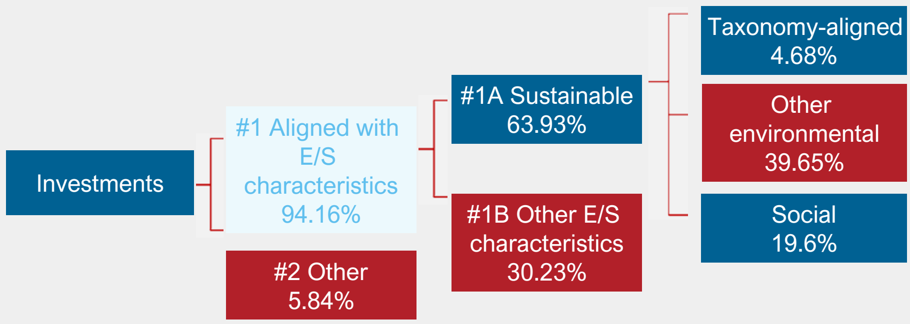
Asset allocation describes the share of investments in specific assets.

The fund invested 63.93 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 94.16 % of its assets in securities of issuers with favourable ESG characteristics;
2. 63.93 % in sustainable investments of which 4.68 % have an environmental objective (which is aligned with the EU Taxonomy), 39.65 % have an environmental objective (which is not aligned with the EU Taxonomy) and 19.6 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 88.67% of its assets in securities of issuers with favourable ESG characteristics;
2. 57.24% in sustainable investments of which 4.65% have an environmental objective (which is aligned with the EU Taxonomy), 32.05% have an environmental objective (which is not aligned with the EU Taxonomy), and 20.54% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Diversified Consumer Services	5.73%
	Household Durables	0.72%
	Distributors	0.56%
	Multiline Retail	0.52%
	Hotels Restaurants & Leisure	0.16%
Healthcare	Health Care Equipment & Supplies	3.92%
Industrials	Building Products	5.06%
	Professional Services	4.66%
	Machinery	22.02%
	Trading Companies & Distributors	2.64%
	Commercial Services & Supplies	14.16%
	Industrial Conglomerates	1.46%
Information Technology	Electronic Equipment Instruments & Components	5.05%
	Semiconductor Equipment & Products	3.67%
	Software	1.73%
Materials	Containers & Packaging	7.98%
	Chemicals	1.91%
	Metals & Mining	0.38%
Open Ended Fund	Closed Ended Cash Fund	1.99%
Utilities	Multi-Utilities	3.48%
	Water Utilities	11.8%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 4.68% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☒ In fossil gas ☐ In nuclear energy

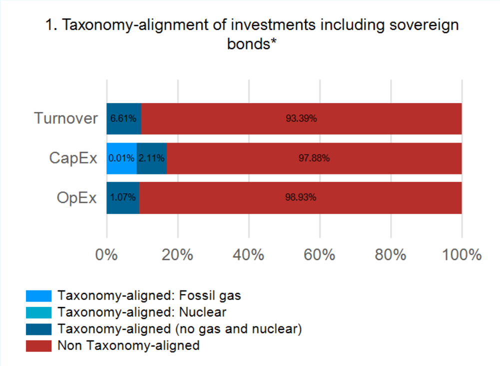
☐ No

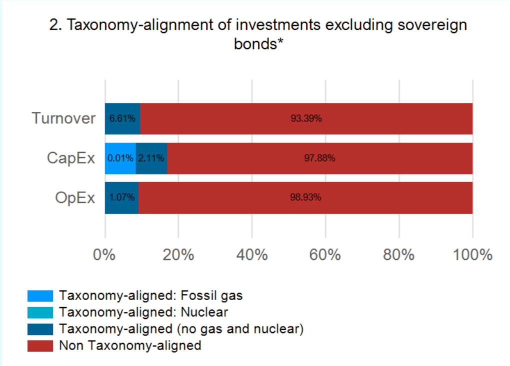
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.70%; Transitional Activity: 0.20%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 4.1%
Opex - 0.6%
Capex - 0.4%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 4.1%
Opex - 0.6%
Capex - 0.4%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 39.65 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 19.6 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics: 1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Switzerland Fund

Legal entity identifier:
5493001N8Q97TPZUYT12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.94% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities,excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 94.41 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 63.94 % of the fund invested in sustainable investments;
iv) 23.68 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 40.14% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 92.27% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 66.47% of the fund was invested in sustainable investments;
iv) 21.98% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 43.61% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 63.94 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Nestle SA	Consumer Staples	9.29%	CH
Novartis AG	Healthcare	6.35%	CH

Aryzta AG	Consumer Staples	3.43%	CH
ABB	Industrials	3.28%	CH
DKSH Holding AG	Industrials	3.26%	CH
Tecan Group AG	Healthcare	3.03%	CH

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

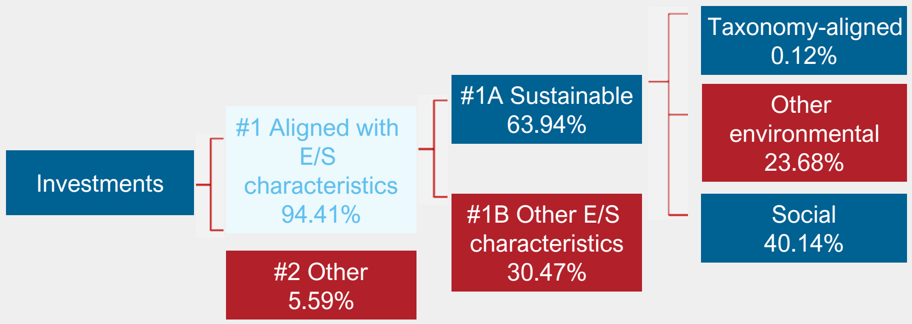
Asset allocation describes the share of investments in specific assets.

The fund invested 63.94 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 94.41 % of its assets in securities of issuers with favourable ESG characteristics;
2. 63.94 % in sustainable investments of which 0.12 % have an environmental objective (which is aligned with the EU Taxonomy), 23.68 % have an environmental objective (which is not aligned with the EU Taxonomy) and 40.14 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 92,27% of its assets in securities of issuers with favourable ESG characteristics;
2. 66.47% in sustainable investments of which 0.87% have an environmental objective (which is aligned with the EU Taxonomy), 21.98% have an environmental objective (which is not aligned with the EU Taxonomy), and 43.61% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Textiles & Apparel	3.01%
	Speciality Retail	1.69%
Consumer Staples	Food Products	12.3%
Financials	Diversified Financial Services	8.38%
	Capital Markets	4.13%
	Insurance	10.05%
Healthcare	Life Sciences Tools & Services	6.02%
	Health Care Equipment & Supplies	5.4%
	Pharmaceuticals	15.12%
	Health Care Technology	0.72%
Industrials	Machinery	4.66%
	Trading Companies & Distributors	4.18%
	Electrical Equipment	3.95%
	Building Products	2.29%
Information Technology	Electronic Equipment Instruments & Components	1.29%
	Semiconductor Equipment & Products	0.76%
Materials	Containers & Packaging	3.61%
	Chemicals	10.87%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.12% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

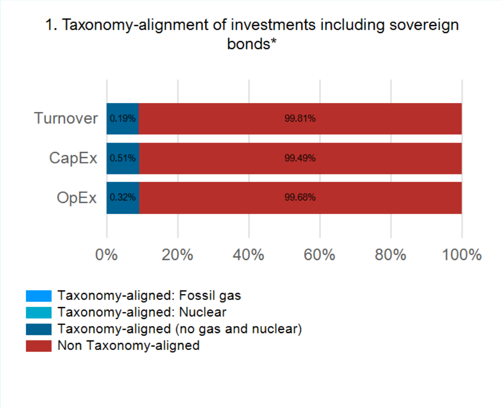
☐ In fossil gas ☐ In nuclear energy

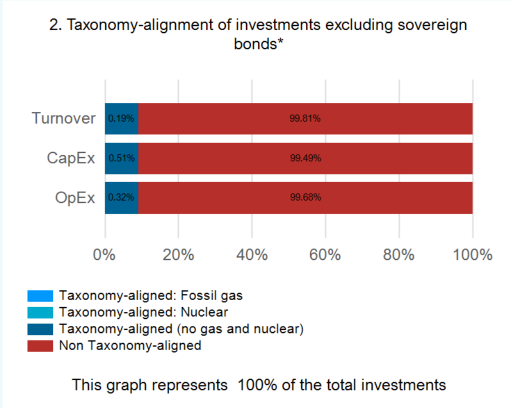
☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.19%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.1%
Opex - 0.3%
Capex - 0.6%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.1%
Opex - 0.3%
Capex - 0.6%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 23.68 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 40.14 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - Thailand Fund

Legal entity identifier: 549300KZ6XVPBRK5QV32

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in August 11, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 83.99% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 19.94% of the fund invested in sustainable investments;
iv) 1.09% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 18.85% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 19.94% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives;or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 11/08/2023-30/04/2024

Largest investments	Sector	% Assets	Country
CP ALL (F)	Consumer Staples	8.52%	TH
PTT (F)	Energy	6.59%	TH
Airports of Thailand (F)	Industrials	6.01%	TH
Bangkok Bank (F)	Financials	5.66%	TH

Minor International (F)	Consumer Discretionary	1.88%	TH

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

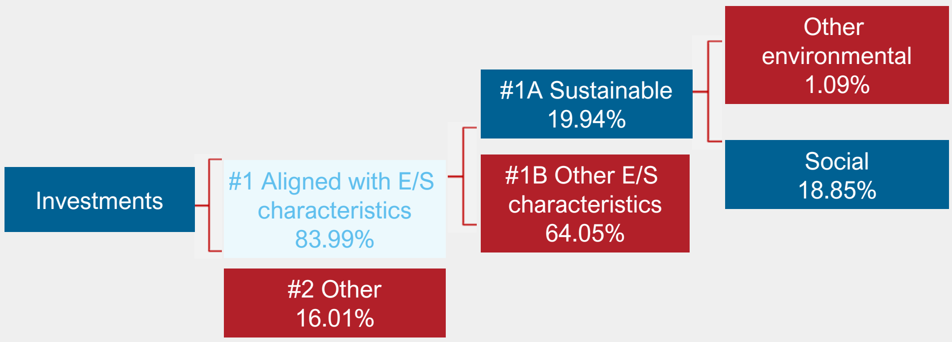
Asset allocation describes the share of investments in specific assets.

The fund invested 19.94 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 83.99 % of its assets in securities of issuers with favourable ESG characteristics;
2. 19.94 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 1.09 % have an environmental objective (which is not aligned with the EU Taxonomy) and 18.85 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	3.18%

Utilities	Independent Power Producers & Energy Traders	4.01%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

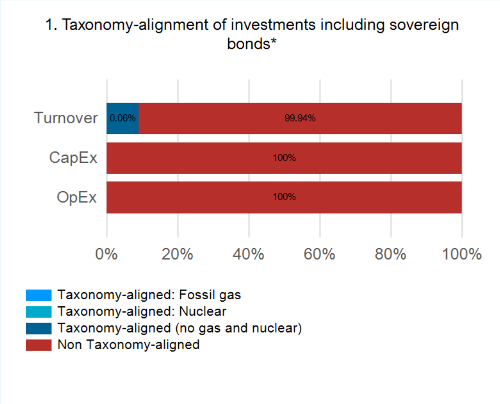
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

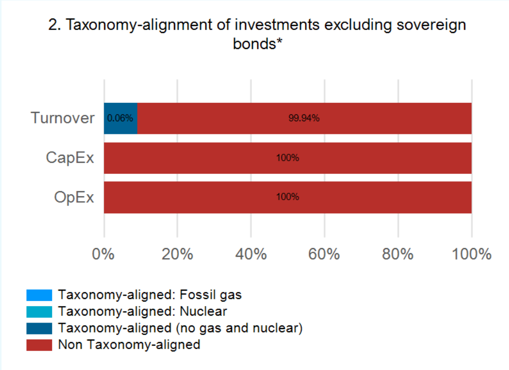
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 1.09 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 18.85 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - World Fund

Legal entity identifier:
5493001CZJOXQY9N2O82

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.32% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics.Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities,excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 92.59 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 67.32 % of the fund invested in sustainable investments;
iv) 33.79 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 32.35% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 92.74% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 60.97% of the fund was invested in sustainable investments;
iv) 28.22% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 31.7% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 67.32 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

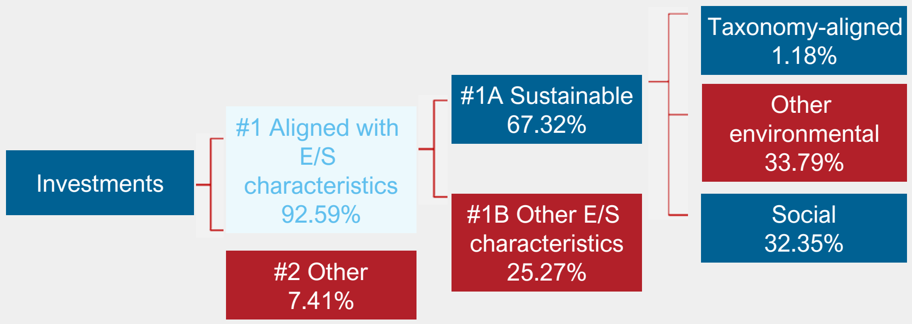
Asset allocation describes the share of investments in specific assets.

The fund invested 67.32 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 92.59 % of its assets in securities of issuers with favourable ESG characteristics;
2. 67.32 % in sustainable investments of which 1.18 % have an environmental objective (which is aligned with the EU Taxonomy), 33.79 % have an environmental objective (which is not aligned with the EU Taxonomy) and 32.35 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 92.74% of its assets in securities of issuers with favourable ESG characteristics;
2. 60.97% in sustainable investments of which 1.06% have an environmental objective (which is aligned with the EU Taxonomy), 28.22% have an environmental objective (which is not aligned with the EU Taxonomy), and 31.7% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund invested 1.18% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

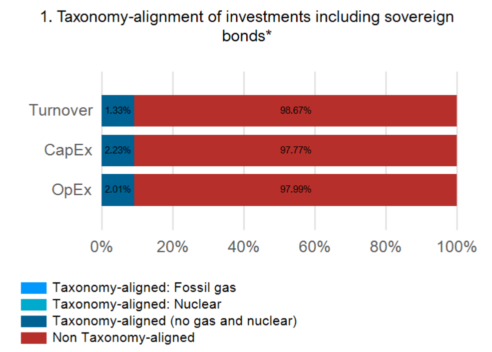
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

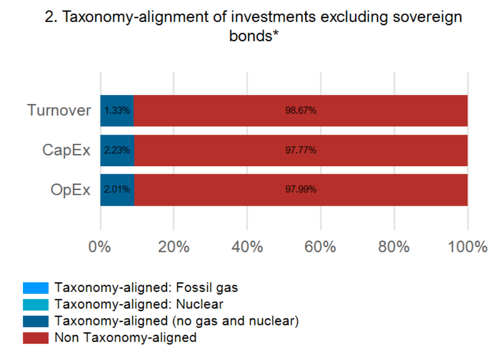
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 99.91% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.45%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.3%
Opex - 2.1%
Capex - 3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.3%
Opex - 2.1%
Capex - 3%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 33.79 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 32.35 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Asia Pacific Dividend Fund

Legal entity identifier:
5493007QY2WD5KHRUI41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.08% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) the 92.62 % percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) the 40.08 % percentage of the fund invested in sustainable investments;
iv) the 23.49 % percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 16.59% the percentage of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 90.33% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 34.78% of the fund was invested in sustainable investments;
iv) 20.87% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 13.91% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 40.08 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	6.07%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

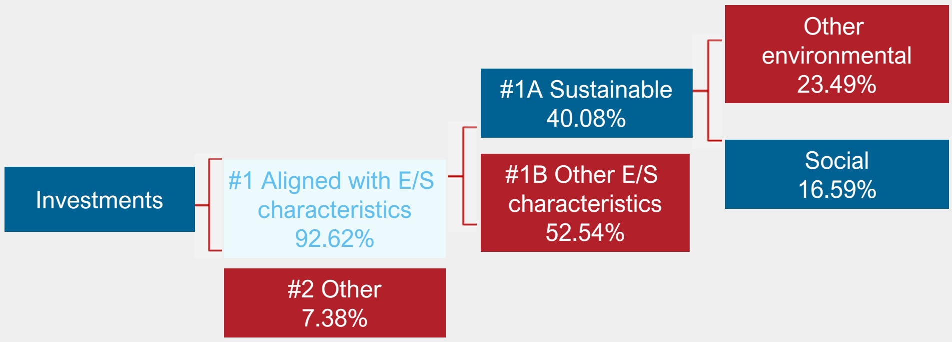
Asset allocation describes the share of investments in specific assets.

The fund invested 40.08 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 92.62 % of its assets in securities of issuers with favourable ESG characteristics;
2. 40.08 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 23.49 % have an environmental objective (which is not aligned with the EU Taxonomy) and 16.59 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 90.33% of its assets in securities of issuers with favourable ESG characteristics;
2. 34.78% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 20.87% have an environmental objective (which is not aligned with the EU Taxonomy), and 13.91% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by

carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

turnover.

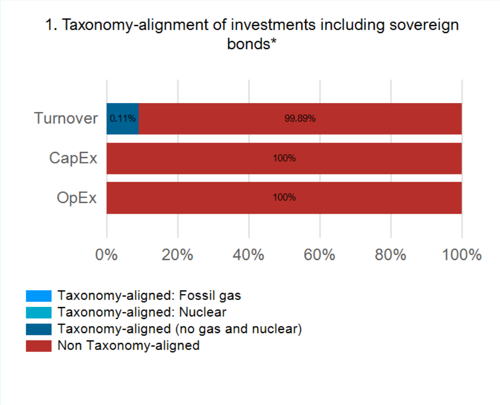
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

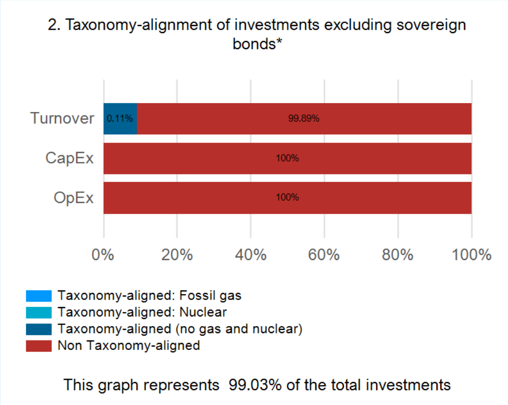
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.11%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0 %
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 23.49 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 16.59 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 78.36% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 95.04 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 78.36 % of the fund invested in sustainable investments;
iv) 41.12 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 34.99% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 96.43% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 72.26% of the fund was invested in sustainable investments;
iv) 29.39% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 40.65% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 78.36 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objectives; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Ferrovial SE	Industrials	4.94%	NL
Allianz	Financials	4.58%	DE
3i Group	Financials	4.44%	GB
Hannover Rueck SE	Financials	3.18%	DE
RELX	Industrials	3.13%	GB
Industria de Diseno Textil SA	Consumer Discretionary	3.1%	ES
Deutsche Boerse AG	Financials	3.05%	DE
Sanofi	Healthcare	2.94%	FR
Tryg	Financials	2.91%	DK
Novartis AG	Healthcare	2.67%	CH
TotalEnergies SE	Energy	2.65%	FR
Admiral Group	Financials	2.63%	GB
Roche Holding AG (B)	Healthcare	2.5%	CH
Unilever	Consumer Staples	2.47%	GB
Autoliv	Consumer Discretionary	2.47%	SE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

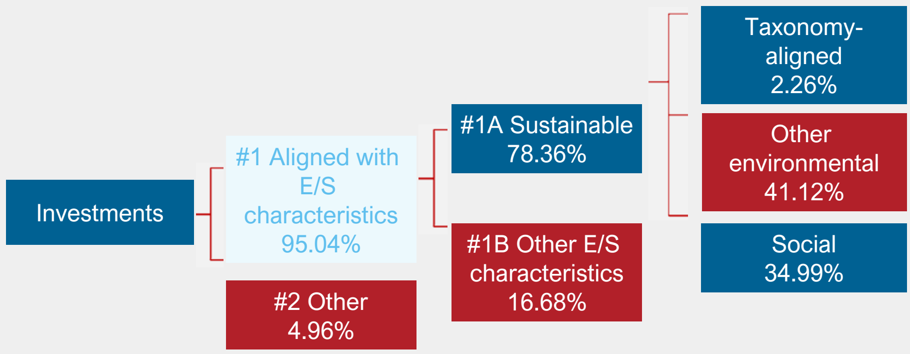
Asset allocation describes the share of investments in specific assets.

The fund invested 78.36 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 95.04 % of its assets in securities of issuers with favourable ESG characteristics;
2. 78.36 % in sustainable investments of which 2.26 % have an environmental objective (which is aligned with the EU Taxonomy), 41.12 % have an environmental objective (which is not aligned with the EU Taxonomy) and 34.99 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 96.43% of its assets in securities of issuers with favourable ESG characteristics;
2. 72.26% in sustainable investments of which 2.22% have an environmental objective (which is aligned with the EU Taxonomy), 29.39% have an environmental objective (which is not aligned with the EU Taxonomy), and 40.65% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	5.96%
Consumer Discretionary	Speciality Retail	3.59%
	Auto Components	2.21%
	Media	2.05%
	Household Durables	1.09%
Consumer Staples	Food & Staples Retailing	3.92%
	Personal Products	2.73%
	Household Products	2.2%
	Food Products	1.58%
Energy	Oil, Gas & Consumable Fuels	3.86%
Financials	Diversified Financial Services	7.8%
	Commercial Banks	7.11%
	Insurance	16.54%
Healthcare	Pharmaceuticals	7.1%
Industrials	Professional Services	4.76%
	Construction & Engineering	4.64%
	Trading Companies & Distributors	3.56%
	Machinery	3.06%
	Electrical Equipment	1.79%
Information Technology	It Services	1.6%
Materials	Paper & Forest Products	2.45%
	Containers & Packaging	1.91%
Open Ended Fund	Closed Ended Cash Fund	2.19%
Utilities	Electric Utilities	4.45%
	Multi-Utilities	1.02%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.26% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

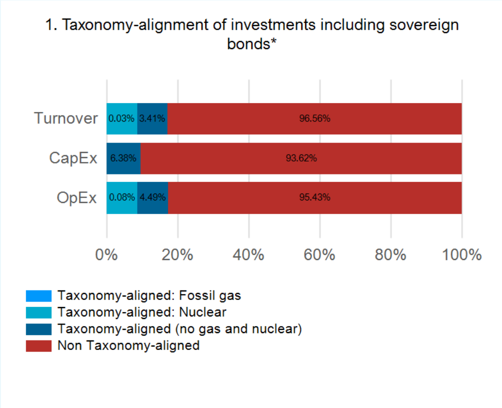
☐ No

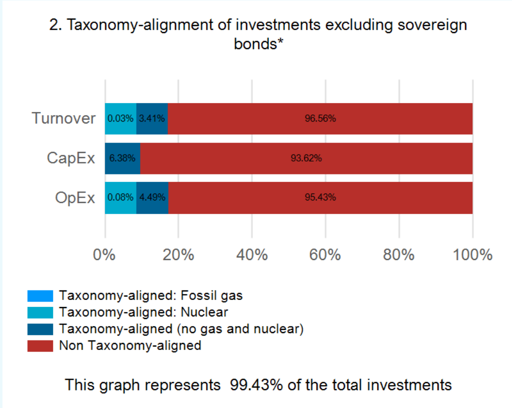
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 99.43% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.63%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 2.2%
Opex - 3.1%
Capex - 4.3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 2.2%
Opex - 3.1%
Capex - 4.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 41.12 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 34.99 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - Global Dividend Fund

Legal entity identifier: 549300TOZX7F2KZWXK25

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 74.13% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 96.94 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 74.13 % of the fund invested in sustainable investments;
iv) 38.02 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 33.54% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 94.28% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 63.49 % of the fund was invested in sustainable investments;
iv) 22.93% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 36.26% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 74.13 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
RELX	Industrials	4.65%	GB
Unilever	Consumer Staples	4.25%	GB
Deutsche Boerse AG	Financials	3.86%	DE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

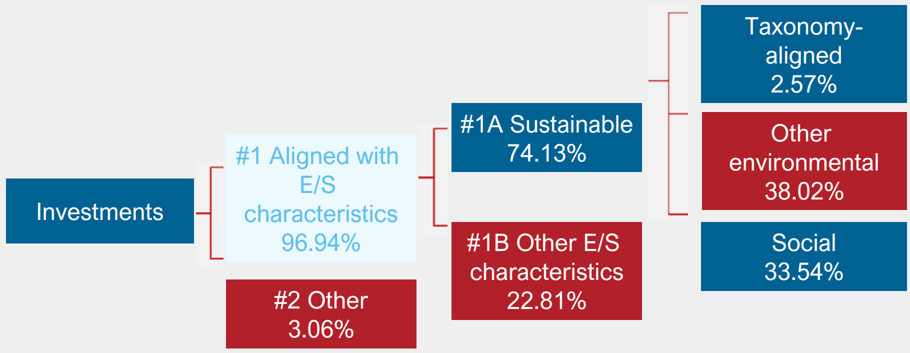
Asset allocation describes the share of investments in specific assets.

The fund invested 74.13 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 96.94 % of its assets in securities of issuers with favourable ESG characteristics;
2. 74.13 % in sustainable investments of which 2.57 % have an environmental objective (which is aligned with the EU Taxonomy), 38.02 % have an environmental objective (which is not aligned with the EU Taxonomy) and 33.54 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 94.28% of its assets in securities of issuers with favourable ESG characteristics;
2. 63.49% in sustainable investments of which 4.29% have an environmental objective (which is aligned with the EU Taxonomy), 22.93% have an environmental objective (which is not aligned with the EU Taxonomy), and 36.26% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	1.04%
Consumer Discretionary	Media	3.37%
	Auto Components	2.14%
	Speciality Retail	1.72%
Consumer Staples	Personal Products	5.35%
	Household Products	5.22%
	Food & Staples Retailing	3.69%
Financials	Insurance	14.59%
	Diversified Financial Services	10.29%
Healthcare	Pharmaceuticals	8.69%
Industrials	Professional Services	8.5%

	Communications Equipment	2.49%
	Computers & Peripherals	1.74%
Materials	Containers & Packaging	2.32%
	Paper & Forest Products	2.27%
Open Ended Fund	Closed Ended Cash Fund	2.3%
Utilities	Electric Utilities	3.02%
	Multi-Utilities	2.98%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.57% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

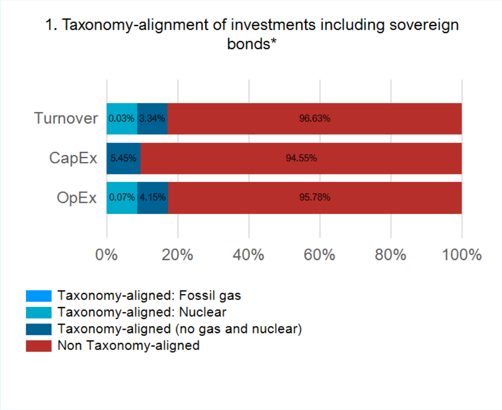
☐ No

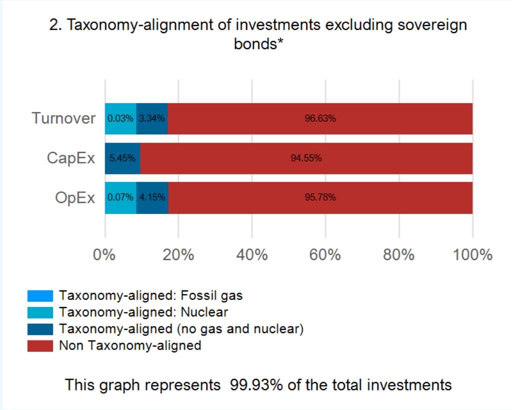
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 99.93% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.84%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 2.6%
Opex - 2.8%
Capex - 3.3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 2.6%
Opex - 2.8%
Capex - 3.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 38.02 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 33.54 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Equity Income Fund

Legal entity identifier:
549300NJ0LHMXLO0MG36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 96.03 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 62.6 % of the fund invested in sustainable investments;
iv) 31.86 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 29.38% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 95.17% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 56.16% of the fund was invested in sustainable investments;
iv) 18.01% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 35.66% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 62.6 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

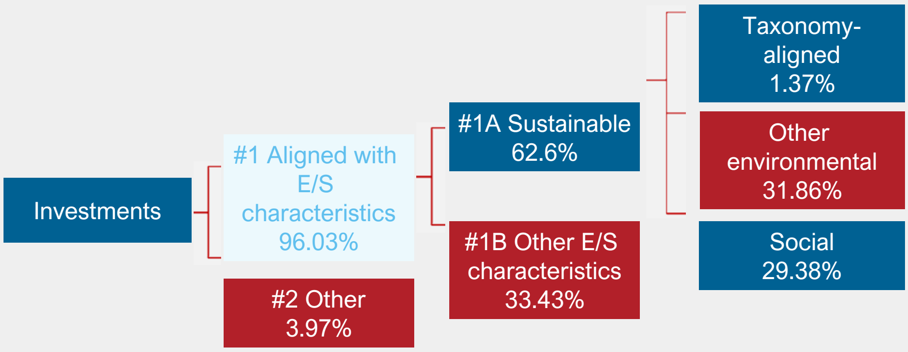
Asset allocation describes the share of investments in specific assets.

The fund invested 62.6 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 96.03 % of its assets in securities of issuers with favourable ESG characteristics;
2. 62.6 % in sustainable investments of which 1.37 % have an environmental objective (which is aligned with the EU Taxonomy), 31.86 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.38 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 95.17% of its assets in securities of issuers with favourable ESG characteristics;
2. 56.16% in sustainable investments of which 2.49% have an environmental objective (which is aligned with the EU Taxonomy), 18.01% have an environmental objective (which is not aligned with the EU Taxonomy), and 35.66% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	2.02%

Utilities	Electric Utilities	4.34%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.37% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

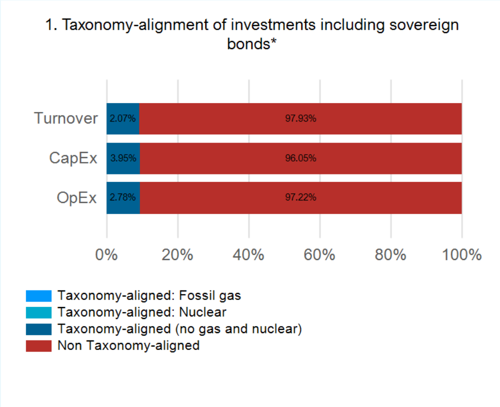
☒ No

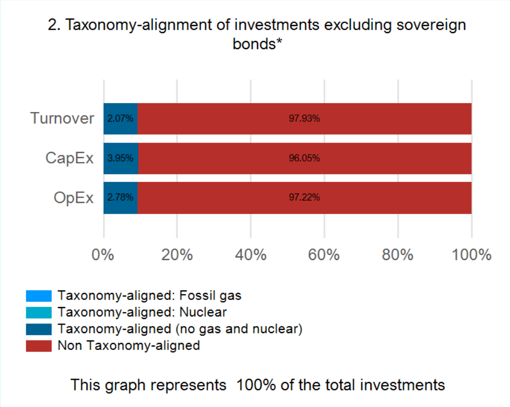
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.59%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.9%
Opex - 0.5%
Capex - 0.9%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.9%
Opex - 0.5%
Capex - 0.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 31.86 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.38 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable European Dividend Plus Fund

Legal entity identifier:
254900G129G6M801BZ71

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:__%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 77.86% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:__%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 81.36 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 77.86 % of the fund invested in sustainable investments;
iv) 39.94 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 35.51% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 85.55% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 72.83% of the fund was invested in sustainable investments;
iv) 29.73% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 40.85% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 77.86 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Muenchener Rueckversicherungs-Gesellschaft AG in Muenchen	Financials	2.5%	DE

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation describes the share of investments in specific assets.

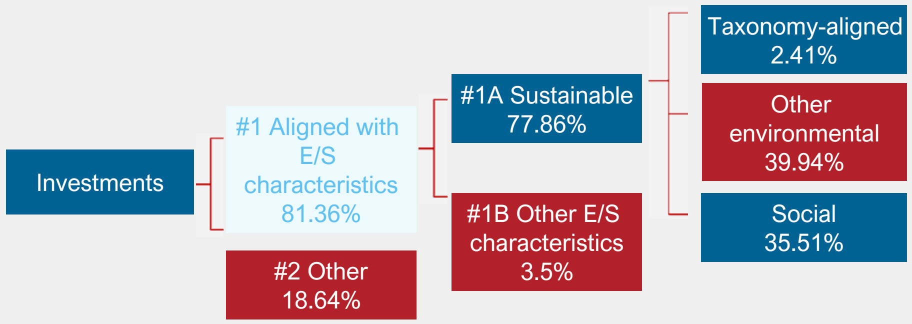
What was the proportion of sustainability-related investments?

The fund invested 77.86 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 81.36 % of its assets in securities of issuers with favourable ESG characteristics;
2. 77.86 % in sustainable investments of which 2.41 % have an environmental objective (which is aligned with the EU Taxonomy), 39.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.51 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 85.55% of its assets in securities of issuers with favourable ESG characteristics;
2. 72.83% in sustainable investments of which 2.26% have an environmental objective (which is aligned with the EU Taxonomy), 29.73% have an environmental objective (which is not aligned with the EU Taxonomy), and 40.85% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	5.59%
Consumer Discretionary	Speciality Retail	3.42%
	Media	2.14%
	Auto Components	1.37%
	Household Durables	0.93%

Materials	Paper & Forest Products	2.67%
	Containers & Packaging	1.84%
	Chemicals	0.43%
Open Ended Fund	Closed Ended Cash Fund	4.89%
Utilities	Electric Utilities	6.78%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.41% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

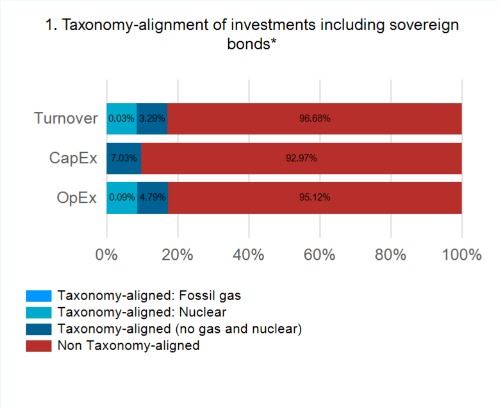
☐ No

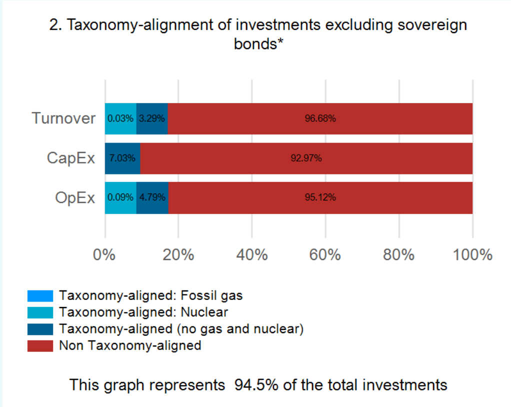
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.37%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 2.2%
Opex - 3.3%
Capex - 4.9%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 2.2%
Opex - 3.3%
Capex - 4.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 39.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.51 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - Sustainable Global Dividend Plus Fund

Legal entity identifier: 549300OZL7XSDZJCL571

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:__%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.43% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:__%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 82.32 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 73.43 % of the fund invested in sustainable investments;
iv) 42 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 29.7% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 85.1% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 65.31% of the fund was invested in sustainable investments; and
iv) 27.33% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 35.91% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 73.43 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
3i Group	Financials	3.82%	GB
Taiwan Semiconductor Manufacturing	Information Technology	3.33%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

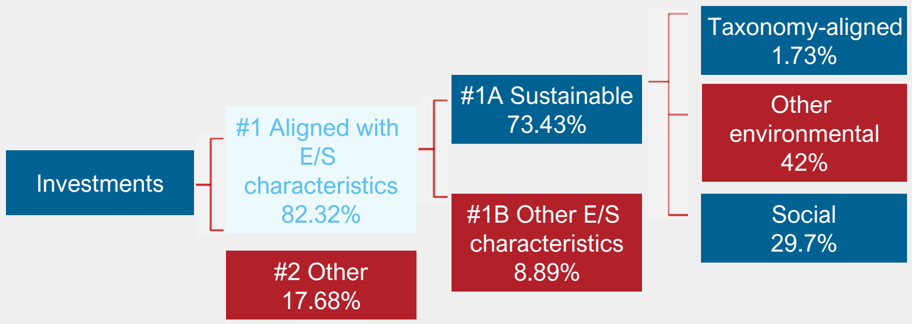
Asset allocation describes the share of investments in specific assets.

The fund invested 73.43 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 82.32 % of its assets in securities of issuers with favourable ESG characteristics;
2. 73.43 % in sustainable investments of which 1.73 % have an environmental objective (which is aligned with the EU Taxonomy), 42 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.7 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 85.1% of its assets in securities of issuers with favourable ESG characteristics;
2. 65.31% in sustainable investments of which 2.08% have an environmental objective (which is aligned with the EU Taxonomy), 27.33% have an environmental objective (which is not aligned with the EU Taxonomy), and 35.91% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	5.62%

Utilities	Electric Utilities	5.16%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.73% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

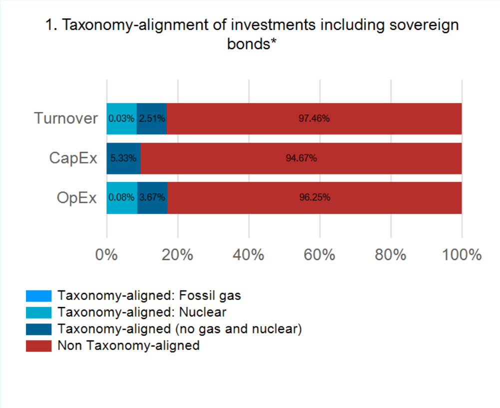
☐ No

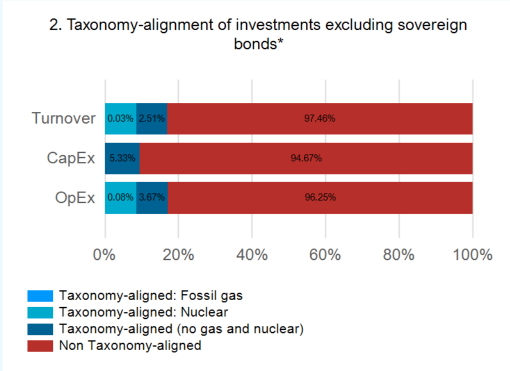
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 96.95% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.78%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.6%
Opex - 2.4%
Capex - 3.5%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.6%
Opex - 2.4%
Capex - 3.5%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 42 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 29.7 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:__%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.59% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:__%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the sub-fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 96.78 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 66.59 % of the fund invested in sustainable investments;
iv) 32 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 34.07% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 93.93% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 57.25% of the fund was invested in sustainable investments;
iv) 18.54% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 36.54% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 66.59 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

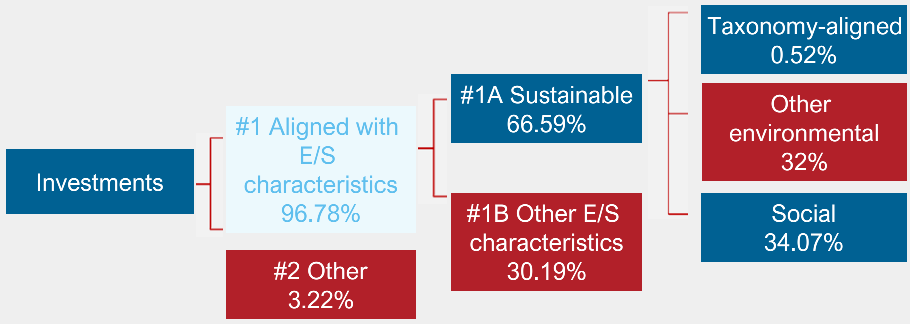
Asset allocation describes the share of investments in specific assets.

The fund invested 66.59 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 96.78 % of its assets in securities of issuers with favourable ESG characteristics;
2. 66.59 % in sustainable investments of which 0.52 % have an environmental objective (which is aligned with the EU Taxonomy), 32 % have an environmental objective (which is not aligned with the EU Taxonomy) and 34.07 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 93.93% of its assets in securities of issuers with favourable ESG characteristics;
2. 57.25% in sustainable investments of which 2.17% have an environmental objective (which is aligned with the EU Taxonomy), 18.54% have an environmental objective (which is not aligned with the EU Taxonomy), and 36.54% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	2.2%
Consumer Discretionary	Media	2.52%

Materials	Chemicals	5.67%
Open Ended Fund	Closed Ended Cash Fund	2.39%
Utilities	Electric Utilities	3.52%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.52% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

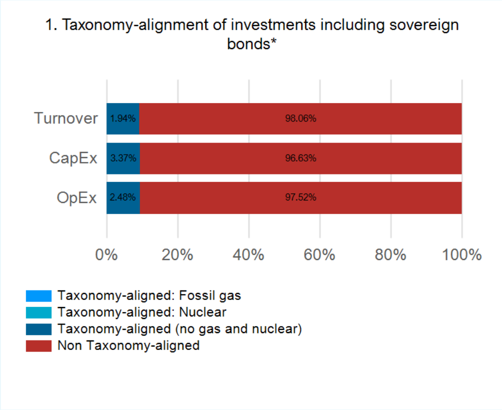
☒ No

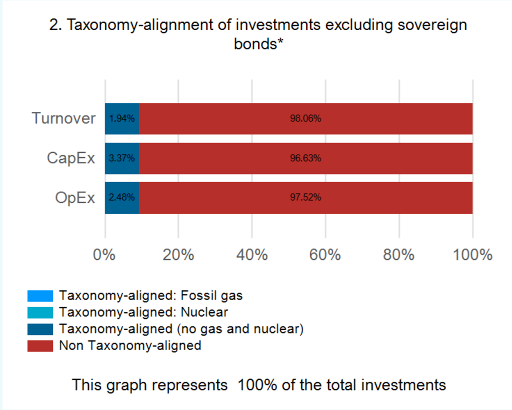
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.47%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.1%
Opex - 0.2%
Capex - 0.4%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.1%
Opex - 0.2%
Capex - 0.4%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 32 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 34.07 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - European Multi Asset Income Fund

Legal entity identifier:
549300P3VQEECSQRUQ90

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:__%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.7% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:__%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 78.13 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 27.7 % of the fund invested in sustainable investments;
iv) 15.24 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 9.94% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 71.75% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 18.9 % of the fund was invested in sustainable investments;
iv) 9.19% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 8.78% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 27.7 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation and climate change adaptation environmental EU Taxonomy objectives; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

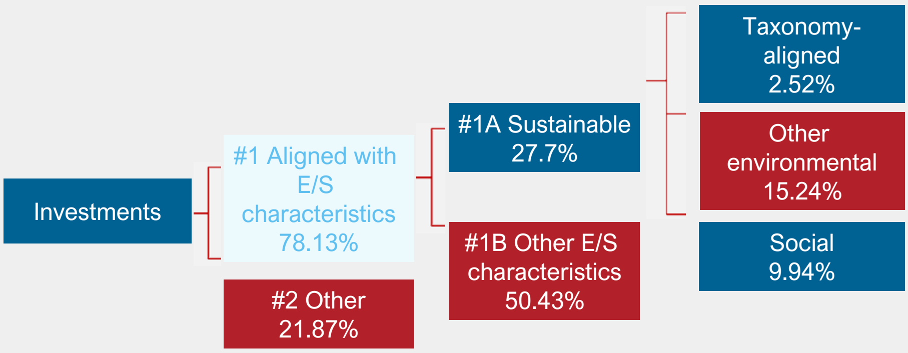
Asset allocation describes the share of investments in specific assets.

The fund invested 27.7 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 78.13 % of its assets in securities of issuers with favourable ESG characteristics;
2. 27.7 % in sustainable investments of which 2.52 % have an environmental objective (which is aligned with the EU Taxonomy), 15.24 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.94 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 71.75% of its assets in securities of issuers with favourable ESG characteristics;
2. 18.9% in sustainable investments of which 0.92% have an environmental objective (which is aligned with the EU Taxonomy), 9.19% have an environmental objective (which is not aligned with the EU Taxonomy), and 8.78% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

	Water Utilities	0%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data *limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.52% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation and adaptation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

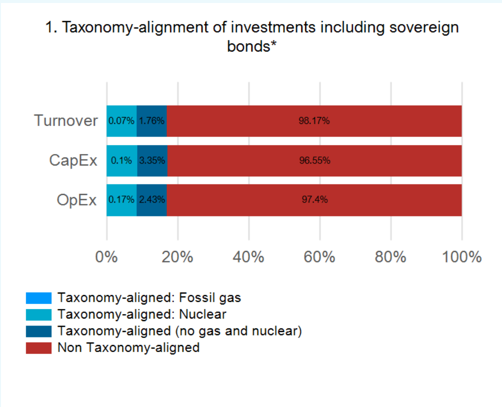
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

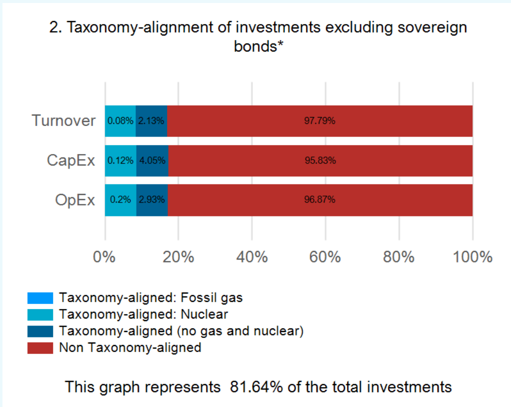
☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 1.24%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 3.9%
Opex - 4.6%
Capex - 6.3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 4.5%
Opex - 5.4%
Capex - 7.4%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 15.24 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.94 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Multi Asset Income Fund

Legal entity identifier:
549300ISMCTFO21OMK36

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.42% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 78.23 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 22.42 % of the fund invested in sustainable investments;
iv) 11.42 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 8.95% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 74.76% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 17.35% of the fund was invested in sustainable investments;
iv) 7.26% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 9.3% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 22.42 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Asset allocation describes the share of investments in specific assets.

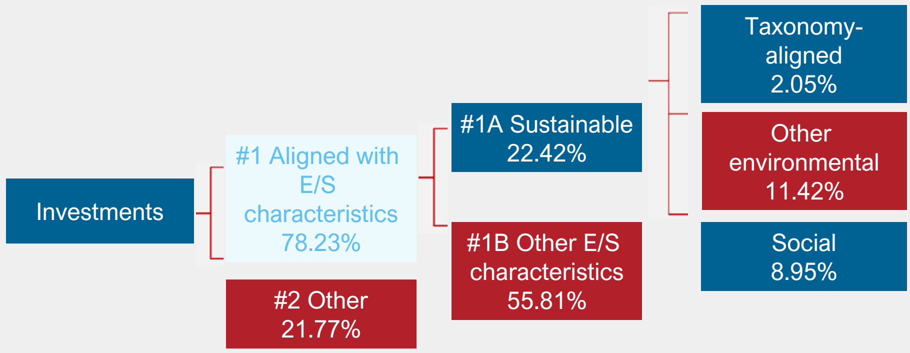
What was the proportion of sustainability-related investments?

The fund invested 22.42 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 78.23 % of its assets in securities of issuers with favourable ESG characteristics;
2. 22.42 % in sustainable investments of which 2.05 % have an environmental objective (which is aligned with the EU Taxonomy), 11.42 % have an environmental objective (which is not aligned with the EU Taxonomy) and 8.95 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 74.76% of its assets in securities of issuers with favourable ESG characteristics;
2. 17.35% in sustainable investments of which 1.48% have an environmental objective (which is aligned with the EU Taxonomy), 7.26% have an environmental objective (which is not aligned with the EU Taxonomy), and 9.3% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.05% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

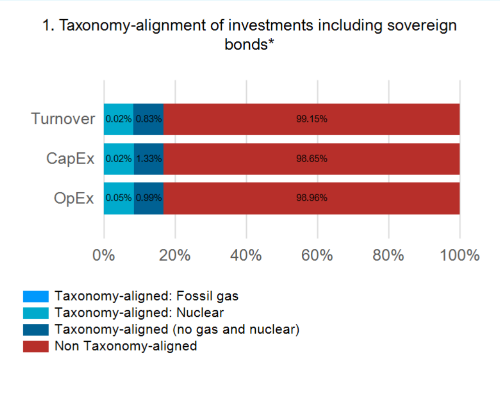
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

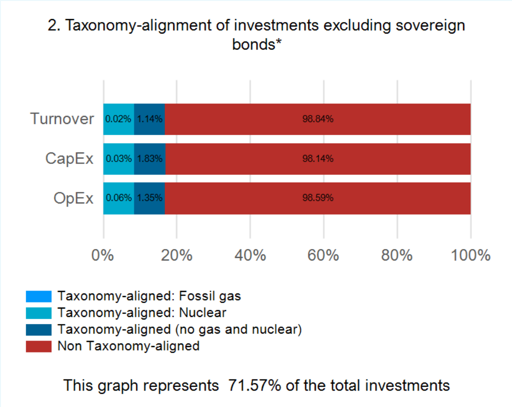
☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.56%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.7%
Opex - 1.7%
Capex - 2.3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 2.4%
Opex - 2.4%
Capex - 3.2%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 11.42 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 8.95 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.25% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in September 9, 2023. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 67.08% the percentage of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework; and
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 11.25% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity’s voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund’s quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 06/09/2023-30/04/2024

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

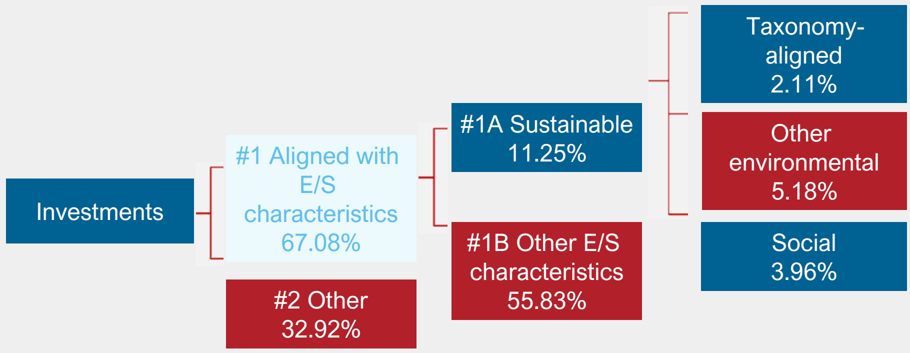
Asset allocation describes the share of investments in specific assets.

The fund invested 11.25 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 67.08 % of its assets in securities of issuers with favourable ESG characteristics;
2. 11.25 % in sustainable investments of which 2.11 % have an environmental objective (which is aligned with the EU Taxonomy), 5.18 % have an environmental objective (which is not aligned with the EU Taxonomy) and 3.96 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.11% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

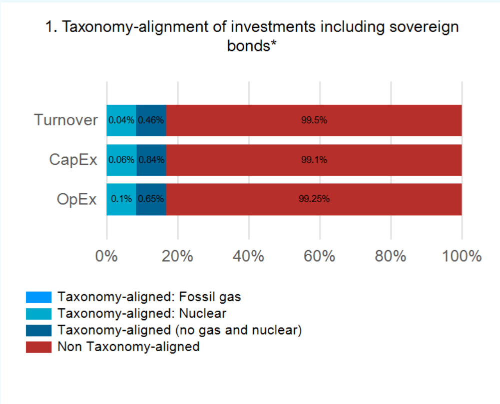
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

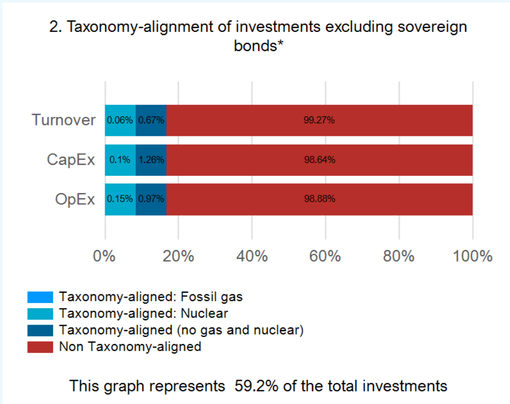
☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.30%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.18 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 3.96 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Sustainable Multi Asset Income Fund

Legal entity identifier:
549300GG6X1NDTLYIF66

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 29.39% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 81.78 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 29.39 % of the fund invested in sustainable investments;
iv) 15.53 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 11.7% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 81.17% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 23.71% of the fund was invested in sustainable investments;
iv) 11.55% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 10.68% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 29.39 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

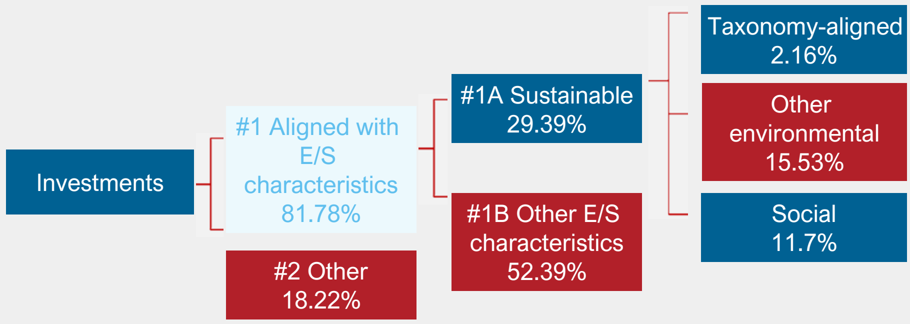
Asset allocation describes the share of investments in specific assets.

The fund invested 29.39 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 81.78 % of its assets in securities of issuers with favourable ESG characteristics;
2. 29.39 % in sustainable investments of which 2.16 % have an environmental objective (which is aligned with the EU Taxonomy), 15.53 % have an environmental objective (which is not aligned with the EU Taxonomy) and 11.7 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 81.17% of its assets in securities of issuers with favourable ESG characteristics;
2. 23.71% in sustainable investments of which 0.79% have an environmental objective (which is aligned with the EU Taxonomy), 11.55% have an environmental objective (which is not aligned with the EU Taxonomy), and 10.68% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.16% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

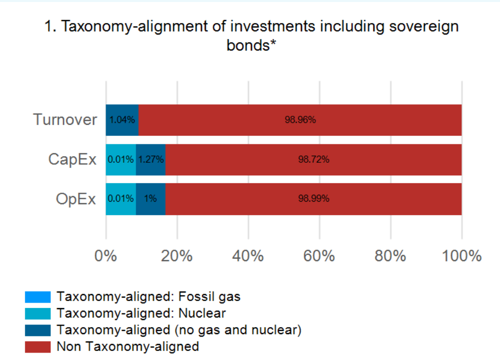
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

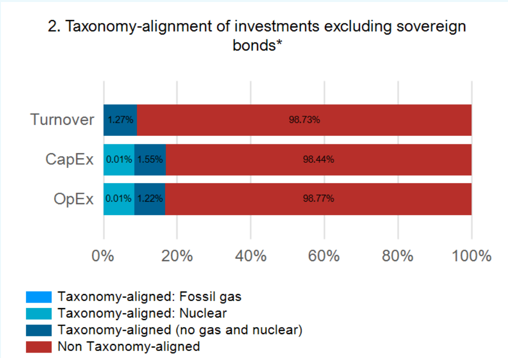
☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 81% of the total investments

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.56%; Transitional Activity: 0.09%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.8%
Opex - 1.3%
Capex - 1.8%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 2.1%
Opex - 1.5%
Capex - 2.1%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 15.53 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 11.7 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Sustainable Asian Bond Fund

Legal entity identifier:
25490016JMCH6V9O7111

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.17% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 88.56 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 22.17 % of the fund invested in sustainable investments;
iv) 12.48 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 9.68% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 90.23% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 26.98% of the fund was invested in sustainable investments;
iv) 12.51% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
iv) 14.47% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 22.17 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives;or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

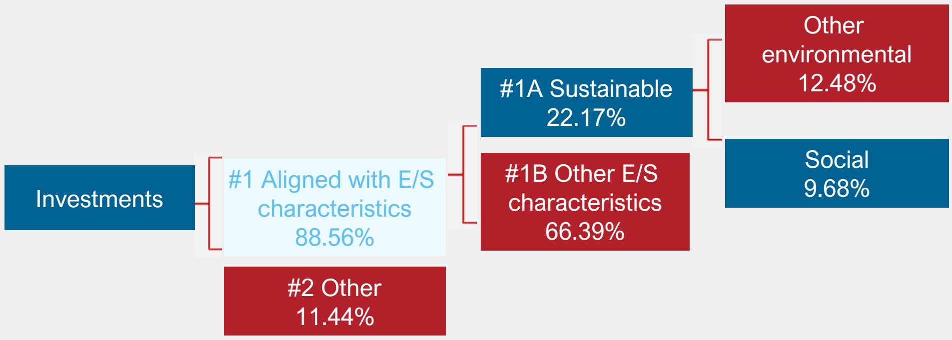
The fund invested 22.17 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 88.56 % of its assets in securities of issuers with favourable ESG characteristics;
2. 22.17 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 12.48 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.68 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 90.23% of its assets in securities of issuers with favourable ESG characteristics;
2. 26.98% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 12.51% have an environmental objective (which is not aligned with the EU Taxonomy), and 14.47% have a social objective.

Fidelity INTERNATIONAL



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

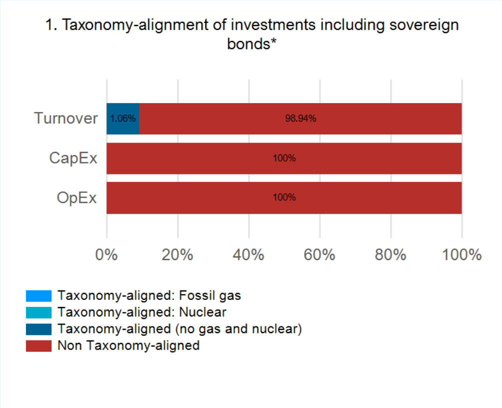
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

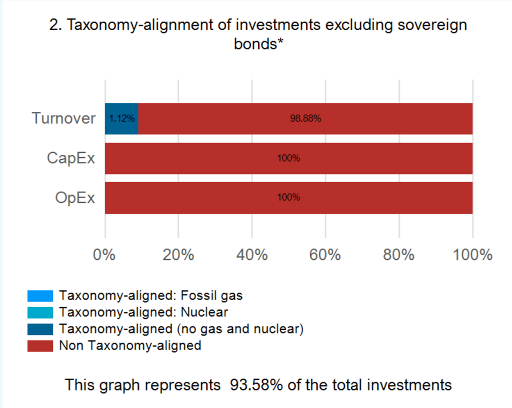
substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.1%
Opex - 0%
Capex - 0%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.1%
Opex - 0%
Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.48 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.68 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 76.4 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 5.35 % of the fund invested in sustainable investments;
iv) 4.12 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 1.23% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 77.54% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 10.55% of the fund was invested in sustainable investments;
iv) 5.09% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 5.47% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 5.35 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

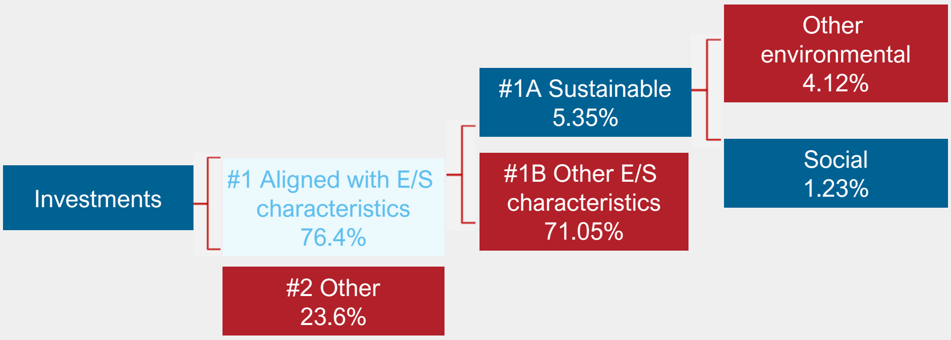
Asset allocation describes the share of investments in specific assets.

The fund invested 5.35 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 76.4 % of its assets in securities of issuers with favourable ESG characteristics;
2. 5.35 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 4.12 % have an environmental objective (which is not aligned with the EU Taxonomy) and 1.23 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 77.54% of its assets in securities of issuers with favourable ESG characteristics;
2. 10.55% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 5.09% have an environmental objective (which is not aligned with the EU Taxonomy), and 5.47% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Hotels Restaurants & Leisure	2.14%
	Automobiles	2.09%
	Household Durables	0.62%
	Multiline Retail	0.4%

Real Estate	Fixed Income - Corp Bds - Real Est Mgt & Dev - Re	4.59%
	Fixed Income - Corp Bonds - Real Estate - Industri	1.56%
Utilities	Gas Utilities	2.04%
	Electric Utilities	0.64%
	Independent Power Producers & Energy Traders	0.63%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

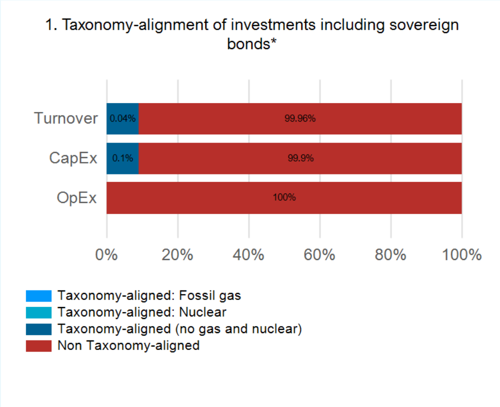
☒ No

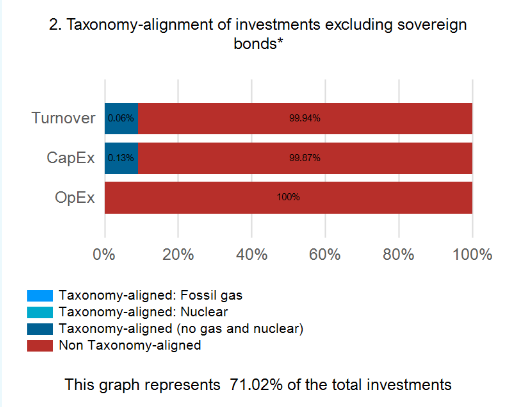
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0 %
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.1%
Opex - 0%
Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 4.12 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 1.23 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Emerging Market Corporate Debt Fund

Legal entity identifier:
549300CUU5R1E8GYA005

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.69% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 68.2 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 16.69 % of the fund invested in sustainable investments;
iv) 8.6 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 8.09% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 68.15% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 17.89% of the fund was invested in sustainable investments;
iv) 7.44% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 10.45% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.69 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

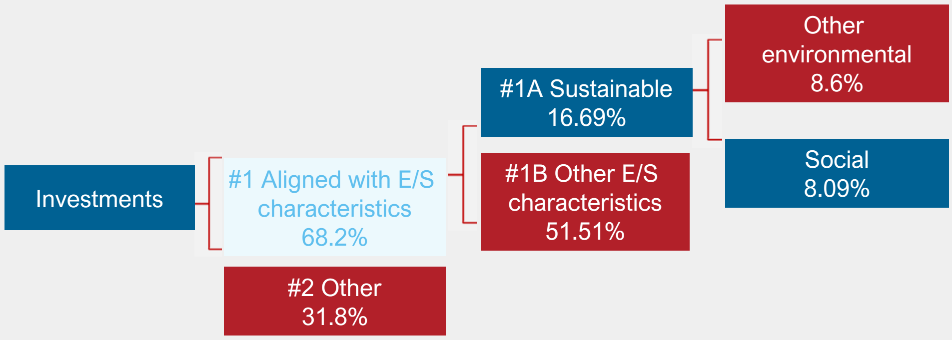
Asset allocation describes the share of investments in specific assets.

The fund invested 16.69 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 68.2 % of its assets in securities of issuers with favourable ESG characteristics;
2. 16.69 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 8.6 % have an environmental objective (which is not aligned with the EU Taxonomy) and 8.09 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 68.15% of its assets in securities of issuers with favourable ESG characteristics;
2. 17.89% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 7.44% have an environmental objective (which is not aligned with the EU Taxonomy), and 10.45% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

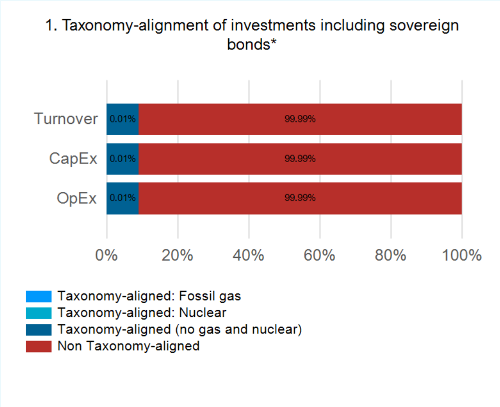
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

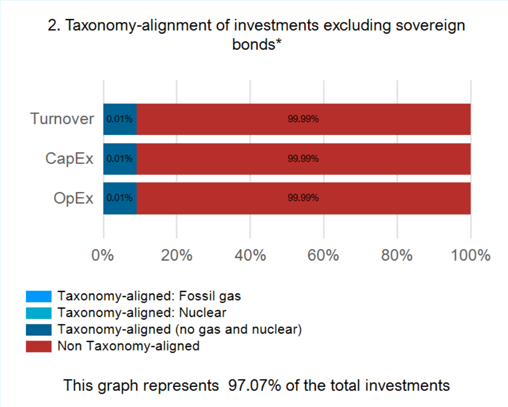
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.2%
Opex - 0%
Capex - 0 %
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.2%
Opex - 0%
Capex - 0%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 8.6 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 8.09 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Emerging Market Debt Fund

Legal entity identifier:
549300JD9HLR74D69D63

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 64.09 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below).
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 60.98% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: ["Sustainable investing framework"].

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:
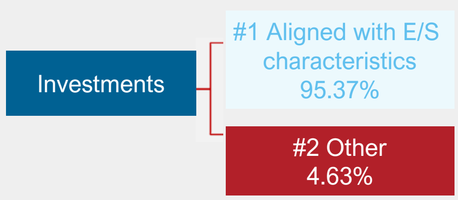
1. 95.37 % of its assets in securities of issuers with favourable ESG characteristics;
The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 93.29% of its assets in securities of issuers with favourable ESG characteristics



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Energy	Government	0.02%
Financials	Diversified Financial Services	2.99%
	Commercial Banks	0.94%
Government	Government	89.06%
	Corporate Bonds	0.1%
Open Ended Fund	Closed Ended Cash Fund	2.94%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

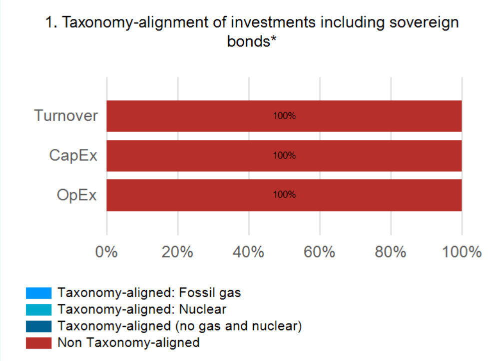
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

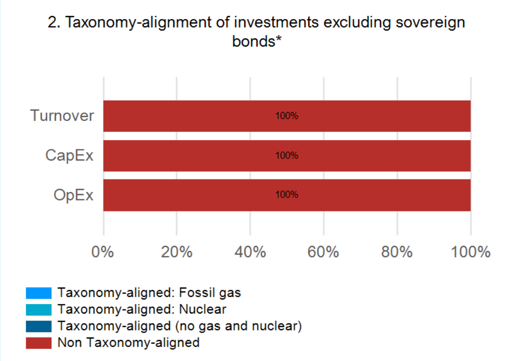
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 5.97% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0 %
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:__%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:__%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

i) 77.16 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;

ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below).

The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 70.62% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 94.32 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 24.97 % of the fund invested in sustainable investments;
iv) 12.9 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 9.33% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 83.53% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 13.94% of the fund was invested in sustainable investments;
iv) 5.22% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 7.22% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 24.97 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

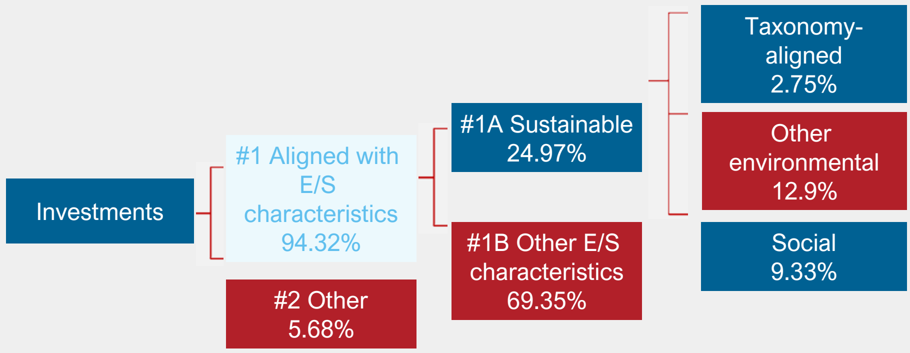
Asset allocation describes the share of investments in specific assets.

The fund invested 24.97 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 94.32 % of its assets in securities of issuers with favourable ESG characteristics;
2. 24.97 % in sustainable investments of which 2.75 % have an environmental objective (which is aligned with the EU Taxonomy), 12.9 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.33 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 83.53% of its assets in securities of issuers with favourable ESG characteristics;
2. 13.94% in sustainable investments of which 1.51% have an environmental objective (which is aligned with the EU Taxonomy), 5.22% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.22% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	0.99%
Consumer Discretionary	Automobiles	2.99%
	Hotels Restaurants & Leisure	2.03%

	Multi-Utilities	3.42%
	Water Utilities	1.86%
	Independent Power Producers & Energy Traders	1.55%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.75% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

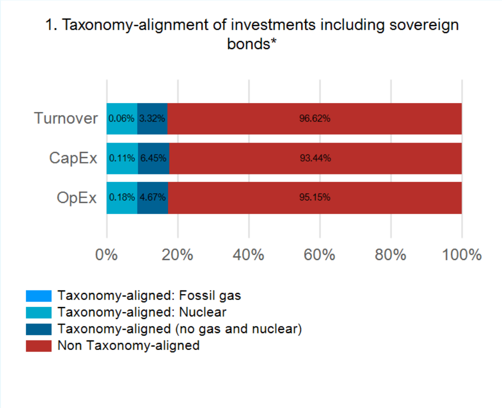
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

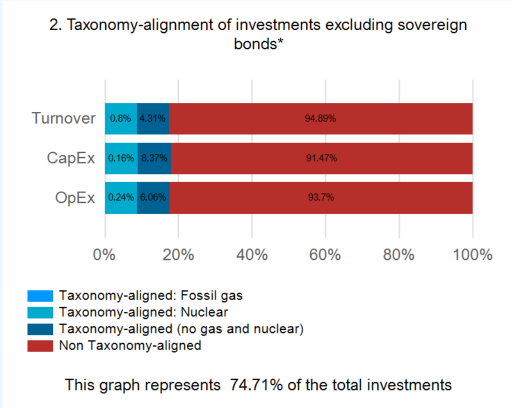
greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.24%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 2.7%
Opex - 2.9%
Capex - 3.8%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 3.9%
Opex - 4.3%
Capex - 5.6%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.9 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.33 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Euro Corporate Bond Fund

Legal entity identifier:
549300HVFD74DI2L1428

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.34% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 94.51 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 36.34 % of the fund invested in sustainable investments;
iv) 20.29 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 12.09% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 81.58% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 22.56% of the fund was invested in sustainable investments;
iv) 10.04% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 9.31% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 36.34 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity’s existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a ‘Very Severe’ controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be ‘sustainable investments’ unless Fidelity's fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

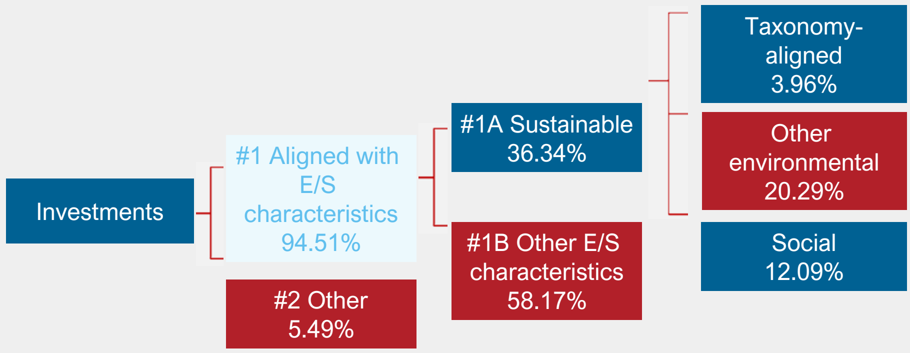
Asset allocation describes the share of investments in specific assets.

The fund invested 36.34 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 94.51 % of its assets in securities of issuers with favourable ESG characteristics;
2. 36.34 % in sustainable investments of which 3.96 % have an environmental objective (which is aligned with the EU Taxonomy), 20.29 % have an environmental objective (which is not aligned with the EU Taxonomy) and 12.09 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 81.58% of its assets in securities of issuers with favourable ESG characteristics;
2. 22.56% in sustainable investments of which 3.2% have an environmental objective (which is aligned with the EU Taxonomy), 10.04% have an environmental objective (which is not aligned with the EU Taxonomy), and 9.31% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

	Independent Power Producers & Energy Traders	2.07%
	Electric Utilities	10.44%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 3.96% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

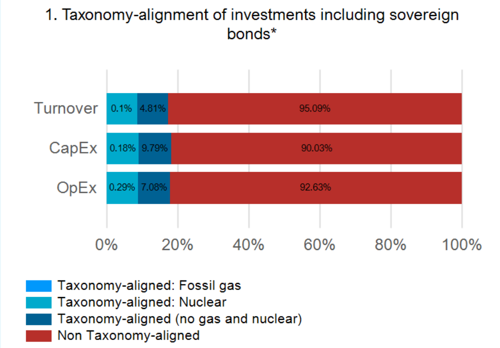
☐ No

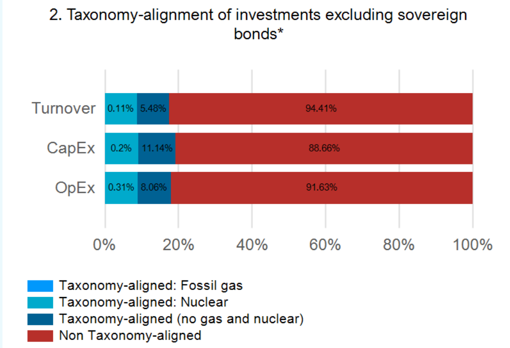
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 86.27% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 3.12%; Transitional Activity: 0.01%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 4.5%
Opex - 5.5%
Capex - 7.5%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 4.8%
Opex - 5.8%
Capex - 7.8%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.29 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 12.09 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Euro Short Term Bond Fund

Legal entity identifier:
3NMLOFBNMWJ7JPIH6S89

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.53% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 92.37 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 24.53 % of the fund invested in sustainable investments;
iv) 18.46 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.78% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 92.57% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 14.59 % of the fund was invested in sustainable investments;
iv) 8.68% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.37% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 24.53 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

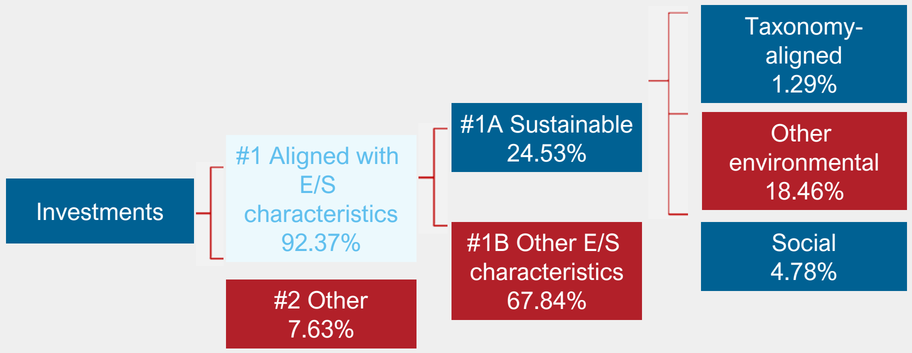
Asset allocation describes the share of investments in specific assets.

The fund invested 24.53 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 92.37 % of its assets in securities of issuers with favourable ESG characteristics;
2. 24.53 % in sustainable investments of which 1.29 % have an environmental objective (which is aligned with the EU Taxonomy), 18.46 % have an environmental objective (which is not aligned with the EU Taxonomy) and 4.78 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 92.57% of its assets in securities of issuers with favourable ESG characteristics;
2. 14.59% in sustainable investments of which 1.54% have an environmental objective (which is aligned with the EU Taxonomy), 8.68% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.37% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	2.56%
Consumer Discretionary	Automobiles	3.18%
	Hotels Restaurants & Leisure	1.21%
Consumer Staples	Food & Staples Retailing	1.21%

Open Ended Fund	Closed Ended Cash Fund	3.5%
Real Estate	Fixed Income - Corp Bds - Real Est Mgt & Dev - Re	3.62%
Utilities	Electric Utilities	5.41%
	Water Utilities	2.18%
	Multi-Utilities	0.68%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.29% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

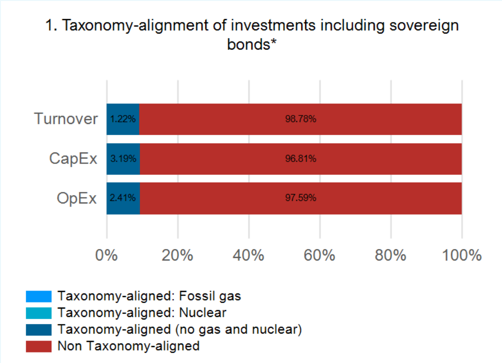
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

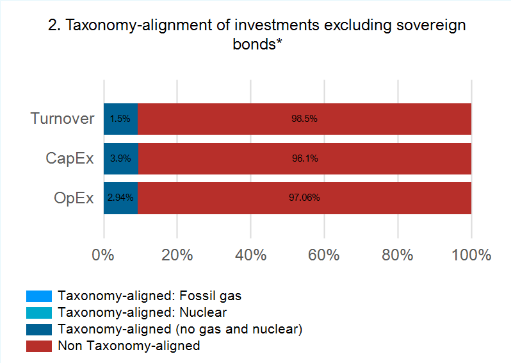
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 80.31% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.83%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.2%
Opex - 1%
Capex - 1.5%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.4%
Opex - 1.2%
Capex - 1.7%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 18.46 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 4.78 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 71.82 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 15.64 % of the fund invested in sustainable investments;
iv) 10.97 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 2.76% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 65.21% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 10.86% of the fund was invested in sustainable investments;
iv) 6.4% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 3.83% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 15.64 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

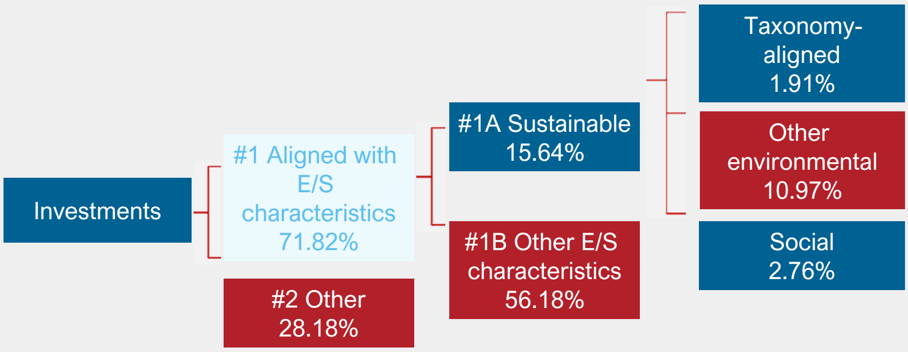
Asset allocation describes the share of investments in specific assets.

The fund invested 15.64 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 71.82 % of its assets in securities of issuers with favourable ESG characteristics;
2. 15.64 % in sustainable investments of which 1.91 % have an environmental objective (which is aligned with the EU Taxonomy), 10.97 % have an environmental objective (which is not aligned with the EU Taxonomy) and 2.76 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 65.21% of its assets in securities of issuers with favourable ESG characteristics;
2. 10.86% in sustainable investments of which 0.63% have an environmental objective (which is aligned with the EU Taxonomy), 6.4% have an environmental objective (which is not aligned with the EU Taxonomy), and 3.83% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.91% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

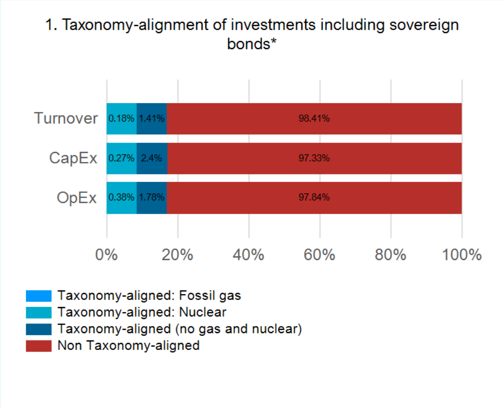
☐ No

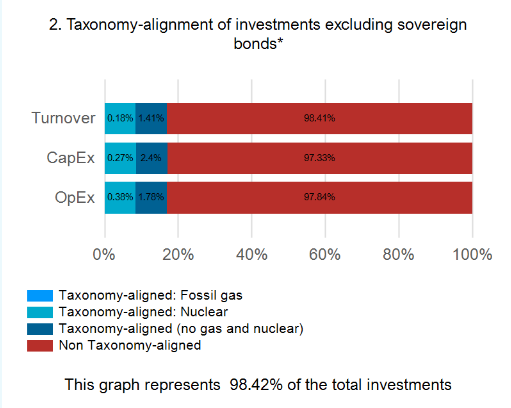
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.89%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.3%
Opex - 1.3%
Capex - 1.9%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.3%
Opex - 1.3%
Capex - 1.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 10.97 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 2.76 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - Flexible Bond Fund

Legal entity identifier: Y5GJXJ4DKJON310L3I87

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 17.19% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 88.12 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 17.19 % of the fund invested in sustainable investments;
iv) 9.47 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 6.09% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 85.03% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 11.92% of the fund was invested in sustainable investments;
iv) 6.14% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.56% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 17.19 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Capex - 4.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 9.47 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 6.09 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Fidelity Funds - Global Bond Fund

Legal entity identifier: GQ0BF6O9W3C24RB7AC25

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.79% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 88.54 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 7.79 % of the fund invested in sustainable investments;
iv) 4.69 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 2.86% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 88.71% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 7.69% of the fund was invested in sustainable investments;
iv) 3.72% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 3.25% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 7.79 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
US Treasury 4.00% 15/02/2034	Government	8.2%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

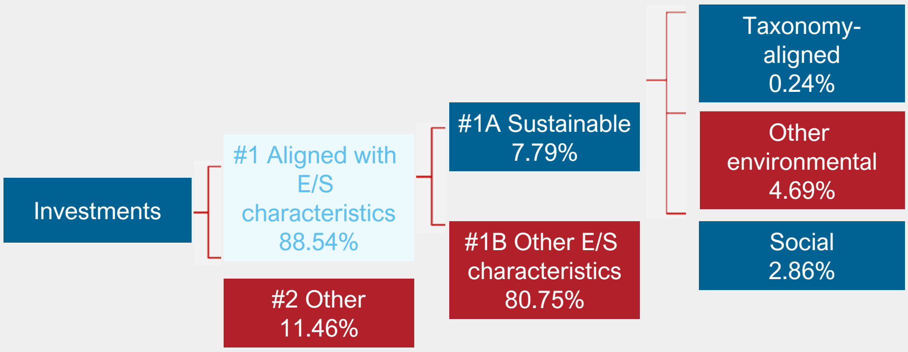
Asset allocation describes the share of investments in specific assets.

The fund invested 7.79 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 88.54 % of its assets in securities of issuers with favourable ESG characteristics;
2. 7.79 % in sustainable investments of which 0.24 % have an environmental objective (which is aligned with the EU Taxonomy), 4.69 % have an environmental objective (which is not aligned with the EU Taxonomy) and 2.86 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 88.71% of its assets in securities of issuers with favourable ESG characteristics;
2. 7.69% in sustainable investments of which 0.71% have an environmental objective (which is aligned with the EU Taxonomy), 3.72% have an environmental objective (which is not aligned with the EU Taxonomy), and 3.25% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Wireless Telecommunication Services	0.5%
	Diversified Telecommunication Services	0.14%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.24% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

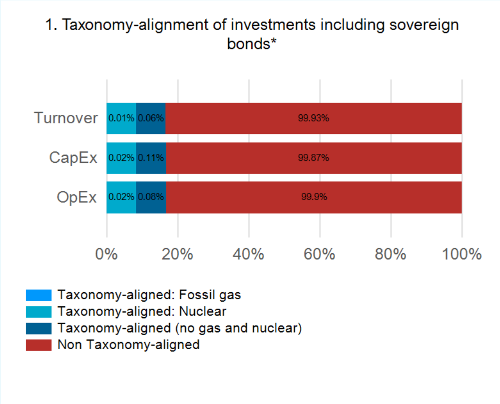
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

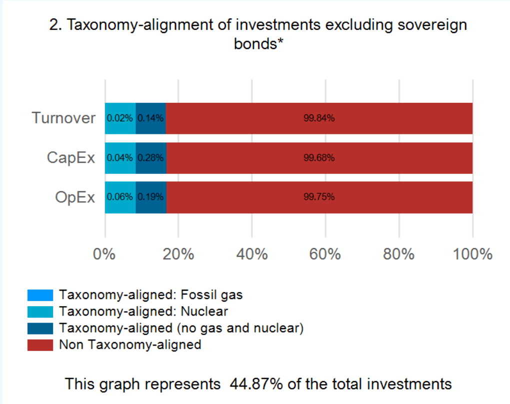
☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.04%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.5%
Opex - 0.5%
Capex - 0.7%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.1%
Opex - 1%
Capex - 1.5%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 4.69 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 2.86 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 88.29 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 34.73 % of the fund invested in sustainable investments;
iv) 20.71 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 2.03% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
vi) 12% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 82.87% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 25.25% of the fund was invested in sustainable investments;
iv) 15.63% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 1.97% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
vi) 7.64% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 34.73 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

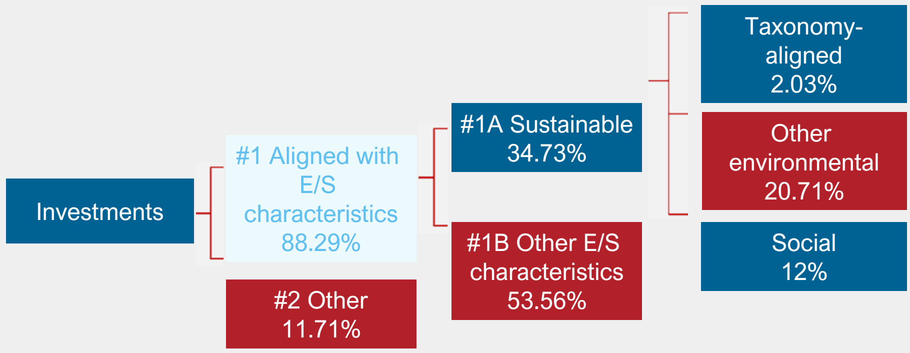
Asset allocation describes the share of investments in specific assets.

The fund invested 34.73 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 88.29 % of its assets in securities of issuers with favourable ESG characteristics;
2. 34.73 % in sustainable investments of which 2.03 % have an environmental objective (which is aligned with the EU Taxonomy), 20.71 % have an environmental objective (which is not aligned with the EU Taxonomy) and 12 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 82.87% of its assets in securities of issuers with favourable ESG characteristics;
2. 25.25% in sustainable investments of which 1.97% have an environmental objective (which is aligned with the EU Taxonomy), 15.63% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.64% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.03% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

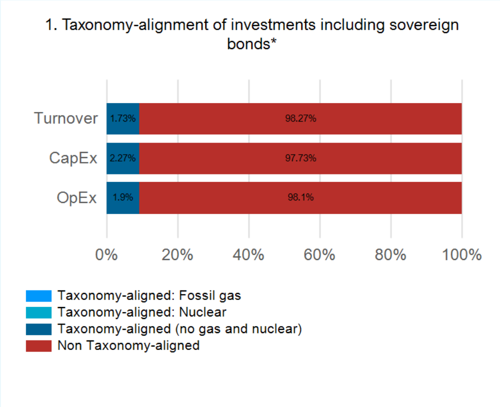
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

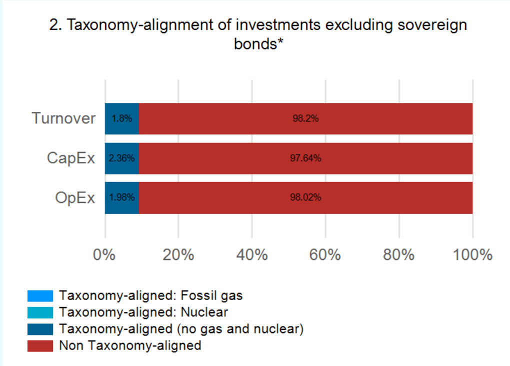
to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 94.1% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.56%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 2.5%
Opex - 2.5%
Capex - 3.2%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 2.6%
Opex - 2.6%
Capex - 3.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.71 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 12 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global High Yield Fund

Legal entity identifier:
549300HLL9VXER4ESF55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.41% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable
investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 70.83 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 11.41 % of the fund invested in sustainable investments;
iv) 5.35 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 6% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 66.58% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 10.76% of the fund was invested in sustainable investments;
iv) 3.82% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 6.94% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 11.41 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

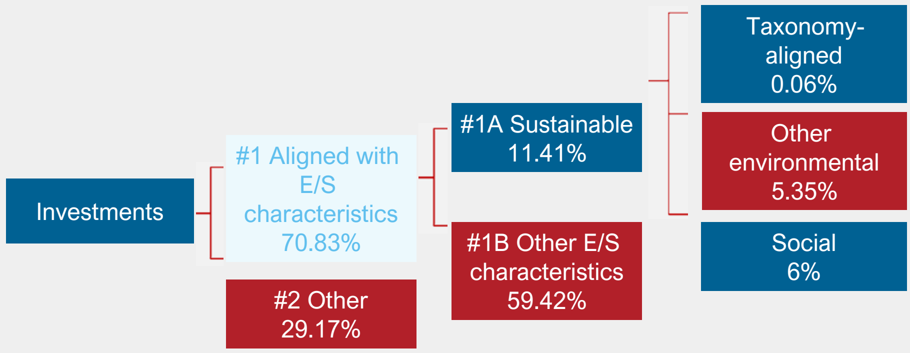
Asset allocation describes the share of investments in specific assets.

The fund invested 11.41 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 70.83 % of its assets in securities of issuers with favourable ESG characteristics;
2. 11.41 % in sustainable investments of which 0.06 % have an environmental objective (which is aligned with the EU Taxonomy), 5.35 % have an environmental objective (which is not aligned with the EU Taxonomy) and 6 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 66.58% of its assets in securities of issuers with favourable ESG characteristics;
2. 10.76% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 3.82% have an environmental objective (which is not aligned with the EU Taxonomy), and 6.94% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The fund invested 0.06% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

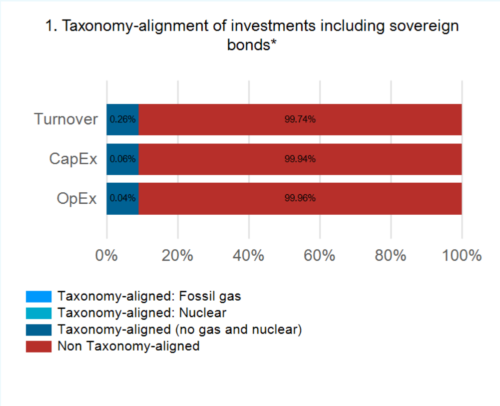
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

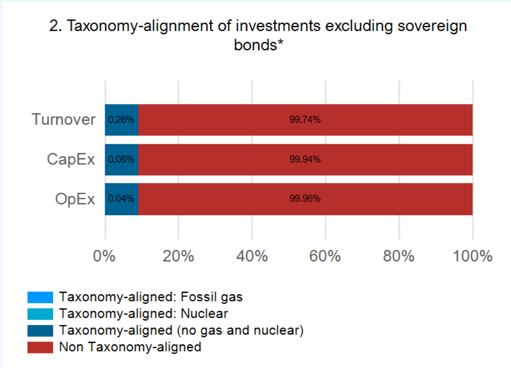
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 98.47% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.01%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.6%
Opex - 0.1%
Capex - 0.1%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.6%
Opex - 0.1%
Capex - 0.1%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.35 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 6 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Hybrids Bond Fund

Legal entity identifier:
549300BKJXZO8Z8K9S85

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.3% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable
investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 85.51 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 20.3 % of the fund invested in sustainable investments;
iv) 9.77 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 1.18% of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
vi) 9.35% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 85.8% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 14.05% of the fund was invested in sustainable investments;
iv) 5.2% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);
v) 1.48% of the fund was invested in sustainable investments with an environmental objective in economic activities (that qualify as environmentally sustainable under the EU Taxonomy); and
vi) 7.38% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 20.3 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

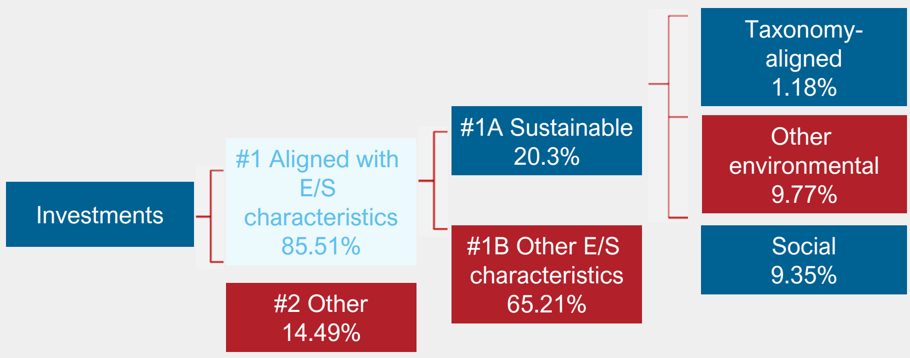
Asset allocation describes the share of investments in specific assets.

The fund invested 20.3 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 85.51 % of its assets in securities of issuers with favourable ESG characteristics;
2. 20.3 % in sustainable investments of which 1.18 % have an environmental objective (which is aligned with the EU Taxonomy), 9.77 % have an environmental objective (which is not aligned with the EU Taxonomy) and 9.35 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 85.8% of its assets in securities of issuers with favourable ESG characteristics;
2. 14.05% in sustainable investments of which 1.48% have an environmental objective (which is aligned with the EU Taxonomy), 5.2% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.38% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Diversified Telecommunication Services	1.3%
Consumer Discretionary	Automobiles	2.9%
Energy	Oil, Gas & Consumable Fuels	3.62%
Financials	Commercial Banks	71.48%
	Capital Markets	6.01%
	Insurance	3.26%
	Diversified Financial Services	1.52%
Healthcare	Pharmaceuticals	2.43%
Real Estate	Fixed Income - Corp Bds - Real Est Mgt & Dev - Re	0.01%
Utilities	Electric Utilities	5.35%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.18% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

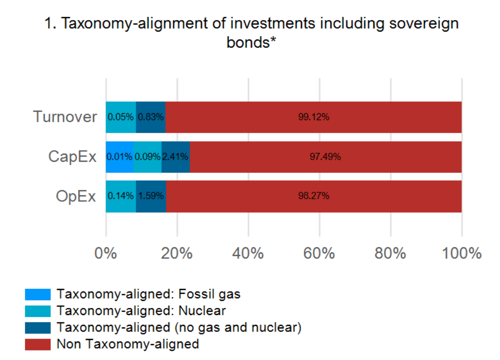
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

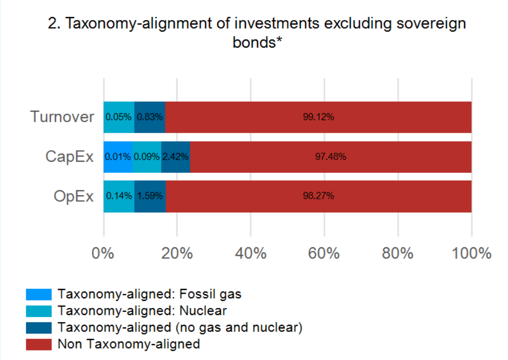
☒ Yes

☒ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 96.48% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.49%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.9%
Opex - 2.3%
Capex - 3.3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.9%
Opex - 2.3%
Capex - 3.3%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 9.77 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 9.35 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Fidelity Funds - Global Income Fund

Legal entity identifier:
549300Y91PT1E5IZKI34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.47% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 78.2% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 16.47% of the fund was invested in sustainable investments and;
iv) 5.48% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 73.16% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 13.26% of the fund was invested in sustainable investments and;
iv) 7.45% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.47% of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

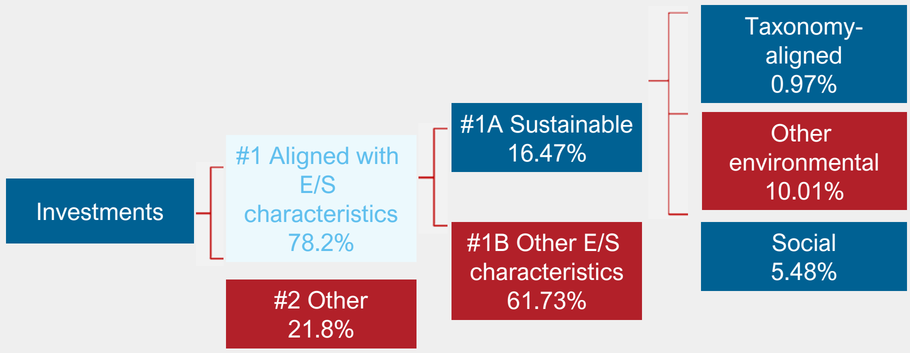
Asset allocation describes the share of investments in specific assets.

The fund invested 16.47 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 78.2 % of its assets in securities of issuers with favourable ESG characteristics;
2. 16.47 % in sustainable investments of which 0.97 % have an environmental objective (which is aligned with the EU Taxonomy), 10.01 % have an environmental objective (which is not aligned with the EU Taxonomy) and 5.48 %have a social objective.

The Asset allocation for the prior reference period was as follows.
The fund invested in:
1. 73.16% of its assets in securities of issuers with favourable ESG characteristics;
2. 13.26% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 5.52% have an environmental objective (which is not aligned with the EU Taxonomy), and 7.45% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.97% in sustainable investments with an environmental objective

on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

aligned with the EU Taxonomy.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

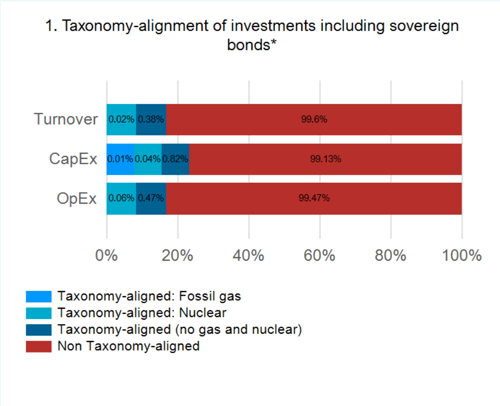
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

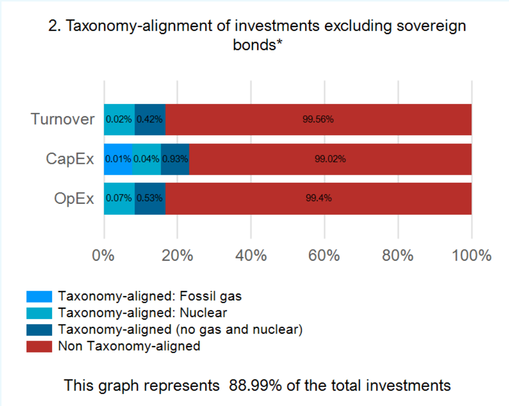
☒ Yes

☒ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.3%; Transitional Activity: 0%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.1%
Opex - 0.3%
Capex - 0.2%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.2%
Opex - 0.3%
Capex - 0.2%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 10.01 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 5.48 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Inflation-linked Bond Fund

Legal entity identifier:
78VTRQN40UWE9NYCJW22

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 97.91 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below). The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 99.05% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

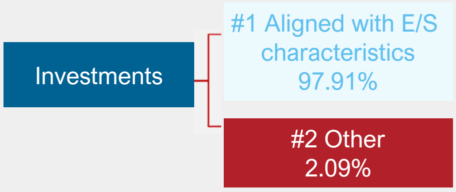
Asset allocation describes the share of investments in specific assets.

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 97.91 % of its assets in securities of issuers with favourable ESG characteristics;

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 99.05% of its assets in securities of issuers with favourable ESG characteristics;



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Government	Government	100.22%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure**

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

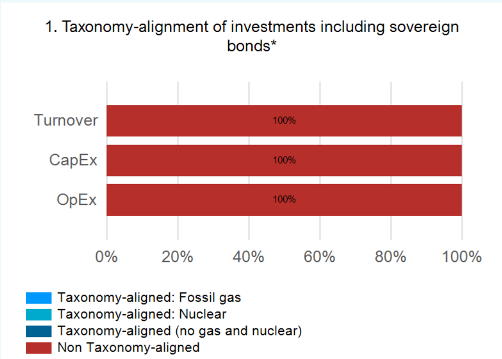
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

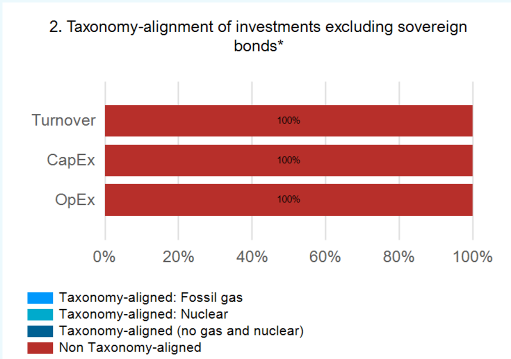
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 74.2% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.44% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 74.31 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 16.44 % of the fund invested in sustainable investments;
iv) 12.65 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 3.18% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 71.83% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 13.3% of the fund was invested in sustainable investments;
iv) 8.75% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.21% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.44 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

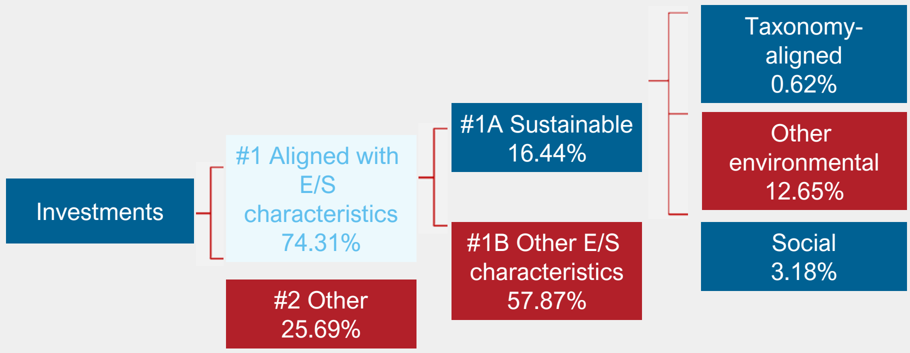
Asset allocation describes the share of investments in specific assets.

The fund invested 16.44 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 74.31 % of its assets in securities of issuers with favourable ESG characteristics;
2. 16.44 % in sustainable investments of which 0.62 % have an environmental objective (which is aligned with the EU Taxonomy), 12.65 % have an environmental objective (which is not aligned with the EU Taxonomy) and 3.18 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 71.83% of its assets in securities of issuers with favourable ESG characteristics;
2. 13.3% in sustainable investments of which 0.34% have an environmental objective (which is aligned with the EU Taxonomy), 8.75% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.21% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.62% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

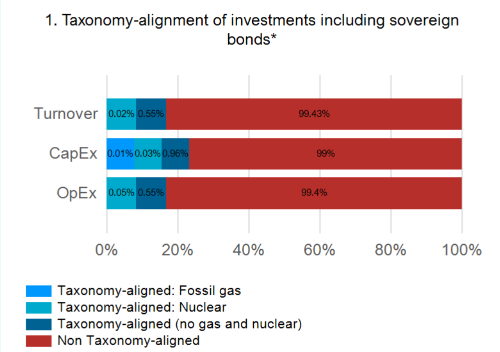
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

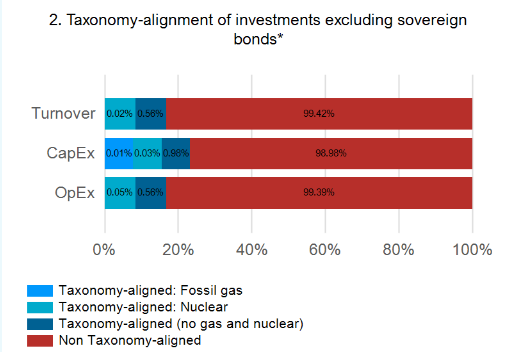
☒ Yes

☒ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 98.32% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.47%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.3%
Opex - 0.3%
Capex - 0.5%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.3%
Opex - 0.3%
Capex - 0.5%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 12.65 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 3.18 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Structured Credit Income Fund

Legal entity identifier:
254900R6Z4Q220PRF360

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:

i) 56.86 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;

ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below). The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 56.62% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 0% of the fund was invested in sustainable investments; and
iv) 0% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.

(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.

(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.

(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

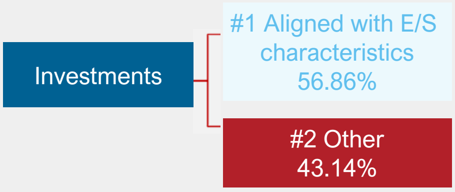
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 56.86 % of its assets in securities of issuers with favourable ESG characteristics;
The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 56.62% of its assets in securities of issuers with favourable ESG characteristics;



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Textiles & Apparel	0.48%
Financials	Diversified Financial Services	93.54%
	Thrifts & Mortgage Finance	2.34%
	Consumer Finance	1.99%
	Commercial Banks	0.24%
Real Estate	Real Estate Investment Trusts (Reits)	0.69%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

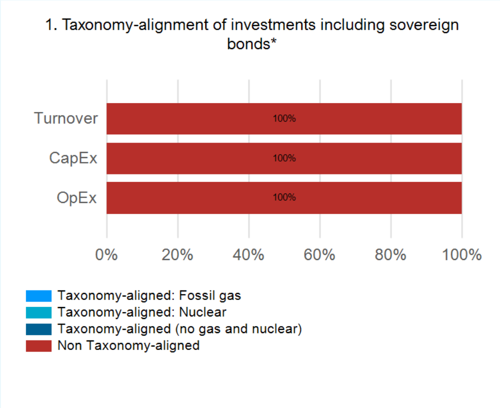
☐ In fossil gas ☐ In nuclear energy

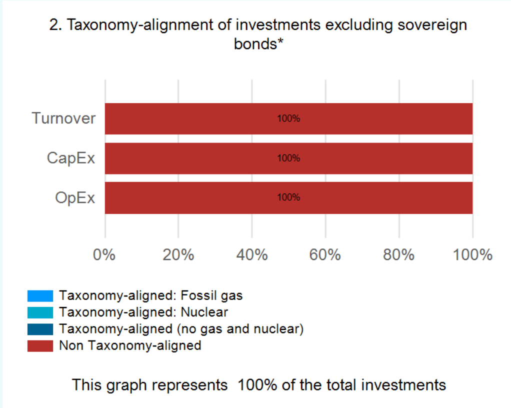
☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.5% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 92.54 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 47.5 % of the fund invested in sustainable investments;
iv) 30.11 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 14.7% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 89.85% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 38.74% of the fund was invested in sustainable investments;
iv) 22.06% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 12.09% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 47.5 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity’s existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a ‘Very Severe’ controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be ‘sustainable investments’ unless Fidelity's fundamental research determined that the issuer was not breaching “do no significant harm” requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

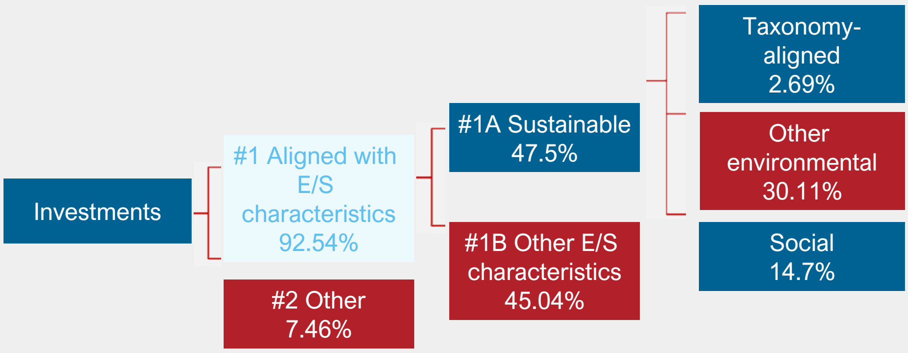
Asset allocation describes the share of investments in specific assets.

The fund invested 47.5 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 92.54 % of its assets in securities of issuers with favourable ESG characteristics;
2. 47.5 % in sustainable investments of which 2.69 % have an environmental objective (which is aligned with the EU Taxonomy), 30.11 % have an environmental objective (which is not aligned with the EU Taxonomy) and 14.7 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 89.85% of its assets in securities of issuers with favourable ESG characteristics;
2. 38.74% in sustainable investments of which 4.6% have an environmental objective (which is aligned with the EU Taxonomy), 22.06% have an environmental objective (which is not aligned with the EU Taxonomy), and 12.09% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.69% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

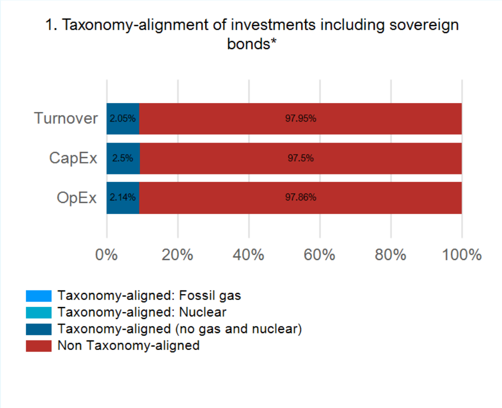
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

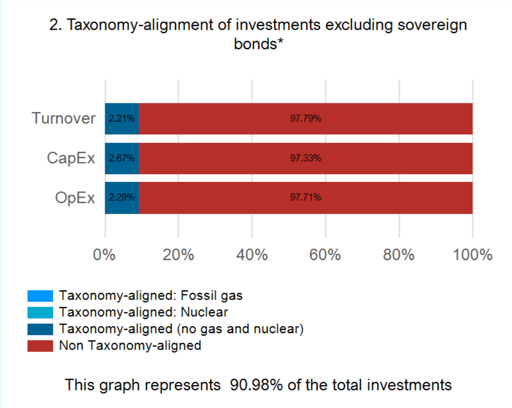
activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.99%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 4.4%
Opex - 3%
Capex - 3.8%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 4.6%
Opex - 3.1%
Capex - 4%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 30.11 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 14.7 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.4% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 91.43 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 16.4 % of the fund invested in sustainable investments;
iv) 8.81 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 6.1% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 89.26% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 11.75% of the fund was invested in sustainable investments;
iv) 5.82% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.83% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 16.4 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
US Treasury 5.44% 18/01/2024	Government	8.41%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

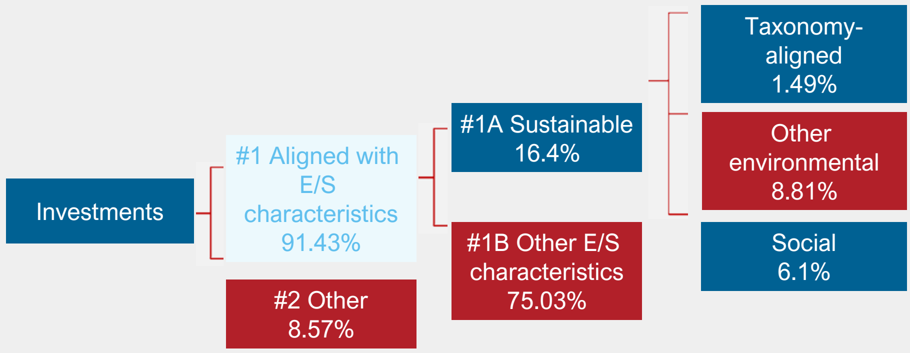
Asset allocation describes the share of investments in specific assets.

The fund invested 16.4 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 91.43 % of its assets in securities of issuers with favourable ESG characteristics;
2. 16.4 % in sustainable investments of which 1.49 % have an environmental objective (which is aligned with the EU Taxonomy), 8.81 % have an environmental objective (which is not aligned with the EU Taxonomy) and 6.1 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 89.26% of its assets in securities of issuers with favourable ESG characteristics;
2. 11.75% in sustainable investments of which 1.1% have an environmental objective (which is aligned with the EU Taxonomy), 5.82% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.82% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.49% in sustainable investments with an environmental objective aligned with the EU Taxonomy.This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

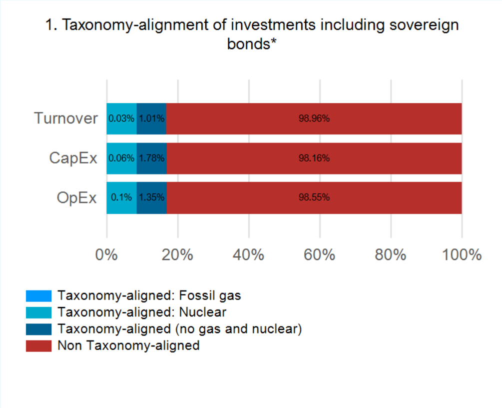
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

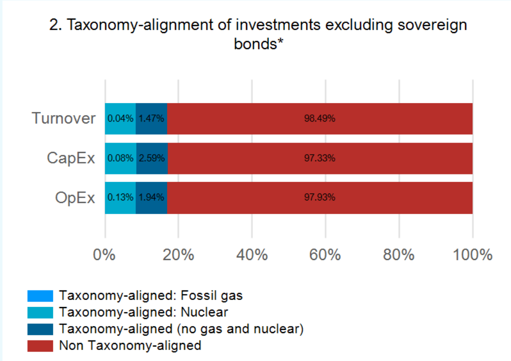
objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 68.66% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.58%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 2%
Opex - 1.9%
Capex - 2.9%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 2.7%
Opex - 2.6%
Capex - 3.9%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 8.81 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 6.1 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - US Dollar Bond Fund

Legal entity identifier:
757QSNCIZ38KH0VOQ986

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.11% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities,excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 91.74 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 11.11 % of the fund invested in sustainable investments;
iv) 5.94 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.71% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 89.13% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 8.81% of the fund was invested in sustainable investments;
iv) 3.96% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.44% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 11.11 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

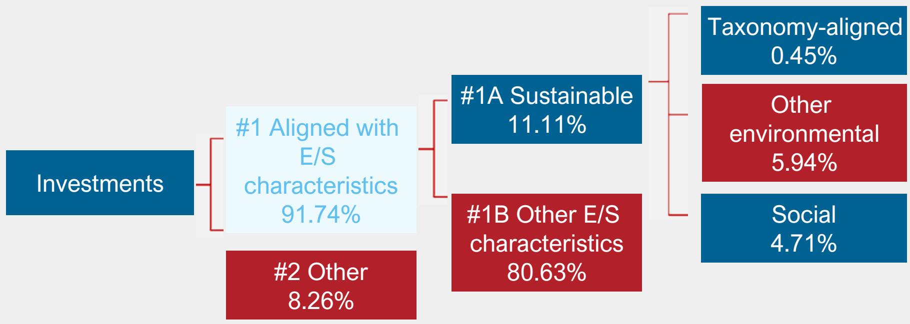
Asset allocation describes the share of investments in specific assets.

The fund invested 11.11 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 91.74 % of its assets in securities of issuers with favourable ESG characteristics;
2. 11.11 % in sustainable investments of which 0.45 % have an environmental objective (which is aligned with the EU Taxonomy), 5.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 4.71 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 89.13% of its assets in securities of issuers with favourable ESG characteristics;
2. 8.81% in sustainable investments of which 0.41% have an environmental objective (which is aligned with the EU Taxonomy), 3.96% have an environmental objective (which is not aligned with the EU Taxonomy), and 4.44% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.45% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

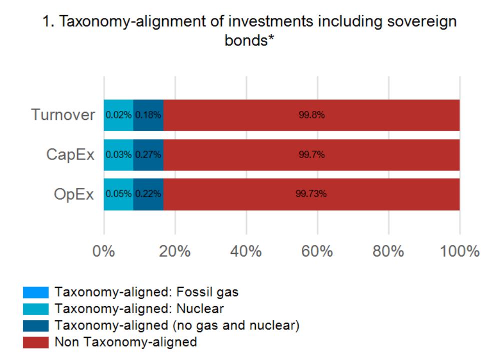
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

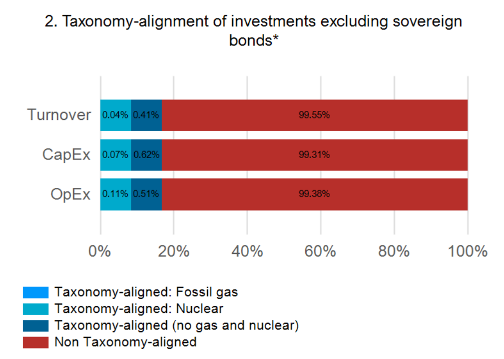
☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 42.34% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.14%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.3%
Opex - 0.3%
Capex - 0.5%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.8%
Opex - 0.7%
Capex - 1%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 5.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 4.71 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Fidelity Funds - US High Yield Fund

Legal entity identifier: 5493009BXYOCIRTXRS63

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?

☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 12.44% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 63.05% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 12.44% of the fund invested in sustainable investments;
iv) 7.3% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 4.98% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 12.44% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country
Fidelity Institutional Liquidity Fund - A-ACC-USD	Open Ended Fund	3.82%	IE

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

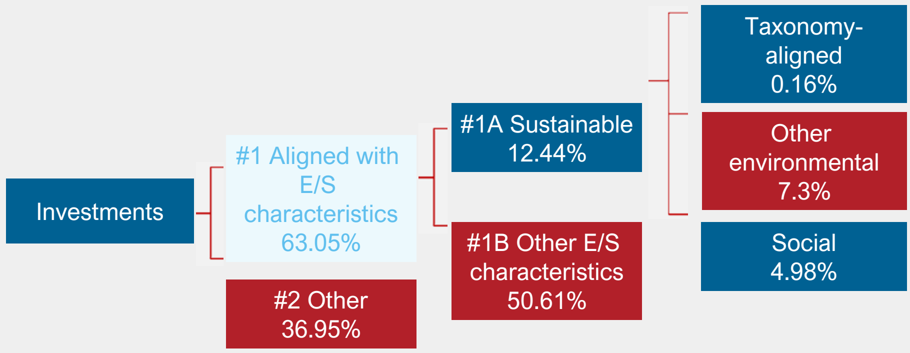
Asset allocation describes the share of investments in specific assets.

The fund invested 12.44 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 63.05 % of its assets in securities of issuers with favourable ESG characteristics;
2. 12.44 % in sustainable investments of which 0.16 % have an environmental objective (which is aligned with the EU Taxonomy), 7.3 % have an environmental objective (which is not aligned with the EU Taxonomy) and 4.98 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.16% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.

The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.

carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The taxonomy alignment of the underlying investments of the fund is measured by turnover.

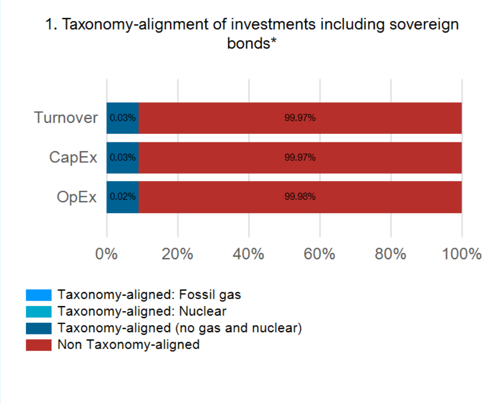
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

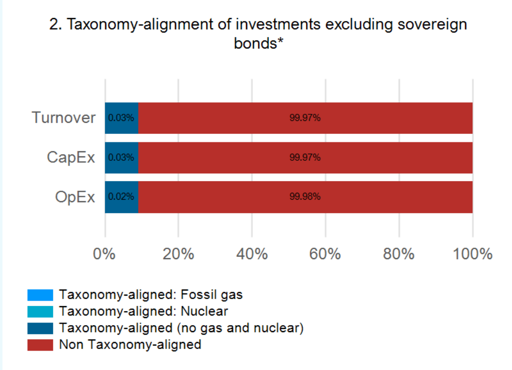
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 99.27% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.3 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 4.98 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 80.66 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below).
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 80.59% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

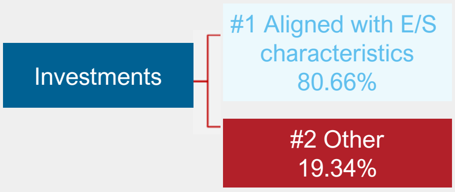
Asset allocation describes the share of investments in specific assets.

The fund invested 0 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 80.66 % of its assets in securities of issuers with favourable ESG characteristics;

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 80.59% of its assets in securities of issuers with favourable ESG characteristics;



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Staples	Household Products	5.28%
Energy	Energy Equipment & Services	1.1%
Financials	Commercial Banks	63.15%
	Diversified Financial Services	23.32%
	Capital Markets	1.65%
	Consumer Finance	1.1%
Industrials	Road & Rail	2.19%
Materials	Chemicals	2.21%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

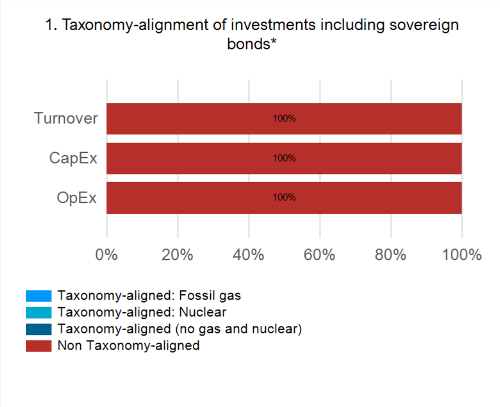
☒ No

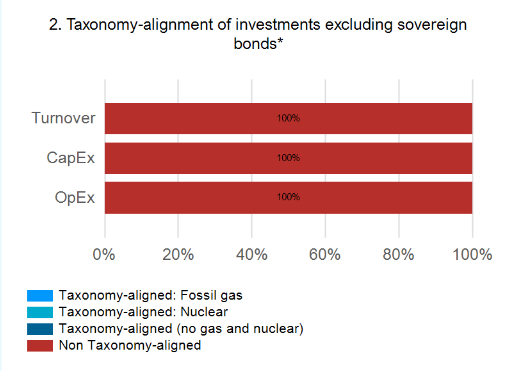
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.00%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0 %
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 0 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 0 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
3. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of__% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics.Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities,excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 81.21 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 84.13% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below).
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The question is not applicable since the fund did not have any sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The question is not applicable since the fund did not have any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

The question is not applicable since the fund did not have any sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The question is not applicable since the fund did not have any sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 12.83% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 92.65% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 12.83% of the fund invested in sustainable investments;
iv) 7.63% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 3.7% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 12.83% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

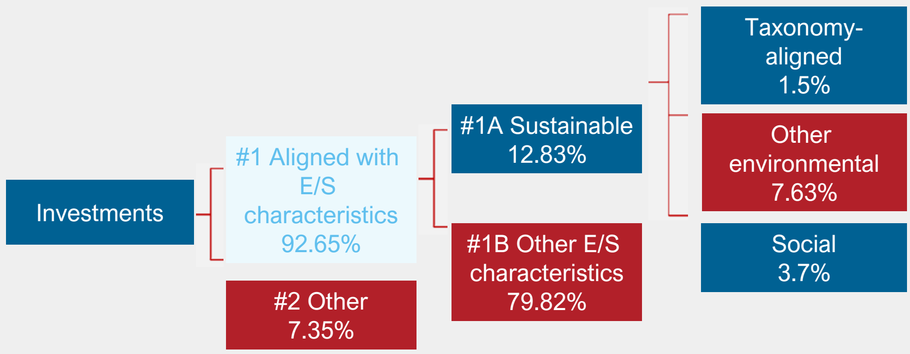
Asset allocation describes the share of investments in specific assets.

The fund invested 12.83 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 92.65 % of its assets in securities of issuers with favourable ESG characteristics;
2. 12.83 % in sustainable investments of which 1.5 % have an environmental objective (which is aligned with the EU Taxonomy), 7.63 % have an environmental objective (which is not aligned with the EU Taxonomy) and 3.7 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.5% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject

power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

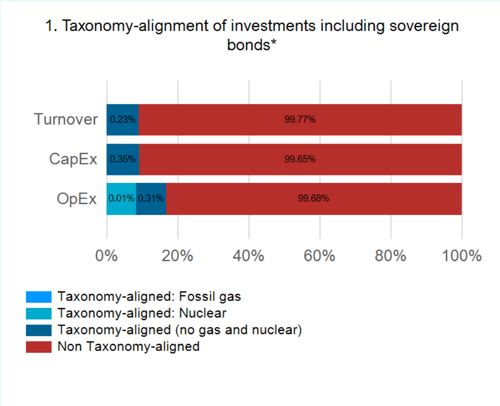
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

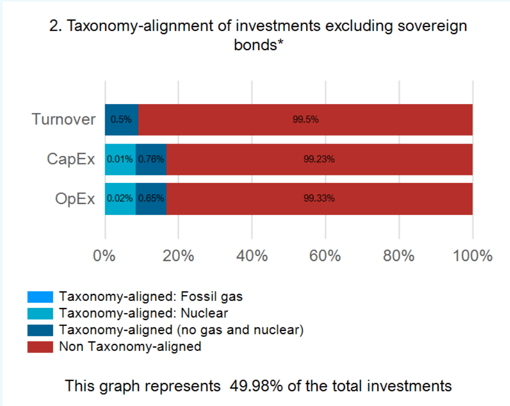
☒ Yes

☐ In fossil gas ☒ In nuclear energy

☐ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.16%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 7.63 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 3.7 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target TM 2030 Fund

Legal entity identifier:
549300D1BVEZ3TH0BG02

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.41% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 80.56% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 34.41% of the fund invested in sustainable investments;
iv) 19.58% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 13.05% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 34.41% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

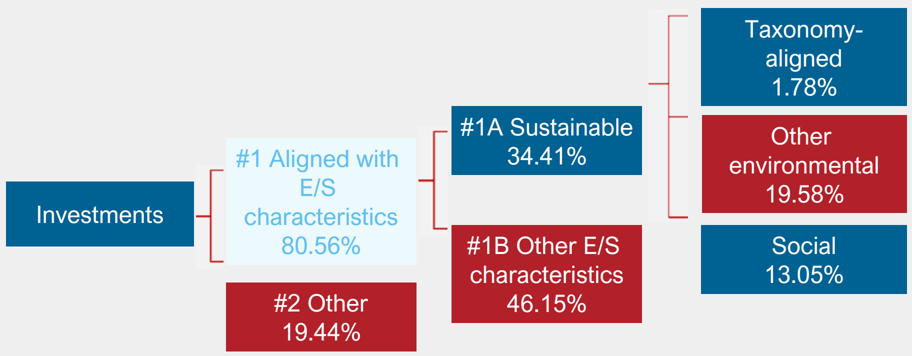
Asset allocation describes the share of investments in specific assets.

The fund invested 34.41 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 80.56 % of its assets in securities of issuers with favourable ESG characteristics;
2. 34.41 % in sustainable investments of which 1.78 % have an environmental objective (which is aligned with the EU Taxonomy), 19.58 % have an environmental objective (which is not aligned with the EU Taxonomy) and 13.05 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 1.78% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

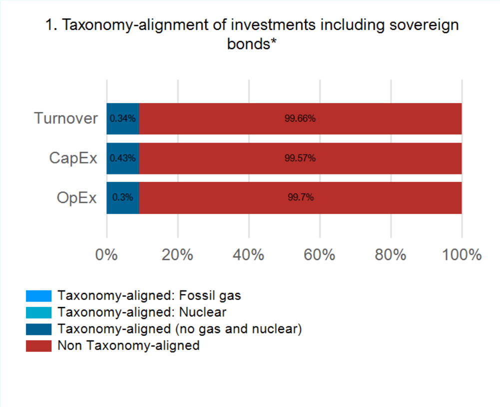
☒ No

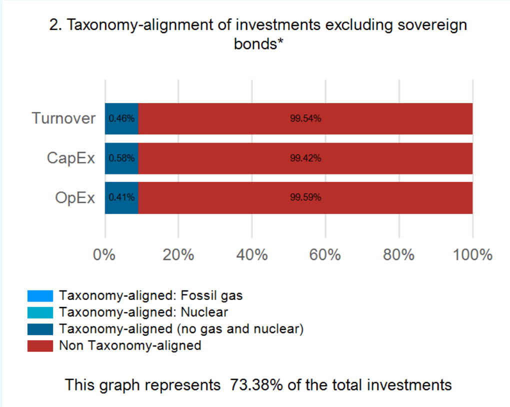
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.23%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 19.58 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 13.05 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target TM 2035 Fund

Legal entity identifier:
549300XULTNPDTV56Y50

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.12% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 82.38% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 51.12% of the fund invested in sustainable investments;
iv) 29.94% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 20.75% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.12% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

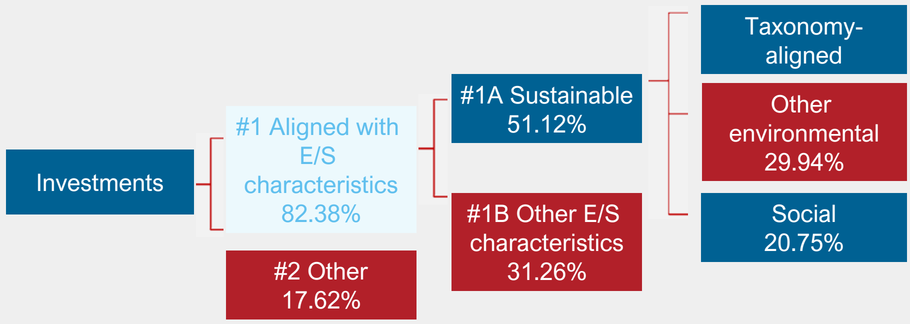
Asset allocation describes the share of investments in specific assets.

The fund invested 51.12 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 82.38 % of its assets in securities of issuers with favourable ESG characteristics;
2. 51.12 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

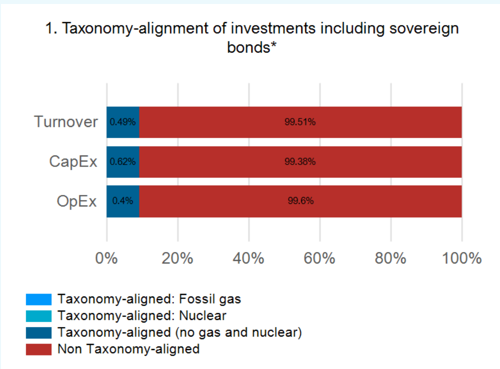
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

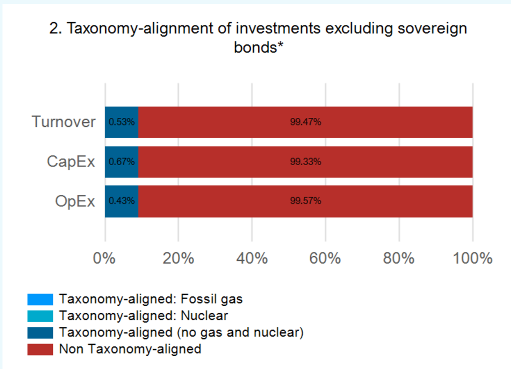
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 93.56% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

The share of the fund made in Enabling Activity: 0.31%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.75 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 82.37% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 51.12% of the fund invested in sustainable investments;
iv) 29.94% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 20.75% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.12% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

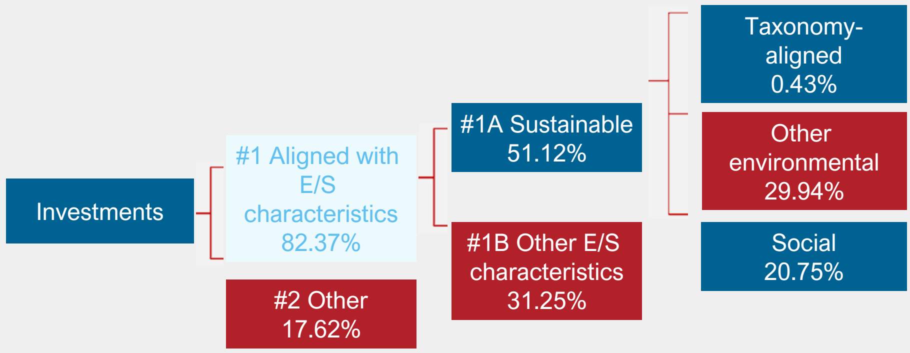
Asset allocation describes the share of investments in specific assets.

The fund invested 51.12 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 82.37 % of its assets in securities of issuers with favourable ESG characteristics;
2. 51.12 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.94 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

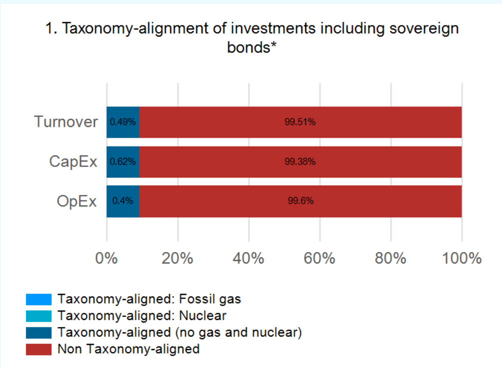
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

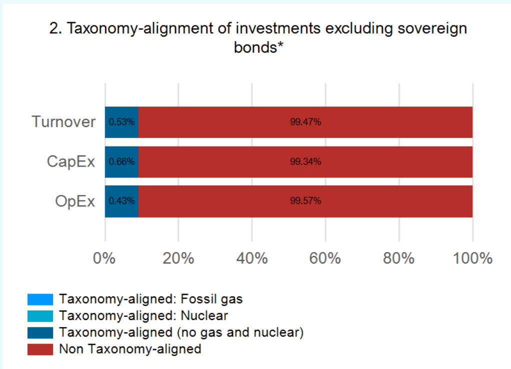
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 93.55% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

The share of the fund made in Enabling Activity: 0.33%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.75 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target TM 2045 Fund

Legal entity identifier:
549300Q8NRARUSN1XS58

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 82.33% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 51.1% of the fund invested in sustainable investments;
iv) 29.92% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 20.75% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

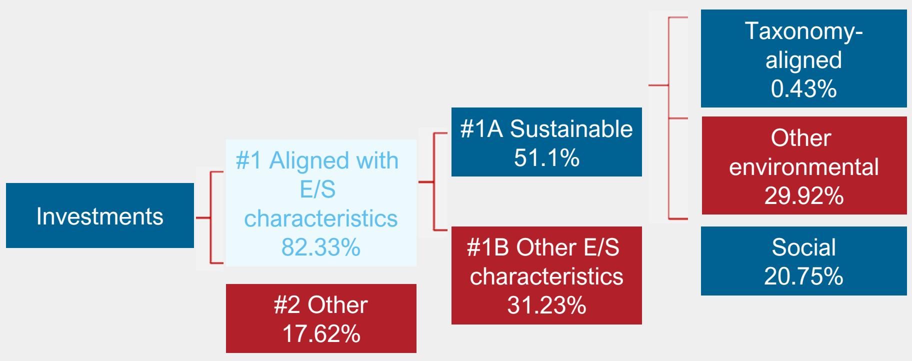
Asset allocation describes the share of investments in specific assets.

The fund invested 51.1 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 82.33 % of its assets in securities of issuers with favourable ESG characteristics;
2. 51.1 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.92 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

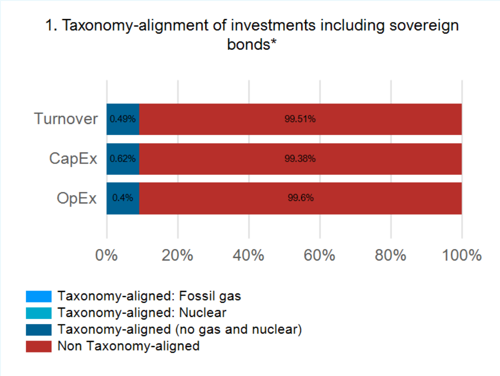
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

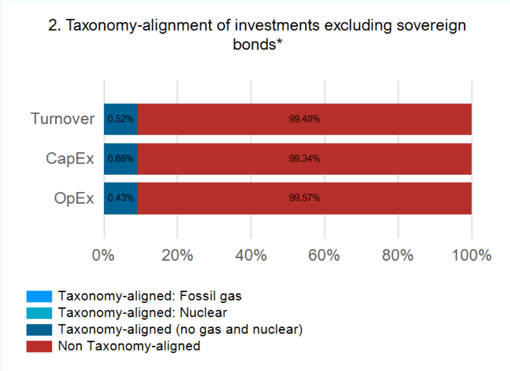
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 93.54% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

The share of the fund made in Enabling Activity: 0.33%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.92 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.75 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target TM 2050 Fund

Legal entity identifier:
549300J4YDP2CV913309

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.11% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 82.34% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 51.11% of the fund invested in sustainable investments;
iv) 29.93% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 20.75% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.11% of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

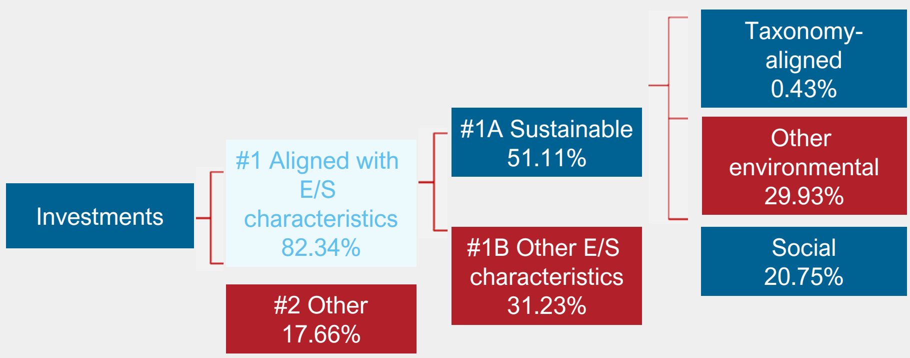
Asset allocation describes the share of investments in specific assets.

The fund invested 51.11 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 82.34 % of its assets in securities of issuers with favourable ESG characteristics;
2. 51.11 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.93 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.75 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 82.39% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 51.1% of the fund invested in sustainable investments;
iv) 29.95% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 20.72% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

Largest investments	Sector	% Assets	Country

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

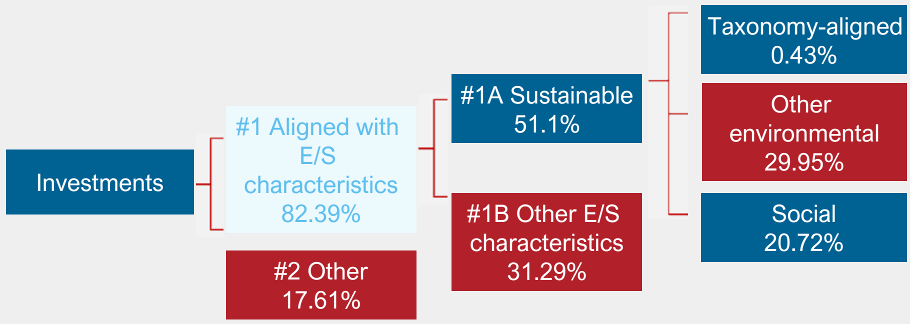
Asset allocation describes the share of investments in specific assets.

The fund invested 51.1 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 82.39 % of its assets in securities of issuers with favourable ESG characteristics;
2. 51.1 % in sustainable investments of which 0.43 % have an environmental objective (which is aligned with the EU Taxonomy), 29.95 % have an environmental objective (which is not aligned with the EU Taxonomy) and 20.72 % have a social objective.

The asset allocation for the prior reference period is not applicable as this is the first reporting period for the fund.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

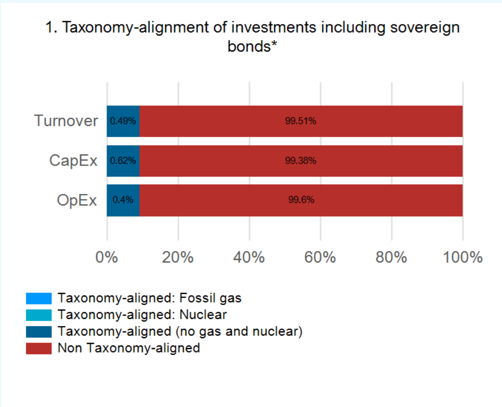
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

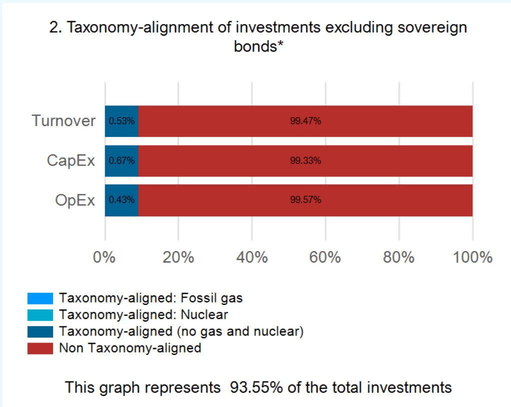
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

The share of the fund made in Enabling Activity: 0.33%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.95 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.72 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target TM 2060 Fund

Legal entity identifier:
2549004RGYR26MYR1T34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund was uplifted to an Article 8 fund in January 23, 2024. The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data is a quarterly average of the following month's end dates : January 31st and April 30th. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 82.38% of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 51.1% of the fund invested in sustainable investments;
iv) 29.94% of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 20.73% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

Not applicable as this is the first reporting period for the fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 51.1% of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 23/01/2024-30/04/2024

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.43% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives.
The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties.
The taxonomy alignment of the underlying investments of the fund is measured by turnover.

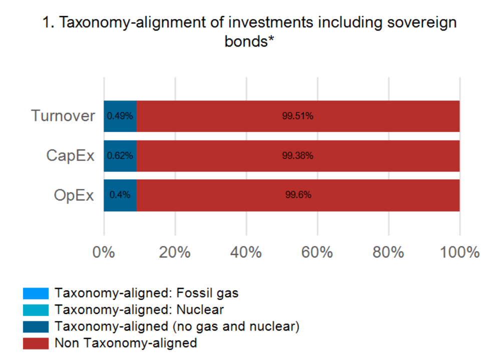
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

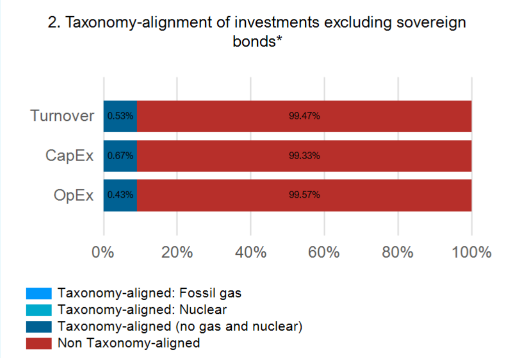
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 93.55% of the total investments

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

reflecting green operational activities of investee companies.

The share of the fund made in Enabling Activity: 0.33%; Transitional Activity: 0.03%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as this is the first reporting period for the fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 20.73 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Institutional Emerging Markets Equity Fund

Legal entity identifier:
549300APJHM18WNUFH86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 52.96% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No referencebenchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
The fund did not invest in sustainable investments with environmental objectives that were aligned with the EU Taxonomy. Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 94.65 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 52.96 % of the fund invested in sustainable investments;
iv) 20.97 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 31.99% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 86.45% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 45.69% of the fund was invested in sustainable investments;
iv) 14.87% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 30.83% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 52.96 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This did not contribute to the environmental EU Taxonomy objectives;or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing	Information Technology	8.46%	TW

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

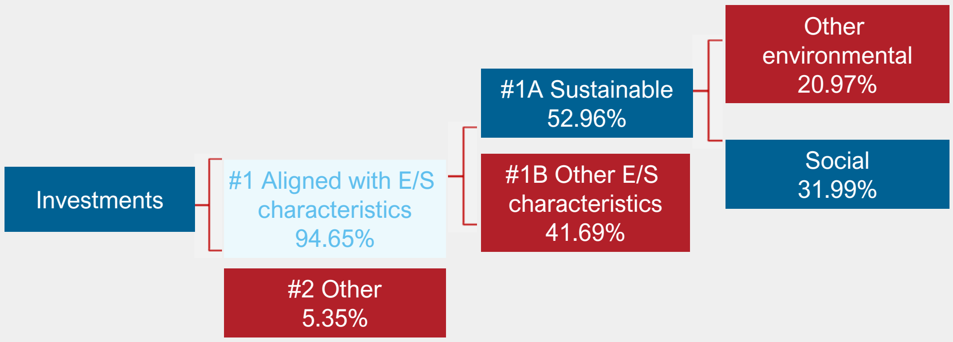
Asset allocation describes the share of investments in specific assets.

The fund invested 52.96 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 94.65 % of its assets in securities of issuers with favourable ESG characteristics;
2. 52.96 % in sustainable investments of which 0 % have an environmental objective (which is aligned with the EU Taxonomy), 20.97 % have an environmental objective (which is not aligned with the EU Taxonomy) and 31.99 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 86.45% of its assets in securities of issuers with favourable ESG characteristics;
2. 45.69% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), 14.87% have an environmental objective (which is not aligned with the EU Taxonomy), and 30.83% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Multiline Retail	8.87%
	Textiles & Apparel	5.19%
	Hotels Restaurants & Leisure	4.66%
	Automobiles	3.58%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

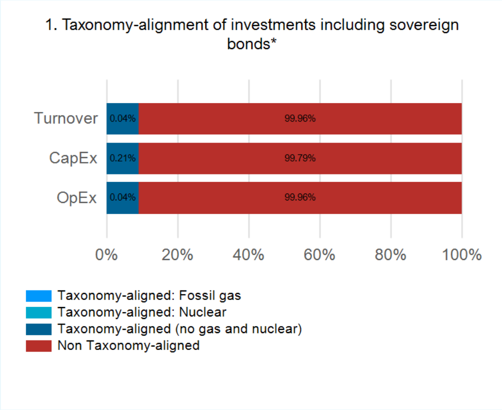
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

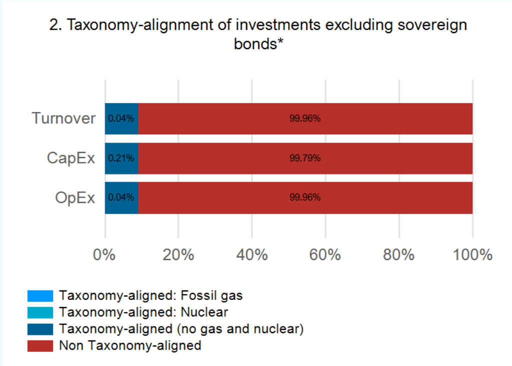
substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.04%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0.2%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0%
Opex - 0%
Capex - 0.2%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 20.97 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 31.99 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.33% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.

The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 94.18 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 68.33 % of the fund invested in sustainable investments;
iv) 29.51 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 35.92% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 92.66% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 55.51% of the fund was invested in sustainable investments;
iv) 23.02% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 32.21% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 68.33 % of sustainable investments.
The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Roche Holding AG	Healthcare	4.47%	CH
SAP SE	Information Technology	4.29%	DE
Industria de Diseno Textil SA	Consumer Discretionary	3.87%	ES
Reckitt Benckiser Group	Consumer Staples	3.67%	GB
Sanofi	Healthcare	3.63%	FR
National Grid	Utilities	3.6%	GB
Associated British Foods	Consumer Staples	3.56%	GB
Fidelity Institutional Liquidity Fund - A-ACC-EUR	Open Ended Fund	3.08%	IE

British American Tobacco	Consumer Staples	2.76%	GB
Ahold Delhaize	Consumer Staples	2.72%	NL
Vonovia SE	Real Estate	2.59%	DE
TotalEnergies SE	Energy	2.56%	FR
SCOR SE	Financials	2.52%	FR

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

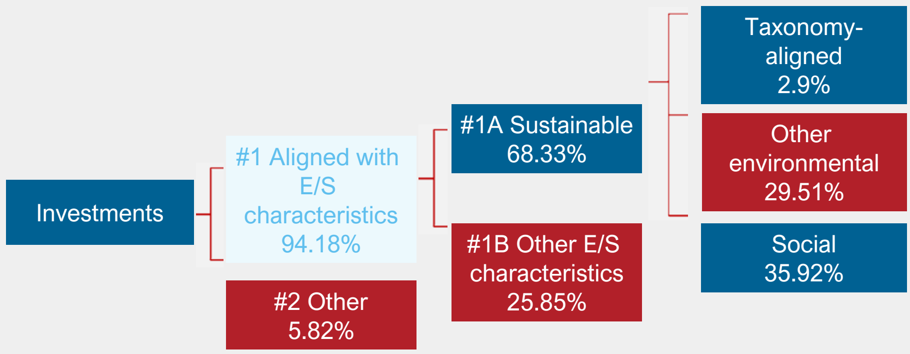
Asset allocation describes the share of investments in specific assets.

The fund invested 68.33 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 94.18 % of its assets in securities of issuers with favourable ESG characteristics;
2. 68.33 % in sustainable investments of which 2.9 % have an environmental objective (which is aligned with the EU Taxonomy), 29.51 % have an environmental objective (which is not aligned with the EU Taxonomy) and 35.92 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 92.66% of its assets in securities of issuers with favourable ESG characteristics;
2. 55.51% in sustainable investments of which 0.28% have an environmental objective (which is aligned with the EU Taxonomy), 23.02% have an environmental objective (which is not aligned with the EU Taxonomy), and 32.21% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Consumer Discretionary	Speciality Retail	4.98%
	Multiline Retail	1.94%
	Textiles & Apparel	1.65%
	Media	1.46%

Utilities	Multi-Utilities	3.93%
	Electric Utilities	1.25%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 2.9% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

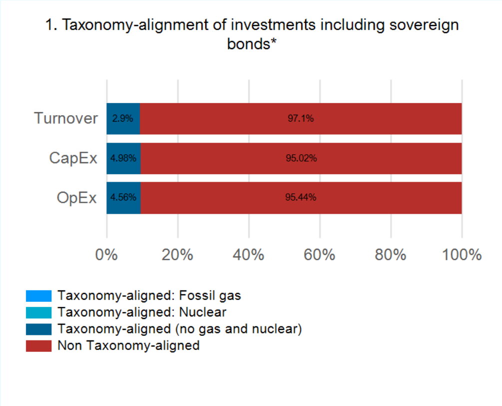
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

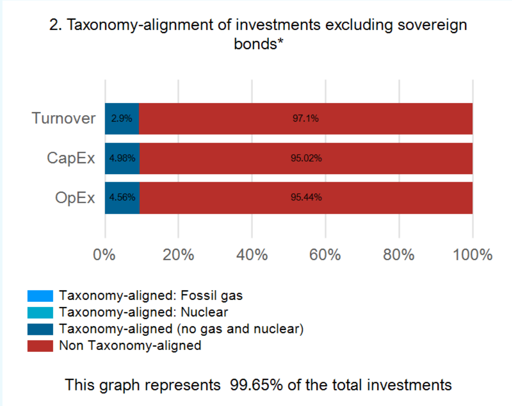
☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 2.57%; Transitional Activity: 0.00%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 1.4%
Opex - 1.9%
Capex - 2.7%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 1.4%
Opex - 1.9%
Capex - 2.7%

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested 29.51 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The fund invested 35.92 % in sustainable investments with a social objective.

What investments were included under “#2 Other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the fund were invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the fund adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund took the following actions to meet the environmental or social characteristics:
1. The fund invested in securities of issuers with favourable ESG characteristics.
2. The fund made sustainable investments.
3. Quarterly Sustainability Review to discuss and review the fund's qualitative and quantitative environmental and social characteristics.
4. The fund has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?

Not applicable

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable

How did this financial product perform compared with the reference benchmark?

Not applicable

How did this financial product perform compared with the broad market index?

Not applicable

Periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities.** That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Institutional Global Focus Fund

Legal entity identifier:
5493003YW9GXTX4AB509

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
☐ Yes	☒ No
☐ It made **sustainable investments with an environmental objective:**__%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 64.23% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:**__%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The fund promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics. Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy, efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.
Where the fund invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below.
The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

How did the sustainability indicators perform?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted were:
i) 86.56 % of the fund invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments in corporate issuers, 0% of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
iii) 64.23 % of the fund invested in sustainable investments;
iv) 34.48 % of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 29.56% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

Principal adverse impacts are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

… and compared to previous periods?

The performance of the sustainability indicators the fund used to measure the attainment of the environmental or social characteristics that it promoted during the previous reporting period were:
i) 82.75% of the fund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
ii) in respect of its direct investments, 0% of the fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
iii) 54.78% of the fund was invested in sustainable investments;
iv) 30.66% of the fund was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
v) 24.01% of the fund invested in sustainable investments with a social objective.
The sustainability indicators of the fund were not subject to an assurance by auditors or a review by third parties.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 64.23 % of sustainable investments. The sustainable investments had an environmental and social objective.
The fund determined a sustainable investment as follows:
a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
(b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.
The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.
Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).
Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts througheffective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:
(i) Due Diligence - analysis of whether principle adverse impacts were material and negative.
(ii) ESG rating - Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
(iii) Exclusions - We adopted a principles-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principles.
(iv) Engagement - Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
(v) Voting - Fidelity's voting policy included explicit minimum standards for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.
(vi) Quarterly reviews - discussion and review of principal adverse impacts through the fund's quarterly review process.
Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information: "Sustainable investing framework" .

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01/05/2023-30/04/2024

Largest investments	Sector	% Assets	Country
Berkshire Hathaway (B)	Financials	4.21%	US
Microsoft	Information Technology	4.02%	US

Norfolk Southern	Industrials	1.88%	US

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

What was the proportion of sustainability-related investments?

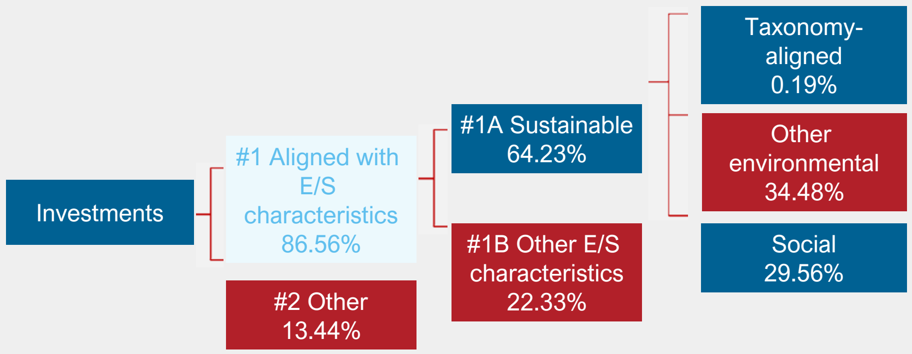
Asset allocation describes the share of investments in specific assets.

The fund invested 64.23 % in sustainable investments.

What was the asset allocation?

The fund invested in:
1. 86.56 % of its assets in securities of issuers with favourable ESG characteristics;
2. 64.23 % in sustainable investments of which 0.19 % have an environmental objective (which is aligned with the EU Taxonomy), 34.48 % have an environmental objective (which is not aligned with the EU Taxonomy) and 29.56 % have a social objective.

The Asset allocation for the prior reference period was as follows. The fund invested in:
1. 82.75% of its assets in securities of issuers with favourable ESG characteristics;
2. 54.78% in sustainable investments of which 0.1% have an environmental objective (which is aligned with the EU Taxonomy), 30.66% have an environmental objective (which is not aligned with the EU Taxonomy), and 24.01% have a social objective.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Communication Services	Media	0.49%
Consumer Discretionary	Multiline Retail	5.44%
	Auto Components	1.11%
	Household Durables	1.07%
	Textiles & Apparel	0.98%
Consumer Staples	Food Products	0.98%
	Personal Products	0.77%
	Beverages	0.48%
Financials	Insurance	8.5%
	Commercial Banks	7.37%
	Diversified Financial Services	13.41%
Healthcare	Health Care Providers & Services	1.49%
	Health Care Equipment & Supplies	1.47%
	Life Sciences Tools & Services	1.06%
Industrials	Road & Rail	6.22%
	Aerospace & Defence	6.08%
	Industrial Conglomerates	0.98%
Information Technology	Internet Software & Services	6.18%
	Computers & Peripherals	4.47%
	Semiconductor Equipment & Products	13.89%
	Software	13.87%
	It Services	1.46%
	Electronic Equipment Instruments & Components	0.29%
Materials	Chemicals	1.54%
Open Ended Fund	Closed Ended Cash Fund	0.56%

The following data is as at April 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invested 0.19% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation economic objectives. The compliance of the investments of the fund with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the fund is measured by turnover.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

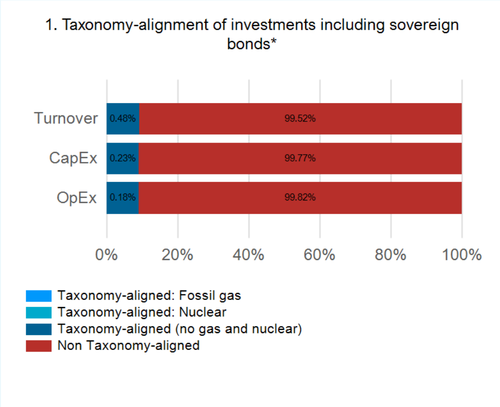
☒ No

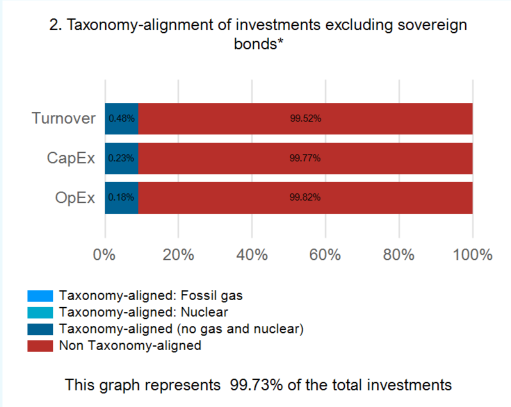
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in dark blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The following data is a quarterly average of the following month end dates: July 31st 2023, October 31st 2023, January 31st 2024 and April 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the fund made in Enabling Activity: 0.24%; Transitional Activity: 0.02%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Previous Reference Period
Taxonomy - alignment of investments including sovereign bonds
Turnover - 0.3%
Opex - 0.1%
Capex - 0.3%
Taxonomy - alignment of investments excluding sovereign bonds
Turnover - 0.3%
Opex - 0.1%
Capex - 0.3%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852
