致聯博SICAV基金股東

意見

我們已查核聯博SICAV基金(「基金」)之財務報表、以及其各項投資組合，其中包括截至2023年5月31日的資產負債表及投資組合，以及截至該日止年度之營運與淨資產變動表及財務報表附註，包含重大會計政策之摘要。

我們認為，此財務報表依據盧森堡有關編製及表達財務報表之法律及規範要求，真實公平反映了基金及其各投資組合截至2023年5月31日的財務狀況，及其截至該日止年度營運結果與淨資產變動情況。

意見基礎

我們根據2016年7月23日有關查核專業之法律(「2016年7月23日之法律」)以及盧森堡「金融業監管委員會(Commission de Surveillance du Secteur Financier)」(「CSSF」)所採納的國際查核準則(「ISAs」)進行查核。本事務所根據2016年7月23日法律與盧森堡CSSF所採納的ISAs的責任詳載於本報告「『註冊會計師(réviseur d'entreprises agréé)』對財務報表查核的責任」乙節。根據盧森堡CSSF所採納的國際專業會計師道德守則，包括由國際會計師道德準則委員會所制定之國際獨立準則(「IESBA守則」)，及有關我們查核財務報表之道德要求，本事務所乃獨立於基金，並且本事務所已履行我們於此等道德要求項下之其他道德責任。我們相信，我們所取得的查核證據可充分且適當地作為我們意見之基礎。

其他資訊

基金董事會(「董事會」)須對其他資訊負責。其他資訊包含年報中所載之資訊，惟不包含財務報表及我們關於註冊會計師(réviseur d'entreprises agréé)之報告。

我們對於財務報表的意見並不涵蓋其他資訊，且我們不會對此發表任何形式的鑒證結論。

關於我們對財務報表的查核，我們的責任是閱讀其他資訊，並在此過程中，考慮其他資訊是否與財務報表或我們在查核中獲得的資訊存在重大不一致，或疑似存在重大不實陳述。如根據我們已執行的工作，我們認為此等其他資訊存在重大不實陳述，我們需要報告此事實。就此，我們沒有任何需要報告之事項。

董事會對財務報表的責任

董事會根據盧森堡有關編製及表達財務報表的法律及監管規定，負責編製及公允表達該等財務報表，且負責就財務報表的編製進行董事會認為必要的內部控制，以免其中存在重大不實陳述(不論因詐欺或錯誤)。

於編製財務報表時，除非董事會有意清算基金或其任何投資組合或終止營運，或無其他實際的替代方案時，董事會應負責評估基金或其各投資組合持續經營的能力，

酌情揭露與持續經營相關的事項以及使用持續經營為會計基礎。

「註冊會計師(réviseur d'entreprises agréé)」對財務報表查核的責任

本事務所的目標為合理確信整體財務報表未存在重大不實陳述，不論係因詐欺或錯誤所致，並出具包含本事務所意見之「註冊會計師(réviseur d'entreprises agréé)」報告。合理確信為一高水準之確信，但不能保證按照2016年7月23日法律及盧森堡CSSF所採納之ISAs所進行之查核總能發現重大不實陳述之存在。不實陳述可能由詐欺或錯誤導致，如合理預期其單獨或整體而言可能影響使用者根據這些財務報表所作出的經濟決策，則該不實陳述會被視為重大。

根據2016年7月23日之法律以及盧森堡CSSF所採納的ISAs，我們於查核時發揮專業判斷及保持專業懷疑。我們亦同時：

- 辨識與評估財務報表重大不實陳述的風險(不論因詐欺或錯誤所致)，針對該等風險設定並執行查核程序，以及取得充分且適當的查核證據作為我們意見之基礎。由於詐欺可能涉及串通、偽造、故意遺漏，不實陳述或逾越內部控制，因此未發現因詐欺所導致的重大不實陳述風險高於因錯誤所導致的重大不實陳述。
- 取得瞭解與查核相關的內部控制，以制定在相關情況下適宜的查核程序，但並非針對基金內部控制的有效性發表意見。
- 評估董事會所採用的會計政策是否適當，以及所作之會計預估及相關揭露事項是否合理。
- 總結董事會對持續經營會計基礎使用的適當性，以及根據取得的查核證據，是否對基金或其投資組合持續經營能力產生重大疑問的事件或情況存在重大不確定性。如果我們認為存在重大不確定性，則需要在我們「註冊會計師(réviseur d'entreprises agréé)」的報告中提請注意財務報表中的相關揭露，或者，如此等揭露不充分，則需修改我們的意見。我們的結論是基於截至「註冊會計師(réviseur d'entreprises agréé)」報告發布之日所獲得的查核證據。惟未來的事件或情況可能導致基金或其投資組合(已決定擬關閉之投資組合除外)停止持續經營。
- 就已決定關閉或擬關閉之投資組合，我們就董事會利用非持續經營會計基礎之適當性做出結論。我們亦評估描述非持續經營會計基礎及其利用原因之揭露之充分性。我們的結論是基於截至「註冊會計師(réviseur d'entreprises agréé)」報告發布之日所獲得的查核證據。
- 評估財務報表的整體陳述、結構與內容，包括揭露內容，以及財務報表是否足以公允表達標的交易及事件。

我們與負責治理人員進行溝通，其中包括查核的計劃範圍及時間安排，以及重大查核發現，包含我們在查核過程中發現內部控制的任何重大缺失。

我們亦向該等負責治理之人員提出聲明表示本事務所業已遵守有關獨立性之相關道德規範，並向其說明就本事務所之獨立性可能合理應注意之所有關係及其他情事，以及如適用，為除去對於所採取保障措施威脅之行動。

June 20, 2023

Dear Shareholder,

This report provides an update for AB SICAV I (the "Fund") for the annual reporting period ended May 31, 2023.

US and international stocks rose, while emerging-market stocks declined during the 12-month period ended May 31, 2023. Aggressive central bank tightening—led by the US Federal Reserve—created headwinds for global equity markets. Despite bouts of increased volatility, developed markets rallied amid signs of easing inflationary pressures, but resilient consumer spending and mostly strong global economic data raised concern that central banks would need to hold rates higher for longer to combat stubbornly high inflation. China's zero-COVID policy weighed on emerging markets until December when restrictions were lifted. Although emerging markets initially rallied, the slower-than-expected pace of China's economic recovery hindered results. Later, the collapse of select US regional banks triggered concerns about broader financial contagion and briefly drove stocks lower.

Within large-cap markets, growth-oriented stocks rose and value-oriented stocks declined in absolute terms. Growth stocks surged higher, led by a technology sector rally, which was fueled by positive earnings reports and optimism over revenue growth linked to the development of AI technologies. Large-cap stocks rose in absolute terms and outperformed small-cap stocks, which declined.

Fixed-income government bond market yields were extremely volatile in all major developed markets. Government bond

prices fell in all major markets except Australia, Canada and Japan. Most central banks raised interest rates significantly to combat persistent inflation. Stress in the global banking sector led treasury markets to rally as yields fell on growth concerns in March. Yields rose in many countries in April and May as core inflation did not fall as expected.

Developed-market investment-grade corporate bonds, which typically have longer maturities and are more sensitive to changes in yields than high-yield corporates, fell and underperformed developed-market treasuries overall—yet outperformed respective treasury markets in the US and eurozone by a wide margin. Developed-market high-yield corporate bonds had positive returns and significantly outperformed developed-market treasuries, while also materially outperforming respective treasury markets in the US and eurozone.

Emerging-market local-currency sovereign bonds led risk asset returns, even as the US dollar rose against the vast majority of developed- and emerging-market currencies. Emerging-market hard-currency sovereign bonds fell, underperforming global developed-market treasuries, while emerging-market corporate bonds rose and outperformed developed-market investment-grade and high-yield corporates overall.

We appreciate your investment in the Fund.

Sincerely,

AllianceBernstein L.P., the Investment Manager of the Fund

The share class performance of each Portfolio is based on the net asset value incorporating the impact of expenses reimbursed or waived by the Management Company as of May 31, 2023. No adjustment has been made for sales charges that may apply when shares are purchased or redeemed. Performance for distributing share classes includes the reinvestment of distributions paid during the year. Past performance is no guarantee of future results. Investment return and principal value may fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.

NOTE B: Significant Accounting Policies

The Financial Statements have been prepared in accordance with Luxembourg legal and regulatory requirements and on a going concern basis, except for Short Duration Income Portfolio and Asia Pacific Local Currency Debt Portfolio whose financial statements have been prepared on a non-going concern basis as the Board of Directors have decided to liquidate these Portfolios on June 20, 2023 and September 26, 2023, respectively. The following is a summary of significant accounting policies followed by the Portfolios.

1. Valuation

1.1 Investments in Securities

Securities listed on a stock exchange or traded on any other regulated market are valued at the last sale price on such exchange or market or, if there has been no sale on such day, at the mean of the closing bid and asked price quoted on such day. If a security is listed on several stock exchanges or markets, the last sale price on the stock exchange or market which constitutes the principal market for such security is used.

Securities traded in the over-the-counter market, including securities listed on an exchange whose primary market is believed to be over-the-counter (but excluding securities traded on The Nasdaq Stock Market, Inc. (“NASDAQ”)) are valued at the mean of the current bid and asked prices. Securities traded on NASDAQ are valued in accordance with the NASDAQ Official Closing Price.

Securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at “fair value” as determined in accordance with procedures established by, and under the general supervision of, the Management Company’s Board of Managers (the “Board of Managers”) and the Board of Directors.

Fair valuation procedures are designed to adjust closing market prices of securities to reflect what is believed to be the fair value of those securities at the Portfolio’s Valuation Point.

When fair valuation procedures are employed with respect to a particular security, various objective and subjective factors may be considered, including, among other things, developments affecting the security or involving an entire market since the security’s latest reported price, current valuations of relevant stock indices or pronouncements of certain governmental authorities. Fair value prices based on third party vendor modeling tools may be utilized to the extent available. Therefore, when fair valuation procedures are employed, the prices of individual securities utilized to calculate the Portfolio’s NAV may differ from quoted or published prices for the same securities. Currently, fair value adjustments are only applicable to certain equity securities and futures contracts.

Accordingly, as may also be the case with a previously reported stock exchange price, the price of any portfolio security determined utilizing fair value pricing procedures may be materially different from the price to be realized upon the sale of such security.

For portfolio securities primarily traded on U.S. and Indian exchanges, it is expected that fair value pricing procedures are employed only under very limited circumstances such as, for example, the early closing of an exchange on which a particular security is traded or the suspension of trading in particular security. However, it is anticipated that fair value pricing procedures will be utilized frequently for securities traded on non-U.S. exchanges or other markets, particularly European and Asian markets, excluding India, because, among other reasons, these markets close well before the Portfolio’s Valuation Point. Between the close of these markets and the relevant Portfolio’s Valuation Point, significant events including broad market

moves may occur. In particular, events in the U.S. market on a trading day after the close of these other markets may affect the value of the Portfolio's securities.

Fixed income securities (i), securities not listed on any stock exchange, or traded on any regulated market (ii), and securities, trading of which on a stock exchange or a regulated market is thin (iii), are valued at the most recent bid price provided by the principal market makers. If there is no such market price, or if such market price is not representative of a security's fair market value, then the security is valued in a manner determined to reflect its fair value in accordance with procedures established by, and under the general supervision of, the Board of Managers and the Board of Directors.

U.S. Government securities and any other debt instruments having 60 days or less remaining until maturity are generally valued at market price by an independent pricing vendor, if a market price is available. If a market price is not available, the securities are valued at amortized cost. This methodology is commonly used for short-term securities that have an original maturity of 60 days or less, as well as short-term securities that had an original term to maturity that exceeded 60 days. In instances when amortized cost is utilized, the valuation committee (the "Committee") must reasonably conclude that the utilization of amortized cost is approximately the same as the fair value of the security. Such factors the Committee will consider include, but are not limited to, an impairment of the creditworthiness of the issuer or material changes in interest rates.

Over-the-counter ("OTC") swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties.

1.2 Warrant Valuation

A listed warrant is valued at the last traded price provided by approved vendors. If there has been no sale on the relevant business day, the warrant is valued at the last traded price from the previous day. On the following days, the security is valued in good faith at fair value. All unlisted warrants are valued in good faith at fair value. Once a warrant has expired, it will no longer be valued.

1.3 Financial Futures Contracts

Initial margin deposits are made upon entering into futures contracts. During the year the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealized losses or gains are incurred. When the contract is closed, a realized gain or loss is recorded. This realized gain or loss is equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Open futures contracts are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used.

1.4 Forward Foreign Currency Contracts

The unrealized gain or loss on open forward foreign currency contracts is calculated as the difference between the contracted

rate and the rate to close out the contract. Realized profit or loss includes net gains or losses on forward foreign currency contracts which have been settled or offset by other contracts with the same counterparty.

1.5 Options Purchased and Options Written

When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased. Premiums paid for the purchase of options which expire unexercised are treated on the expiration date as realized losses. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or loss. If a purchased call option is exercised, the premium increases the cost basis of the security or foreign currency purchased by the relevant Portfolio. When an option is written, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio on the expiration date as realized gains. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security or foreign currency purchased by the relevant Portfolio. Listed put or call options purchased by a Portfolio are valued at the last sale price. If there has been no sale on that day, such securities are valued at the closing bid prices on that day.

1.6 Investments in other Undertakings for Collective Investment ("UCIs")

Investments in other UCIs are valued at the last available NAV for the UCI in question.

1.7 Swap Agreements

The Portfolios accrue for interim payments on swap contracts on a daily basis, within income and expenses. Swap contracts are marked to market on a daily basis with fluctuations in value recorded in "Unrealized appreciation (depreciation) on swaps" in the Statement of Assets and Liabilities and "Changes in unrealized gains and (losses) on swaps" in the Statement of Operations and Changes in Net Assets. Once a swap contract has matured or is sold, the net amount is recorded as "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" in the Statement of Operations and Changes in Net Assets. The upfront premiums paid or received are recognized as cost or proceeds in the Statement of Assets and Liabilities and are amortized in a straight line basis over the life of the contract. Accruals of amortized upfront premiums on credit default swaps are included in "Swap income" until the position is sold, thereafter the amortized upfront premiums are included within "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency". On all other swap types the amortized upfront premiums are included within "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency". Fluctuations in the value of swap contracts are recorded as a component of "Changes in unrealized gains and (losses) on swaps" in the Statement of Operations and Changes in Net Assets.

“Upfront premiums paid/(received) on swap contracts” disclosed in the Statement of Assets and Liabilities include premiums paid (received) on the OTC credit default swaps and a margin that is yet to be settled on the centrally cleared credit default swaps.

2. Organization Expenses

The organization expenses for the following Portfolios are being amortized on a straight-line basis through the following dates:

AB SICAV I –	Dates
Sustainable Income Portfolio	June 2026
US Low Volatility Equity Portfolio	June 2026
Diversity Champions Equity Portfolio	December 2027
Global ESG Improvers Portfolio	January 2028

The organization expenses of other existing Portfolios have been fully amortized in prior years.

For China Multi-Asset Portfolio, Concentrated European Equity Portfolio, Low Volatility All Market Income Portfolio, Sustainable All Market Portfolio, Arya European Alpha Portfolio, Asia High Yield Portfolio, Sustainable Climate Solutions Portfolio, Global Low Carbon Equity Portfolio, Climate High Income Portfolio, China Net Zero Solutions Portfolio, American Multi-Asset Portfolio and Short Duration Income Portfolio, the Investment Manager waived amounts due to them in relation to formation expenses and therefore the deferred organization expenses asset has been written down on these Portfolios during the year ended May 31, 2023.

3. Allocation Method

Income and expenses (except for class-specific management and distribution fees) for the “fixed income” and “balanced” Portfolios are allocated on a daily basis utilizing a hybrid allocation model. This model allocates based upon each class’ proportionate percentage of the combined value of settled shares for those classes which accrue a daily dividend and the value of the shares outstanding for those classes which accrue a monthly dividend or no dividend at all.

Income and expenses for the “equity” Portfolios are allocated on a daily basis by each class’ value of their proportionate shares outstanding.

For all of the Portfolios, realized and unrealized gains and losses are allocated on a daily basis by each class’ value of their proportionate shares outstanding.

Class specific management, management company, distribution fees and realized and unrealized gains and losses on forward foreign currency contracts related to the Currency Hedged Share Classes are charged/allocated directly to the respective class.

Due to the distinct institutional nature of all types of Class S shares of the Portfolios, certain fund expenses, where applicable, are allocated to the Class S shares based upon minimum shareholder activity and account level requirements.

4. Currency Translation

Values expressed in a currency, other than the currency in which a Portfolio is denominated, are translated at the average of the last available buying and selling price. Transactions in foreign currencies are translated into the currency of each Portfolio at the exchange rate ruling at the date of the transactions.

The Combined Statement of Assets and Liabilities is presented in U.S. Dollars at the exchange rates ruling at the date of the Combined Statement of Assets and Liabilities, while the Combined Statement of Operations and Changes in Net Assets is presented in U.S. Dollars at the average exchange rates ruling during the year. Exchange rates applied in the financial statements are: spot rate 1.0689 and average rate 1.0451 for EUR to USD, spot rate 0.1403 and average rate 0.1444 for CNH to USD and spot rate 1.2440 and average rate 1.2020 for GBP to USD.

The “Currency translation adjustment” presented in the Statement of Operations and Changes in Net Assets is the result of the difference in exchange rates used to translate combined net assets at the beginning of the year, the Statement of Assets and Liabilities and the Statement of Operations and Changes in Net Assets.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date. Interest income is accrued daily. Investment gains and losses for the Portfolios are determined on an average cost basis. The Fund accretes discounts and amortizes premiums as adjustments, if applicable, to interest income. Investment transactions are recorded on trade date plus one day.

6. Estimates

The preparation of the Financial Statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of income and expenses during the reporting year. Actual results may differ from those estimates.

7. Swing Pricing Adjustment

(The following applies to all Portfolios except Sustainable Global Thematic Portfolio and Global Value Portfolio)

The Fund implemented a NAV Adjustment Policy, also known as “swing pricing” policy, effective from November 2, 2015. Under this policy, a Portfolio’s NAV may be adjusted to reflect the impact of estimated transaction costs, deal spreads and charges generated by shareholders’ purchase and redemption activity. Swing pricing is automatically applied when daily net subscriptions or redemptions exceed a threshold specified by the Swing Pricing Committee under the supervision of the Board of Directors.

When swing pricing is applied, the NAV of the relevant Portfolio’s shares will be adjusted up or down, in an amount generally not to exceed 2% of the relevant NAV, so that the transaction costs incurred due to the purchase and redemption activity are borne by the investors transacting in the Portfolio’s shares, rather than the Portfolio itself. This adjustment is intended to minimize dilution of the value of shareholders’ investment in shares of a Portfolio brought on by transactions in the Portfolio’s shares.

The NAV per Share and the total net assets as disclosed in the Statistical Information are the published NAV per Share and the total net assets, whereas the total net assets disclosed in the Statement of Assets and Liabilities and Statement of Operations and Changes in Net Assets is the total NAV excluding any period end swing adjustments.

All Portfolios subject to swing pricing except Emerging Market Local Currency Debt Portfolio, Asia Income Opportunities Portfolio, Concentrated Asia Equity Portfolio, Sustainable Emerging Market Debt Portfolio, All Market Income Portfolio, Financial Credit Portfolio, Sustainable European Thematic Portfolio, Europe (Ex UK) Equity Portfolio, China Multi-Asset Portfolio, Concentrated European Equity Portfolio, Low

Volatility All Market Income Portfolio, Sustainable Income Portfolio, Asia High Yield Portfolio, Sustainable Climate Solutions Portfolio, Climate High Income Portfolio, American Multi-Asset Portfolio and Global ESG Improvers Portfolio swung their NAVs during the reporting period and as of May 31, 2023, none of such Portfolios swung their NAVs.

NOTE C: Taxes

As a Luxembourg *société d'investissement à capital variable* ("SICAV"), the Fund is not subject, under present tax laws, to income, withholding or capital gains taxes in Luxembourg.

The Fund is subject to the Luxembourg *taxe d'abonnement* at the rate of 0.05% per annum calculated and payable quarterly, on the aggregate total net assets on the last day of each calendar quarter. The rate is 0.01% for share classes reserved to institutional investors within the meaning of Article 174 of the Law of 2010. Dividends, interest and capital gains on Portfolio securities issued in certain countries may be subject to withholding or capital gains taxes imposed by such countries.

People's Republic of China (PRC)

Corporate Income Tax ("CIT")

By investing in shares of PRC resident enterprises (including China A-, B- and H-Shares), RMB denominated corporate and government bonds, securities investment funds and warrants listed on the PRC stock exchanges or PRC inter-bank bond markets, a Portfolio may be subject to withholding income tax ("WIT") and other taxes imposed in the PRC.

Lacking specific guidance, it is uncertain whether the RQFII or the relevant investing Portfolios would be considered the taxpayer with respect to the PRC-sourced income derived from the investment in bonds, shares and other securities in the PRC. In the event the RQFII were considered to be the taxpayer, any PRC taxes levied against the RQFII would be reimbursed and ultimately borne by the relevant Portfolios of the Fund.

If the relevant Portfolios are deemed to be the taxpayer, then such Portfolios will be subject to PRC CIT at 25% on its worldwide taxable income if it is considered to be a tax resident enterprise of the PRC. If the Portfolio is considered to be a nontax resident enterprise with an establishment or place of business ("PE") in the PRC, the PRC sourced profits attributable to that PE would be subject to CIT at 25%.

Under the PRC CIT Law effective from 1 January 2008, a foreign enterprise without a PE in the PRC will generally be subject to a WIT at the current rate of 10% on its PRC sourced income, including but not limited to passive income (e.g. dividends, interest, gains arising from transfer of assets, etc.), subject to the application of treaty relief.

The Investment Manager intends to manage and operate the Portfolios in such a manner that the Portfolios and the Fund not be treated as a tax resident enterprise of the PRC or a nontax resident enterprise with a PE in the PRC for CIT purposes, although this cannot be guaranteed. As such, it is expected that the Portfolios should only be subject to WIT at 10% to the extent the Portfolio directly derives PRC sourced income in respect of its investment in bonds, shares and other securities in the PRC.

Equity investments

With the approval from the PRC State Council, the PRC State Administration of Taxation, the PRC Ministry of Finance and the China Securities Regulatory Commission have jointly issued Caishui [2014] 79 ("Circular 79") to clarify the WIT treatment with respect to gains derived by QFIIs and RQFIIs from the disposal of equity investments, including shares in PRC enterprises. According to Circular 79, QFIIs and RQFIIs are temporarily exempt from WIT with respect to gains derived from the disposal of equity investments, including shares in PRC enterprises (e.g. A-Shares and B-Shares), via the QFII or RQFII investment quota, effective from November 17, 2014.

PRC tax disclosure regarding Stock Connect

In addition to investing in A-Shares via the RQFII quota of the RQFII Holder, the Fund may gain exposure to A-Shares through Stock Connect, which has commenced trading as of November 17, 2014.

With the approval from the PRC State Council, the PRC State Administration of Taxation, the PRC Ministry of Finance and the CSRC have jointly issued Caishui [2014] 81 ("Circular 81") to clarify the PRC tax treatment regarding China Connect Securities. Circular 81 is effective on November 17, 2014.

According to Circular 81, the Fund is subject to the following PRC income tax treatment with respect to the Northbound Trading under Stock Connect (*i.e.* trading of certain A-Shares on the SSE):

- Temporarily exempt from PRC WIT with respect to gains derived from the disposal of A-Shares.
- Subject to PRC WIT at 10% with respect to dividends received from A-Shares.
- Subject to PRC SD at 0.1% with respect to the sale of A-Shares (*i.e.* the purchase of A-Shares is not subject to PRC SD).

Investors should note that Stock Connect has limited or no history, and, accordingly, the taxation rules applicable to China Connect Securities traded on Stock Connect are not long established and subject to change in the future. Investors should seek advice from their professional tax advisors with any questions regarding China Connect Securities.

The PRC Ministry of Finance ("MOF") and PRC State Taxation Administration ("STA") have jointly issued Caishui [2018] 108 ("Circular 108") to clarify the 3-year PRC tax exemption treatment of bond interest derived by foreign institutional investors on 22 November 2018. According to Circular 108 and Announcement [2021] No. 34 ("Announcement 34"), foreign institutional investors are temporarily exempt from WIT and PRC Value-Added Tax with respect to bond interest income derived in the domestic bond market for the period from 7 November 2018 to 31 December 2025. Neither Circular 108 nor Announcement 34 mentions the retroactive tax collection on bond interest derived prior to 7 November 2018.

NOTE D: Distributions

The following tables describe the frequency and nature of distributions, if applicable, for Base Currency Share Classes and suffixes as well as the meaning of other suffixes used by the Fund. Note that the distribution policy of a suffix supersedes the distribution policy of the base Share Class listed below.

Base Share Class	Distribution Policy Details	
	Fixed Income Portfolios	All Other Portfolios
A, B, C, E, I, IX, L, N, RX, XX, Z	Declares distributions daily and pays them monthly	Does not make distributions ¹

R <i>Example: AR</i>	Declares and pays distributions annually, based on gross income and may pay out of capital
L <i>Example: IL</i>	Monthly distributions based on net income and will not pay out of capital

Suffix	Additional information
X <i>Example: A2X</i>	Designates share classes no longer offered for new investors and may be used in addition to other suffixes relating to distribution. Note to distinguish the X suffix from base Share Classes (IX, XX, RX) offered for Global Core Equity Portfolio.

¹ All Market Income Portfolio Shares: AEO, ASO, AX, BX and BC pay distributions quarterly based on net income and may pay out of capital.

² Global Real Estate Securities Portfolio: Share Class ID pays distributions annually based on net income.

³ Global Plus Fixed Income Portfolio Shares: 1D, IDE and 1DG pays distributions monthly based on net income and may pay out of capital.

⁴ If the NAV per share of the Share Class falls below USD 1 or AUD 1, the Board may either liquidate the Share Class or merge it with another Share Class that has similar features.

⁵ Europe (Ex UK) Equity Portfolio and Eurozone Equity Portfolio: may declare and pay distributions annually based on net income and may pay out of capital.

⁶ American Growth Portfolio: does not intend to make distributions.

There is no guarantee that distributions will be made. A high distribution yield does not necessarily imply a positive or high return. Gross income means income before the deduction of fees and expenses.

All Shares that declare distributions must do so at least once a year (unless there is nothing to distribute or if making distributions is at the discretion of the Board or the Management Company) and must pay them within one month of declaration. When a dividend is declared, the NAV of the relevant Share Class is reduced by the amount of the dividend.

Distributions are paid only on Shares that were owned as of the record date (the date on which distributions are assigned to Shares). For each Share Class, distributions are paid in the currency of that Share Class including the currency offered Share Class.

Unless otherwise specified above, all distributions indicated may consist of net income, gross income (interest and dividends before fees and expenses), realised and unrealised gains from Portfolio investments and/or capital invested in the Portfolio.

Distributions based on net income typically represent net income (gross income less fees and expenses). These distributions are based on actual investment results, do not target or project any particular rate or amount and may vary from one distribution period to another. Distributions in excess of net income may represent a return of the investor's original investment amount and as such may result in a decrease in the NAV per Share for the relevant Share Class.

Shareholders may request that their distributions be automatically reinvested. Unless reinvested, any distribution from capital may reduce a portfolio's future growth and increase the chances of capital loss. A high distribution yield does not necessarily imply a positive or high return.

No interest is paid on unclaimed dividend payments, and after 5 years these payments will be returned to the Portfolio.

The Board may offer new and different types of dividend-paying Share Classes for a Portfolio in the future.

The Board intends to maintain a stable distribution rate for the following Share Classes:

NOTE F: Soft Commission Arrangements and Transaction Costs

During the year ended May 31, 2023, where permitted under applicable law, the Investment Manager and any Affiliated Sub-Investment Manager, if applicable, received and entered into soft-dollar commissions/arrangements with brokers relating to Portfolios of the Fund that invest in equity securities, in respect of which certain goods and services used to support the investment decision making process were received. The soft commission arrangements were entered into on the basis that the execution of transactions on behalf of the Fund will be consistent with best execution standard and the Investment Manager considers many factors regarding best execution standards when entering into soft commission arrangements such as the size and nature of brokerage fees.

Additionally, due to the nature of the investment strategy of certain Portfolios, including where the Investment Manager delegates investment management services to AllianceBernstein Limited and CPH Capital Fondsmæglerselskab A/S, all costs associated with soft commission arrangements may be “unbundled” and borne by the Investment Manager or its sub-delegates, if required by applicable law.

The goods and services received include specialist industry, company and consumer research, portfolio and market analysis and computer software used for the delivery of such services.

The nature of the goods and services received is such that the benefits provided under the arrangement must be those which assist in the provision of investment services to the Fund and may contribute to an improvement in the Fund’s performance.

For the avoidance of doubt, such goods and services do not include travel, accommodations, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employees’ salaries or direct money payments.

Transaction costs are costs incurred in the acquisition, issue or disposal of transferable securities, money market instruments, derivatives or other eligible assets. They can include bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, transaction related taxes and other market charges. They do not include debt premiums or discounts, financing costs or internal administrative or holding costs. Transaction costs are included within the cost of investments in the

Portfolio of Investments as well as in the “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” and “Changes in unrealized gains and (losses) on investments” in the Statement of Operations and Changes in Net Assets. Transaction costs are excluded from the Total Expense Ratio and/or expense reimbursement calculation.

NOTE G: Forward Foreign Currency Contracts

A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract is included in “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” in the Statement of Operations and Changes in Net Assets.

Fluctuations in the value of open forward foreign currency contracts are reflected for financial reporting purposes as a component of “Unrealized appreciation/(depreciation) on forward foreign currency contracts” in the Statement of Assets and Liabilities.

One or more of a Portfolio’s share classes offered in a particular currency (each, an “Offered Currency”) may be hedged to such Offered Currency. Any such share class will constitute a “Currency Hedged Share Class”. Currency Hedged Share Classes aim to provide investors a return more closely

correlated to the Portfolio’s base currency return by reducing the effect of exchange rate fluctuations between the portfolio’s base currency and the relevant Offered Currency, taking into account practical considerations such as transaction costs. The hedging strategy employed is designed to reduce, but may not eliminate, currency exposure between the portfolio’s base currency and the Offered Currency. Risks may arise from the potential inability of counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the hedged currency.

Given that there is no segregation of liabilities between the various share classes within a portfolio, there is a remote risk that, under certain circumstances, currency hedging transactions in relation to a Currency Hedged Share Class could result in liabilities which might affect the NAV of the other share classes of the same portfolio, in which case assets of the other share classes of the portfolio may be used to cover the liabilities incurred by such Currency Hedged Share Class. The securities in the Fund are used as collateral for forward foreign currency contracts including those used for share class hedging.

NOTE H: Repurchase Agreements

Repurchase agreements are collateralized by obligations of the United States, its agencies or instrumentalities thereof. The securities underlying the repurchase agreement will be held by the Depository at all times in an amount at least equal to the repurchase price, including accrued interest.

At May 31, 2023, there were no repurchase agreements.

The total interest expense arising from repurchase agreements during the year ended May 31, 2023 for Global Income Portfolio and Short Duration Income Portfolio was \$163,597 and \$8,710, respectively.

NOTE I: Reverse Repurchase Agreements

Reverse repurchase agreements are identical to repurchase agreements except that rather than buying securities for cash subject to their repurchase by the seller, a Fund sells portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price slightly higher than the sale price. During the reverse repurchase agreement period, the Fund continues to receive principal and interest payments on these securities. Generally, the effect of a reverse repurchase agreement is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while it will be able to keep the interest income associated with those portfolio securities.

Such transactions are advantageous only if the “interest cost” to the Fund of the reverse repurchase transaction, *i.e.*, the difference between the sale and repurchase price for the

NOTE J: Financial Futures Contracts

The Fund may buy or sell financial futures contracts. The Fund bears the market risk that arises from changes in the value of these financial instruments. The Fund’s activities in financial futures contracts are conducted through regulated exchanges, which do not result in counterparty credit risk.

At the time the Fund enters into a financial futures contract, the Fund deposits and maintains with the broker as collateral an initial margin as required by the exchange on which the transaction is effected.

NOTE K: Swap Transactions

A swap is an agreement that obliges two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or otherwise determined notional amount. Realized gains and (losses) and changes in unrealized gains and (losses) on swaps are included in the Statement of Operations and Changes in Net Assets respectively under “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” and as a component of “Change in unrealized gains and (losses) on swaps”.

Centrally Cleared Credit Default Swaps

The buyer in a centrally cleared credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Centrally Cleared Interest Rate Swaps

A centrally cleared interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

Total Return Swaps

A total return swap is a bilateral agreement in which each of the parties agree to exchange the total performance of an underlying asset for a series of interest payments based on a notional amount that serves as a computation basis.

securities, is less than the cost of otherwise obtaining the cash invested in portfolio securities.

The value of reverse repurchase agreements and related collateral outstanding as at May 31, 2023, are as follows:

AB SICAV I –	Value	Collateral Market Value
Global Income Portfolio	\$ 18,354,650	17,811,478
Short Duration Income Portfolio . .	\$ 13,311,500	13,086,578

The total interest expense arising from reverse repurchase agreements during the year ended May 31, 2023 for Global Income Portfolio and Short Duration Income Portfolio was \$592,100 and \$498,920, respectively.

Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as the variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

Credit Default Swaps

The buyer in a credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Interest Rate Swaps

An interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

Inflation Swaps

An inflation swap is a bilateral agreement in which each of the parties agree to exchange fixed rate payments for floating, inflation index linked payments based on a notional amount that serves as a computation basis.

Variance Swaps

Variance swaps are contracts in which two parties agree to exchange cash payments based on the difference between the stated level of variance and the actual variance realized on underlying asset(s) or index(es). Actual “variance” as used here is defined as the sum of the square of the returns on the reference asset(s) or index(es) (which in effect is a measure of its “volatility”) over the length of the contract term. So the parties to a variance swap can be said to exchange actual volatility for a contractually stated rate of volatility.

NOTE L: Loans of Portfolio Securities

A Portfolio may make secured loans of its securities. The risk in lending securities, as with other extensions of credit, consists of possible loss of rights in the collateral should the borrower fail financially. In addition, a Portfolio will be exposed to the risk that the sale of any collateral realized upon the borrower’s default will not yield proceeds sufficient to replace the loaned securities.

In determining whether to lend securities to a particular borrower, the Investment Manager will consider all relevant facts and circumstances, including the creditworthiness of the borrower.

While securities are on loan, the borrower may pay a Portfolio concerned any income from the securities. A Portfolio may invest any cash collateral in money market instruments, thereby earning additional income, or receive an agreed upon amount of income from a borrower who has delivered equivalent collateral.

A Portfolio may have the right to regain record ownership of loaned securities or equivalent securities in order to exercise ownership rights such as voting rights, subscription rights and rights to dividends, interest or distributions. A Portfolio may pay reasonable finders’, administrative and other fees in connection with a loan.

For making secured loans of its securities, a Portfolio receives gross fee income, of which 20% is paid to securities lending agent for providing securities lending services.

For the year ended May 31, 2023, the Portfolios earned a net fee income, which is presented in Statement of Operations and Changes in Net Assets under “Securities lending income, net”.

For the year ended May 31, 2023 Brown Brothers Harriman & Co. (acting as securities lending agent) earned a fee of \$502,528 for providing securities lending services. This is included in the Statement of Operations and Changes in Net Assets under “Securities lending income, net”.

The value of loaned securities and related collateral outstanding as of May 31, 2023, are as below. The collateral relates to securities held on the Portfolios.

NOTE M: Bank Facility

The Fund has access to an overdraft facility (the “Facility”), established with the Depositary, intended to provide for short-term/temporary financing if necessary, subject to certain restrictions, in connection with abnormal redemption activity.

Each Portfolio of the Fund is limited to borrowing 10% of its respective net assets. Borrowings pursuant to the Facility are subject to interest at a mutually agreed upon rate and security by the underlying assets of each Portfolio.

NOTE N: Option Transactions

The Fund may purchase and write (sell) put and call options on securities. The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by the premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written.

Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a

realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option.

Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

The Fund may also invest in options on swap agreements, also called swaptions. A swaption is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based premium.

A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

NOTE P: Co-Management of Assets

For the purpose of effective management, where the investment policies of a Portfolio so permit, the Management Company may choose to co-manage assets of certain Portfolios within or outside the Fund. In such cases, assets of different Portfolios will be managed in common. The assets which are co-managed shall be referred to as a “pool”. These pooling arrangements are an administrative device designed to reduce operational and other expenses and do not change the legal rights and obligations of Shareholders. The pools do not constitute separate entities and are not directly accessible to investors. Each of the co-managed Portfolios shall remain entitled to its specific assets. Where the assets of more than attributable one Portfolio are pooled, the assets to each participating Portfolio will initially be

 AB – Global Value Pool.

determined by reference to its initial allocation of assets to such a pool and will change in the event of additional allocations or withdrawals.

The entitlements of each participating Portfolio to the co-managed assets apply to each and every line of investments of such pool. Additional investments made on behalf of the co-managed Portfolios shall be allotted to such Portfolios in accordance with their respective entitlement, whereas assets sold shall be levied similarly on the assets attributable to each participating Portfolio.

As of May 31, 2023, the Fund co-manages the assets of certain Portfolios within the Fund utilizing the following pool:

NOTE Q: Clearing Reserve Fund

(The following applies to China A Shares Equity Portfolio)

Under the Investment Regulations, the Sub-Custodian is required to deposit a minimum clearing reserve fund as a percentage of the ABL Quota, the percentage amount to be

determined from time to time by the China Securities Depository & Clearing Corporation Limited (“CSDCC”) Shanghai and Shenzhen branches. Currently, the minimum clearing reserve ratio determined by the CSDCC Shanghai and Shenzhen branches are 0.08% and 0.06% respectively.

NOTE R: Incentive Fee

Arya European Alpha Portfolio and Select Absolute Alpha Portfolio

At the end of each partial financial year/ financial year, the Investment Manager received/will receive the following:

Arya European Alpha Portfolio: 20% (15% for Class F Shares) of the amount by which the “Adjusted NAV” (as defined below) of each of the relevant Share Classes exceeds the “High-Water Mark” (as defined below) at the end of the last day of a financial year.

Select Absolute Alpha Portfolio: 20% (10% for Class F Shares and 15% for S13 Shares) of the amount by which the “Adjusted NAV” (as defined below) of each of the relevant Share Classes exceeds the “High-Water Mark” (as defined below) at the end of the last day of a financial year.

Defined terms:

“Adjusted NAV” means the Net Asset Value per share before the reduction for the current financial year’s incentive fee, if any.¹

“High-Water Mark” or “HWM” means, for a Share Class, the NAV per share at the end of the last day of the most recent financial year in which the last incentive fee was paid or, if no incentive fee has been paid, the initial offering price of such Share Class at issue.

“Current Shares Outstanding” means the total Shares in issue, for each Share Class, on each day of the Portfolio’s financial year.

“Subscription Adjustment” means the prior day unrealized incentive fee divided by the prior day shares outstanding multiplied by the gross subscription shares.

“Cumulative Subscription Adjustment” means the cumulative prior days’ Subscription Adjustment over the reference period plus the current day Subscription Adjustment.

“Reference Period” means the period equal to at least 12 months, which begins either at the issue of the Share Class or at the time the last incentive fee has been paid. The reference period will always end at a financial year end, except in the case of a Share Class liquidation.

If there is a redemption in a Share charging Incentive Fees at any point during the year, other than as of the end of a financial year, an incentive fee with respect to such Share will be determined for such partial financial year and paid as of such date regardless of whether the financial year end Adjusted NAV exceeds the High-Water Mark. The High-Water Mark is not reset on those Business Days at which incentive fees crystallise following the redemption of Shares.

In accordance with ESMA guidelines 34/39/992 on performance fees in UCITS and certain types of AIFs, the Board will reset the High-Water Mark if no incentive fee has been paid during a five year performance reference period.

The following share classes (and corresponding H classes) do not charge an Incentive Fee: S and Z.

Select Absolute Alpha Portfolio

As of May 31, 2023 incentive fees payable was \$60. This is included within the line item “Accrued expenses and other liabilities” in the Statement of Assets and Liabilities.

To the Shareholders of AB SICAV I

Opinion

We have audited the financial statements of AB SICAV I (the “Fund”) and of each of its Portfolios, which comprise the statement of assets and liabilities and the portfolio of investments as at May 31, 2023, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its Portfolios as at May 31, 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of July 23, 2016 on the audit profession (the “Law of July 23, 2016”) and with International Standards on Auditing (“ISAs”) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (“CSSF”). Our responsibilities under the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “responsibilities of the *réviseur d’entreprises agréé*” for the audit of the financial statements” section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (“IESBA Code”) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund (the “Board of Directors”) is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the *réviseur d’entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and

for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund’s and each of its Portfolios’ ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or any of its Portfolios or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d’entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors’ use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s or any of its Portfolios’ ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d’entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d’entreprises agréé*. However, future events or conditions may cause the Fund or any of its portfolios (except for the portfolios where a decision of an intention to close exists) to cease to continue as a going concern.

- In respect of the portfolios where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors' use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going concern basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our audit report of the "réviseur d'entreprises agréé".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats of safeguards applied.

Value at Risk

For UCITS the Value at Risk (VaR) can be measured on an absolute or a relative basis. VaR is a widely used risk measure of the risk of loss on a specific portfolio of financial assets. The Investment Manager monitored the total global exposure (market risk) of the equity Portfolios for the year ended May 31,

2023 utilizing the VaR calculated on a relative basis (pursuant to which the VaR of the relevant Portfolio may not exceed twice the VaR of the relevant reference benchmark). During the aforementioned year the low, high and average VaR of the Portfolios measured on a relative basis were as follows:

Portfolio	Benchmark	Low	High	Average
Emerging Markets Multi-Asset Portfolio	MSCI Emerging Markets	53.27%	93.66%	65.76%
All Market Income Portfolio	50% MSCI World Index / 40% Bloomberg Global High Yield (Hedged USD) / 10% Bloomberg Global Treasuries (Hedged USD)	–	86.19%	64.92%

During the aforementioned fiscal year, the low, high and average VaR of the Portfolios measured on an absolute basis were as follows:

Leverage

For the Portfolios listed below, the Investment Manager does not expect to utilize bank borrowing in implementing the Portfolios' investment strategy.

The expected level of leverage is calculated as the sum of the notionals of the financial derivative instruments held by the Portfolio. Pursuant to the CSSF Circular 11/512 dated May 30, 2011, this calculation methodology neither takes into account the fact that a particular financial derivative instrument increases or decreases the Portfolio's investment risks nor permits to net financial derivative instruments with reverse positions.

Shareholders should be aware that (i) a higher level of expected leverage does not automatically imply a higher level of investment risk and (ii) the expected level of leverage disclosed above is mainly generated by the use of derivatives for hedging purposes or for efficient portfolio management. In addition, the actual leverage of the Portfolio may deviate from the below mentioned expected level of leverage:

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes:
 In fossil gas In nuclear energy
 No

There is currently no data to measure whether the Portfolio has invested in fossil gas and/or nuclear energy related activities that comply with the EU taxonomy. It may, as a result of the implementation of its specific investment strategy, hold investments having a marginal exposure to such activities but until there is external vendor data enabling measurement of such exposure, the Portfolio does not commit to any minimum exposure.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflects the "greenness" of investee companies today.

Taxonomy-alignment of investments including sovereign bonds: 4%
 Taxonomy-alignment of investments excluding sovereign bonds: 4%

As of the data of this report, for Taxonomy alignment indicators Capex and Opex, AB does not have access to suitable data to accurately report on those indicators.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB’s Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB’s Do No Significant Harm (“DNSH”) Policy. AB’s DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB’s interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and; was ineligible for inclusion in AB’s Article 9 products.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Yes, for any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB’s proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes,

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs and had selected the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

Work is in progress on the evolution of the PAI framework going forward.

As indicated above, PAI indicators are considered as part of the Portfolio’s Exclusion Policy and are also included in AB’s proprietary methodology to determine that a specific security meets the DNSH principle as well as the Portfolio’s Exclusion Policy.

Additional information on the PAIs is published in the European ESG Template (EET).

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio invested in issuers that AB believed were positively aligned with sustainable investment themes related to climate change. These themes are either derived from the UN SDGs or aligned with the long-term global warming objectives of the Paris Agreement. All issuers either contributed directly to the achievement of at least one UN SDG or satisfied the criteria to be aligned with the Paris Agreement.

● **How did the sustainability indicators perform?**

These themes were either derived from the UN SDGs (Resilience and Innovation) or aligned with the long-term global warming objectives of the Paris Agreement (Transition). Below details the top 3 SDGs by aligned portfolio weight as at 31 May 2023. Please note that issuers may align to more than one SDG but for the calculation below issuers are mapped according to the Primary SDG to which they are aligned and an issuer can only map to one SDG:

- SDG 13 "Climate Action": 17%
- SDG 3 " Good Health and Well-being": 12%
- SDG 9 "Industry, Innovation and Infrastructure": 12%

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

N/A

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB's Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB's Do No Significant Harm ("DNSH") Policy. AB's DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB's interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and; was ineligible for inclusion in AB's Article 9 products.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Yes, for any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB's proprietary methodology to determine that a security meets the DNSH principle.

Yes

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs and had selected the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

Work is in progress on the evolution of the PAI framework going forward.

As indicated above, PAI indicators are considered as part of the Portfolio's Exclusion Policy and are also included in AB's proprietary methodology to determine that a specific security meets the DNSH principle as well as the Portfolio's Exclusion Policy.

Additional information on the PAIs is published in the European ESG Template (EET).

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio invested in issuers that AB believed were positively exposed to environmentally- or socially- oriented sustainable investment themes derived from the UN SDGs, such as Health, Climate, and Empowerment, as well as the theme of Institutions for sovereign debt securities. All issuers contributed directly to the achievement of at least one UN SDG.

● **How did the sustainability indicators perform?**

For the Portfolio, the attainment of the sustainable investment objective was measured through an assessment of alignment with one or more UN SDGs.

Below details the top 3 SDGs by aligned portfolio weight as at the 31 May 2023 (weights reflect reweighted portfolio ex-cash and derivatives). Please note that issuers may align to more than one SDG but for the calculation below issuers are mapped according to the Primary SDG to which they are aligned and an issuer can only map to one SDG.

- SDG 13 “Climate Action”: 29%
- SDG 3 “Good Health and Well-being”: 13%
- SDG 8 “Decent Work and Economic Growth”: 12%

For EU Taxonomy-eligible activities, the proportion of EU Taxonomy alignment is displayed in the following questions.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

N/A

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

AB’s Article 9 products used a combination of a sector-based pre-trade exclusion policy to restrict or limit exposure to securities in sectors that may impact the mandatory PAIs and AB’s Do No Significant Harm (“DNSH”) Policy. AB’s DNSH policy used a threshold-based scoring system to assess issuers on indicators related to these PAIs, which represents AB’s interpretation of significant harm. Any issuer breaching this threshold was deemed to do significant harm to the environment and/or society and; was ineligible for inclusion in AB’s Article 9 products.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

● **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Yes, for any sustainable investment held by the Portfolio, alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was required as part of AB’s proprietary methodology to determine that a security meets the DNSH principle.

How did this financial product consider principal adverse impacts on sustainability factors?

Yes,

The Portfolio complied with the SFDR requirements of considering all mandatory PAIs and had selected the following two additional PAIs:

- Carbon Emission Reduction
- Human Rights Policy

Work is in progress on the evolution of the PAI framework going forward.

As indicated above, PAI indicators are considered as part of the Portfolio’s Exclusion Policy and are also included in AB’s proprietary methodology to determine that a specific security meets the DNSH principle as well as the Portfolio’s Exclusion Policy.

Additional information on the PAIs is published in the European ESG Template (EET).
