The Company offers Accumulating Share Classes, Distributing Share Classes and Discretionary Distributing Share Classes. The Company intends to declare dividends for the Distributing Share Classes and Discretionary Distributing Share Classes.

Approach to declaring dividends

Distributing Share Classes (Share Class Sub-Indicators "X" and "M")

For the Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be equal to the net investment income attributable to such Classes (i.e. 100% of the net investment income).

For the Global Asset Backed Securities Fund, net investment income is considered to include net realised gains and losses from prepaid principal on mortgaged-backed and asset-backed securities for the purpose of the dividend policy.

For the Global Balanced Income Fund, net investment income is considered to include the premium received as a result of the Funds writing listed and OTC options for the purpose of the dividend policy.

For Global Brands Equity Income Fund, net investment income is considered to include income earned through receipt of premiums by taking exposure via one or more swaps to written options on equity securities and /or to indices for the purpose of the dividend policy.

Discretionary Distributing Share Classes (Share Class Sub-Indicators "R" and "RM")

For the Discretionary Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be set at the discretion of the Board of Directors of the Company. The Discretionary Distributing Share Class may pay distributions from capital or may charge all or part of the Fund's fees and expenses to the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of a Shareholder's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease of the Net Asset Value per Share. Where part or all of the fees and expenses of a Share Class are charged to the capital of that Share Class the result will be a reduction of the capital that the Share Class has available for investment in the future and capital may be eroded.

Further details on the Discretionary Distributing Share Classes will be included in the relevant key investor information document of the applicable Fund.

Notes to the financial statements (continued)

As at 31 December 2025

Stable Distributing Share Classes (Share Class Sub-Indicators "Y" and "YM")

For the Stable Distributing Share Classes of the Bond Funds, Equity Funds, Asset Allocation Funds and Alternative Investment Funds, the Company intends to declare dividends which will be set at the discretion of the Board of Directors of the Company. The Stable Distributing Share Class may pay distributions from capital or may charge all or part of the Fund's fees and expenses to the capital of the Fund. Dividends paid out of capital amount to a return or withdrawal of part of a Shareholder's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease of the Net Asset Value per Share. Where part or all of the fees and expenses of a Share Class are charged to the capital of that Share Class the result will be a reduction of the capital that the Share Class has available for investment in the future and capital may be eroded.

Further details on the Stable Distributing Share Classes will be included in the relevant key investor information document of the applicable Fund.

Frequency of Dividends

Equity Funds and Alternative Investment Funds – semi-annual dividend (Share Class Sub-Indicators "X" and "R")

Both the Distributing Share Classes (Share Class Sub-Indicator "X") and Discretionary Distributing Share Classes (Share Class Sub-Indicator "R") aim to declare semi-annual dividends for Equity Funds (other than the Global Brands Equity Income Fund) and Alternative Investment Funds. Such dividends, if any, will be accrued on the last Dealing Day of June and December and declared on the next Dealing Day. The dividend declaration will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of July and January.

Bond Funds, Asset Allocation Funds and the Global Brands Equity Income Fund – quarterly dividend (Share Class Sub-Indicators "X", "Y" and "R")

The Distributing Share Classes (Share Class Sub-Indicator "X"), Discretionary Distributing Share Classes (Share Class Sub-Indicator "R") and Stable Distributing Share Classes (Share Class Sub-Indicator "Y") aim to declare Quarterly dividends for Bond Funds, Asset Allocation Funds and The Global Brands Equity Income Fund.

Such dividends, if any, will be accrued on the last Dealing Day of March, June, September and December and declared on the next Dealing Day. The dividend declaration, where issued, will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of January, April, July and October as applicable.

Monthly Distributing Share Class (Share Class Sub-Indicators "M", "RM" and "YM")

The Distributing Share Classes (Share Class Sub-Indicator "M"), Discretionary Distributing Share Classes (Share Class Sub-Indicator "RM") and Stable Distributing Share Classes (Share Class Sub-Indicator "YM") aim to declare monthly dividends. Such dividends, if any, will be accrued on the last Dealing Day of the month and declared on the next Dealing Day. The dividend declaration for these Distributing Share Classes, Discretionary Distributing Share Classes and Stable Distributing Share Classes, where issued, will be made public at the registered office of the Company and made available at the offices of the Transfer Agent on the first Dealing Day of the following month as applicable.

For the year ended 31 December 2025, the Fund paid dividends as follows:

[1] Formerly known as Global Sustain Fund prior to 28 April 2025.
[2] Fund merged into Emerging Markets Debt Opportunities Fund on 16 May 2025.

6 TAXATION

Under current law and practice, the Company is not liable to any Luxembourg income tax, or any Luxembourg capital gains tax on the realised capital appreciation of the assets of the Company nor are dividends paid by the Company liable to any Luxembourg withholding tax. The Company is, however, liable to annual subscription tax in Luxembourg ("taxe d'abonnement") calculated at the rate of 0.05% of the Net Asset Value of the funds. Furthermore, the Company has sought the benefit of a reduced annual tax rate of 0.01% for Share Classes where the whole of the Share Class is held by institutional investors as provided by Article 174 of the 2010 Law, likely those Shares with Share Class Indicators J, N, S or Z. This tax is payable quarterly on the basis of the net assets of the relevant Funds, calculated at the end of the quarter to which the tax relates. No stamp or other tax will be payable in Luxembourg in connection with the issue of Shares of the Company, except a once and for all tax of EUR 1,239.47 which was paid upon incorporation.

Pursuant to Article 175 of the 2010 Law, subscription tax is not payable on the value of the assets of the Funds represented by investments in other Luxembourg undertakings for collective investment which are themselves subject to the subscription tax.

Subscription tax is calculated by reference to the net assets of the relevant Fund or Share Class at the end of each calendar quarter. Subscription tax will be paid from the taxe d'abonnement Specific Additional Cost described in the prospectus. Any difference between the Specific Additional Costs collected and the tax payable will be paid by or credited to the Management Company.

Dividends, interest and capital gains on securities held by the Company may be subject to non-recoverable withholding tax or capital gains tax in the country of origin.

The below Funds had a provision for Indian Capital Gains Tax net of any refunds as at the year end, the amounts are included within the "Provision for foreign tax" on the Statement of Assets and Liabilities:

8 SOFT COMMISSION ARRANGEMENTS

In compliance with the MiFID II requirements, research costs are borne by the Investment Adviser and paid for separately from transaction costs. Transaction costs are charged on an execution only basis. The only exception to this is the Morgan Stanley Investment Funds – Japanese Equity Fund, Japanese Small Cap Equity Fund (liquidated) and Japanese Small-Mid Cap Equity Fund, where the "unbundling" of research and dealing commissions is not possible due to the local Japanese regulatory requirements not allowing for separate payment of research costs.

9 STATEMENTS OF PORTFOLIO CHANGES

A statement giving the changes in the portfolio of investments for the year ended 31 December 2025 is available to shareholders, free of charge, on request from the Company's registered office, and also from the Paying Agents in countries where the company is registered to sell its Shares.

Please see list of Paying Agents on page 565.

10 OVERDRAFT FACILITY

The Company has access to a short-term credit extension facility with J.P. Morgan SE, Luxembourg Branch, primarily to facilitate the clearance of securities and foreign exchange transactions and in connection with abnormal redemption activity. Should such credit be extended, the Custodian shall be entitled to charge the Funds at rates to be agreed upon from time to time. In addition to any other remedies available, the Custodian shall be entitled to a right of set-off against the property of the Company to satisfy the repayment of, or reimbursement for accrued interest thereon.

There is no cross liability between the funds of the Company therefore the Custodian only has a right of set-off of the pool of assets of the fund that is relative to the overdraft.

11 LIABILITY OF THE COMPANY

The Board of Directors of the Company shall maintain for each Fund a separate pool of assets. As between Shareholders, each pool of assets is invested for the exclusive benefit of the relevant Fund.

The assets of the Company have been segregated on a Fund by Fund basis with third party creditors only having recourse to the assets of the relevant Fund.

12 BROKER ACCOUNTS

All derivative instruments and time deposits, as listed within the Schedule of Investments, on pages 7 to 482, are transacted through third party brokers.

In addition these brokers hold the collateral described in the above mentioned statements as applicable. The Funds are

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Notes to the financial statements (continued)

As at 31 December 2025

exposed to counter-party risk in respect of all amounts including collateral due to them from such brokers.

Payments of income and settlement proceeds are at the risk of the Funds.

The collateral and margin accounts received and paid by the Fund is listed within the Schedule of Investments, on pages 7 to 482.

Margin account transactions with brokers are added or deducted from the Net Asset Value.

13 TRANSACTION COSTS

For the year ended 31 December 2025, the Fund incurred transaction costs namely, commission and taxes relating to purchases or sales of transferable securities, money market instruments, exchange traded derivatives or other eligible assets. They can include the bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, transaction related taxes and other market charges.

15 ANTI-DILUTION MEASURES

As investors enter or exit a Fund, the potential purchase and sale of securities may incur trading costs such as bid/ask spreads, brokerage fees, transaction charges and taxes. These costs are charged to the fund and are borne by all remaining shareholders of the Fund, an effect known as dilution which can impact the remaining shareholders' returns on their investment in the Fund.

In order to protect remaining shareholders from dilution, the Management Company may adjust the NAV of a Fund to reflect these estimated trading costs, a mechanism known as swing pricing.

When net investor activity in a Fund exceeds a certain threshold ("Swing Threshold") on a given Dealing Day, the NAV is adjusted by a factor ("Swing Factor"), upwards in case of net subscriptions and downwards in case of net redemptions. In either case, the swung NAV applies to all transactions, regardless of direction, not the specific circumstances of each individual investor transaction.

For each Fund, the Swing Factor shall not exceed 2% of the NAV in normal market conditions, however, the Management Company may decide to temporarily increase this limit in exceptional circumstances (e.g. stressed or dislocated markets resulting in increased trading costs beyond the 2% cap) to protect Shareholders' interests.

As at 31 December 2025, there was no swing recorded.

All funds were swung during the year with the exception of the following Funds:

American Resilience Fund, Asia Opportunity Fund, Calvert Climate Aligned Fund, Calvert Diversity, Equity and Inclusion Fund, Calvert Global Equity Fund, Calvert US Equity Fund, Global Brands Equity Income Fund, Global Brands Fund, Global Insight Fund, Global Opportunity Fund, Global Permanence Fund, Global Quality Fund, Indian Equity Fund, Japanese Small Cap Equity Fund, Japanese Small-Mid Cap Equity Fund, MENA Equity Fund, NextGen Emerging Markets Fund, Tailwinds Fund, US Advantage Fund, US Growth Fund, US Permanence Fund, Vitality Fund, Calvert Global High Yield Bond Fund, Calvert Sustainable Euro Corporate Bond Fund, Euro Corporate Bond Fund, Euro Corporate Bond – Duration Hedged Fund, European Fixed Income Opportunities Fund, Floating Rate ABS Fund, Global Asset Backed Securities Focused Fund, Global Credit Fund, Global Fixed Income Opportunities Fund, Short Maturity Euro Corporate Bond Fund, US Dollar Short Duration Bond Fund, Global Balanced Defensive Fund, Global Balanced Income Fund, Global Balanced Risk Control Fund of Funds.

16 INDEMNIFICATIONS

The Company has arrangements in place for the indemnification of the members of its Board of Directors, and of its service providers (the "Indemnified Parties") in certain circumstances, which exclude the Indemnified Parties' own negligence, wilful default, or fraud. The Company's service providers include the Management Company, the Investment Advisers, the Sub-Investment Advisers, the Custodian, the Administrator and Paying Agent, the Distributor and the Registrar and Transfer Agent.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Notes to the financial statements (continued)

As at 31 December 2025

17 DIRECTORS' REMUNERATION

The Non-executive Directors of the Company are entitled to remuneration at an annual rate of EUR 80,000 per director. In addition the appointed Chairman receives EUR 10,000 per annum.

The Administration charge is utilised to pay the remuneration of the Non-executive Directors including reasonable out-of-pocket expenses. Non-executive Directors fees remain ultimately subject to approval by the Company's shareholders.

18 EPIDEMICS/PANDEMICS/OUTBREAKS RISK

The performance of the Shares depends on the performance of the investments of the Funds, which could also be adversely affected by the effects of epidemics, pandemics or outbreaks of communicable diseases. In response to intensifying efforts to contain epidemics, pandemics or outbreaks of communicable diseases, governments around the world may take a number of actions, such as prohibiting residents' freedom of movement, encouraging or ordering employees to work remotely from home, and banning public activities and events, among others. Any prolonged disruption of businesses could negatively impact financial conditions. The performance of the Shares could be adversely affected to the extent that any of these epidemics, pandemics or outbreaks harms the economy in general.

19 SUBSEQUENT EVENTS

Effective 20 January 2026, Morgan Stanley Investment Funds – Global Opportunity Horizon 2030 Fund was launched.

Effective 28 April 2026, Morgan Stanley Investment Funds – Strategic Income Fund intends to launch.

Effective 20 April 2026, Morgan Stanley Investment Funds - Short Maturity Euro Corporate Bond Fund intends to liquidate.

Effective 27 May 2026, Morgan Stanley Investment Funds - Quantactive Global Property Fund intends to liquidate.

The Company is monitoring the war in Iran and increased tensions in the Middle East and its impact on the regional economy, as well as on other world economies and the financial markets. The rate of economic growth, elevated geopolitical uncertainty, as well as central bank actions have impacted and could continue to impact capital markets.

Independent Auditor's Report

To the Shareholders of Morgan Stanley Investment Funds 6B, route de Trèves L-2633 Senningerberg Luxembourg

Opinion

We have audited the financial statements of Morgan Stanley Investment Funds (the "Company") and of each of its Funds, which comprise the statement of assets and liabilities and the schedule of investments as at 31 December 2025, and the statement of operations and changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its Funds as at 31 December 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information. The other information comprises the Shareholders' information, Board of Directors' Report, Directors and service providers, Statement of share and net assets statistics, Paying and information agents, Appendix 1: Fund expense ratios, Appendix 2: Portfolio turnover rate, Appendix 3: Sub-Advisers, Appendix 4: Hedged Share Classes, Appendix 5: Performance Summary, Appendix 6: Risk Measurement and Global Exposure, Appendix 7: Remuneration Policy of the Management Company, Appendix 8: Securities Financing Transactions, Appendix 9: Sustainable Finance Disclosure, but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the financial statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's and each of its Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company of any of its Funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Independent Auditor's Report (continued)
As at 31 December 2025

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of Board of Directors of the Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's or any of its Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Company or any of its Funds (except for the Funds where a decision of an intention to close exists) to cease to continue as a going concern.
- In respect of the Funds where a decision or an intention to close exists, we conclude on the appropriateness of the Board of Directors of the Company's use of the non-going concern basis of accounting. We also evaluate the adequacy of the disclosures describing the non-going concern basis of accounting and reasons for its use. Our conclusions are based on the audit evidence obtained up to the date of our audit report of the "réviseur d'entreprises agréé".
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Appendix 1: Fund expense ratios (unaudited)

As at 31 December 2025

The following figures show the total expenses charged to each Class of each Fund open as at 31 December 2025, calculated net of any fee waivers and expressed as a percentage of average net assets for the year. For further information in relation to the expenses charged to the Funds, please refer to pages 500 to 516. For details of changes to the Management Fee during the year, please refer to note 4. Reported expense ratios may differ from the on-going charges figures due to accounting adjustments and/or significant movement in the total net assets for each Share Class within the year.

Appendix 4: Hedged Share Classes (unaudited)

As at 31 December 2025

The Board of Directors of the Company may decide from time to time for some or all of the Funds to issue Currency Hedged Share Classes.

Currency Hedged Share Classes seek to reduce the currency exposure of the Shareholder to currencies other than the currency in which the Currency Hedged Share Class is denominated (the "Hedged Share Class Currency"). The hedging process will vary depending on the type of fund for which the Currency Hedged Share Class is issued and the hedging strategy adopted for all the Currency Hedged Share Classes in that particular Fund, as defined by the prospectus. The types of Currency Hedged Share Class are as follows:

NAV Hedged Share Classes (Share Class Sub–Indicator "H") seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund's Reference Currency. This involves hedging the Fund's Reference Currency to the Hedged Share Class Currency without reference to its Investment Currencies.

Portfolio Hedged Share Classes (Share Class Sub–Indicator "H1") seek to reduce exposure to currency movements between the Hedged Share Class Currency and the Fund's Investment Currencies. This involves hedging the Fund's Investment Currencies back to the Hedged Share Class Currency without reference to its Reference Currency.

Index Hedged Share Classes (Share Class Sub-Indicator "H2")

Index Hedged Share Classes utilise hedging strategies that seek to reduce exposure to currency movements between the Hedged Share Class Currency and the currencies of a Fund's benchmark index ("Index Currencies"). This involves hedging the Fund's Index Currencies back to the Hedged Share Class Currency without reference to the Fund's Reference Currency or its Investment Currency.

NAV Hedged (Non–deliverable Currency) Share Classes (Share Class Sub–Indicator "H3") seek to reduce exposure to currency movements between a non–deliverable Hedged Share Class Currency and the Fund's Reference Currency. This involves hedging the Fund's Reference Currency back to the Hedged Share Class Currency without reference to its Investment Currencies. As the Hedged Share Class Currency is non–deliverable the Share Class will be denominated in a currency other than the Hedged Share Class Currency for the purposes of subscription and redemption.

Partially Hedged Share Classes (Share Class Sub-Indicator "H4")

It seeks to reduce the currency risk of the fund's exposure to securities denominated in hard currencies against the share class currency. For non USD denominated share classes offered in the Parametric Global Defensive Equity Fund only, which targets 50% of the portfolio to be invested in cash equivalents and will be rebalanced if the weighting deviates more than 5%, it seeks to reduce the currency risk between the share class currency and the fund's exposure to the USD denominated cash equivalent portion.

There is no segregation of liabilities between the different share classes of the same Fund. As such, under certain conditions, there is a remote risk that transactions specific to a Hedged Share Class could result in liabilities which may exceed the assets of that Hedged Share Class. In such a scenario, any excess liabilities could adversely impact the Net Asset Value of other share classes within the same Fund, as the assets of other share classes would be exposed to the excess liabilities of the Hedged Share Class. The Management Company has put in place a number of measures and controls as part of its risk management framework in order to prevent such an event, hence the risk of such 'cross contamination' is considered by the Management Company to be extremely low.

The hedging strategies adopted at the year end are as follows:

Fund Name	Hedged Share Class(es)	Hedging Strategy
American Resilience Fund	AH (EUR), BH (EUR), CH (EUR)	NAV Currency Hedge
Asia Opportunity Fund	AH (EUR), BH (EUR), CH (EUR), IH (EUR), IH (GBP), JH (GBP), ZH (EUR), ZH (GBP), ZH3 (BRL)	NAV Currency Hedge and Non-deliverable Currency Hedge

[3] Formerly known as Calvert Sustainable Diversity, Equity and Inclusion Fund prior to 28 April 2025.
[4] Fund commenced operations on 28 February 2025.
[5] Formerly known as Global Sustain Fund prior to 28 April 2025.
[6] Fund commenced operations on 29 August 2025.
[7] Fund closed operations on 19 March 2025.
[8] Fund commenced operations on 27 August 2025.
[9] Fund commenced operations on 15 January 2025.
[10] Formerly known as Calvert Sustainable Global Green Bond Fund prior to 28 April 2025.
[11] Fund closed operations on 30 October 2025.
[12] Fund merged into Emerging Markets Debt Opportunities Fund on 16 May 2025.
[13] Fund closed operations on 26 March 2025.
* Share Class was launched during the year.
** Share Class was reactivated during the year.
*** Share Class was closed during the year.

Past performance is not a guide to the future. The value of an investment and any income from it can go down as well as up. Investors may not get back the original amount invested.

The Parametric Commodity Fund uses a "tracking error" to measure the consistency between the Fund's returns and the returns of the Index. The Fund's benchmark is the Barclays Commodity Index Series. In general, the lower the tracking error, the more consistent the Fund's returns are relative to the Index, and vice-versa. In normal market conditions the anticipated level of tracking error will be within 1.5% (excluding charges) of the Index. Factors which are likely to affect the ability of the Fund to track the performance of the Index might include transaction costs (from Index and Fund turnover and dividend reinvestment), portfolio weightings not being exactly the same as the Index, residual cash holdings, or other related factors such as efficient portfolio management, illiquid components, and any trading restrictions that may be in place.

The realised tracking error at the year end was 0.49%.

The annual tracking difference between the Fund and its index was -1.58%.

Appendix 6:
Risk Measurement and Global Exposure (unaudited)
As at 31 December 2025

As per ESMA/10 –788 "Guidelines on Risk Measurement and the Calculation of Global Exposure and Counterparty Risk for UCITS" on annual report disclosure requirements, the Global Exposure table below outlines the following information:

- Each Fund's approach to measuring global exposure.
- Where the Fund is using relative VaR to measure global exposure the reference portfolio is provided.
- Lowest, average and highest relative VaR or absolute VaR for each Fund measuring global exposure on the VaR approach (note these numbers are actual VaR and relative VaR numbers and do not represent utilisation levels of the regulatory limit).
- Relevant regulatory limit for the Funds global exposure approach for Funds using VaR approach.
- Average leverage is given at the Fund level where the Fund uses the VaR approach to measure global exposure.
- Leverage is calculated using the sum of the notionals approach and the commitment approach.

		Global Exposure

Appendix 6:
Risk Measurement and Global Exposure (unaudited) (continued)
As at 31 December 2025

The Risk Criteria table below indicates the risk model type and inputs for the VaR calculation based on asset class, which is also displayed in the Global Exposure table above:

Asset Class	Calculation Model	Confidence Interval	Holding Period	Length of Data History
Alternatives / Asset Allocation	Parametric	99%	20 days	Weekly observations exponentially weighted with a 26-week (6 months) half-life using 2 years of data, changed in Q3 to exponentially weighted with a 52-week (1 year) half-life using 3 years of data.
Equity	Parametric	99%	20 days	The MSCI Barra model uses daily observations with two different half-lives – 252 for volatilities and 504 for correlations.
Fixed Income	Parametric	99%	20 days	Weekly observations with exponentially weighted with a 52-week half-life using 3 years of data.

Appendix 7: Remuneration Policy of the Management Company (unaudited)

As at 31 December 2025

UCITS 2024 Remuneration Disclosure by Morgan Stanley Fund Management (Ireland) Limited to Morgan Stanley Investment Funds

1. Legal background

This remuneration disclosure has been prepared as required by, and in accordance with, the guidance provided in (1) EU Commission Recommendation on remuneration policies in the financial services sector (2009/384 EC) dated 30 April 2009; (2) EU Directive 2009/65/EC (as amended by Directive 2014/91/EU) ("the **UCITS Directive**"); and (3) the European Securities and Markets Authority "Guidelines on sound remuneration policies under the UCITS Directive", (ESMA/2016/575) dated 14 October 2016 ("the "**Guidelines**") and in particular with section 14.1 (headed "External Disclosure").

The data used in the analysis for this disclosure relates to the financial year ending December 31, 2025 of Morgan Stanley ("the **Firm**") and to the remuneration of staff of Morgan Stanley Fund Management Ireland Limited (FMIL) Limited ("the **UCITS Management Company**") and its senior management team and other members of its staff whose actions have a material impact on the risk profile of the UCITS it manages or on the UCITS Management Company itself ("Identified Staff").

2. The "Identified Staff" for the purposes of this disclosure

The Guidelines define "Identified Staff" as follows:

a) "categories of staff, including senior management, risk takers, control functions, staff responsible for heading the investment management, administration, marketing, and any employee receiving total remuneration that falls into the remuneration bracket of senior management and risk takers, whose professional activities have a material impact on the management company's risk profile or the risk profiles of UCITS that it manages" ("**Group A**"); and

b) "categories of staff of the entity(ies) to which investment management activities have been delegated by the management company and whose professional activities have a material impact on the UCITS's risk profile or the risk profiles of UCITS that the UCITS management company manages ("**Group B**").

References in this disclosure letter to "Identified Staff" or to staff in Group A or Group B, should be construed accordingly.

Eleven Identified Staff were employed or paid by the UCITS Management Company itself. All of the remaining Identified Staff are employees of other Morgan Stanley entities whose professional activities are considered to have a material impact on the risk profile of the UCITS managed by the UCITS Management Company, taking into consideration the internal organisation, nature, scope and complexity of the UCITS Management Company and the UCITS it manages.

The Identified Staff within Group A are staff who have been employed by or seconded to the UCITS Management Company and who are therefore subject to the Guidelines as adopted by the Central Bank of Ireland (CBI).

The Identified Staff in Group B are staff of one of the Morgan Stanley group entities to which the portfolio management of one or more of the UCITS Management Company's Funds has been delegated pursuant to Article 13 of the UCITS Directive. They are not seconded to, or performing a function of, the UCITS Management Company. Accordingly, they are not staff of the UCITS Management Company. However, they are subject to applicable rules on remuneration which are deemed "equally as effective" as those which apply to Group A or appropriate contractual arrangements are in place in line with the Guidelines.

3. Process for determining remuneration policies and principles

The UCITS Management Company, as an affiliate of Morgan Stanley, benefits from the resources available within the Firm and is subject to the remuneration policies and practices that are applied on a Firm-wide level, including the Global Incentive Compensation Discretion Policy and the Global Compensation Policy.

In determining, maintaining and implementing the remuneration policies and practices applicable to the UCITS Management Company, including Identified Staff, the UCITS Management Company is subject to the remuneration policies and practices that apply to all Morgan Stanley International Limited (MSI) Group entities as well as those applying to Morgan Stanley globally and may consult, or receive guidance from, the Firm's control functions and relevant remuneration committees to ensure consistency. Remuneration policy is designed to satisfy four key Firm-wide remuneration objectives: (i) deliver pay for sustainable performance, (ii) align remuneration with shareholders' interests, (iii) attract and retain top talent, and (iv) mitigate excessive risk-taking.

In support of these objectives, annual compensation (i.e. remuneration) for the majority of the Firm's employees, including Identified Staff, is comprised of two key elements: fixed remuneration and variable remuneration (variable incentive remuneration) that is discretionary and based on, among other factors, Firm performance measured against risk-adjusted metrics and individual and business segment performance.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2025

The committee that manages remuneration for the Firm is the Compensation, Management Development and Succession Committee (CMDS Committee) of the Morgan Stanley Board of Directors. As of 31 December 2025, it consisted of four directors, all of whom are independent under the New York Stock Exchange listing standards. Each year, the CMDS Committee's mandate is to review the Firm-wide aggregate variable remuneration pool for variable incentive remuneration and to review and approve the design and structure of Morgan Stanley's Firm-wide deferred incentive remuneration programs, including the form of deferred incentive remuneration awards to be granted, the portion of variable incentive remuneration to be deferred, and the vesting, payment, cancellation and clawback provisions of deferred incentive remuneration awards. The CMDS Committee has adopted the Global Incentive Compensation Discretion Policy, which applies to all Firm entities worldwide and sets forth guidance for managers on the use of discretion and considerations for assessing risk management and outcomes when making variable incentive remuneration decisions, and considerations for assessing risk management and outcomes. It has also approved the Global Compensation Policy which covers compensation philosophy and objectives, framework and governance.

In addition, the Board of the UCITS Management Company has adopted a remuneration policy (the "MSIM Fund Management (Ireland) Limited Remuneration Policy") in compliance with UCITS and the Guidelines as adopted by the CBI.

The policy is also appropriate to the UCITS Management Company's size, internal organization and the nature, scope and complexity of its activities. As well as complying with all of the UCITS management company's legal obligations, the principles of the MSIM Fund Management (Ireland) Limited Remuneration Policy supports the business strategy, objectives, values and long-term interests of its clients, including the Fund. In particular, the MSIM Fund Management (Ireland) Limited Remuneration Policy is designed to ensure that remuneration is consistent with and promotes sound and effective risk management and does not encourage risk taking that is inconsistent with the risk profile of the UCITS managed by the UCITS Management Company.

When determining its own remuneration decisions or influencing the decisions made by other Morgan Stanley entities, the UCITS Management Company takes into account and complies with (1) Irish, UK and EU legislation; (2) the MSIM Fund Management (Ireland) Limited Remuneration Policy and CBI requirements; and (3) the requirements of other remuneration policies set by the Firm. In doing so, it applies consistent principles with the objective of aligning the incentivisation of Identified Staff with business objectives, supporting the delivery of the UCITS Management Company's business plans and corporate values, avoiding conflicts of interest and enabling the right calibre of staff to be recruited. The UCITS Management Company always seeks to ensure, therefore, that the remuneration principles applied by it and the Firm are consistent with and promote sound and effective risk management and do not encourage risk-taking that is inconsistent with the risk profiles, rules or instruments of incorporation of the UCITS managed by the UCITS Management Company.

The following considerations are taken into account in the design, implementation and oversight of the UCITS Management Company's remuneration policies and practices:

- Overall corporate governance principles and structures as well as their interactions with the remuneration system;
- The inputs provided by all control functions (i.e. human resources, risk management, compliance, internal audit, etc.), which will be properly involved in the design of the Remuneration Policy, as further described below; and
- The clear distinction between operating and control functions, the safeguards for preventing conflicts of interests and the internal reporting system.

4. Involvement of control functions in risk management and the remuneration of those control functions

The control functions of the Firm assist the UCITS Management Company in implementing its overall remuneration strategy, having regard to operational, liquidity, market and counterparty risks.

In particular:

a. The Risk Management function helps to ensure that the structure and design of remuneration arrangements does not encourage risk taking that is inconsistent with the risk profile of the UCITS managed by the UCITS Management Company;

b. The Human Resources and Compliance functions analyse how the remuneration structure affects the UCITS Management Company's compliance with legislation, regulations and internal policies;

c. The Internal Audit function periodically carries out an independent audit of the design, implementation and effects of Morgan Stanley's remuneration policies;

d. The EMEA Remuneration Oversight Committee ("EROC") provides formal oversight of EMEA remuneration matters to ensure remuneration practices in EMEA are compliant with relevant UK and EU legislation and follow good practice standards. The EROC is comprised of the Head of EMEA, Latin America and Canada, and Chief Executive Officer of MSI (Chair), the EMEA

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2025

Head of Human Resources (Deputy Chair), the EMEA Chief Operating Officer (COO), and the EMEA Heads of Risk, Regulatory Relations, Finance, Legal and Compliance. Additional attendees include the EMEA Heads of Internal Audit, Employment Legal, EMEA Head of HR Products and EMEA Head of Compensation. The EROC reviews activities of the UCITS Management Company that may lead to individual or collective adjustments of remuneration for its employees; and

e. The MSI Remuneration Committee was established with effect from 1 January 2017, being appointed by the Board of Directors of MSI to assist in discharging its obligations in relation to remuneration matters of MSI and its subsidiaries (the MSI Group) and identified material risk takers. Its remit includes reviewing the remuneration policies and practices of the UCITS Management Company in accordance with the UCITS Directive and the Guidelines.

The Control Functions, including Risk Management, Compliance, and Internal Audit, as well as other support functions such as Finance, Legal and Human resources, are independent from the businesses they monitor. Those engaged in control functions are remunerated in accordance with objectives linked to their functions. Their objectives are independent of the financial performance of the UCITS of the UCITS Management Company. Potential conflicts that may arise in relation to individual remuneration decisions are mitigated by the independent role of Human Resources in the year end remuneration process.

5. Design and structure of remuneration

Remuneration paid to Identified Staff is awarded in accordance with Morgan Stanley principles relating to remuneration. Annual remuneration is comprised of two key elements: fixed remuneration and variable remuneration. Staff eligibility for annual incentive compensation (variable remuneration) is discretionary and subject to a multi-dimensional performance measurement, which considers, as applicable, the performance of the individual, the UCITS Management Company, the business segment, and the Firm.

Identified Staff receive a total annual remuneration package consisting of fixed pay that is comprised of base salary and, in certain circumstances, one or more allowances that are reviewed at least annually; and variable remuneration[1], payable partially as a cash bonus and partially in the form of deferred incentive remuneration awards. The amount of variable incentive remuneration is discretionary and is determined on the basis of, but not limited to, a variety of factors, including performance measured against risk-adjusted metrics and individual performance. It is possible that an individual could be awarded no variable incentive remuneration. Deferred incentive remuneration awards are typically subject to vesting over a multi-year period and are subject to cancellation until the payment date for competition, cause (i.e., any act or omission that constitutes a breach of obligation to the Company, including failure to comply with internal compliance, ethics or risk management standards, and failure or refusal to perform duties satisfactorily, including supervisory and management duties), disclosure of proprietary information, and solicitation of employees or clients. Awards are also subject to malus until the payment date if an employee's act or omission (including with respect to direct supervisory responsibilities) causes a restatement of the Firm's consolidated financial results, constitutes a violation of the Firm's global risk management principles, policies and standards, or causes a loss of revenue associated with a position on which the employee was paid and the employee operated outside of internal control policies. The Firm and/or the UCITS Management Company will also consider the exercise of cancellation and/or clawback (whether or not the Identified Staff remains employed by the UCITS Management Company or relevant Morgan Stanley Entity, as applicable), where it determines in its sole discretion that the relevant business unit, MSIM FMIL or the UCITS in which the Identified Staff is employed (or in relation to which they carry out some or all their duties) suffers a material failure of risk management.

The UCITS Management Company competes for access to talent globally with investment management firms, private equity firms, hedge funds, investment banks, brokerage firms and other companies offering financial services, and the UCITS Management Company's ability to sustain or improve its position in this highly competitive environment depends substantially on its ability to continue to attract and retain the most qualified individuals. In support of the UCITS Management Company's recruitment and retention objectives, the Firm continually monitors competitive pay levels and structures its incentive awards to include, among other things, vesting, deferred payment and cancellation provisions that protect the UCITS Management Company's interests and align the interests of Identified Staff with those of the UCITS' investors.

The Firm's Global Incentive Compensation Discretion Policy requires compensation managers to consider only legitimate, business related factors when exercising discretion in determining variable incentive remuneration, including adherence to Morgan Stanley's core values, conduct, disciplinary actions in the current performance year, risk management and risk outcomes. The policy specifically provides that all managers must consider whether or not an individual has managed risk appropriately and effectively managed and supervised the risk control practices of his or her reports during the performance year. Compensation managers are trained on the Global Incentive Compensation Discretion Policy and are required to certify that they have followed the requirements of that policy and have escalated situations potentially requiring attention.

1 The Firm does not award variable remuneration to a non-executive director for their non-executive director role.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 7: Remuneration Policy of the Management Company (unaudited) (continued)

As at 31 December 2025

Other financial and non-financial performance criteria that may be taken into account in deciding whether to award, and the amount of any variable incentive compensation to award, includes (but is not limited to):

- business and market conditions;
- individual conduct, including but not limited to, adherence to Morgan Stanley's code of conduct and policies;
- contribution to the performance and profitability of the business unit, the UCITS Management Company and the Firm;
- contribution to the strategic objectives of the UCITS Management Company, business unit, the Firm and the team;
- compliance with internal and external rules;
- revenue and profitability of funds managed by a portfolio manager;
- assets managed by a portfolio manager; and
- contribution to client objectives.

6. Quantitative remuneration disclosure[2]: scope of disclosure

We are required to disclose and include in this report certain aggregate remuneration details for (1) the entire staff of the UCITS Management Company[3], (2) the UCITS Management Company's senior management team and other members of its staff whose actions have a material impact on the risk profile of the UCITS the UCITS Management Company manages or on the UCITS Management Company itself[4], and (3) the staff of the delegate of the UCITS Management Company to whom investment management functions (including risk management) have been delegated.

We have included in our disclosure the relevant remuneration information details for all Identified Staff – i.e. for those in Group A and Group B (defined above).

7. Quantitative remuneration disclosure: financial information

On the basis of (1) our own financial records for staff in Group A and (2) the financial information supplied to us (pursuant and subject to their respective sectoral and jurisdictional obligations, both legal and regulatory) by entities to which relevant investment management activities have been delegated (the "**Delegate Companies**"), the requisite remuneration information in respect of the 2025 financial year ending December 31, 2025 was as follows:

a. The total fixed remuneration paid to all staff of the UCITS Management Company's was USD 5,458,075.

b. The total variable remuneration (variable incentive compensation) paid to all staff of the UCITS Management Company was USD 14,411,769.

c. The number of individuals included as UCITS Management Company's staff (including for these purposes Identified Staff) was 312.

d. The total remuneration (fixed and variable combined) paid to senior management and members of staff whose actions have a material impact on the risk profile of the UCITS or on the UCITS Management Company itself was USD 11,974,533.

8. Quantitative remuneration disclosure: rationale for apportionment

In calculating the "remuneration paid" to the staff in a) to d) above, we have, in accordance with the UCITS Directive and the Guidelines, adopted a proportionate approach and included a relevant proportion of staff's total remuneration. The apportionment method takes in to account a number of factors including, but not limited to; number of accounts managed by investment managers, number of accounts of the contracting entity, headcount of the Investment Management business as a proportion of the Institutional Securities Group and Investment Management Group overall headcount.

MSIM Fund Management (Ireland) Limited

January 2026

[2] Identified Staff and their associated remuneration are not allocated to individual UCITS so a breakdown by UCITS Fund does not exist and is not readily available.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of securities lending transactions as at the reporting date. The Company is protected from borrower default by an indemnification provided by the lending agent, J.P Morgan Bank Luxembourg S.A. If a borrower defaults, the lending agent would sell the collateral and use the proceeds to purchase the security that was not returned in the market. If the proceeds from the sale of the collateral are not enough to purchase the security the lending agent is liable for the difference. Therefore it is the lending agent (J.P. Morgan SE) who has the liability.

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2025

Aggregate transaction data

Type and quality of collateral

Non-cash collateral received by each Fund in respect of securities lending transactions as at the reporting date is in the form of government bonds.

All of the Funds' securities collateral have a credit rating of investment grade. Quality of collateral has been interpreted as pertaining to bond instruments, which have been assessed and reported in accordance with whether they are considered investment grade, below investment grade or not-rated. These designations are derived from the credit rating issued to the security or its issuer by at least one globally recognised credit rating agency, such as Standard & Poor's and Moody's. Bond instruments with a credit rating between 'AAA' and 'BBB' are deemed as investment grade. Credit ratings for bonds below these designations are considered below investment grade.

			COLLATERAL MARKET VALUE (in Fund Currency)
Fund Name	**Fund Currency**	**Quality**	**Total**
Asia Equity Fund	USD	Investment grade	1,915,713
Global Endurance Fund	USD	Investment grade	3,037,396
QuantActive Global Infrastructure Fund	USD	Investment grade	44,657,524
QuantActive Global Property Fund	USD	Investment grade	3,785,619

Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point and therefore have a maturity tenor of one day.

Country in which counterparties are established

The country in which counterparties are established is disclosed under the section "Top Ten Counterparties" on page 597.

Settlement and clearing

The Company's securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

Re–use of collateral

Non-cash collateral received by a Fund may not be sold, re-invested or pledged. As the collateral in receipt for securities lending is entirely in the form of securities, there is no reuse of securities lending collateral.

Safekeeping of collateral

Collateral received

J.P Morgan Bank Luxembourg S.A, as securities lending agent of the Funds, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The Custodian J.P. Morgan Bank Luxembourg S.A. is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

Return and cost

The total income earned from securities lending transactions is split between the relevant Funds and the securities lending agent. Details of this split are disclosed in note 3 to the financial statements on pages 545 to 546. Income earned during the year by the Funds from securities lending transactions is disclosed in the statement of operations and changes in net assets on pages 500 to 516.

TOTAL RETURN SWAPS

Global Data

Amount of assets engaged in Total Return Swaps

The following table represents the total value engaged in Total Return Swaps as at year end:

Fund Name	Fund Currency	Unrealised Gain and Loss in Fund Currency (in absolute value)	% of Total Net Asset Value
Global Brands Equity Income Fund	USD	1,078,520	0.27
Emerging Markets Debt Opportunities Fund	USD	1,044,342	0.04
Emerging Markets Local Income Fund	USD	194,067	0.01
Global Macro Fund	USD	169,217	0.04
Systematic Liquid Alpha Fund	USD	7,080,158	7.89

Concentration Data

Ten largest collateral issuers

The following table provides details of the top ten issuers in respect of Total Return Swaps as at the reporting date.

	COLLATERAL VALUE (in Fund Currency)				
	Global Brands Equity Income Fund	Emerging Markets Debt Opportunities Fund	Emerging Markets Local Income Fund	Global Macro Fund	Systematic Liquid Alpha Fund
Issuer	USD	USD	USD	USD	USD
Bank of America N.A.	–	620,923	–	113,690	–
Morgan Stanley & Co. International PLC	970,000	–	–	–	–

Collateral may included those received in respect of total return swaps and OTC forward currency exchange contracts. Please refer to the derivative instruments and collateral received and paid listed within the Schedule of Investments on pages 7 to 482 for further details.

Top ten counterparties

The following table provides details of the top ten counterparties (based on gross volume of outstanding transactions) in respect of the total return swaps as at the reporting date. It also includes all counterparties in respect of the total return swaps at the year-end date.

		Unrealised Gain and Loss in Fund Currency (in absolute value)				
		Global Brands Equity Income Fund	Emerging Markets Debt Opportunities Fund	Emerging Markets Local Income Fund	Global Macro Fund	Systematic Liquid Alpha Fund
Counterparties	Incorporation Country	USD	USD	USD	USD	USD

Appendix 8: Securities Financing Transactions (unaudited) (continued)

As at 31 December 2025

At the time of writing, it is not possible to identify the value of cash collateral specific to the different types of OTC derivatives where multiple types of OTC derivatives are traded with the same counterparty. This is a consequence of counterparties calculating and recording cash collateral based on the aggregated position of all OTC derivatives traded between the counterparty and its client. This calculation methodology is compliant with the International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") in place and is considered standard market practice within the industry. As a result, it is not practically possible to disclose cash collateral values specific to individual positions held by the Funds in total return swaps. Any cash collateral disclosures provided below are in respect of all OTC derivative transactions entered into by the Funds under the ISDA Master Agreement, not just total return swaps.

Maturity tenor of total return swaps transactions

The following table provides an analysis of the maturity tenor in respect of the total return swaps as at the year-end date:

	Unrealised Gain and Loss in Fund Currency (in absolute value)				
	Global Brands Equity Income Fund	Emerging Markets Debt Opportunities Fund	Emerging Markets Local Income Fund	Global Macro Fund	Systematic Liquid Alpha Fund
Maturity	**USD**	**USD**	**USD**	**USD**	**USD**
1 day	–	–	–	–	–
2 to 6 days	–	–	–	–	–
1 to 4 weeks	–	831,372	–	–	–
1 to 3 months	–	212,970	194,067	169,217	964,754
3 to 12 months	1,078,520	–	–	–	6,115,404
more than 1 year	–	–	–	–	–
open maturity	–	–	–	–	–

The above maturity tenor analysis has been based on the contractual maturity date.

Country in which counterparties are established

The country in which counterparties are established is disclosed under the section "Top Ten Counterparties" on page 597.

Settlement and clearing

OTC derivative transactions are entered into by the Funds under an ISDA Master Agreement, a bilateral agreement between the Funds and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

Re–use of collateral

Cash collateral received in respect of OTC derivative transactions was invested from time to time for certain Funds as foreseen with the Company's prospectus. The performance returns from the re-use of cash collateral are not available.

The returns below for Morgan Stanley Liquidity Funds, a UCITS advised by an affiliate of the Investment Adviser, represent a reasonable estimate of returns received from the re-investment of cash collateral for the year ended 31 December 2025:

Morgan Stanley Liquidity Funds (MSLF) Sub–Fund	Net Return
US Dollar Liquidity Fund	4.45%
US Dollar Treasury Liquidity Fund	4.27%
Euro Liquidity Fund	2.35%

Safekeeping of collateral

Collateral received

The following table provides an analysis of the amount held in segregated account in relation to collateral received by the Global Brands Equity Income Fund, Emerging Markets Debt Opportunities Fund, Global Macro Fund and Systematic Liquid Alpha Fund in respect of OTC derivative transactions (including total return swaps, inflation rate swaps, credit default swaps and OTC forward currency exchange contracts), as at the reporting date.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **American Resilience Fund**

Legal entity identifier: **5493007IAYGIHAZG5H09**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.15% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies involved in certain fossil fuel related activities; and (ii) companies in certain energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests (as per SFDR).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
have any tie to fossil fuels (until 29 September 2025)[1]	0.00%	n/a
were involved in certain fossil fuel related activities (from 30 September 2025)[2]	0.00%	0.00%
have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
civilian firearms (>10% revenue)	0.00%	0.00%
weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons (which includes depleted uranium)	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	58.15%

[1] This indicator was adjusted on 29 September 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period.

[2] For further information on the fossil fuel-related activities, please refer to the Fund's Prospectus.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Environmental Characteristics				
Exclusions:				
% of the Fund invested in companies which:				
Have any tie to fossil fuels	0.00%	0.00%	0.00%	0.00%
Have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%	0.00%	0.00%
Social Characteristics				
Exclusions:				
% of the Fund invested in companies which derive revenue from:				
Civilian firearms (>10% revenue)	0.00%	0.00%	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%	0.00%	0.00%
Sustainable Investments:				
% of the Fund invested in companies classified as sustainable investments	10.00%	49.25%	55.20%	50.21%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to an environmental or social objective test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs. This was primarily determined using net alignment scores obtained from third-party data providers.

The UN SDGs include environmental (e.g. SDG 13: Climate Action) and social (e.g. SDG 3: Good Health and Well-Being) objectives. The third-party data providers' net alignment scores indicate whether companies in the providers' coverage universe have a net positive alignment with each of the UN SDGs through their products and services (e.g. a healthcare company's essential medical products may be positively aligned with SDG 3: Good Health and Well-Being) and/or their operational alignment (e.g. a company with a robust carbon reduction plan may be positively aligned with SDG 13: Climate Action). More information on the UN SDGs can be found at: https://www.undp.org/sustainable-development-goals. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

In the first instance, the Investment Adviser classified companies as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria using the third-party data: 1) having a net positive aggregate alignment score across all the SDGs; 2) having sufficient net positive alignment with at least one individual SDG; and 3) not having a material net mis-alignment with any of the SDGs.

In limited cases, and where it was satisfied that it is appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its positive contribution test, contrary to the position indicated by the third-party SDG net alignment scores. The Investment Adviser did this when, for example, it considered the third-party SDG net alignment data to be out of date or incorrect.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm ("DNSH") test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact ("PAI") indicators. This was primarily determined using data obtained from third-party providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

In the first instance, the Fund used data from third-party providers to assess the mandatory PAI indicators. The Fund used reasonable proxies for those PAIs for which the Investment Adviser considered that the data was not widely or reliably available. During the reference period, these were the 'Unadjusted gender pay gap', 'Activities negatively affecting biodiversity sensitive areas' and 'Emissions to water' PAI indicators.

To determine whether significant harm was caused, initial thresholds for each mandatory PAI indicator were generally set in one of the following ways:

- For binary indicators (e.g. 'Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises'), a binary pass/fail test was applied;
- For indicators based on quantifiable numerical data (e.g. 'GHG intensity of investee companies'), the initial threshold was set by the Investment Adviser was based on either:
  - A relative level where the worst performers within the broader investable universe (which was limited to issuers for which data is available, subject to the exceptions noted below), were deemed to fail the initial test; or
  - An absolute level where companies which performed above/below a defined level (as appropriate) were deemed to fail the initial test.

For each mandatory PAI indicator, where data was not available, a company was deemed to fail the initial test and was not classified as a sustainable investment. However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the company, and therefore did not provide data on that PAI indicator, the company was deemed to pass the initial test on the basis that the company's activities were unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

In limited cases, and where was satisfied that it was appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its DNSH test, contrary to the position indicated by the third-party data. The Investment Adviser did this when, for example, it considered the third-party data to be out of date or incorrect.

As part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

As noted above, the assessment was based on information obtained from third-party data providers or, where the Investment Adviser considered it appropriate, internal research, engagement with the company and/or other data sources.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

In addition, the environmental and social characteristics promoted by the Fund incorporated consideration of the following PAIs through binding exclusions:

- PAI indicator 4: exposure to companies active in the fossil fuel sector;
- PAI indicator 14: exposure to controversial weapons;

As noted above, as part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

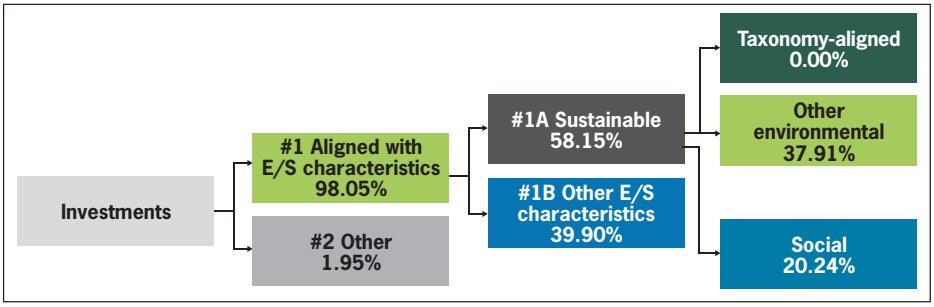
What was the proportion of sustainability-related investments?

98.05% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

58.15% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	25.85%
Information Technology	18.99%
Industrials	13.79%
Health Care	12.29%
Consumer Staples	10.49%
Consumer Discretionary	10.26%
Communication Services	6.39%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes "other" assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum proportion of its assets in companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets that were invested in companies classified as sustainable investments were assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

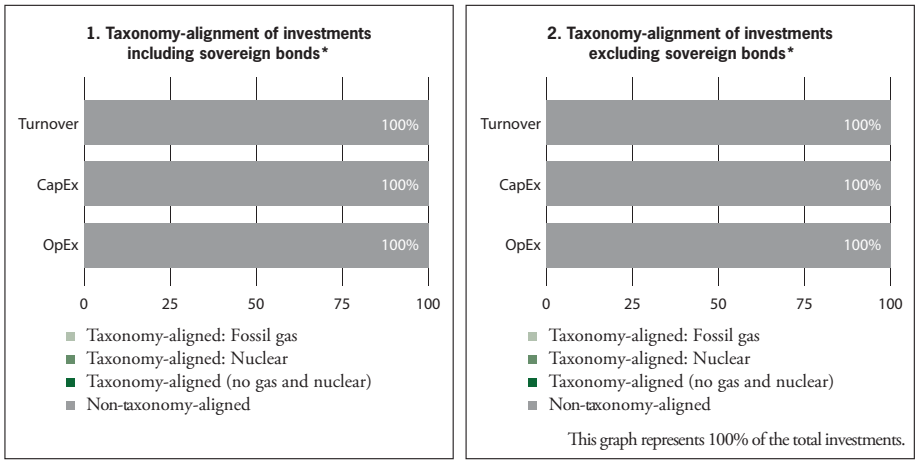
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

37.91% of the Fund's assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

20.24% of the Fund's assets were invested in companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.95% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns on operating capital. The investment process is focused on understanding the long-term sustainability of a company's returns on operating capital and engagement with companies plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies on potentially financially material ESG risks and opportunities.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Asia Equity Fund (previously called Sustainable Asia Equity Fund)**

Legal entity identifier: **3YN85S5L733W17SQIB18**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Throughout the reference period, the Fund promoted the following environmental and social characteristics:

- the fund promotes the environmental characteristic of limiting negative environmental externalities by avoiding investments in certain industries with the potential to cause harm to the environment, such as coal, arctic oil and arctic gas; and
- the fund promotes the social characteristic of limiting negative social externalities by avoiding investments in certain industries with the potential to cause harm to human health and wellbeing, such as alcohol, gambling, tobacco and weapons.

On 28 April 2025, the Fund's investment policy was amended and the Fund was renamed. These amendments included adjustments to the restriction screening policy, and the removal of commitments to make sustainable investments and to maintain a lower carbon footprint than the MSCI AC Asia Ex Japan Index in aggregate at the portfolio level.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Sector-based exclusions:		
% of the Fund's exposure to issuers which derive revenue from:		
thermal coal mining or extraction (10% revenue)	0.00%	0.00%
oil sands (5% revenue)	0.00%	0.00%
Arctic oil (5% revenue)	0.00%	0.00%
Arctic gas (5% revenue)	0.00%	0.00%
gambling (5% revenue)	0.00%	0.00%
adult entertainment (10% revenue)	0.00%	0.00%
tobacco producing, supplying or offering retail services (10% revenue)	0.00%	0.00%
alcohol producing, supplying or offering retail services (10% revenue)	0.00%	0.00%
civilian firearms (>0% revenue until 27 April 2025; >5% revenue from 28 April 2025)	0.00%	0.00%
controversial weapons (0% revenue)	0.00%	0.00%
The indicators below were not monitored after 28 April 2025. There were no exceptions to these indicators while in place during the reference period.		
Thematic alignment to sustainable development		
As stated above, the Investment Adviser aimed to ensure that a minimum of 40% of the Fund's assets were invested in chosen environmental and social sub-themes. The relevant criteria varied by sub-theme and are listed below. The %s of the Fund invested in each of the below sub-themes were:		
Responsible Energy Transition	n/a	n/a
Sustainable Production & Circular Economy	n/a	n/a
Improved Access, Affordability & Sustainable Economic Growth	n/a	n/a
Decent Work & Innovation	n/a	n/a
TOTAL: Thematic alignment to sustainable development	**40.00%**	**n/a**
Exclusions:		
Sector-based exclusions:		
% of the Fund's exposure to issuers which derive revenue from:		
thermal coal-based power generation (10% revenue)	0.00%	n/a
Fossil fuels (10% revenue)	0.00%	n/a
% of the Fund invested in the MSCI AC Asia Ex Japan Index's highest carbon emitters, defined as:	0.00%	
the top 80 emitters by emissions intensity	0.00%	n/a
the top 20 emitters by absolute emissions	0.00%	n/a

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

Throughout the reference period, the Fund considered certain PAI through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.

As at 31 December 2025 (continued)

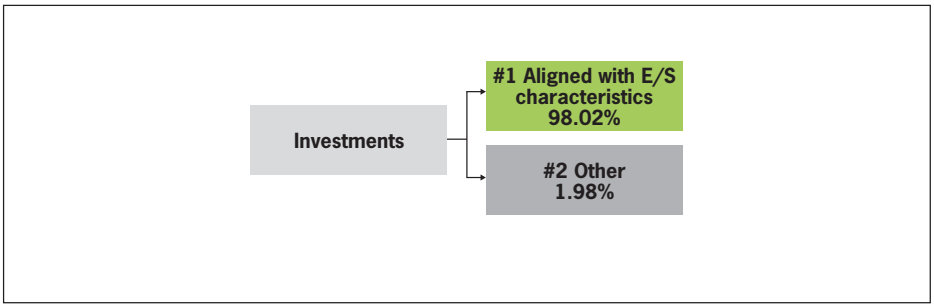
What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	33.36%
Financials	25.90%
Consumer Discretionary	12.87%
Communication Services	10.12%
Industrials	6.21%
Health Care	2.77%
Energy	1.84%
Consumer Staples	1.68%
Real Estate	1.66%
Materials	1.63%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.51%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

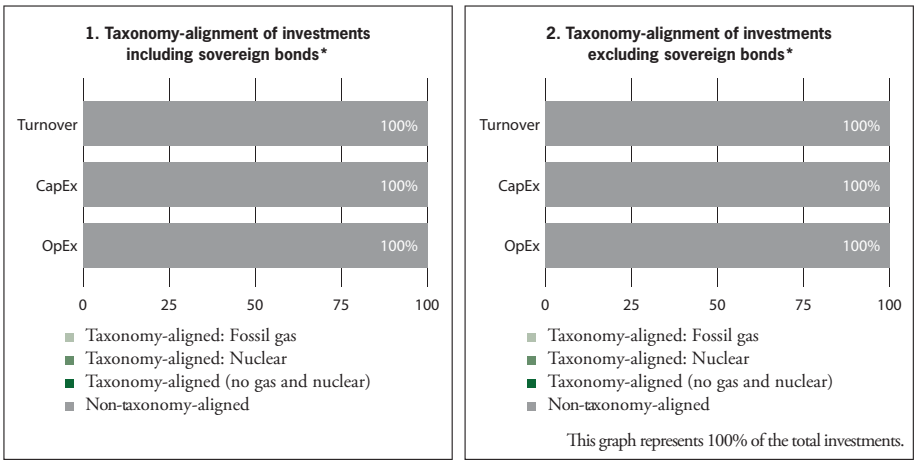
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund promoted environmental and social characteristics but no longer committed to making any sustainable investments. Following 28 April 2025, the Investment Adviser no longer committed to making a minimum portion of sustainable investments with an environmental objective not aligned with the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.98% of the Fund's investments were comprised of (i) hedging instruments and/or (ii) cash held for ancillary liquidity. These investments were not subject to minimum environmental or social safeguards.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

In 2025, the Investment Adviser conducted engagements on topics such as decarbonisation, labour management and fair wages.

The Investment Adviser also monitored investments in the Fund according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Asia Opportunity Fund**

Legal entity identifier: **549300A6F3VVR9QM8333**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
% Fund invested in companies whose GICS sub-industry was (until 31 March 2025)[1]:		
Tobacco	0.00%	n/a
Coal & Consumable Fuels	0.00%	n/a
% Fund invested in companies which derive revenue from:		
tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
manufacture of civilian firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

[1] This indicator was removed from the Fund on 1 April 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period. For further information, please refer to the Fund's Notice to Shareholders.

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions:				
% Fund invested in companies whose GICS sub-industry was:				
Tobacco	0.00%	0.00%	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies which derive revenue from:				
Tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%	0.00%	0.00%
Thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts ("PAI") on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund's adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	9.78%	TAIWAN
TRIP.COM GROUP LTD	Consumer Discretionary	6.97%	CHINA
COUPANG INC	Consumer Discretionary	5.73%	SOUTH KOREA
ICICI BANK LTD	Financials	5.53%	INDIA
BAIDU INC	Communication Services	4.77%	CHINA
TENCENT HOLDINGS LTD	Communication Services	4.46%	CHINA
MEITUAN	Consumer Discretionary	4.32%	CHINA
HDFC BANK LTD	Financials	4.05%	INDIA
ETERNAL LTD	Consumer Discretionary	3.94%	INDIA
KWEICHOW MOUTAI CO LTD	Consumer Staples	3.81%	CHINA

% Assets are calculated based on the Fund's investments at year-end during the reference period.

What was the proportion of sustainability-related investments?

93.46% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and/or derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

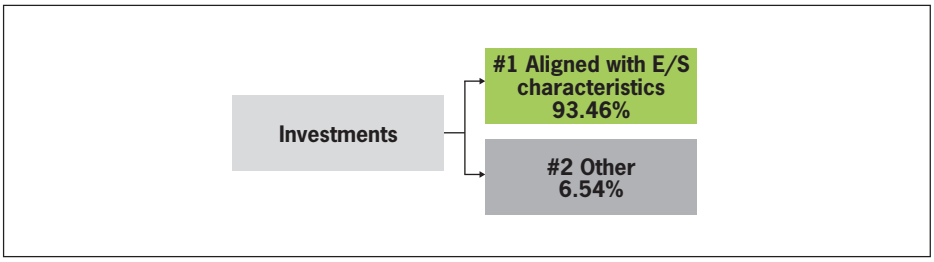
What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product (i.e. cash and/ or derivatives held for efficient portfolio management purposes) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	33.54%
Financials	18.49%
Communication Services	14.15%
Information Technology	13.97%
Industrials	6.17%
Consumer Staples	3.81%
Real Estate	3.34%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

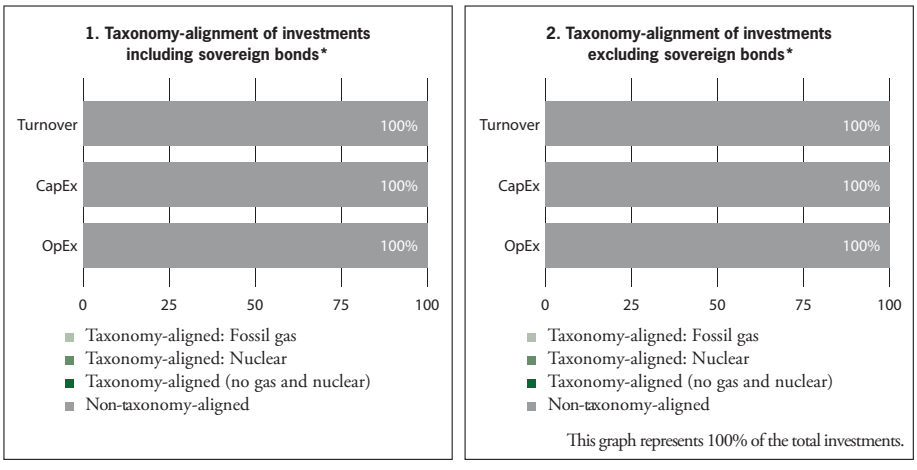
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

6.54% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Climate Aligned Fund**

Legal entity identifier: **549300Q2RHPRD81Y4C87**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective: 99.32%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies located in developed markets that are involved in economic activities that address climate transition and/or are those that the Investment Adviser assess to be contributing to the long-term de-carbonisation objectives of the Paris Agreement.

In addition, the Fund maintained a carbon footprint of at least 50% less than the MSCI World Index. The goal is to reduce the emissions year-on-year to reach net zero at portfolio level by 2050 or earlier.

In light of the above, this Fund has a reduction in carbon emissions as its objective. In pursuing this objective this Fund does not track or otherwise align with the methodology of an EU Climate Transition Benchmark or an EU Paris-Aligned Benchmark. The Investment Adviser, however, ensured that the continued effort of reducing carbon emissions was ensured in view of achieving the objectives of the Paris Agreement through the application of the characteristics described above.

The Fund's carbon reduction objective was aligned with the Paris Agreement and the Fund contributed towards the objectives of the Paris Agreement by maintaining a carbon footprint 50% lower than the benchmark, overweighting climate solution providers and aiming to achieve net zero at portfolio level by 2050 or earlier. These binding features contributed towards the objectives of the Paris Agreement including its long-term temperature goal, climate adaptation and climate mitigation.

Where investments no longer met the Fund's sustainable investment objective, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.32%
Carbon footprint at least 50% lower than that of the MSCI World Index. Measured by tonnes of CO2 per $1million enterprise value (including scope 1 and 2 emissions, and only including scope 3 emissions for certain sectors for which, in the view of the Investment Adviser, scope 3 emissions are likely to constitute a material factor in overall carbon emissions) Therefore, the carbon footprint threshold of 50% of the MSCI World Index, and the actual carbon footprint of the Fund, were:	230.02	180.69
Portfolio holdings which demonstrated environmental and/ or climate leadership or improvement in accordance with the Investment Adviser's proprietary methodology. The percentage of investeee companies which the Investment Adviser aimed to be categorised as meeting its criteria and the percentage of portfolio holdings actually meeting this criteria were:	90.00%	99.32%
Reduction in emissions year-on-year to reach net zero at portfolio level by 2050 or earlier. For this purpose, the Fund considers scope 1 and 2 GHG emissions and scope 3 GHG emissions for all sectors currently required to be considered by the EU CTBs and UC PABs. The decarbonization trajectory per annum at overall portfolio which the Investment Adviser aimed to meet and the actual decarbonization trajectory of the fund were:	-7.00%	43.46%
Exclusions:		
% of investee companies involved with:		
controversial weapons (any activities) (0% revenue)	0.00%	0.00%
civilian firearms manufacturing or production (≥5% reve-nue)	0.00%	0.00%
military or conventional weapons, or weapon systems manufacturing, production or distribution (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
tobacco manufacturing or production (0% revenue)	0.00%	0.00%
tobacco distribution or retail (≥10% revenue) (from 01 April 2025)	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
thermal coal, oil, &/or natural gas-based electricity gener-ation (individually or combined) (≥50% revenue) (from 01 April 2025)	0.00%	0.00%
significant ESG controversies or violations of international norms* without evidence of material remediation and improvement - *UNGC, ILO Fundamental Principles – *OECD Guidelines for Multinational Enterprises, UNGP on Business and Human Rights (from 01 April 2025)	0.00%	0.00%

The year-over-year increase in the fund's overall carbon footprint is primarily attributable to four, higher Scope 3-emitting companies held in the portfolio as of year-end: two of them experienced an increase in their Scope 3 emissions during the year, as a result of higher sales volumes and associated greater use of their downstream products; in addition, the portfolio weights of all four companies increased toward the end of the year as a result of market movements, further amplifying their contribution to the fund's overall carbon footprint. These securities were subsequently sold during the Q1 2026 portfolio rebalancing.

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	98.81%	99.32%	99.39%
Carbon footprint at least 50% lower than that of the MSCI World Index. Measured by tonnes of CO2 per $1million enterprise value (including scope 1 and 2 emissions, and only including scope 3 emissions for certain sectors for which, in the view of the Investment Adviser, scope 3 emissions are likely to constitute a material factor in overall carbon emissions) Therefore, the carbon footprint threshold of 50% of the MSCI World Index, and the actual carbon footprint of the Fund, were:	See relevant year	118.23 (Fund) 196.87 *(MSCI World Index)*	109.68 (Fund) 222.52 *(MSCI World Index)*	125.95 (Fund) 194.05 *(MSCI World Index)*
Portfolio holdings which demonstrated environmental and/ or climate leadership or improvement in accordance with the Investment Adviser's proprietary methodology. The percentage of investee companies which the Investment Adviser aimed to be categorised as meeting its criteria and the percentage of portfolio holdings actually meeting this criteria were:	90.00%	98.58%	99.28%	99.39%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Reduction in emissions year-on-year to reach net zero at portfolio level by 2050 or earlier. For this purpose, the Fund considers scope 1 and 2 GHG emissions and scope 3 GHG emissions for all sectors currently required to be considered by the EU CTBs and UC PABs. The decarbonization trajectory per annum at overall portfolio which the Investment Adviser aimed to meet and the actual decarbonization trajectory of the fund were: Note: As the Fund launched in 2022, the Fund will begin reporting on its year-on-year reduction in emissions from 2023	-7.00%	N/A	-7.23%	14.83%
Exclusions:				
% of investee companies involved with:				
Severe ESG controversies without material remediation and improvement	0.00%	0.00%	0.00%	0.00%
Controversial weapons	0.00%	0.00%	0.00%	0.00%
Civilian firearms	0.00%	0.00%	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%	0.00%	0.00%
Gambling	0.00%	0.00%	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

During 2024, the fund's carbon footprint increased versus 2023, mainly due to a new investment in a company that is involved in the development, design, manufacturing, supply, and installation of cables across energy and telecom applications. Whilst the company's emissions contributed to increasing the overall fund's carbon footprint, the investment team viewed it as a key player in the value chain supporting the energy transition, digitalization and sustainability processes, and estimated that the company derives at least 25% of their revenue from green activities.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager tested all of the fund's investments against the PAI indicators which are mandatory to consider under SFDR. The investment manager did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The investment manager sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the investment manager was supplemented with best available proxy indicators or qualitative analysis.

The investment manager applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In cases where the PAI methodology suggested an investment may be causing significant harm, the investment manager conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the investment manager concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the investment manager believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

Where the investment manager determined that a held issuer was causing significant harm according to one or multiple PAIs, it was removed from the portfolio on a reasonable timeline, taking into consideration the best interests of the shareholders of the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases, using information from relevant ESG data providers, that it viewed as being significant, and on failures to comply with the UN Global Compact (UNGC) Principles, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or the International Labour Organization (ILO) Fundamental Principles.

The Fund excluded companies with evidence of violations of any of the global norms listed above and without evidence of material remediation and improvement. The investment manager maintained its own determination of significant ESG controversies and violations of UNGC Principles, informed by data sourced from third party providers.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question "How were the indicators for adverse impacts on sustainability factors taken into account?".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

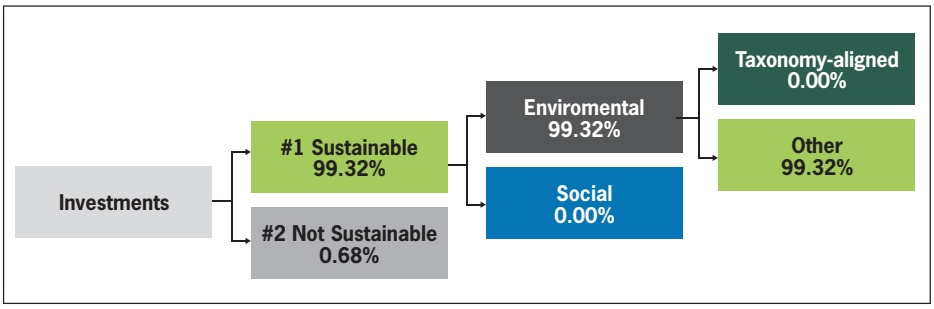
What was the proportion of sustainability-related investments?

99.32% of the Fund comprised sustainable investments with an environmental objective.

The Fund's remaining assets were held in cash and hedging instruments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In addition to the Fund's overarching environmental sustainable investment objective, through the Calvert Principles, the Fund's methodology for evaluating investments as sustainable investments considered both environmental and social factors (as relevant) as set out above. The Investment Adviser then selected sustainable investments for inclusion in the Fund based on their contribution to the environmental sustainable investment objective of the Fund.

In view of this methodology and as this Fund has an environmental objective, for SFDR purposes the Investment Adviser has reported all sustainable investments in this question as environmentally focused sustainable investments for reporting purposes. However, please note that the sustainable investments may have also made a contribution to social factors.

The carbon tilt was applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher carbon footprint than the portfolio level average or target).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	32.19%
Financials	19.56%
Industrials	13.41%
Health Care	12.25%
Consumer Discretionary	6.57%
Utilities	4.63%
Communication Services	4.03%
Consumer Staples	2.69%
Materials	2.27%
Real Estate	1.72%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels.	5.12%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

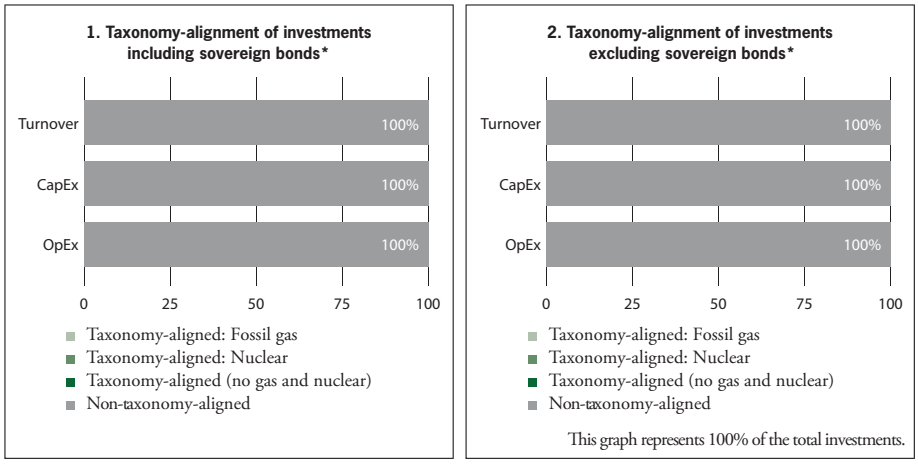
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

99.32% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.68% of the Fund's investments were not aligned with the sustainable investment objective of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. During the reference period, some investments were no longer classified as sustainable investments after they were acquired. The Investment Adviser sold these investments, keeping in mind the best interests of the Fund's shareholders.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Diversity, Equity and Inclusion Fund**

Legal entity identifier: **549300LM8EX1C25T5840**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☐ It made **sustainable investments with an environmental objective** ___**%:**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective: 97.55%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that demonstrated leadership or meaningful improvement in having a diverse workforce and an equal and inclusive work culture.

In addition to this primary objective, the Fund ensured that its investee companies maintained higher levels of board gender and ethnic diversity considered at the portfolio level as compared to the MSCI World Index.

Where investments no longer met the Fund's sustainable investment objective, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.56%
Portfolio holdings which had evidence of DEI leadership or improvement. Measured by % of Fund investee companies categorized as diversity leaders or diversity improvers (and not diversity neutral or diversity laggards). The percentage of investee companies which the Investment Adviser aimed to be diversity leaders/diversity improvers, and the percentage of portfolio holdings actually meeting this criteria were:	90.00%	99.56%
Higher levels of gender diversity than that of the MSCI World Index. Measured by the average number of women at board level. The gender diversity value of the MSCI World Index and that of the Fund were:	3.96	4.49
Higher levels of ethnic diversity than that of the MSCI World Index. Measured by average percentage of underrepresented ethnicities at board level. The ethnic diversity values of the MSCI World Index and that of the fund were:	22.92%	29.34%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager tested all of the fund's investments against the PAI indicators which are mandatory to consider under SFDR. The investment manager did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The investment manager sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the investment manager was supplemented with best available proxy indicators or qualitative analysis.

The investment manager applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In cases where the PAI methodology suggested an investment may be causing significant harm, the investment manager conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the investment manager concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the investment manager believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

Where the investment manager determined that a held issuer was causing significant harm according to one or multiple PAIs, it was removed from the portfolio on a reasonable timeline, taking into consideration the best interests of the shareholders of the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases, using information from relevant ESG data providers, that it viewed as being significant, and on failures to comply with the UN Global Compact (UNGC) Principles, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or the International Labour Organization (ILO) Fundamental Principles.

The Fund excluded companies with evidence of violations of any of the global norms listed above and without evidence of material remediation and improvement. The investment manager maintained its own determination of significant ESG controversies and violations of UNGC Principles, informed by data sourced from third party providers.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the proportion of sustainability-related investments?

97.55% of the Fund's investments were sustainable investments.

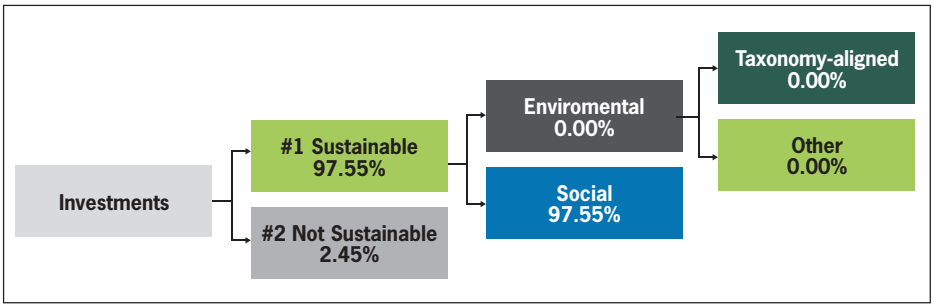
None of the Fund's sustainable investments had an environmental objective during the reference period.

97.55% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In addition to the Fund's overarching social sustainable investment objective, through the Calvert Principles, the Fund's methodology for evaluating investments as sustainable investments considered both environmental and social factors (as relevant) as set out above. The Investment Adviser then selected sustainable investments for inclusion in the Fund based on their contribution to the social sustainable investment objective of the Fund.

In view of this methodology and as this Fund has a social objective, for SFDR purposes the Investment Adviser has reported all sustainable investments in this question and in the question below ("What was the share of socially sustainable investments?") as socially focused sustainable investments for reporting purposes. However, please note that the sustainable investments may have also made a contribution to environmental factors.

The diversity commitments to be better than the MSCI World Index were applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a lower number of women or percentage of underrepresented ethnicities at the board level than the portfolio level average of target).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	40.12%
Financials	19.97%
Health Care	12.18%
Consumer Discretionary	9.46%
Communication Services	5.95%
Industrials	5.18%
Consumer Staples	2.92%
Utilities	1.81%
Real Estate	1.43%
Materials	0.46%
Energy	0.09%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels.	4.77%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of socially sustainable investments?

97.55% of the Fund's investments were sustainable investments with a social objective.

As noted above, this Fund has social objective, so for SFDR purposes the Investment Adviser has reported all sustainable investments as social sustainable investments in this question. However, please note that the sustainable investments may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

2.45% of the Fund's investments were not aligned with the sustainable investment objective of the Fund and have been included in the "other" category. These investments comprised: (i) cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards; and (ii) some securities that no longer qualified as sustainable investments as a result of data updates at the end of Q4 2025, which were sold from the fund in early Q1 2026, and which until then were compliant with the fund's exclusions and with the Calvert Principles.

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. During the reference period, some investments were no longer classified as sustainable investments after they were acquired. The Investment Adviser sold these investments, keeping in mind the best interests of the Fund's shareholders.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Global Equity Fund**

Legal entity identifier: **254900YKPKYL7EFV9Z72**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 85.37% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Through the application of the Calvert Principles for Responsible Investment (the "Calvert Principles"), the Fund promoted environmental sustainability and resource efficiency, equitable societies and respect for human rights, in addition to accountable governance and transparent operations.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Calvert Principles		
% of names held in the Fund that are considered eligible for investment in accordance with the Calvert Principles, measured as a % of portfolio:	90.00%	98.31%
Sustainable Investments		
% of the Fund's investments which qualify as sustainable investments under SFDR	50.00%	85.37%

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Calvert Principles				
% of names held in the Fund that are considered eligible for investment in accordance with the Calvert Principles, measured as a % of portfolio:	90.00%	n/a	97.91%	97.99%
Sustainable Investments				
% of the Fund's investments which qualify as sustainable investments under SFDR	50.00%	n/a	71.66%	69.40%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

In parallel to the Calvert Principles analysis, Calvert performed an assessment of each investment in the Fund to determine whether it qualified as a sustainable investment. This assessment aimed to identify issuers with evidence of making a positive contribution to a specific environmental or social objective, through either of the following four pathways:

1. Companies generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment;

2. Companies benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non-exhaustive, illustrative list):

   a. Direct environmental impact (e.g., carbon emissions, waste emissions, water use);

   b. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon);

   c. Workplace practices (e.g., diversity, inclusion, gender pay equity);

- Companies considered to be addressing global challenges – climate change: Companies which addressed the climate transition, which was evaluated by selecting companies that perform in the top 20-40% of their peer group on material environmental factors, and supported with a qualitative assessment of companies' green solutions, carbon reduction commitments, carbon emission performance trends and/or their progress toward meeting any commitments through their products and services and/ or which demonstrated commitment to the goal of reaching transition;

- Companies considered to be addressing global challenges – diversity, equity and inclusion leaders and improvers: Companies that demonstrated leadership were evaluated based on the gender balance across different levels of the workforce and/or demonstrated leadership in ethnic diversity members relative to the country's demographic in certain applicable countries, as well as leadership in other dimensions of diversity among board members (including age, cultural background, and skill sets), and policies and procedures that adequately support equal opportunity in the hiring process, equal pay and fair promotion. Companies that demonstrated meaningful improvement in diversity practices was evidenced by 1) increased workforce diversity (gender or ethnicity), 2) demonstrated progress after a severe diversity or inclusion controversy, 3) resolved shareholder proposals (for companies based in US and Canada) on diversity and inclusion issues; or 4) identified as an engagement target by Calvert on diversity and inclusion issues.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- testing whether the investment met the thresholds set by Calvert for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How did this financial product consider principal adverse impacts on sustainability factors? below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser tested all of the Fund's investments against the PAI indicators which are mandatory to consider under SFDR. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The Investment Adviser sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the Investment Adviser was supplemented with best available proxy indicators or qualitative analysis.

The Investment Adviser applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm. Thresholds were reviewed annually based on a large investable universe.

In cases where the PAI methodology suggested an investment may be causing significant harm, the Investment Adviser conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the Investment Adviser concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

(i) The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

(ii) The significant harm assessment resulted from a company being classified in a peer group which the Investment Adviser believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

(iii) The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

The Investment Adviser's use of proxy indicators will be kept under review and will be replaced by more specific PAI indicators from third-party data providers, when the Investment Adviser determines that sufficiently reliable data has become available.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For its sustainable investments, Calvert monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. Calvert made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio as long as alignment with the portfolios environmental or social characteristics was maintained.

Through the application of the Calvert Principles to all investments in the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, application of the Calvert Principles considers whether issuers:

- demonstrate poor management of environmental risks or contribute significantly to local or global environmental problems;
- demonstrate a pattern of employing forced, compulsory or child labour;
- exhibit a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibit a pattern and practice of violating the rights and protections of Indigenous Peoples.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

In considering whether an investment held in the Fund should be regarded as a sustainable investment, Calvert determined each issuer's compliance with the themes and values set out in the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles, which are contained in PAI #10 and which is therefore considered for all investments in the Fund.

The Fund will make information available on how it has incorporated the PAIs in its periodic reports to investors.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

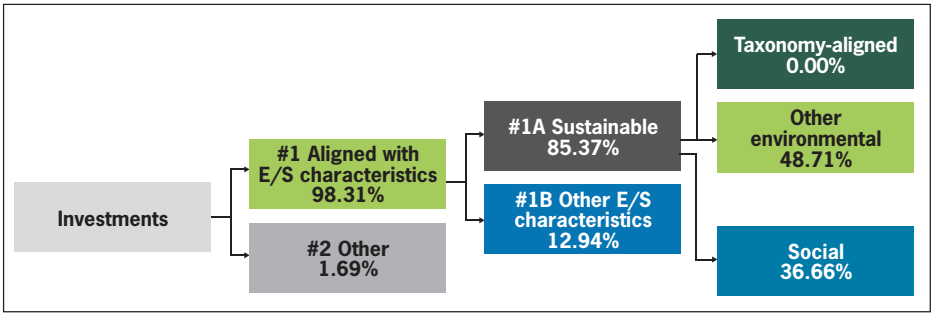
What was the proportion of sustainability-related investments?

98.31% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

85.37% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	21.15%
Financials	17.84%
Consumer Discretionary	13.84%
Industrials	12.33%
Health Care	11.27%
Consumer Staples	9.65%
Communication Services	7.87%
Materials	2.25%
Utilities	2.11%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.51%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

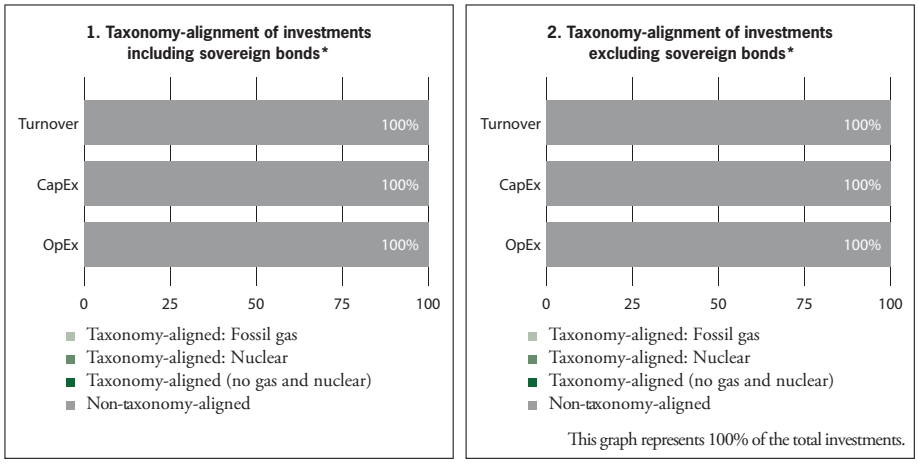
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

48.71% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

36.66% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.69% of the Fund's investments were comprised of cash for ancillary liquidity. These investments are included in the "#2 Other" category and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, Calvert and the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. Calvert and the Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, Calvert and the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, Calvert and the Investment Adviser monitored the investment universe according to the Fund's sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Sustainable Developed Europe Equity Select Fund**

Legal entity identifier: **549300UT4CY7ZR786J23**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective: 63.58%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective: 36.11%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were leaders on, or demonstrated significant improvement in, the management of, environmental and/or social issues such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, and that were determined to be sustainable investments by the Investment Adviser.

The fund invested only in those companies with evidence of making a positive contribution to a specific environmental or social objective, through either of the following two pathways:

1. Generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment; or

2. Benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non exhaustive, illustrative list):

    i. Direct environmental impact (e.g., carbon emissions, waste emissions, water use)

    ii. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon); or

    iii. Workplace practices (e.g., diversity, inclusion, gender pay equity).

All investments in the fund were evaluated under the Calvert Principles for Responsible Investment (the "Calvert Principles"). The Calvert Principles provide a framework to assess investee company activities and behaviours across a number of financially material ESG themes to determine their eligibility for Calvert funds.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI Europe index and higher levels of board gender diversity at the portfolio-level than the MSCI Europe index.

Where investments no longer met the Fund's sustainable investment objective, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.69%
Carbon footprint at least 50% lower than that of the MSCI Europe Index. Measured by weighted average carbon intensity, defined as tonnes of CO2 per $1million revenue (excluding Scope 3 emissions) Therefore, the carbon footprint threshold of 50% of the MSCI Europe Index, and the actual carbon footprint of the Fund were:	41.81	25.95
Higher level of board gender diversity at the portfolio-level than the MSCI Europe Index, measured by average number of women at board level). The gender diversity value of the MSCI Europe Index and that of the Fund were:	5.58	6.13
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.69%
Exclusions:		
% investee companies involved with:		
controversial weapons (any activities) (>0% revenue)	0.00%	0.00%
civilian firearms manufacturing, production (≥5% reve-nue)	0.00%	0.00%
military or conventional weapons, or weapons systems manufacturing, production, distribution (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
tobacco manufacturing, production (>0% revenue)	0.00%	0.00%
tobacco distribution, retail (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
gambling (≥10% revenue)	0.00%	0.00%
thermal and metallurgical coal exploration, mining, extraction, distribution, refining (≥1% revenue) (from 01 April 2025)	0.00%	0.00%
oil fuels exploration, extraction, refining, distribution (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
gaseous fuels exploration, extraction, manufacturing, distribution (≥50% revenue) (from 01 April 2025)	0.00%	0.00%
thermal coal-based electricity generation (≥30% revenue) (from 01 April 2025)	0.00%	0.00%
thermal coal, oil and/or natural gas-based electricity generation (either individually or combined) (≥50% revenue) (from 01 April 2025)	0.00%	0.00%
significant ESG controversies or violations of international norms* without evidence of material remediation and improvement – *UNGC, ILO Fundamental Principles – *OECD Guidelines for Multinational Enterprises, UNGP on Business and Human Rights (from 01 April 2025)	0.00%	0.00%

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.72%	99.36%	99.39%
Carbon footprint at least 50% lower than that of the MSCI Europe Index. Measured by weighted average carbon intensity, defined as tonnes of CO2 per $1million revenue (excluding Scope 3 emissions). Therefore, the carbon footprint threshold of 50% of the MSCI Europe Index, and the actual carbon footprint of the Fund were:	See relevant year	41.04 (Fund) 57.39 *(MSCI Europe Index)*	37.85 (Fund) 50.15 *(MSCI Europe Index)*	30.23 (Fund) 41.04 *(MSCI Europe Index)*
Higher level of board gender diversity at the portfolio-level than the MSCI Europe Index, measured by average number of women at board level). The gender diversity value of the MSCI Europe Index and that of the Fund were:	See relevant year	5.45 (Fund) 5.11 *(MSCI Europe Index)*	5.75 (Fund) 5.29 *(MSCI Europe Index)*	5.97 (Fund) 5.41 *(MSCI Europe Index)*
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.72%	99.24%	99.21%
Exclusions:				
% investee companies involved with:				
Severe ESG controversies without material remediation and improvement	0.00%	0.00%	0.00%	0.00%
Controversial weapons	0.00%	0.00%	0.00%	0.00%
Civilian firearms	0.00%	0.00%	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%	0.00%	0.00%
Gambling	0.00%	0.00%	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager tested all of the fund's investments against the PAI indicators which are mandatory to consider under SFDR. The investment manager did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The investment manager sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the investment manager was supplemented with best available proxy indicators or qualitative analysis.

The investment manager applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In cases where the PAI methodology suggested an investment may be causing significant harm, the investment manager conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the investment manager concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the investment manager believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

Where the investment manager determined that a held issuer was causing significant harm according to one or multiple PAIs, it was removed from the portfolio on a reasonable timeline, taking into consideration the best interests of the shareholders of the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases, using information from relevant ESG data providers, that it viewed as being significant, and on failures to comply with the UN Global Compact (UNGC) Principles, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or the International Labour Organization (ILO) Fundamental Principles.

The Fund excluded companies with evidence of violations of any of the global norms listed above and without evidence of material remediation and improvement. The investment manager maintained its own determination of significant ESG controversies and violations of UNGC Principles, informed by data sourced from third party providers.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question "How were the indicators for adverse impacts on sustainability factors taken into account?".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
NOVARTIS AG	Health Care	3.98%	SWITZERLAND
INTESA SANPAOLO SPA	Financials	3.73%	ITALY
ASML HOLDING NV	Information Technology	3.48%	NETHERLANDS

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the proportion of sustainability-related investments?

99.69% of the Fund's investments were sustainable investments.

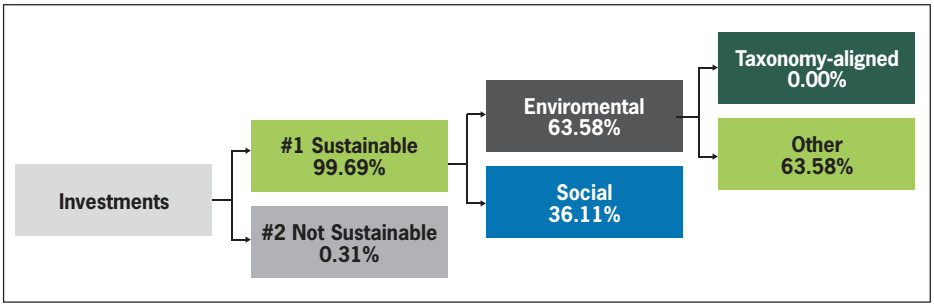
63.58% of the Fund comprised sustainable investments with an environmental objective.

36.11% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assessed the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	29.15%
Industrials	16.31%
Health Care	15.11%
Consumer Discretionary	11.68%
Information Technology	10.17%
Utilities	5.89%
Consumer Staples	5.21%
Communication Services	4.24%
Real Estate	1.08%
Materials	0.86%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels.	19.12%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

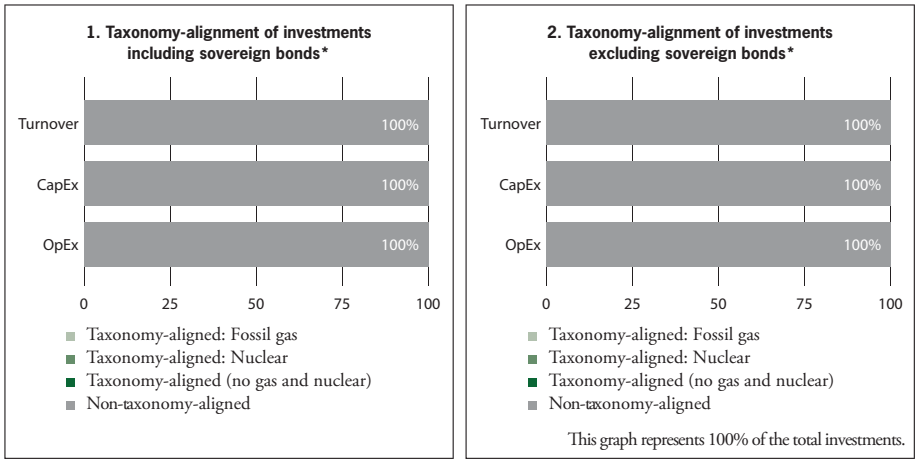
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

63.58% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

36.11% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.31% of the Fund's investments were not aligned with the sustainable investment objective of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. During the reference period, some investments were no longer classified as sustainable investments after they were acquired. The Investment Adviser sold these investments, keeping in mind the best interests of the Fund's shareholders.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Sustainable Developed Markets Equity Select Fund**

Legal entity identifier: **54930037M4G3K40KMR44**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective: 59.72%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective: 36.57%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were leaders on, or demonstrated significant improvement in, the management of, environmental and/or social issues such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, and that were determined to be sustainable investments by the Investment Adviser.

The fund invested only in those companies with evidence of making a positive contribution to a specific environmental or social objective, through either of the following two pathways:

1. Generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment; or

2. Benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non exhaustive, illustrative list):

    i. Direct environmental impact (e.g., carbon emissions, waste emissions, water use)

    ii. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon); or

    iii. Workplace practices (e.g., diversity, inclusion, gender pay equity).

All investments in the fund were evaluated under the Calvert Principles for Responsible Investment (the "Calvert Principles"). The Calvert Principles provide a framework to assess investee company activities and behaviours across a number of financially material ESG themes to determine their eligibility for Calvert funds.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI World index and higher levels of board gender diversity at the portfolio-level than the MSCI World index.

Where investments no longer met the Fund's sustainable investment objective, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.56%
Carbon footprint at least 50% lower than that of the MSCI World Index. Measured by weighted average carbon intensity, defined as tonnes of CO2 per $1million revenue (excluding Scope 3 emissions) Therefore, the carbon footprint threshold of 50% of the MSCI World Index, and the actual carbon footprint of the Fund were:	45.46	37.25
Higher level of board gender diversity at the portfolio-level than the MSCI World Index, measured by weighted average number of women at board level). The gender diversity value of the MSCI World Index and that of the Fund were:	4.12	4.61
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.56%
Exclusions:		
% investee companies involved with:		
controversial weapons (any activities) (>0% revenue)	0.00%	0.00%
civilian firearms manufacturing, production (≥5% revenue)	0.00%	0.00%
military or conventional weapons, or weapons systems manufacturing, production, distribution (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
tobacco manufacturing, production (>0% revenue)	0.00%	0.00%
tobacco distribution, retail (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
gambling (≥10% revenue)	0.00%	0.00%
thermal and metallurgical coal exploration, mining, extraction, distribution, refining (≥1% revenue) (from 01 April 2025)	0.00%	0.00%
oil fuels exploration, extraction, refining, distribution (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
gaseous fuels exploration, extraction, manufacturing, distribution (≥50% revenue) (from 01 April 2025)	0.00%	0.00%
thermal coal-based electricity generation (≥30% revenue) (from 01 April 2025)	0.00%	0.00%
thermal coal, oil and/or natural gas-based electricity generation (either individually or combined) (≥50% revenue) (from 01 April 2025)	0.00%	0.00%
significant ESG controversies or violations of international norms* without evidence of material remediation and improvement – *UNGC, ILO Fundamental Principles – *OECD Guidelines for Multinational Enterprises, UNGP on Business and Human Rights (from 01 April 2025)	0.00%	0.00%

Gambling	0.00%	0.00%	0.00%	0.00%
% investee companies which have experienced breaches of the UNGC and ILO Fundamental Principles (without material remediation and improvement)	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager tested all of the fund's investments against the PAI indicators which are mandatory to consider under SFDR. The investment manager did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The investment manager sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the investment manager was supplemented with best available proxy indicators or qualitative analysis.

The investment manager applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In cases where the PAI methodology suggested an investment may be causing significant harm, the investment manager conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the investment manager concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the investment manager believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

Where the investment manager determined that a held issuer was causing significant harm according to one or multiple PAIs, it was removed from the portfolio on a reasonable timeline, taking into consideration the best interests of the shareholders of the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases, using information from relevant ESG data providers, that it viewed as being significant, and on failures to comply with the UN Global Compact (UNGC) Principles, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or the International Labour Organization (ILO) Fundamental Principles.

The Fund excluded companies with evidence of violations of any of the global norms listed above and without evidence of material remediation and improvement. The investment manager maintained its own determination of significant ESG controversies and violations of UNGC Principles, informed by data sourced from third party providers.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question "How were the indicators for adverse impacts on sustainability factors taken into account?".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
NVIDIA CORP	Information Technology	5.99%	UNITED STATES

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the proportion of sustainability-related investments?

96.29% of the Fund's investments were sustainable investments.

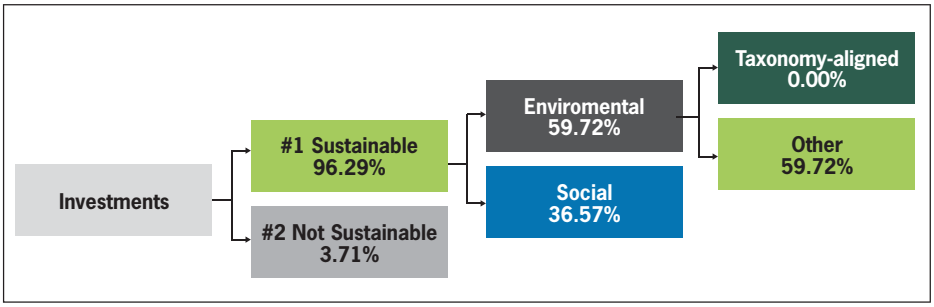
59.72% of the Fund comprised sustainable investments with an environmental objective.

36.57% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assessed the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	31.80%
Financials	21.86%
Health Care	11.10%
Industrials	10.18%
Consumer Discretionary	9.00%
Communication Services	4.99%
Consumer Staples	3.33%
Materials	3.06%
Utilities	2.98%
Real Estate	1.26%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels.	7.79%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

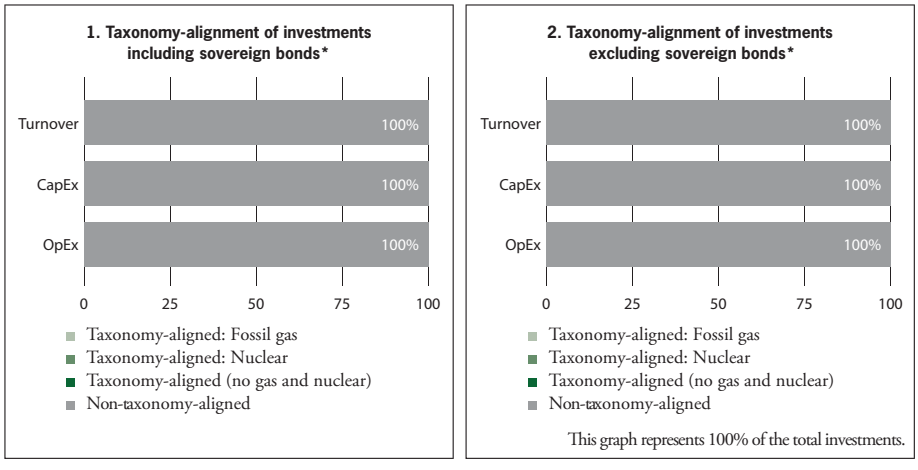
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

59.72% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

36.57% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

3.71% of the Fund's investments were not aligned with the sustainable investment objective of the Fund and have been included in the "other" category. These investments comprised: (i) cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards; and (ii) some securities that no longer qualified as sustainable investments as a result of data updates at the end of Q4 2025, which were sold from the fund in early Q1 2026, and which until then were compliant with the fund's exclusions and with the Calvert Principles.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. During the reference period, some investments were no longer classified as sustainable investments after they were acquired. The Investment Adviser sold these investments, keeping in mind the best interests of the Fund's shareholders.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Sustainable Emerging Markets Equity Select Fund**

Legal entity identifier: **549300VQZN51VK03CV16**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective: 69.63%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective: 27.95%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were leaders on, or demonstrated significant improvement in, the management of, environmental and/or social issues such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, and that were determined to be sustainable investments by the Investment Adviser.

The fund invested only in those companies with evidence of making a positive contribution to a specific environmental or social objective, through either of the following two pathways:

1. Generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment; or

2. Benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non exhaustive, illustrative list):

   i. Direct environmental impact (e.g., carbon emissions, waste emissions, water use)

   ii. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon); or

   iii. Workplace practices (e.g., diversity, inclusion, gender pay equity).

All investments in the fund were evaluated under the Calvert Principles for Responsible Investment (the "Calvert Principles"). The Calvert Principles provide a framework to assess investee company activities and behaviours across a number of financially material ESG themes to determine their eligibility for Calvert funds.

In addition to this primary objective, the Fund maintained a carbon profile lower than the MSCI Emerging Markets index and higher levels of board gender diversity at the portfolio-level than the MSCI Emerging Markets index.

Where investments no longer met the Fund's sustainable investment objective, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.57%
Carbon footprint at least 50% lower than that of the MSCI EM Index. Measured by weighted average carbon intensity, defined as tonnes of CO2 per $1million revenue (excluding Scope 3 emissions) Therefore, the carbon footprint threshold of 50% of the MSCI EM Index, and the actual carbon footprint of the Fund were:	136.71	81.35
Higher level of board gender diversity at the portfolio-level than the MSCI EM Index, measured by weighted average number of women at board level). The average gender diversity value of the MSCI EM Index and that of the Fund were:	2.30	2.68
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.57%
Exclusions:		
% investee companies involved with:		
controversial weapons (any activities) (>0% revenue)	0.00%	0.00%
civilian firearms manufacturing, production (≥5% revenue)	0.00%	0.00%
military or conventional weapons, or weapons systems manufacturing, production, distribution (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
tobacco manufacturing, production (>0% revenue)	0.00%	0.00%
tobacco distribution, retail (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
gambling (≥10% revenue)	0.00%	0.00%
thermal and metallurgical coal exploration, mining, extraction, distribution, refining (≥1% revenue) (from 01 April 2025)	0.00%	0.00%
oil fuels exploration, extraction, refining, distribution (≥10% revenue) (from 01 April 2025)	0.00%	0.00%
gaseous fuels exploration, extraction, manufacturing, distribution (≥50% revenue) (from 01 April 2025)	0.00%	0.00%
thermal coal-based electricity generation (≥30% revenue) (from 01 April 2025)	0.00%	0.00%
thermal coal, oil and/or natural gas-based electricity generation (either individually or combined) (≥50% revenue) (from 01 April 2025)	0.00%	0.00%
significant ESG controversies or violations of international norms* without evidence of material remediation and improvement – *UNGC, ILO Fundamental Principles – *OECD Guidelines for Multinational Enterprises, UNGP on Business and Human Rights (from 01 April 2025)	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager tested all of the fund's investments against the PAI indicators which are mandatory to consider under SFDR. The investment manager did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The investment manager sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the investment manager was supplemented with best available proxy indicators or qualitative analysis.

The investment manager applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In cases where the PAI methodology suggested an investment may be causing significant harm, the investment manager conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the investment manager concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the investment manager believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

Where the investment manager determined that a held issuer was causing significant harm according to one or multiple PAIs, it was removed from the portfolio on a reasonable timeline, taking into consideration the best interests of the shareholders of the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases, using information from relevant ESG data providers, that it viewed as being significant, and on failures to comply with the UN Global Compact (UNGC) Principles, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or the International Labour Organization (ILO) Fundamental Principles.

The Fund excluded companies with evidence of violations of any of the global norms listed above and without evidence of material remediation and improvement. The investment manager maintained its own determination of significant ESG controversies and violations of UNGC Principles, informed by data sourced from third party providers.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question "How were the indicators for adverse impacts on sustainability factors taken into account?".

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
TAIWAN SEMICONDUC-TOR MANUFACTURING CO LT	Information Technology	9.71%	TAIWAN

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the proportion of sustainability-related investments?

97.58% of the Fund's investments were sustainable investments.

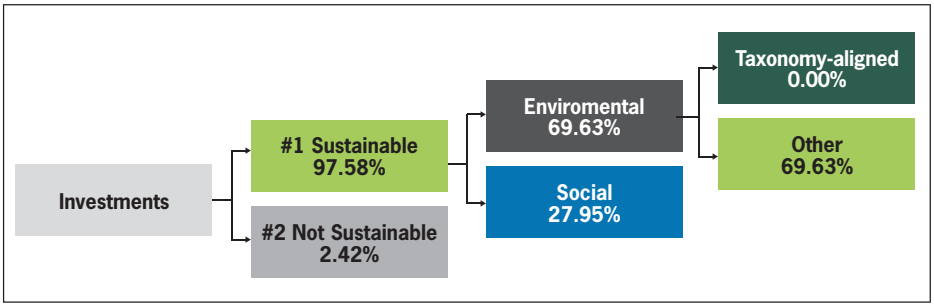
69.63% of the Fund comprised sustainable investments with an environmental objective.

27.95% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assessed the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	30.87%
Financials	27.97%
Consumer Discretionary	11.80%
Consumer Staples	7.15%
Industrials	6.05%
Communication Services	5.49%
Health Care	4.23%
Real Estate	3.11%
Materials	1.79%
Utilities	1.13%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels.	2.94%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

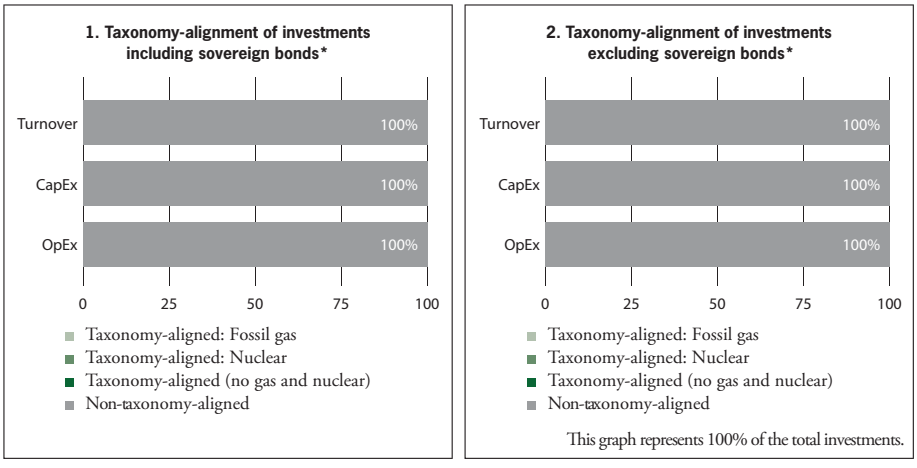
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

69.63% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

27.95% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

2.42% of the Fund's investments were not aligned with the sustainable investment objective of the Fund and have been included in the "other" category. These investments comprised: (i) cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards; and (ii) some securities that no longer qualified as sustainable investments as a result of data updates at the end of Q4 2025, which were sold from the fund in early Q1 2026, and which until then were compliant with the fund's exclusions and with the Calvert Principles.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. During the reference period, some investments were no longer classified as sustainable investments after they were acquired. The Investment Adviser sold these investments, keeping in mind the best interests of the Fund's shareholders.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Sustainable US Equity Select Fund**

Legal entity identifier: **549300LM3S8HT563GM12**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective: 57.01%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective: 38.37%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in companies that were leaders on, or demonstrated significant improvement in, the management of, environmental and/or social issues such as environmental sustainability, diversity, equity and inclusion, respect for human rights and valuing human capital, and that were determined to be sustainable investments by the Investment Adviser.

The fund invested only in those companies with evidence of making a positive contribution to a specific environmental or social objective, through either of the following two pathways:

1. Generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment; or

2. Benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non exhaustive, illustrative list):

    i. Direct environmental impact (e.g., carbon emissions, waste emissions, water use)

    ii. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon); or

    iii. Workplace practices (e.g., diversity, inclusion, gender pay equity).

All investments in the fund were evaluated under the Calvert Principles for Responsible Investment (the "Calvert Principles"). The Calvert Principles provide a framework to assess investee company activities and behaviours across a number of financially material ESG themes to determine their eligibility for Calvert funds.

In addition to this primary objective, the Fund maintained a carbon profile lower than the Russell 1000 index and higher levels of board gender diversity at the portfolio-level than the Russell 1000 index.

Where investments no longer met the Fund's sustainable investment objective, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	99.39%
Carbon footprint at least 50% lower than that of the Russell 1000 Index. Measured by weighted average carbon intensity, defined as tonnes of CO2 per $1million revenue (excluding Scope 3 emissions) Therefore, the carbon footprint threshold of 50% of the Russell 1000 Index, and the actual carbon footprint of the Fund were:	44.04	33.71
Higher level of board gender diversity at the portfolio-level than the Russell 1000 index, measured by weighted average number of women at board level). The average gender diversity value of the Russell 1000 index and that of the Fund were:	3.84	4.32
Portfolio holdings which demonstrated ESG leadership or improvement in accordance with the Investment Adviser's proprietary methodology. Measured by the percentage of Fund investee companies categorised as Leaders.	90.00%	99.39%
Exclusions:		
% investee companies involved with:		
controversial weapons (any activities) (>0% revenue)	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The investment manager tested all of the fund's investments against the PAI indicators which are mandatory to consider under SFDR. The investment manager did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The investment manager sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the investment manager was supplemented with best available proxy indicators or qualitative analysis.

The investment manager applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In cases where the PAI methodology suggested an investment may be causing significant harm, the investment manager conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the investment manager concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the investment manager believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

Where the investment manager determined that a held issuer was causing significant harm according to one or multiple PAIs, it was removed from the portfolio on a reasonable timeline, taking into consideration the best interests of the shareholders of the fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Adviser monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. The Investment Adviser made assessments on controversy cases, using information from relevant ESG data providers, that it viewed as being significant, and on failures to comply with the UN Global Compact (UNGC) Principles, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or the International Labour Organization (ILO) Fundamental Principles.

The Fund excluded companies with evidence of violations of any of the global norms listed above and without evidence of material remediation and improvement. The investment manager maintained its own determination of significant ESG controversies and violations of UNGC Principles, informed by data sourced from third party providers.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
NVIDIA CORP	Information Technology	8.22%	UNITED STATES
MICROSOFT CORP	Information Technology	6.90%	UNITED STATES

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the proportion of sustainability-related investments?

95.38% of the Fund's investments were sustainable investments.

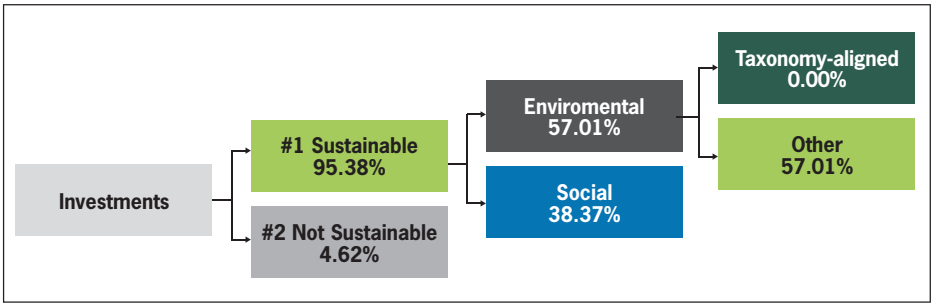
57.01% of the Fund comprised sustainable investments with an environmental objective.

38.37% of the Fund comprised sustainable investments with a social objective.

The Fund's remaining assets were held in cash and hedging instruments, as described below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments assessed the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may have also made a contribution to environmental or social factors respectively.

The carbon tilt and diversity tilt were both applied at a portfolio level (and not at the level of individual holdings, meaning that individual holdings may have had a higher weighted average carbon intensity and lower weighted average number of women at the board level than the portfolio level average or target).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	37.55%
Financials	18.73%
Industrials	12.49%
Health Care	11.26%
Consumer Discretionary	7.12%
Real Estate	3.59%
Communication Services	2.94%
Utilities	2.38%
Materials	2.17%
Consumer Staples	1.16%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.72%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captured issuers which derived any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. These investments were not found to be causing harm to other relevant environmental or social objectives or violating minimum social safeguards, and so they passed the "do no significant harm" test required to be considered a sustainable investment. Further, all investments in the Fund were deemed eligible following the application of the Calvert Principles which considered the financially material negative impacts of investee companies on the environment, society, human rights and other ESG issues through their activities and behaviour.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

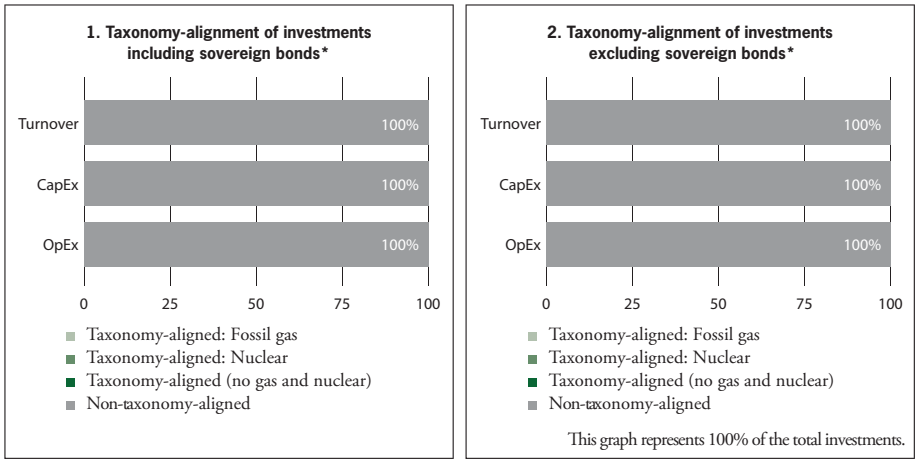
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

57.01% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

38.37% of the Fund's investments were sustainable investments with a social objective.

As noted above some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

4.62% of the Fund's investments were not aligned with the sustainable investment objective of the Fund and have been included in the "other" category. These investments comprised: (i) cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards; and (ii) some securities that no longer qualified as sustainable investments as a result of data updates at the end of Q4 2025, which were sold from the fund in early Q1 2026, and which until then were compliant with the fund's exclusions and with the Calvert Principles.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. The Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

The Investment Adviser also regularly monitored investments in the Fund according to the Fund's sustainable investment methodology. During the reference period, some investments were no longer classified as sustainable investments after they were acquired. The Investment Adviser sold these investments, keeping in mind the best interests of the Fund's shareholders.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert US Equity Fund**

Legal entity identifier: **254900N0V32EZ5RG2W26**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 88.94% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Through the application of the Calvert Principles for Responsible Investment (the "Calvert Principles"), the Fund promoted environmental sustainability and resource efficiency, equitable societies and respect for human rights, in addition to accountable governance and transparent operations.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Calvert Principles		
% of names held in the Fund that are considered eligible for investment in accordance with the Calvert Principles, measured as a % of portfolio:	90.00%	96.65%
Sustainable Investments		
% of the Fund's investments which qualify as sustainable investments under SFDR	50.00%	88.94%

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Calvert Principles				
% of names held in the Fund that are considered eligible for investment in accordance with the Calvert Principles, measured as a % of portfolio:	90.00%	n/a	n/a	97.08%
Sustainable Investments				
% of the Fund's investments which qualify as sustainable investments under SFDR	50.00%	n/a	n/a	87.29%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

In parallel to the Calvert Principles analysis, Calvert performed an assessment of each investment in the Fund to determine whether it qualified as a sustainable investment. This assessment aimed to identify issuers with evidence of making a positive contribution to a specific environmental or social objective, through either of the following four pathways:

1. Companies generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment;

2. Companies benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non-exhaustive, illustrative list):

    a. Direct environmental impact (e.g., carbon emissions, waste emissions, water use);

    b. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon);

    c. Workplace practices (e.g., diversity, inclusion, gender pay equity);

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- testing whether the investment met the thresholds set by Calvert for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How did this financial product consider principal adverse impacts on sustainability factors? below for the details of this process); and
- ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser tested all of the Fund's investments against the PAI indicators which are mandatory to consider under SFDR. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The Investment Adviser sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the Investment Adviser was supplemented with best available proxy indicators or qualitative analysis.

The Investment Adviser applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm. Thresholds were reviewed annually based on a large investable universe.

In cases where the PAI methodology suggested an investment may be causing significant harm, the Investment Adviser conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the Investment Adviser concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

(i) The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

(ii) The significant harm assessment resulted from a company being classified in a peer group which the Investment Adviser believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

(iii) The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

The Investment Adviser's use of proxy indicators will be kept under review and will be replaced by more specific PAI indicators from third-party data providers, when the Investment Adviser determines that sufficiently reliable data has become available.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For its sustainable investments, Calvert monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. Calvert made assessments on controversy cases that it viewed as being severe based on information from relevant ESG data providers, and failures to comply with the UN Global Compact or the ILO fundamental principles, although such incidents did not automatically result in exclusion from the portfolio as long as alignment with the portfolios environmental or social characteristics was maintained.

Through the application of the Calvert Principles to all investments in the Fund, the Fund incorporated consideration of the themes and values set out in the OECD Guidelines for Multi-National Enterprises and the UN Guiding Principles.

In particular, application of the Calvert Principles considers whether issuers:

- demonstrate poor management of environmental risks or contribute significantly to local or global environmental problems;
- demonstrate a pattern of employing forced, compulsory or child labour;
- exhibit a pattern and practice directly or through the company's supply chain of human rights violations or are complicit in human rights violations committed by governments or security forces, including those that are under U.S. or international sanction for human rights abuses; or
- exhibit a pattern and practice of violating the rights and protections of Indigenous Peoples.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

In considering whether an investment held in the Fund should be regarded as a sustainable investment, Calvert determined each issuer's compliance with the themes and values set out in the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles, which are contained in PAI #10 and which is therefore considered for all investments in the Fund.

The Fund will make information available on how it has incorporated the PAIs in its periodic reports to investors.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

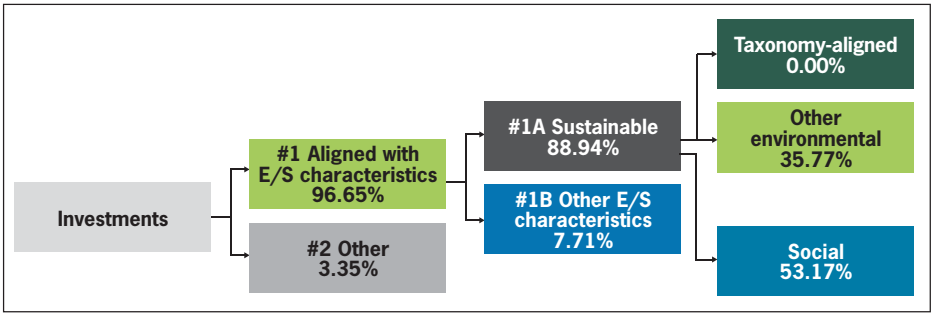
What was the proportion of sustainability-related investments?

96.65% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

88.94% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Health Care	21.75%
Financials	21.72%
Information Technology	16.78%
Industrials	12.52%
Materials	7.42%
Consumer Discretionary	5.82%
Communication Services	4.57%
Consumer Staples	3.12%
Real Estate	2.94%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels.	3.72%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy given that there is a lack of company-reported data available and a limited number of economic activities currently in scope for the EU Taxonomy regulation. As a result, the Investment Adviser has not reported the EU Taxonomy alignment of the Fund's investments, as such alignment is not an accurate reflection of the investment philosophy of the Fund.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

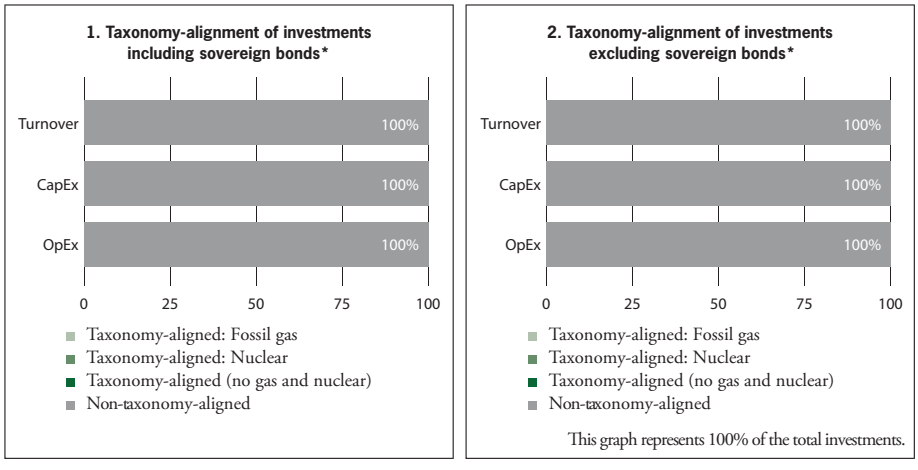
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

35.77% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

53.17% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.35% of the Fund's investments were comprised of cash for ancillary liquidity. These investments are included in the "#2 Other" category and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, through proprietary ESG research, collaboration between its dedicated engagement team and portfolio managers, and coordination with other shareholders, Calvert and the Investment Adviser engaged with its investee companies to better align with the Calvert Principles for Responsible Investment. Calvert and the Investment Adviser engaged on issues related to climate change, diversity, labour and human rights and ESG disclosure throughout the reference period. In line with the Fund's sustainable investment objective, Calvert and the Investment Adviser also supported shareholder resolutions of its investments, related to executive remuneration, social and human rights, and environmental, health and safety issues.

During the reference period, Calvert and the Investment Adviser monitored the investment universe according to the Fund's sustainable investment methodology, to avoid any new investments in companies that did not meet the Calvert Principles or that were involved in activities that should be excluded by the Fund.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Developing Opportunity Fund**

Legal entity identifier: **549300LL0EXEQPRYTK93**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
% Fund invested in companies whose GICS sub-industry was (until 31 March 2025)[1]:		
tobacco	0.00%	n/a
coal & consumable fuels	0.00%	n/a
% Fund invested in companies which derive revenue from:		
tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
manufacture of civilian firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

[1] This indicator was removed from the Fund on 1 April 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period. For further information, please refer to the Fund's Notice to Shareholders.

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts ("PAI") on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund's adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	9.88%	TAIWAN
MERCADOLIBRE INC	Consumer Discretionary	6.66%	UNITED STATES
TRIP.COM GROUP LTD	Consumer Discretionary	5.97%	CHINA
COUPANG INC	Consumer Discretionary	5.50%	SOUTH KOREA
NU HOLDINGS LTD/CAYMAN ISLANDS	Financials	5.32%	BRAZIL
TENCENT HOLDINGS LTD	Communication Services	4.61%	CHINA
ICICI BANK LTD	Financials	4.51%	INDIA
MEITUAN	Consumer Discretionary	4.49%	CHINA
ETERNAL LTD	Consumer Discretionary	4.17%	INDIA

% Assets are calculated based on the Fund's investments at year-end during the reference period.

What was the proportion of sustainability-related investments?

96.24% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and/or derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

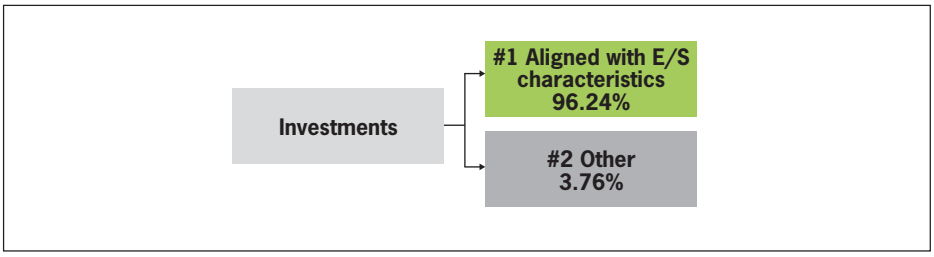
Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product (i.e. cash and/ or derivatives held for efficient portfolio management purposes) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	39.00%
Financials	20.11%
Information Technology	13.49%
Communication Services	12.92%
Industrials	5.20%
Consumer Staples	2.97%
Real Estate	2.56%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

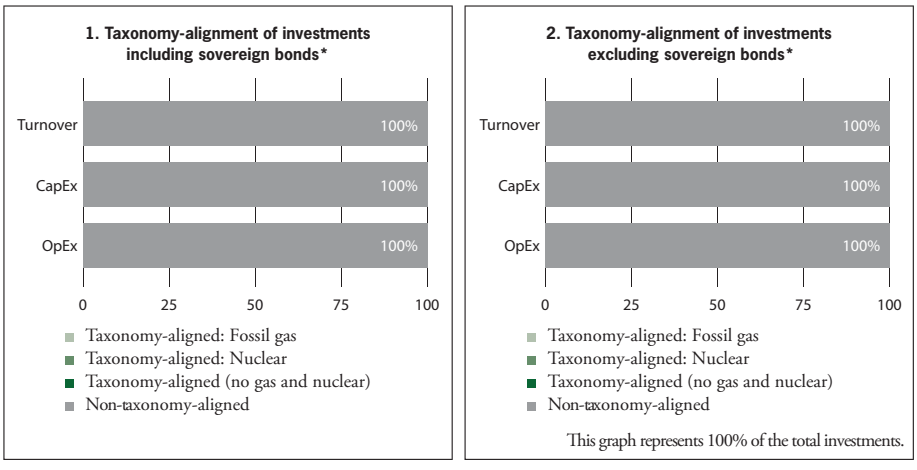
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.76% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, firstly, the Fund promoted the environmental characteristic of contributing towards climate change mitigation by seeking to achieve a lower carbon footprint than the MSCI Emerging Markets (Net) Index in aggregate at the portfolio level.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environment and to human health and wellbeing, such as tobacco and weapons, by applying binding exclusions. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Sector-based exclusions:		
% of the Fund's exposure to issuers involved in the manufacturing or production of which derive revenue from:	0.00%	
tobacco (directly manufacture or >5% revenue)	0.00%	0.00%
adult entertainment (directly produce or own a majority stake (>50%))	0.00%	0.00%
manufacture of civilian firearms	0.00%	0.00%
controversial Weapons (manufacture, or are a majority owner, or majority owned by)	0.00%	0.00%
fossil fuels (>10% revenue)	0.00%	0.00%
coal (>10% revenue from mining and extraction of thermal coal, or >10% revenue from coal-fired power)	0.00%	0.00%
oil sands (>5% revenue from extraction or production)	0.00%	0.00%
Arctic oil and gas (>5% revenue from oil extraction or production in the Arctic region)	0.00%	0.00%
gambling (>5% revenue)	0.00%	0.00%
Lower Carbon Footprint		
Carbon Footprint lower than that of the MSCI Emerging Markets (Net) Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	275.56	96.72
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above and additional issuers based on indicators such as MSCI ESG ratings/scores or consideration of certain GICS sectors. The target % universe reduction, and the actual % universe reduction caused by the exclusions were (until 27 April 2025)[1]:	20.00%	n/a

* Calculated based on the number of stocks in MSCI EM Index.

[1] This indicator was removed from the Fund on 28 April 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Lower Carbon Footprint:				
Carbon Footprint lower than that of the MSCI Emerging Markets (Net) Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	See relevant year	58.15 (Fund) 322.60 *(MSCI Emerging Markets (Net) Index)*	106.28 (Fund) 323.00 *(MSCI Emerging Markets (Net) Index)*	174.45 (Fund) 332.48 *(MSCI Emerging Markets (Net) Index)*
Reference universe reduction:				
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above and additional issuers based on indicators such as MSCI ESG ratings/ scores or consideration of certain GICS sectors. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.30%*	22.75%*	21.98%*

* Calculated based on the number of stocks in MSCI EM Index.

[1] The fossil fuel and Arctic gas exclusions were added on 8 November 2023.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered some of the principal adverse impacts ("PAI") on sustainability factors through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in fossil fuels, thermal coal mining and extraction and thermal coal power generation. The Fund therefore considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LT	Information Technology	11.48%	TAIWAN
LOCALIZA RENT A CAR SA	Industrials	7.04%	BRAZIL
NU HOLDINGS LTD/CAYMAN ISLANDS	Financials	5.64%	BRAZIL
GRUPO FINANCIERO BANORTE SAB DE CV	Financials	4.86%	MEXICO
VARUN BEVERAGES LTD	Consumer Staples	4.52%	INDIA
BHARTI AIRTEL LTD	Communication Services	4.41%	INDIA
SEA LTD	Communication Services	4.29%	SINGAPORE
XP INC	Financials	3.72%	UNITED STATES
RAIA DROGASIL SA	Consumer Staples	3.72%	BRAZIL
MERCADOLIBRE INC	Consumer Discretionary	3.56%	UNITED STATES

What was the proportion of sustainability-related investments?

96.06% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

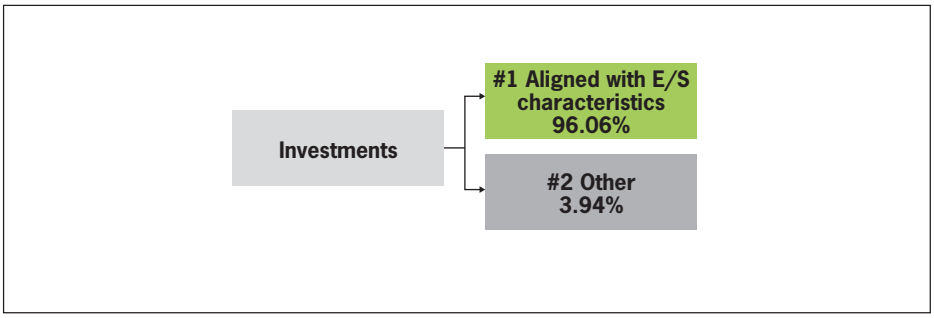
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Emerging Markets (Net) Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

In which economic sectors were the investments made?

Sector	% Assets
Financials	27.71%
Information Technology	14.04%
Communication Services	13.78%
Industrials	12.86%
Consumer Discretionary	9.22%
Consumer Staples	8.23%
Health Care	6.07%
Materials	2.11%
Utilities	1.02%
Real Estate	1.01%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.78%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

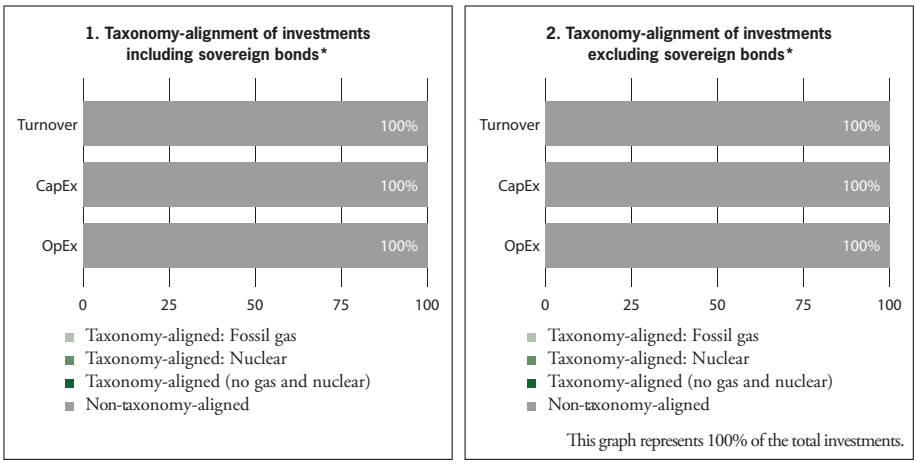
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.94% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. This is comprised of cash held for ancillary liquidity, which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the promoted environmental and social characteristics were met through the application of exclusions and maintaining a lower carbon footprint than the index at the portfolio level. To ensure the attainment of these promoted environmental and social characteristics, automated tools/screens and portfolio surveillance tools were used by the Portfolio Surveillance team. In addition, the Investment Adviser performed periodic manual desk reviews to ensure compliance.

In evaluating environmental and social risks, the Investment Adviser also engaged with companies on issues most relevant to their businesses. For example, the Investment Adviser engaged companies on their use of carbon and renewable energy, and their decarbonization plans. The investment team also discussed social issues around a company's labor force, community, supply chain and diversity at the management level.

The Investment Adviser also continued to push for enhanced transparency and disclosure on issues relating to applicable sustainability metrics. In particular, the Investment Adviser engaged with companies on board composition, especially independence and gender diversity. In many cases, the first step of these conversations is merely obtaining of the data, as complex subsidiary structures within emerging markets can make this particularly hard to determine.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Europe Opportunity Fund**

Legal entity identifier: **54930039WYT5E8WI3793**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
% Fund invested in companies whose GICS sub-industry was (until 31 March 2025)[1]:		
tobacco	0.00%	n/a
coal & consumable fuels	0.00%	n/a
% Fund invested in companies which derive revenue from:		
tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
manufacture of civilian firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

[1] This indicator was removed from the Fund on 1 April 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period. For further information, please refer to the Fund's Notice to Shareholders.

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts ("PAI") on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund's adverse impacts on these sustainability factors.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
DSV A/S	Industrials	9.61%	DENMARK
HERMES INTERNATIONAL SCA	Consumer Discretionary	8.95%	FRANCE
MONCLER SPA	Consumer Discretionary	8.68%	ITALY
SPOTIFY TECHNOLOGY SA	Communication Services	7.78%	SWEDEN
ASML HOLDING NV	Information Technology	4.92%	NETHERLANDS
LIBERTY MEDIA CORP-LIBERTY FORMULA ONE	Communication Services	4.72%	UNITED STATES
L'OREAL SA	Consumer Staples	4.66%	FRANCE
ON HOLDING AG	Consumer Discretionary	4.66%	SWITZERLAND

% Assets are calculated based on the Fund's investments at year-end during the reference period.

What was the proportion of sustainability-related investments?

98.42% of the Fund's investments attained the promoted environmental or social characteristics during the reference period through the application of environmental and social exclusions. The remainder of the investments during the reference period were investments in cash and/or derivatives held for efficient portfolio management purposes, and were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

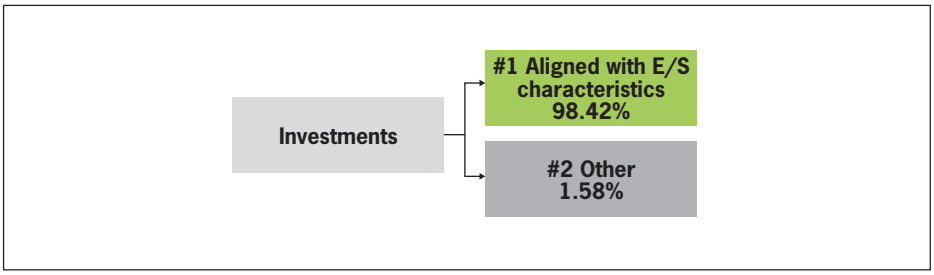
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product (i.e. cash and/ or derivatives held for efficient portfolio management purposes) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	34.89%
Communication Services	14.74%
Industrials	14.19%
Health Care	9.73%
Financials	9.61%
Information Technology	8.49%
Consumer Staples	6.77%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

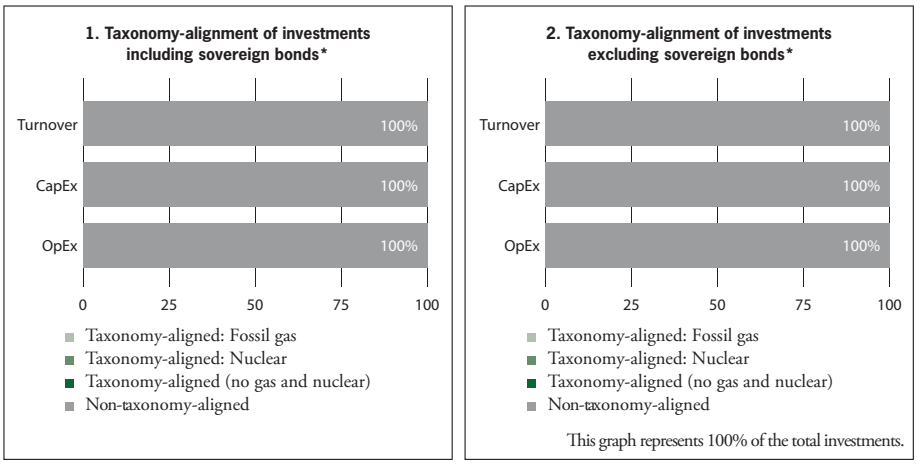
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.58% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Brands Equity Income Fund**

Legal entity identifier: **549300NOAL4YUQM4WM15**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.97% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies involved in certain fossil fuel related activities; and (ii) companies in certain energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests (as per SFDR).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Environmental Characteristics Exclusions		
Exclusions:		
% of the Fund invested in companies which:		
have any tie to fossil fuels (until 29 September 2025)[1]	0.00%	n/a
were involved in certain fossil fuel related activities (from 30 September 2025)[2]	0.00%	0.00%
have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
Civilian firearms (>10% revenue)	0.00%	0.00%
Weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons (which includes depleted uranium)	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	10.00%	66.97%

[1] This indicator was adjusted on 29 September 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period.

[2] For further information on the fossil fuel-related activities, please refer to the Fund's Prospectus.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to an environmental or social objective test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs. This was primarily determined using net alignment scores obtained from third-party data providers.

The UN SDGs include environmental (e.g. SDG 13: Climate Action) and social (e.g. SDG 3: Good Health and Well-Being) objectives. The third-party data providers' net alignment scores indicate whether companies in the providers' coverage universe have a net positive alignment with each of the UN SDGs through their products and services (e.g. a healthcare company's essential medical products may be positively aligned with SDG 3: Good Health and Well-Being) and/or their operational alignment (e.g. a company with a robust carbon reduction plan may be positively aligned with SDG 13: Climate Action). More information on the UN SDGs can be found at: https://www.undp.org/sustainable-development-goals. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

In the first instance, the Investment Adviser classified companies as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria using the third-party data: 1) having a net positive aggregate alignment score across all the SDGs; 2) having sufficient net positive alignment with at least one individual SDG; and 3) not having a material net mis-alignment with any of the SDGs.

In limited cases, and where it was satisfied that it is appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its positive contribution test, contrary to the position indicated by the third-party SDG net alignment scores. The Investment Adviser did this when, for example, it considered the third-party SDG net alignment data to be out of date or incorrect.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm ("DNSH") test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact ("PAI") indicators. This was primarily determined using data obtained from third-party providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

In the first instance, the Fund used data from third-party providers to assess the mandatory PAI indicators. The Fund used reasonable proxies for those PAIs for which the Investment Adviser considered that the data was not widely or reliably available. During the reference period, these were the 'Unadjusted gender pay gap', 'Activities negatively affecting biodiversity sensitive areas' and 'Emissions to water' PAI indicators.

To determine whether significant harm was caused, initial thresholds for each mandatory PAI indicator were generally set in one of the following ways:

- For binary indicators (e.g. 'Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises'), a binary pass/fail test was applied;
- For indicators based on quantifiable numerical data (e.g. 'GHG intensity of investee companies'), the initial threshold was set by the Investment Adviser was based on either:
  - A relative level where the worst performers within the broader investable universe (which was limited to issuers for which data is available, subject to the exceptions noted below), were deemed to fail the initial test; or
  - An absolute level where companies which performed above/below a defined level (as appropriate) were deemed to fail the initial test.

For each mandatory PAI indicator, where data was not available, a company was deemed to fail the initial test and was not classified as a sustainable investment. However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the company, and therefore did not provide data on that PAI indicator, the company was deemed to pass the initial test on the basis that the company's activities were unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

In limited cases, and where was satisfied that it was appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its DNSH test, contrary to the position indicated by the third-party data. The Investment Adviser did this when, for example, it considered the third-party data to be out of date or incorrect.

As part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

As noted above, the assessment was based on information obtained from third-party data providers or, where the Investment Adviser considered it appropriate, internal research, engagement with the company and/or other data sources.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

In addition, the environmental and social characteristics promoted by the Fund incorporated consideration of the following PAIs through binding exclusions:

- PAI indicator 4: exposure to companies active in the fossil fuel sector;
- PAI indicator 14: exposure to controversial weapons;

As noted above, as part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

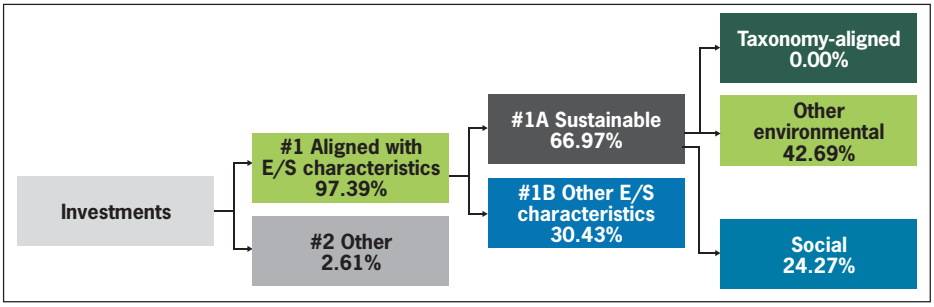
What was the proportion of sustainability-related investments?

97.39% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

66.97% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	22.66%
Information Technology	21.02%
Industrials	16.21%
Health Care	13.32%
Consumer Staples	12.27%
Consumer Discretionary	6.95%
Communication Services	4.95%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes "other" assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum proportion of its assets in companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets that were invested in companies classified as sustainable investments were assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

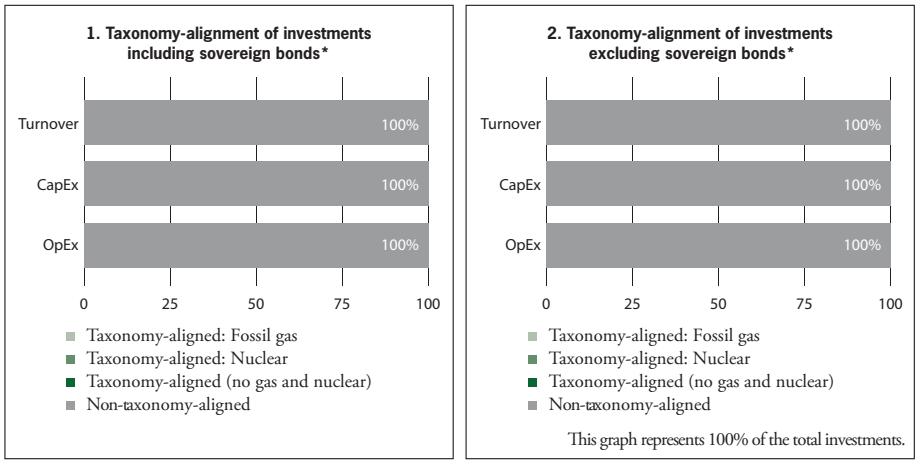
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

42.69% of the Fund's assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

24.27% of the Fund's assets were invested in companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.61% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity as well as profits or losses through the swaps to options on equity indices. They were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns on operating capital. The investment process is focused on understanding the long-term sustainability of a company's returns on operating capital and engagement with companies plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies on potentially financially material ESG risks and opportunities.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

% of the Fund invested in companies which have any tie to controversial weapons	0.00%	0.00%	0.00%	0.00%
Sustainable Investments:				
% of the Fund invested in companies classified as sustainable investments	10.00%	63.30%	68.03%	64.03%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to an environmental or social objective test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs. This was primarily determined using net alignment scores obtained from third-party data providers.

The UN SDGs include environmental (e.g. SDG 13: Climate Action) and social (e.g. SDG 3: Good Health and Well-Being) objectives. The third-party data providers' net alignment scores indicate whether companies in the providers' coverage universe have a net positive alignment with each of the UN SDGs through their products and services (e.g. a healthcare company's essential medical products may be positively aligned with SDG 3: Good Health and Well-Being) and/or their operational alignment (e.g. a company with a robust carbon reduction plan may be positively aligned with SDG 13: Climate Action). More information on the UN SDGs can be found at: https://www.undp.org/sustainable-development-goals. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

In the first instance, the Investment Adviser classified companies as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria using the third-party data: 1) having a net positive aggregate alignment score across all the SDGs; 2) having sufficient net positive alignment with at least one individual SDG; and 3) not having a material net mis-alignment with any of the SDGs.

In limited cases, and where it was satisfied that it is appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its positive contribution test, contrary to the position indicated by the third-party SDG net alignment scores. The Investment Adviser did this when, for example, it considered the third-party SDG net alignment data to be out of date or incorrect.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm ("DNSH") test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact ("PAI") indicators. This was primarily determined using data obtained from third-party providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

In the first instance, the Fund used data from third-party providers to assess the mandatory PAI indicators. The Fund used reasonable proxies for those PAIs for which the Investment Adviser considered that the data was not widely or reliably available. During the reference period, these were the 'Unadjusted gender pay gap', 'Activities negatively affecting biodiversity sensitive areas' and 'Emissions to water' PAI indicators.

To determine whether significant harm was caused, initial thresholds for each mandatory PAI indicator were generally set in one of the following ways:

- For binary indicators (e.g. 'Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises'), a binary pass/fail test was applied;
- For indicators based on quantifiable numerical data (e.g. 'GHG intensity of investee companies'), the initial threshold was set by the Investment Adviser was based on either:
  - A relative level where the worst performers within the broader investable universe (which was limited to issuers for which data is available, subject to the exceptions noted below), were deemed to fail the initial test; or
  - An absolute level where companies which performed above/below a defined level (as appropriate) were deemed to fail the initial test.

For each mandatory PAI indicator, where data was not available, a company was deemed to fail the initial test and was not classified as a sustainable investment. However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the company, and therefore did not provide data on that PAI indicator, the company was deemed to pass the initial test on the basis that the company's activities were unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

In limited cases, and where was satisfied that it was appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its DNSH test, contrary to the position indicated by the third-party data. The Investment Adviser did this when, for example, it considered the third-party data to be out of date or incorrect.

As part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

As noted above, the assessment was based on information obtained from third-party data providers or, where the Investment Adviser considered it appropriate, internal research, engagement with the company and/or other data sources.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

In addition, the environmental and social characteristics promoted by the Fund incorporated consideration of the following PAIs through binding exclusions:

- PAI indicator 4: exposure to companies active in the fossil fuel sector;
- PAI indicator 14: exposure to controversial weapons;

As noted above, as part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

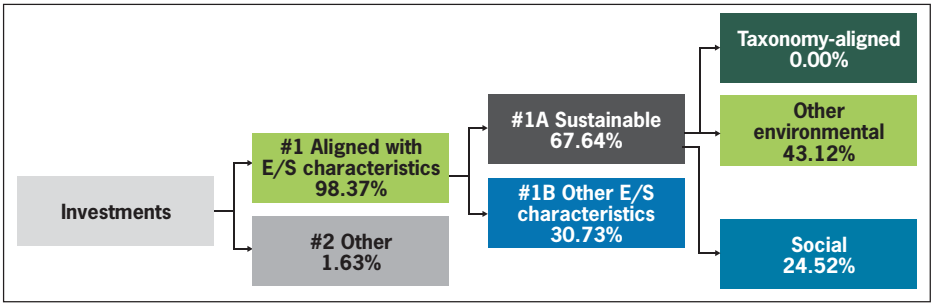
What was the proportion of sustainability-related investments?

98.37% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

67.64% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	22.86%
Information Technology	21.20%
Industrials	16.41%
Health Care	13.43%
Consumer Staples	12.38%
Consumer Discretionary	7.09%
Communication Services	5.00%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes "other" assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum proportion of its assets in companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets that were invested in companies classified as sustainable investments were assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

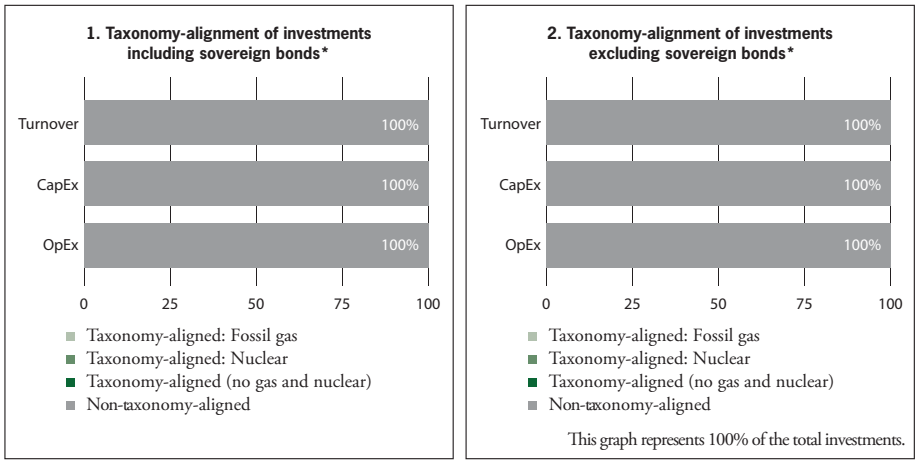
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

Although the Fund committed to invest a minimum proportion of its assets in companies classified as sustainable investments, there was no commitment to a minimum share of investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

43.12% of the Fund's assets were invested in Companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

24.52% of the Fund's assets were invested in companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.63% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instructions for ancillary liquidity as well as profits or losses through the swaps to options on equity indices. They were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns on operating capital. The investment process is focused on understanding the long-term sustainability of a company's returns on operating capital and engagement with companies plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies on potentially financially material ESG risks and opportunities.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Brands Horizon 2029 Fund**

Legal entity identifier: **254900R7G7PCZCT7QT89**

Reference period: **28 February 2025 to 31 December 2025**

This Fund was launched on 28 February 2025.

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 13.06% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund will transition its asset allocation from investing 90% of its assets in bonds (excluding cash) at launch ("**Bond Allocation**"), to investing up to 100% of its assets (excluding cash) in equities at the end of a four-year investment period ("**Equity Allocation**"). The environmental and social characteristics promoted during the reference period were as follows:

Bond Allocation

During the reference period, the Fund promoted the social characteristic of limiting negative social externalities by avoiding investments in sovereign issuers that significantly violated social rights or are subject to certain international sanctions.

Equity Allocation

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies involved in certain fossil fuel related activities; and (ii) companies in certain energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests (as per SFDR).

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
have any tie to fossil fuels (until 29 September 2025)[1]	0.00%	n/a
were involved in certain fossil fuel related activities (from 30 September 2025)[2]	0.00%	0.00%
have been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
civilian firearms (>10% revenue)	0.00%	0.00%
weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons (which includes depleted uranium)	0.00%	0.00%
Sustainable Investments:		
% of the Fund invested in companies classified as sustainable investments	1.00%	13.06%
Bond Allocation		
% of the Fund invested in companies classified as sustainable investments		
are in the bottom 10% ranked countries for social viola-tions, based on the investment manager's indicator	0.00%	0.00%
are subject to sanctions from the UN or EU	0.00%	0.00%

[1] This indicator was adjusted on 29 September 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period.

[2] For further information on the fossil fuel-related activities, please refer to the Fund's Prospectus.

. . . and compared to previous periods?

Not applicable. This Fund was launched on 28 February 2025.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Bond Allocation

Not applicable.

Equity Allocation

The positive contribution to an environmental or social objective test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs. This was primarily determined using net alignment scores obtained from third-party data providers.

The UN SDGs include environmental (e.g. SDG 13: Climate Action) and social (e.g. SDG 3: Good Health and Well-Being) objectives. The third-party data providers' net alignment scores indicate whether companies in the providers' coverage universe have a net positive alignment with each of the UN SDGs through their products and services (e.g. a healthcare company's essential medical products may be positively aligned with SDG 3: Good Health and Well-Being) and/or their operational alignment (e.g. a company with a robust carbon reduction plan may be positively aligned with SDG 13: Climate Action). More information on the UN SDGs can be found at: https://www.undp.org/sustainable-development-goals. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

In the first instance, the Investment Adviser classified companies as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria using the third-party data: 1) having a net positive aggregate alignment score across all the SDGs; 2) having sufficient net positive alignment with at least one individual SDG; and 3) not having a material net mis-alignment with any of the SDGs.

In limited cases, and where it was satisfied that it is appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its positive contribution test, contrary to the position indicated by the third-party SDG net alignment scores. The Investment Adviser did this when, for example, it considered the third-party SDG net alignment data to be out of date or incorrect.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Bond Allocation

Not applicable

Equity Allocation

The do no significant harm ("DNSH") test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact ("PAI") indicators. This was primarily determined using data obtained from third-party providers.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

Bond Allocation

Not applicable.

Equity Allocation

In the first instance, the Fund used data from third-party providers to assess the mandatory PAI indicators. The Fund used reasonable proxies for those PAIs for which the Investment Adviser considered that the data was not widely or reliably available. During the reference period, these were the 'Unadjusted gender pay gap', 'Activities negatively affecting biodiversity sensitive areas' and 'Emissions to water' PAI indicators.

To determine whether significant harm was caused, initial thresholds for each mandatory PAI indicator were generally set in one of the following ways:

- For binary indicators (e.g. 'Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises'), a binary pass/fail test was applied;
- For indicators based on quantifiable numerical data (e.g. 'GHG intensity of investee companies'), the initial threshold was set by the Investment Adviser was based on either:
  - A relative level where the worst performers within the broader investable universe (which was limited to issuers for which data is available, subject to the exceptions noted below), were deemed to fail the initial test; or
  - An absolute level where companies which performed above/below a defined level (as appropriate) were deemed to fail the initial test.

For each mandatory PAI indicator, where data was not available, a company was deemed to fail the initial test and was not classified as a sustainable investment. However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the company, and therefore did not provide data on that PAI indicator, the company was deemed to pass the initial test on the basis that the company's activities were unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

In limited cases, and where it was satisfied that it was appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its DNSH test, contrary to the position indicated by the third-party data. The Investment Adviser did this when, for example, it considered the third-party data to be out of date or incorrect.

As part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Bond Allocation
Not applicable.

Equity Allocation
As part of the Investment Adviser's DNSH test, companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

As noted above, the assessment was based on information obtained from third-party data providers or, where the Investment Adviser considered it appropriate, internal research, engagement with the company and/or other data sources.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Bond Allocation
The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defined in relation to the bottom-10% ranked countries on an indicator reflecting the fulfillment of social rights. The Fund therefore considered in part the PAI 16: investee countries subject to social violations.

Equity Allocation
The mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

In addition, the environmental and social characteristics promoted by the Fund incorporated consideration of the following PAIs through binding exclusions:

- PAI indicator 4: exposure to companies active in the fossil fuel sector;
- PAI indicator 14: exposure to controversial weapons;

As noted above, as part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

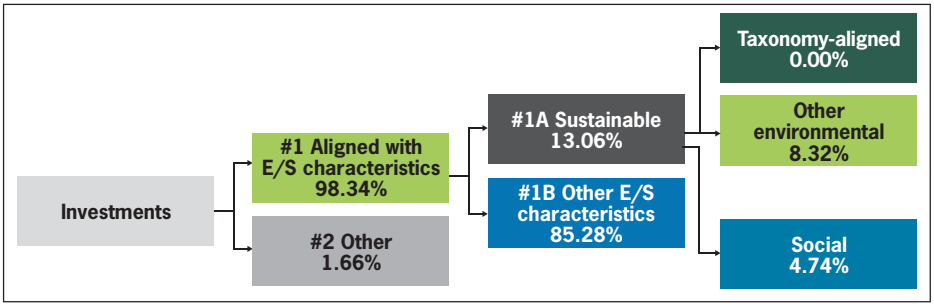
What was the proportion of sustainability-related investments?

98.34% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

13.06% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereign	**79.34%**
Equity	**19.00%**
Financials	4.42%
Information Technology	4.09%
Industrials	3.17%
Health Care	2.59%
Consumer Staples	2.39%
Consumer Discretionary	1.37%
Communication Services	0.97%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes "other" assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum proportion of its assets in companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets that were invested in companies classified as sustainable investments were assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

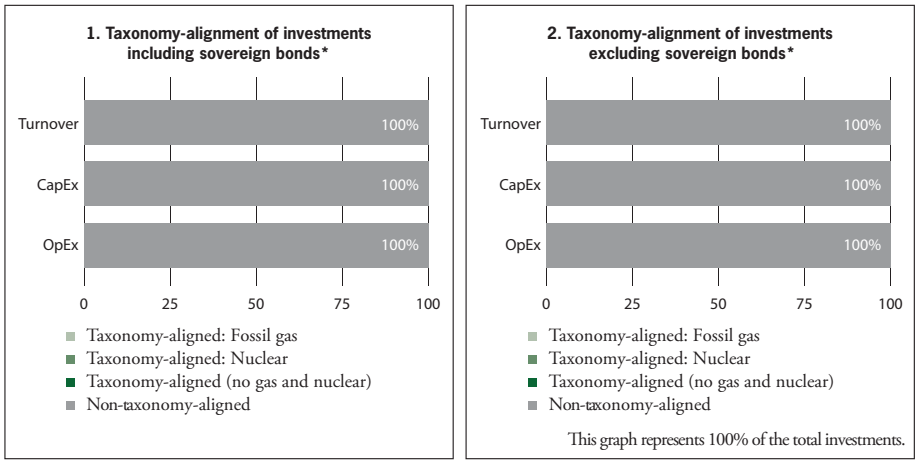
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.32% of the Fund's assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

4.74% of the Fund's assets were invested in companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.66% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity as well as profits or losses through the swaps to options on equity indices. They were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns on operating capital. The investment process is focused on understanding the long-term sustainability of a company's returns on operating capital and engagement with companies plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies on potentially financially material ESG risks and opportunities.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Endurance Fund**

Legal entity identifier: **549300M2W4IZFV5OHT61**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund invested in companies whose GICS sub-industry is:				
Tobacco	0.00%	0.00%	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies which derive revenue from:				
Tobacco (>5% recent year revenue)	0.00%	0.00%	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

What were the top investments of this financial product?

Security	Sector	% Assets	Country
ROIVANT SCIENCES LTD	Health Care	6.48%	UNITED STATES
TEVA PHARMACEUTICAL INDUSTRIES LTD	Health Care	5.66%	ISRAEL
VICTORIA PLC	Consumer Discretionary	5.53%	UNITED KINGDOM
ABIVAX SA	Health Care	5.32%	FRANCE
QXO INC	Industrials	5.20%	UNITED STATES
IMMUNOVANT INC	Health Care	4.78%	UNITED STATES
TELEFLEX INC	Health Care	4.39%	UNITED STATES
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	4.29%	UNITED STATES
ARBUTUS BIOPHARMA CORP	Health Care	4.28%	UNITED STATES
BELITE BIO INC	Health Care	4.07%	CAYMAN ISLANDS

% Assets are calculated based on the Fund's investments at year-end during the reference period.

What was the proportion of sustainability-related investments?

81.11% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

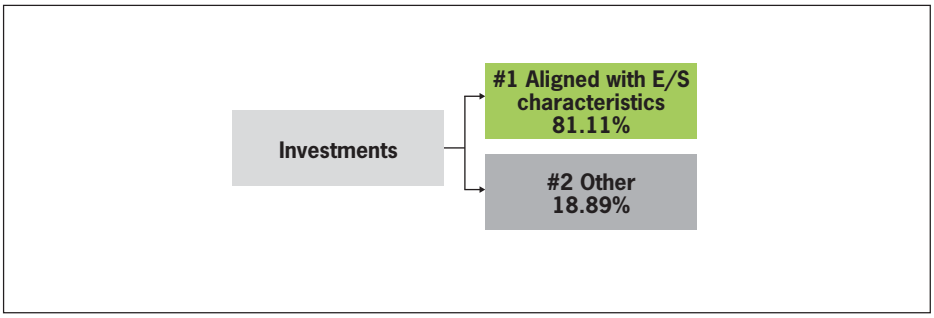
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Health Care	45.77%
Consumer Discretionary	13.93%
Industrials	6.29%
Information Technology	5.82%
Energy	3.80%
Financials	3.47%
Communication Services	1.03%
Real Estate	1.00%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.80%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

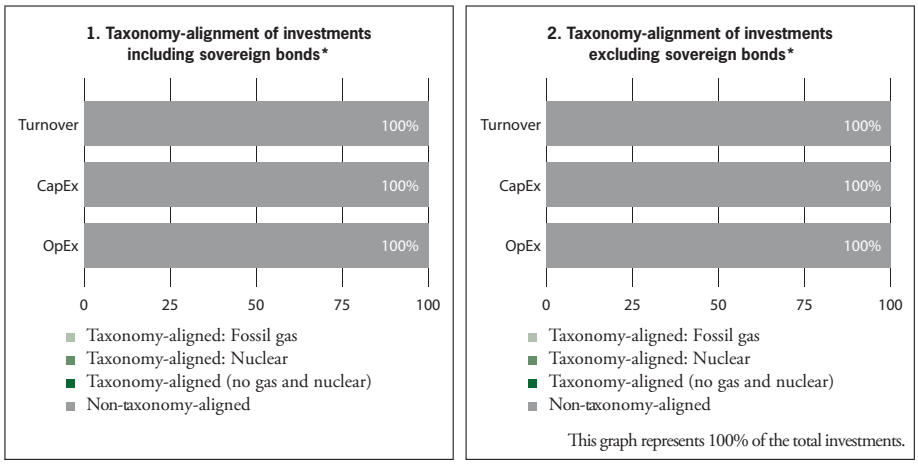
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

18.89% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilized its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organizing framework helped the investment team categorize and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue or capital expenditure alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	9.78%	UNITED STATES
TESLA INC	Consumer Discretionary	8.99%	UNITED STATES
AFFIRM HOLDINGS INC	Financials	6.45%	UNITED STATES
SHOPIFY INC	Information Technology	5.85%	CANADA
APPLOVIN CORP	Information Technology	5.64%	UNITED STATES
ADYEN NV	Financials	4.93%	NETHERLANDS
MERCADOLIBRE INC	Consumer Discretionary	4.85%	UNITED STATES
ROYALTY PHARMA PLC	Health Care	4.84%	UNITED STATES

% Assets are calculated based on the Fund's investments at year-end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

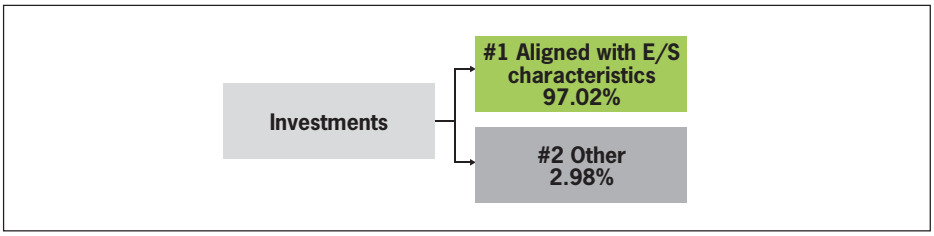
What was the proportion of sustainability-related investments?

97.02% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	35.44%
Consumer Discretionary	15.88%
Financials	15.48%
Health Care	15.09%
Industrials	6.83%
Real Estate	4.38%
Communication Services	3.93%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels.	1.95%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

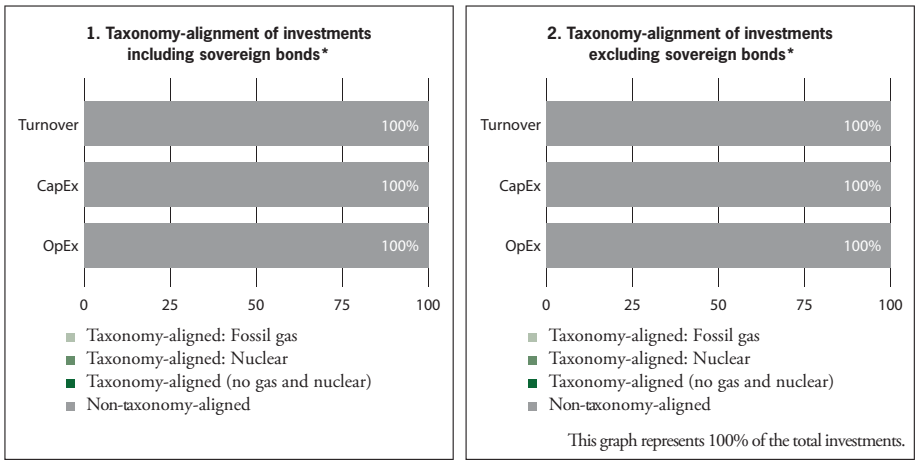
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.98% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilized its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organizing framework helped the investment team categorize and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue or capital expenditure alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Opportunity Fund**

Legal entity identifier: **5493000BFE8KBAX1S309**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
% Fund invested in companies whose GICS sub-industry was (until 31 March 2025)[1]:		
tobacco	0.00%	n/a
coal & consumable fuels	0.00%	n/a
% Fund invested in companies which derive revenue from:		
tobacco (>5% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
thermal coal (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
manufacture of civilian firearms and ammunition (>10% recent year revenue as determined using data from MSCI ESG BISR)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

[1] This indicator was removed from the Fund on 1 April 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period. For further information, please refer to the Fund's Notice to Shareholders.

The entirety of the Fund, apart from cash and derivatives held for efficient portfolio management purposes, were screened against the Fund's Restriction Screening Policy. During the reference period, 0% of the Fund's investments were in violation of the Fund's Restriction Screening Policy.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts ("PAI") on sustainability factors only in part, as follows:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers which are involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly consider the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor (a) integrating ESG analysis within the research process and/or (b) engaging with management of investee companies. The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (2): Carbon footprint;
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

As a result, the Fund contributed to mitigating the Fund's adverse impacts on these sustainability factors.

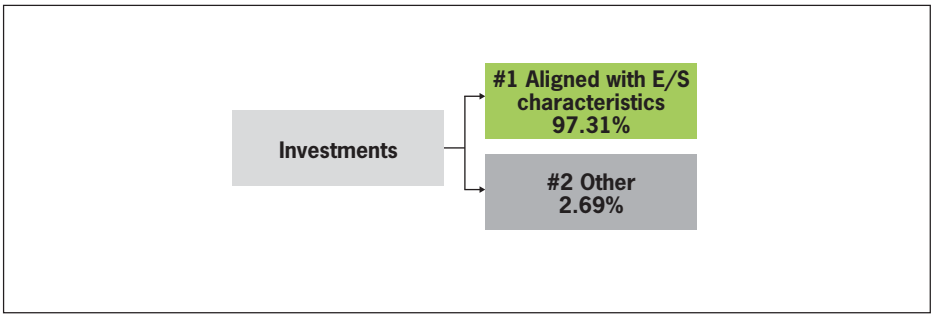
What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product (i.e. cash and/ or derivatives held for efficient portfolio management purposes) which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	32.59%
Communication Services	16.90%
Information Technology	16.23%
Financials	16.04%
Industrials	15.55%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and derivative instruments held for efficient portfolio management purposes.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

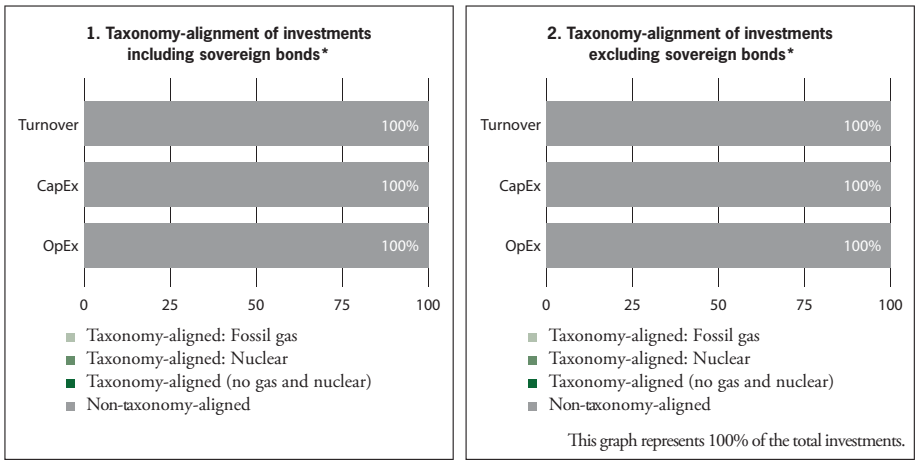
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.69% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and/or derivatives held for efficient portfolio management purposes and they were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may impact the value of a company's securities. As part of a company quality assessment, the Investment Adviser has also analysed potential impacts to humanity's health, environment, liberty and productivity and corporate governance practices to ensure agency, culture and trust within investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Legal entity identifier: **549300BNIZDA1BSKNE57**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	9.39%	UNITED STATES
ROYALTY PHARMA PLC	Health Care	7.76%	UNITED STATES
ROYAL GOLD INC	Materials	6.14%	UNITED STATES
QXO INC	Industrials	5.20%	UNITED STATES
EUROFINS SCIENTIFIC SE	Health Care	5.10%	FRANCE
CANADIAN NATIONAL RAILWAY CO	Industrials	5.08%	CANADA
LVMH MOET HENNESSY LOUIS VUITTON SE	Consumer Discretionary	4.87%	FRANCE
MERCADOLIBRE INC	Consumer Discretionary	4.85%	UNITED STATES
CORE & MAIN INC	Industrials	4.81%	UNITED STATES

% Assets are calculated based on the Fund's investments at year-end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

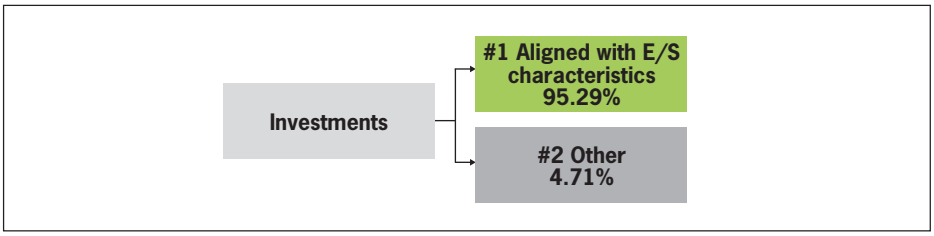
What was the proportion of sustainability-related investments?

95.29% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	19.78%
Consumer Discretionary	18.51%
Information Technology	16.81%
Health Care	15.21%
Financials	10.88%
Materials	6.51%
Real Estate	2.87%
Consumer Staples	2.52%
Communication Services	1.67%
Energy	0.52%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.60%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

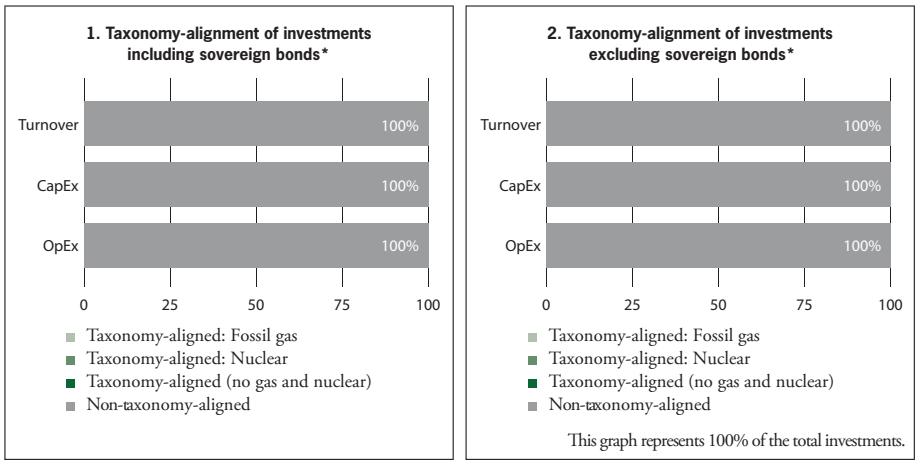
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

4.71% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue or capital expenditure alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Quality Fund**

Legal entity identifier: **549300KY7ZHUDESLHQ60**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.80% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies involved in certain fossil fuel related activities; and (ii) companies in certain energy intensive sectors. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons or civilian firearms; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests (as per SFDR).

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
have any tie to fossil fuels (until 29 September 2025)[1]	0.00%	n/a
were involved in certain fossil fuel related activities (from 30 September 2025)[2]	0.00%	0.00%
have been assigned any of the following sectors or indus-tries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utili-ties), or metals and mining	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
civilian firearms (>10% revenue)	0.00%	0.00%
weapons (>10% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons (which includes depleted uranium)	0.00%	0.00%
Sustainable Investments		
% of the Fund invested in companies classified as sustaina-ble investments	10.00%	59.80%

[1] This indicator was adjusted on 29 September 2025 and was not monitored thereafter. During the reference period, there was one temporary exception to the Fund's attainment of its environmental and social characteristics. The Investment Adviser rectified this by making minor adjustments to the exclusion. For further information, please refer to the MS INVF Product Notice dated September 2025 (available on the SICAV's website).

[2] For further information on the fossil fuel-related activities, please refer to the Fund's Prospectus.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to an environmental or social objective test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs. This was primarily determined using net alignment scores obtained from third-party data providers.

The UN SDGs include environmental (e.g. SDG 13: Climate Action) and social (e.g. SDG 3: Good Health and Well-Being) objectives. The third-party data providers' net alignment scores indicate whether companies in the providers' coverage universe have a net positive alignment with each of the UN SDGs through their products and services (e.g. a healthcare company's essential medical products may be positively aligned with SDG 3: Good Health and Well-Being) and/or their operational alignment (e.g. a company with a robust carbon reduction plan may be positively aligned with SDG 13: Climate Action). More information on the UN SDGs can be found at: https://www.undp.org/sustainable-development-goals. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

In the first instance, the Investment Adviser classified companies as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria using the third-party data: 1) having a net positive aggregate alignment score across all the SDGs; 2) having sufficient net positive alignment with at least one individual SDG; and 3) not having a material net mis-alignment with any of the SDGs.

In limited cases, and where it was satisfied that it is appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its positive contribution test, contrary to the position indicated by the third-party SDG net alignment scores. The Investment Adviser did this when, for example, it considered the third-party SDG net alignment data to be out of date or incorrect.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm ("DNSH") test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact ("PAI") indicators. This was primarily determined using data obtained from third-party providers.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

In the first instance, the Fund used data from third-party providers to assess the mandatory PAI indicators. The Fund used reasonable proxies for those PAIs for which the Investment Adviser considered that the data was not widely or reliably available. During the reference period, these were the 'Unadjusted gender pay gap', 'Activities negatively affecting biodiversity sensitive areas' and 'Emissions to water' PAI indicators.

To determine whether significant harm was caused, initial thresholds for each mandatory PAI indicator were generally set in one of the following ways:

- For binary indicators (e.g. 'Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises'), a binary pass/fail test was applied;
- For indicators based on quantifiable numerical data (e.g. 'GHG intensity of investee companies'), the initial threshold was set by the Investment Adviser was based on either:
  - A relative level where the worst performers within the broader investable universe (which was limited to issuers for which data is available, subject to the exceptions noted below), were deemed to fail the initial test; or
  - An absolute level where companies which performed above/below a defined level (as appropriate) were deemed to fail the initial test.

For each mandatory PAI indicator, where data was not available, a company was deemed to fail the initial test and was not classified as a sustainable investment. However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the company, and therefore did not provide data on that PAI indicator, the company was deemed to pass the initial test on the basis that the company's activities were unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

In limited cases, and where was satisfied that it was appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its DNSH test, contrary to the position indicated by the third-party data. The Investment Adviser did this when, for example, it considered the third-party data to be out of date or incorrect.

As part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

As noted above, the assessment was based on information obtained from third-party data providers or, where the Investment Adviser considered it appropriate, internal research, engagement with the company and/or other data sources.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

In addition, the environmental and social characteristics promoted by the Fund incorporated consideration of the following PAIs through binding exclusions:

- PAI indicator 4: exposure to companies active in the fossil fuel sector;
- PAI indicator 14: exposure to controversial weapons;

As noted above, as part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considered a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

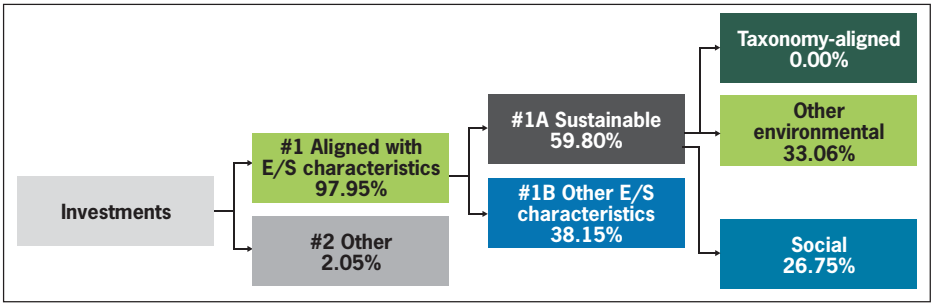
What was the proportion of sustainability-related investments?

97.95% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

59.80% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.59%
Financials	19.43%
Industrials	14.77%
Health Care	11.27%
Consumer Staples	10.73%
Consumer Discretionary	8.40%
Communication Services	4.76%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes "other" assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to invest a minimum proportion of its assets in companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets that were invested in companies classified as sustainable investments were assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

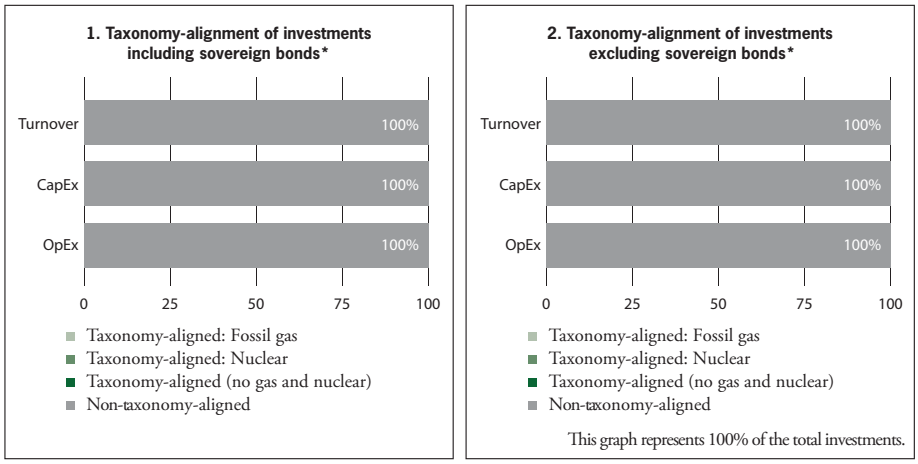
Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

33.06% of the Fund's assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

26.75% of the Fund's assets were invested in companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.05% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns on operating capital. The investment process is focused on understanding the long-term sustainability of a company's returns on operating capital and engagement with companies plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies on potentially financially material ESG risks and opportunities.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Quality Select Fund (previously called Global Sustain Fund)**

Legal entity identifier: **549300O8II6STSHJE485**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in: (i) companies involved in certain fossil fuel related activities; (ii) companies in certain energy intensive sectors; (iii) companies for which greenhouse gas (GHG) emissions intensity data and/or estimates were not available and/or could not be estimated; and (iv) by applying a GHG emissions intensity filter. The Fund promoted this characteristic by also seeking to achieve a GHG emissions intensity for the portfolio that is significantly lower than that of the reference universe. The reference universe is defined, only for the purposes of comparing GHG emissions intensity, as the companies within the MSCI AC World Index. For the avoidance of any doubt, the Fund does not seek to make investments that contribute to climate change mitigation within the meaning of the EU Taxonomy.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involves weapons, civilian firearms, tobacco, alcohol, adult entertainment or gambling; and (ii) that have any tie to controversial weapons.

In addition, a proportion of the Fund's investments were classified as sustainable investments through an assessment comprising three tests (as per SFDR).

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which:		
have any tie to fossil fuels (until 29 September 2025)[1]	0.00%	n/a
were involved in certain fossil fuel related activities (from 30 September 2025)[2]	0.00%	0.00%
have been assigned any of the following sectors or indus-tries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utili-ties), or metals and mining	0.00%	0.00%
do not have GHG emissions intensity estimates available and/or which cannot be estimated (in the Investment Team's discretion)	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
civilian firearms (>10% revenue)	0.00%	0.00%
weapons (>10% revenue)	0.00%	0.00%
tobacco (>5% revenue)	0.00%	0.00%
alcohol (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
gambling (>10% revenues)	0.00%	0.00%
% of the Fund invested in companies which:		
have any tie to controversial weapons (which includes depleted uranium)	0.00%	0.00%
have been assigned any of the following sectors or indus-tries under MSCI GICS: Brewers, Casinos & Gaming, Distillers & Vintners, or Tobacco	0.00%	0.00%
Sustainable Investments

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
GHG Emission intensity:		
The Investment Adviser seeks to achieve a GHG emissions intensity for the portfolio that is significantly lower (as measured by metric tonnes of GHG per $1m of company sales using Scope 1 and 2 emissions) than that of the reference universe. The reference universe is defined, only for the purposes of comparing GHG emissions intensity, as the companies within the MSCI AC World Index (MSCI ACWI). The GHG emissions intensity of the reference universe and the portfolio were 151.40 and 35.42 respectively. This means the portfolio's GHG emissions intensity was 77% lower than that of the reference universe.	151.40	35.42

Sustainability Indicator	Reference Universe Reduction Threshold	2025 Reference Universe Reduction Value
Reference universe reduction		
The Investment Adviser committed to at least a 20% reduction in the reference universe through applying the following environmental exclusions:		
1. Companies involved in certain fossil fuel related activities;	20.00%	20.11%
2. Companies that has been assigned any of the following sectors or industries under MSCI GICS: energy, construction materials, utilities (excluding renewable electricity and water utilities), metals and mining;		
3. Companies for which GHG emissions intensity data and/or estimates are not available and/or cannot be estimated; and		
4. The remaining companies are then ranked according to their GHG emissions intensity estimates, and those with the highest intensity are excluded from the reference universe, with the view to ensuring that these binding criteria should collectively result in a reduction of the reference universe by at least 20% in a significantly engaging manner.		
The total aimed % reduction in the reference universe, and the actual total % reduction in the reference universe were:		

[1] This indicator was adjusted on 29 September 2025 and was not monitored thereafter. During the reference period, there was one temporary exception to the Fund's attainment of its environmental and social characteristics. The Investment Adviser rectified this by making minor adjustments to the exclusion. For further information, please refer to the MS INVF Product Notice dated September 2025 (available on the SICAV's website).

[2] For further information on the fossil fuel-related activities, please refer to the Fund's Prospectus.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The positive contribution to an environmental or social objective test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments were classified based on their net positive alignment with the UN SDGs. This was primarily determined using net alignment scores obtained from third-party data providers.

The UN SDGs include environmental (e.g. SDG 13: Climate Action) and social (e.g. SDG 3: Good Health and Well-Being) objectives. The third-party data providers' net alignment scores indicate whether companies in the providers' coverage universe have a net positive alignment with each of the UN SDGs through their products and services (e.g. a healthcare company's essential medical products may be positively aligned with SDG 3: Good Health and Well-Being) and/or their operational alignment (e.g. a company with a robust carbon reduction plan may be positively aligned with SDG 13: Climate Action). More information on the UN SDGs can be found at: https://www.undp.org/sustainable-development-goals. The Investment Adviser recognises that the UN SDGs were written by Governments for Governments and therefore data that seeks to align corporate actions to the SDGs will not be perfectly representative.

In the first instance, the Investment Adviser classified companies as having a positive contribution to an environmental or social objective as simultaneously meeting three criteria using the third-party data: 1) having a net positive aggregate alignment score across all the SDGs; 2) having sufficient net positive alignment with at least one individual SDG; and 3) not having a material net mis-alignment with any of the SDGs.

In limited cases, and where it was satisfied that it is appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its positive contribution test, contrary to the position indicated by the third-party SDG net alignment scores. The Investment Adviser did this when, for example, it considered the third-party SDG net alignment data to be out of date or incorrect.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The do no significant harm ("DNSH") test applied by the Investment Adviser sought to ensure that companies classified as sustainable investments did not cause significant harm to any of the mandatory, SFDR-defined principal adverse impact ("PAI") indicators. This was primarily determined using data obtained from third-party providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

In the first instance, the Fund used data from third-party providers to assess the mandatory PAI indicators. The Fund used reasonable proxies for those PAIs for which the Investment Adviser considered that the data was not widely or reliably available. During the reference period, these were the 'Unadjusted gender pay gap', 'Activities negatively affecting biodiversity sensitive areas' and 'Emissions to water' PAI indicators.

To determine whether significant harm was caused, initial thresholds for each mandatory PAI indicator were generally set in one of the following ways:

- For binary indicators (e.g. 'Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises'), a binary pass/fail test was applied;
- For indicators based on quantifiable numerical data (e.g. 'GHG intensity of investee companies'), the initial threshold was set by the Investment Adviser was based on either:
  - A relative level where the worst performers within the broader investable universe (which was limited to issuers for which data is available, subject to the exceptions noted below), were deemed to fail the initial test; or
  - n absolute level where companies which performed above/below a defined level (as appropriate) were deemed to fail the initial test.

For each mandatory PAI indicator, where data was not available, a company was deemed to fail the initial test and was not classified as a sustainable investment. However, in cases where the third-party data provider determined that a particular PAI indicator was not meaningful given the nature or the industry of the company, and therefore did not provide data on that PAI indicator, the company was deemed to pass the initial test on the basis that the company's activities were unlikely to be causing significant harm to the environmental or social theme covered by that PAI indicator.

In limited cases, and where was satisfied that it was appropriate to do so based on its internal research, engagement with the company and/or other data sources, the Investment Adviser treated certain companies as passing its DNSH test, contrary to the position indicated by the third-party data. The Investment Adviser did this when, for example, it considered the third-party data to be out of date or incorrect.

As part of its long-term investment approach, the Investment Adviser sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the Investment Adviser considers a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the Investment Adviser's DNSH test, companies were not classified as sustainable investments if they failed to comply with the themes and values promoted by the OECD Guidelines for Multinational Enterprises or the UN Global Compact, or if they lacked processes and compliance mechanisms to monitor compliance with the themes and values promoted by these global norms.

As noted above, the assessment was based on information obtained from third-party data providers or, where the Investment Adviser considered it appropriate, internal research, engagement with the company and/or other data sources.

The Investment Adviser used the OECD Guidelines for Multinational Enterprises and the UN Global Compact as reasonable proxies.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory PAI indicators in the SFDR rules were considered by the Investment Adviser (in the manner set out above) for the purposes of classifying some of the Fund's investments as sustainable investments.

In addition, the environmental and social characteristics promoted by the fund incorporated consideration of the following PAIs through binding exclusions:

- PAI indicator 3: GHG intensity of investee companies (through restrictions based on Scope 1 and 2 GHG intensity);
- PAI indicator 4: exposure to companies active in the fossil fuel sector;
- PAI indicator 14: exposure to controversial weapons;

As noted above, as part of its long-term investment approach, the investment manager sought to engage with companies to encourage them towards better ESG practices and to minimise or mitigate the principal adverse impacts of their activities on a materiality basis (i.e. if the investment manager considers a particular PAI indicator to be potentially financially material to the long-term sustainability of high returns on capital).

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

As at 31 December 2025 (continued)

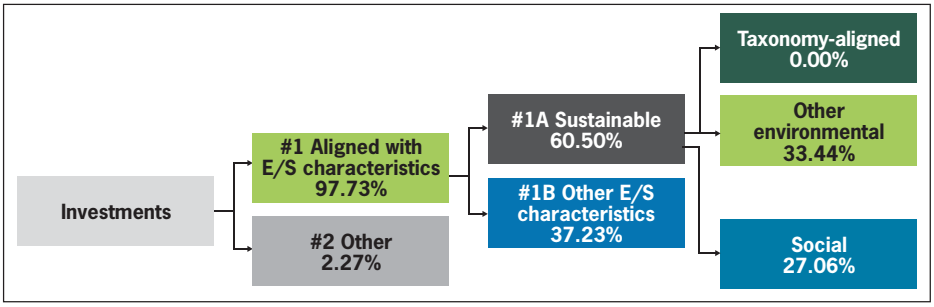
What was the proportion of sustainability-related investments?

97.73% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

60.50% of the Fund's assets were invested in companies classified as sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	28.93%
Financials	19.66%
Industrials	14.94%
Health Care	11.41%
Consumer Staples	9.51%
Consumer Discretionary	8.46%
Communication Services	4.82%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes "other" assets held by the Fund such as cash and money market instruments for ancillary liquidity.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

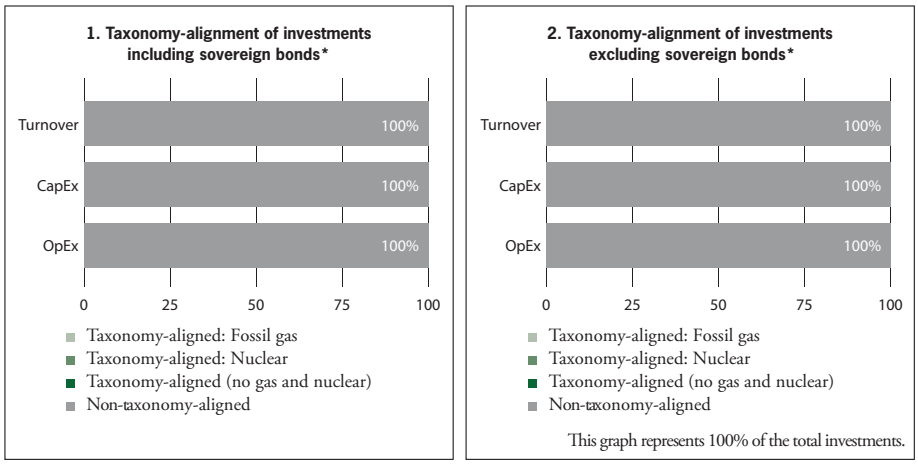
The Fund did not commit to invest a minimum proportion of its assets in companies classified as sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's assets that were invested in companies classified as sustainable investments were assessed by the Investment Adviser as aligned with the environmentally sustainable economic activities under the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☑ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

Although the Fund committed to invest a minimum proportion of its assets in companies classified as sustainable investments, there was no commitment to a minimum share of investments in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

33.44% of the Fund's assets were invested in companies classified as sustainable investments with an environmental objective, which were not Taxonomy-aligned.

What was the share of socially sustainable investments?

27.06% of the Fund's assets were invested in companies classified as sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.27% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised cash and money market instruments for ancillary liquidity and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and assessed companies to classify them as sustainable investments or not. It also regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

The Investment Adviser also engaged directly with companies on environmental and social issues material to the sustainability of returns on operating capital. The investment process is focused on understanding the long-term sustainability of a company's returns on operating capital and engagement with companies plays a vital role in this. It informs the Investment Adviser whether management can maintain these returns while growing the business over the long term. This includes direct engagement with companies on potentially financially material ESG risks and opportunities.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Stars Fund**

Legal entity identifier: **254900JNN56RTBNF6T31**

Reference period: **29 August 2025 to 31 December 2025**

This Fund was launched on 29 August 2025.

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of limiting negative externalities by excluding investments in companies whose core business activity involved thermal coal mining or thermal coal-based power generation.

In addition, the Fund considered social characteristics by applying binding exclusions on: (i) companies whose core business activity involved weapons, civilian firearms or tobacco; and (ii) companies that had any tie to controversial weapons.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Environmental Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
thermal coal mining (>5% revenue)	0.00%	0.00%
thermal coal-based power generation (>5% revenue)	0.00%	0.00%
% of the Fund invested in companies assigned Coal & Consumable Fuels as their sub-industry under MSCI GICS	0.00%	0.00%
Social Characteristics		
Exclusions:		
% of the Fund invested in companies which derive revenue from:		
civilian firearms (>10% revenue)	0.00%	0.00%
weapons (>10% revenue)	0.00%	0.00%
tobacco production (>5% revenue)	0.00%	0.00%
% of the Fund invested in companies which have any tie to controversial weapons (which includes depleted uranium)	0.00%	0.00%
% of the Fund invested in companies assigned Tobacco as their industry under MSCI GICS	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Not applicable. The Fund was launched on 29 August 2025.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the Fund considered principal adverse impacts on sustainability factors only in part, as follows:

- The Fund excluded investments in companies whose core business activity involved thermal coal mining or thermal coal-based power generation. The Fund therefore partly considered PAI indicator 4: exposure to companies active in the fossil fuel sector;
- The Fund excluded investments in companies that had any tie to controversial weapons. The Fund therefore considered PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 29 August 2025 to 31 December 2025.

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy, and made no commitment to a minimum share of such investments.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.03% of the Fund's investments were not aligned with environmental and social characteristics of the Fund and have been included in the "other" category. "Other" includes investments held for ancillary liquidity, including cash and money market instruments. No minimum environmental or social safeguards were applied to these investments.

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser applied the exclusions and regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the fund met its environmental and/or social characteristics through the following:

ESG tilt:

The Fund promoted environmental and social characteristics by maintaining a higher ESG score at portfolio level than the sustainability indicator comparison benchmark, according to a proprietary ESG scoring methodology developed by the Investment Adviser[1].

The Investment Adviser monitored the attainment of the environmental and social characteristics promoted by the Fund by monitoring the Fund's ESG score against that of the sustainability indicator comparison benchmark. The proprietary ESG scoring methodology developed by the Investment Adviser is based on external ESG data provided by third party vendors as well as the Investment Adviser's qualitative evaluation of investee companies. To determine the customized ESG score for a company, an industry-adjusted score, provided by a third-party data provider as determined by the Investment Adviser, is used as a quantitative base to reflect the company's ESG performance relative to the standards and performance of the company's industry peers. The Investment Adviser then adjusts this score based on their own qualitative assessment and expectations of how a company's ESG activities may improve corporate value, considering the following criteria:

- Attitude to Engagement;
- ESG Commitment;
- ESG Disclosure;
- Business Strategy including ESG;
- Business Risks from an ESG viewpoint; and
- Expectation for change.

The ESG scores of the Fund's investments are then aggregated at the portfolio level and monitored daily against the ESG score for the sustainability indicator comparison benchmark, which may be subject to similar adjustment by the Investment Adviser based on its own qualitative assessment as described above.

Exclusions:

The Fund promoted:

- the environmental characteristic of contributing towards climate change mitigation by excluding companies involved in thermal coal mining and generation; and
- the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

The Fund also contributed to environmental and social themes by avoiding investments in issuers which experienced severe ESG controversies (and no appropriate remedial action had taken place), or which failed to adhere to certain international norms.

Further detail on the nature of these exclusions is set out in response to the question 'How did the sustainability indicators perform?'.

The fund's sustainability indicator comparison benchmark is the MSCI Japan Index.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

[1] Unless otherwise noted, references to the Investment Adviser refer to the Investment Adviser of the Fund and/or any Sub-Investment Advisers engaged for management of the Fund (as appropriate).

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

- The Fund excluded companies which receive a certain percentage of their revenue from thermal coal mining and generation. The Fund therefore partly considers PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded companies which have committed violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises. The Fund therefore considers PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded companies which have any exposure to controversial weapons. The Fund therefore considered the PAI indicator 14: exposure to controversial weapons.

In addition, the Investment Adviser also engaged with companies on the following PAIs on a materiality basis (i.e., if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer):

- PAI indicator 1: GHG emissions;
- PAI indicator 2: carbon footprint;
- PAI indicator 3: GHG intensity of investee companies;
- PAI indicator 5: share of non-renewable energy consumption and production;
- PAI indicator 6: energy consumption intensity per high impact climate sector; and
- PAI indicator 13: board gender diversity.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
SONY GROUP CORP	Consumer Discretionary	7.74%	JAPAN
HITACHI LTD	Industrials	7.19%	JAPAN
MITSUBISHI UFJ FINANCIAL GROUP INC	Financials	6.59%	JAPAN
FUJITSU LTD	Information Technology	5.47%	JAPAN
MITSUBISHI ESTATE CO LTD	Real Estate	5.29%	JAPAN
KAJIMA CORP	Industrials	4.42%	JAPAN
TORAY INDUSTRIES INC	Materials	4.34%	JAPAN
RESONA HOLDINGS INC	Financials	3.38%	JAPAN
EBARA CORP	Industrials	3.02%	JAPAN
TOHO CO LTD/TOKYO	Communication Services	2.80%	JAPAN

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

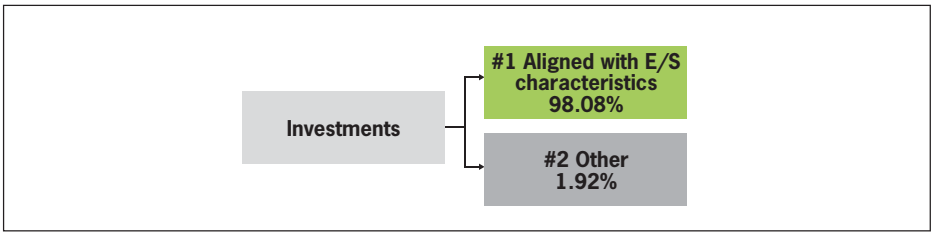
What was the proportion of sustainability-related investments?

98.08% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR")..

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	30.26%
Consumer Discretionary	13.39%
Financials	12.36%
Materials	11.00%
Information Technology	10.13%
Communication Services	6.88%
Real Estate	5.29%
Consumer Staples	3.41%
Energy	3.05%
Health Care	2.31%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	13.67%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. This indicator is therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

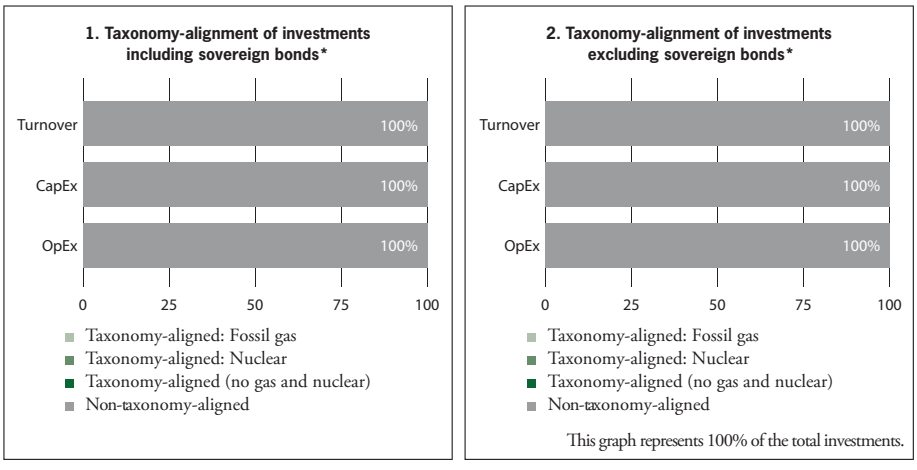
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.92% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Sub-Investment Adviser conducted engagements through dialogue on Business Strategy, Business Structures, Capital Structures, Corporate Governance, Proposals for General Meetings of Shareholders, and ESG issues.

The team focused on "Material ESG issues" which are common to all sectors as well as important issues that are material to individual companies. The Sub-Investment Adviser also conducted stewardship activities such as "Purpose-based dialogues" with companies in order to contribute to the enhancement of corporate value and sustainable growth of investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Japanese Small-Mid Cap Equity Fund**

Legal entity identifier: **254900YCNT4U7C2VHY64**

Reference period: **27 August 2025 to 31 December 2025**

This Fund was launched on 27 August 2025.

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the fund met its environmental and/or social characteristics through the following:

ESG tilt:

The Fund promoted environmental and social characteristics by maintaining a higher ESG score at portfolio level than the sustainability indicator comparison benchmark, according to a proprietary ESG scoring methodology developed by the Investment Adviser[1].

The Investment Adviser monitored the attainment of the environmental and social characteristics promoted by the Fund by monitoring the Fund's ESG score against that of the sustainability indicator comparison benchmark. The proprietary ESG scoring methodology developed by the Investment Adviser is based on external ESG data provided by third party vendors as well as the Investment Adviser's qualitative evaluation of investee companies. To determine the customized ESG score for a company, an industry-adjusted score, provided by a third-party data provider as determined by the Investment Adviser, is used as a quantitative base to reflect the company's ESG performance relative to the standards and performance of the company's industry peers. The Investment Adviser then adjusts this score based on their own qualitative assessment and expectations of how a company's ESG activities may improve corporate value, considering the following criteria:

- Attitude to Engagement;
- ESG Commitment;
- ESG Disclosure;
- Business Strategy including ESG;
- Business Risks from an ESG viewpoint; and
- Expectation for change.

The ESG scores of the Fund's investments are then aggregated at the portfolio level and monitored daily against the ESG score for the sustainability indicator comparison benchmark, which may be subject to similar adjustment by the Investment Adviser based on its own qualitative assessment as described above.

Exclusions:

The Fund promoted:

- the environmental characteristic of contributing towards climate change mitigation by excluding companies involved in thermal coal mining and generation; and
- the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

The Fund also contributed to environmental and social themes by avoiding investments in issuers which experienced severe ESG controversies (and no appropriate remedial action had taken place), or which failed to adhere to certain international norms.

Further detail on the nature of these exclusions is set out in response to the question 'How did the sustainability indicators perform?'.

The fund's sustainability indicator comparison benchmark is the MSCI Japan Small Cap Index.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

[1] Unless otherwise noted, references to the Investment Adviser refer to the Investment Adviser of the Fund and/or any Sub-Investment Advisers engaged for management of the Fund (as appropriate).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
ESG Tilt:		
Portfolio level ESG score which is higher than the sustainability indicator comparison benchmark (shown in the Indicator Threshold column)	5.73	6.39
Exclusions:		
% Fund exposure to investee companies deriving revenue from:		
Thermal coal mining and/or thermal coal power generation (>10% revenue)	0.00%	0.00%
Supply of key products necessary for production of tobacco products & tobacco manufacturing (>5% revenue)	0.00%	0.00%
Adult entertainment (>5% revenue)	0.00%	0.00%
Civilian firearms production (>5% revenue)	0.00%	0.00%
Gambling (>5% revenue)	0.00%	0.00%
% of the Fund exposure to investee companies which:		
Manufacture whole weapon systems, intended use components, or are a majority owner of, or majority owned by, controversial weapons company, including cluster munitions	0.00%	0.00%
% Fund exposure to investee companies which breach International norms:		
Experienced ESG controversies without remedial action	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles	0.00%	0.00%

. . . and compared to previous periods?

Not applicable - this fund was launched on 27 August 2025.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

- The Fund excluded companies which receive a certain percentage of their revenue from thermal coal mining and generation. The Fund therefore partly considers PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded companies which have committed violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development ("OECD") Guidelines for Multinational Enterprises. The Fund therefore considers PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- The Fund excluded companies which have any exposure to controversial weapons. The Fund therefore considered the PAI indicator 14: exposure to controversial weapons.

In addition, the Investment Adviser also engaged with companies on the following PAIs on a materiality basis (i.e., if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer):

- PAI indicator 1: GHG emissions;
- PAI indicator 2: carbon footprint;
- PAI indicator 3: GHG intensity of investee companies;
- PAI indicator 5: share of non-renewable energy consumption and production;
- PAI indicator 6: energy consumption intensity per high impact climate sector; and
- PAI indicator 13: board gender diversity.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 27 August 2025 to 31 December 2025.

Security	Sector	% Assets	Country
YOKOHAMA FINANCIAL GROUP INC	Financials	3.01%	JAPAN

KATITAS CO LTD	Real Estate	2.03%	JAPAN

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

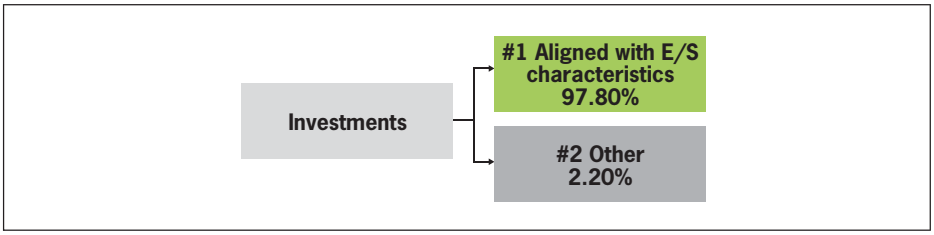
What was the proportion of sustainability-related investments?

97.80% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	23.16%
Consumer Discretionary	23.02%
Information Technology	19.12%
Materials	8.93%
Consumer Staples	7.50%
Financials	5.12%
Communication Services	5.00%
Real Estate	2.03%
Health Care	1.90%
Energy	1.06%
Utilities	0.94%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.65%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. This indicator is therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

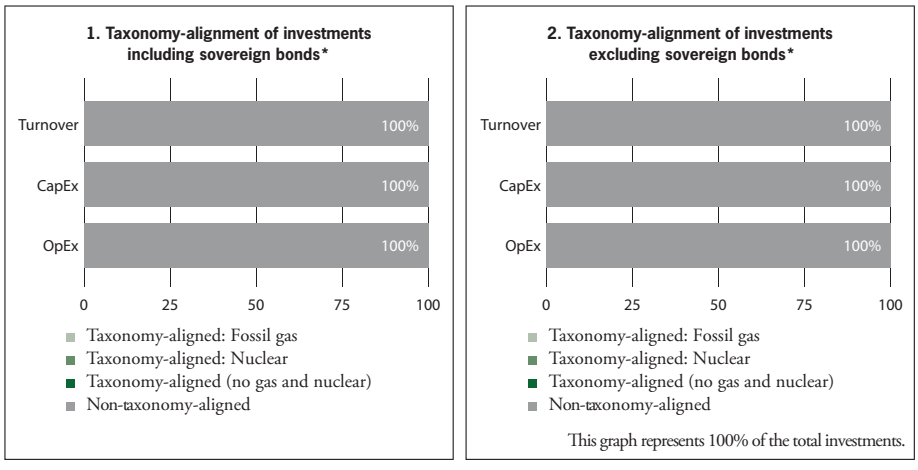
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.20% of the Fund's investments were not aligned with the promoted environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Sub-Investment Adviser conducted engagements through dialogue on Business Strategy, Business Structures, Capital Structures, Corporate Governance, Proposals for General Meetings of Shareholders, and ESG issues.

The team focused on "Material ESG issues" which are common to all sectors as well as important issues that are material to individual companies. The Sub-Investment Adviser also conducted stewardship activities such as "Purpose-based dialogues" with companies in order to contribute to the enhancement of corporate value and sustainable growth of investee companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **NextGen Emerging Markets Fund**

Legal entity identifier: **5493005TO95BBNXCKP66**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, firstly the Fund promoted the environmental characteristic of contributing towards climate change mitigation by seeking to achieve a lower carbon footprint than the MSCI Frontier Emerging Markets Index in aggregate at the portfolio level.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and to human health and well-being, such as tobacco and weapons, by applying binding exclusions. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Sector-based exclusions based on the universe as defined in the prospectus:		
% of the Fund's exposure to issuers whose core business as defined by more than 10% revenues from:		
fossil fuels (until 27 April 2025)[1]	0.00%	0.00%
Thermal coal mining extraction	0.00%	0.00%
Thermal coal-based power generation	0.00%	0.00%
Adult entertainment	0.00%	0.00%
Tobacco	0.00%	0.00%
% of the Fund's exposure to issuers which derive more than 5% revenue from:		
Arctic oil and gas	0.00%	0.00%
Oil sands	0.00%	0.00%
Gambling	0.00%	0.00%
% of the Fund invested in issuers with any tie to:		
Civilian firearms	0.00%	0.00%
Controversial weapons	0.00%	0.00%
% of the Fund invested in the universe's highest carbon emitters, defined as (until 27 April 2025):[1]		
The top 20 emitters by absolute emissions	0.00%	n/a
The top 40 emitters by emissions intensity	0.00%	n/a
% of the Fund invested in state-owned enterprises in universe,, defined by enterprises with >=35% state ownership, excluding the sectors of financials, healthcare and communication services (until 27 April 2025):[1]	0.00%	n/a
% of the Fund invested in the following sectors, as defined by MSCI Global Industry Classification System (until 27 April 2025):[1]		
Utilities sector (excluding renewables & water)	0.00%	n/a
Construction materials	0.00%	n/a
ESG Controversies & International norms exclusions:		
% of the Fund's exposure to issuers which have:		
Committed violations of the UN Guiding Principles, UN Global Compact and the OECD Guidelines for Multinational Enterprises	0.00%	0.00%
An unremediated "Red" ESG controversy	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Lower Carbon Footprint		
Carbon Footprint lower than that of the MSCI Frontier Emerging Markets Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions. The carbon footprint of the index and that of the Fund were:	369.54	49.76
Reference universe reduction:		
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were (until 27 April 2025)[1]:	20.00%	n/a

[1] This indicator was removed from the Fund on 28 April 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period.

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered some of the principal adverse impacts ("PAI") on sustainability factors through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction and thermal coal power generation. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across, all relevant mandatory PAI indicators in the SFDR rules on a materiality basis (i.e., if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Adviser engaged on that PAI).

VIETNAM TECHNOLOGICAL & COMMERCIAL JOINT	Financials	2.82%	VIETNAM
ATTIJARIWAFA BANK	Financials	2.77%	MOROCCO

What was the proportion of sustainability-related investments?

99.25% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

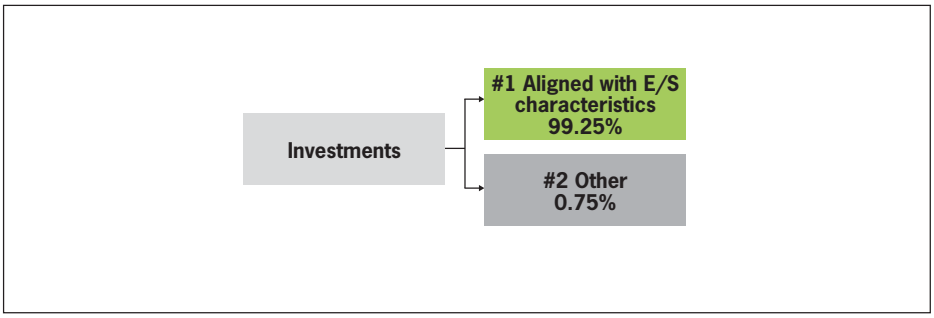
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Frontier Emerging Markets Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

In which economic sectors were the investments made?

Sector	% Assets
Financials	54.32%
Industrials	8.91%
Materials	8.41%
Consumer Discretionary	7.93%
Energy	5.40%
Consumer Staples	5.05%
Communication Services	3.01%
Health Care	2.91%
Information Technology	2.44%
Real Estate	0.88%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.81%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

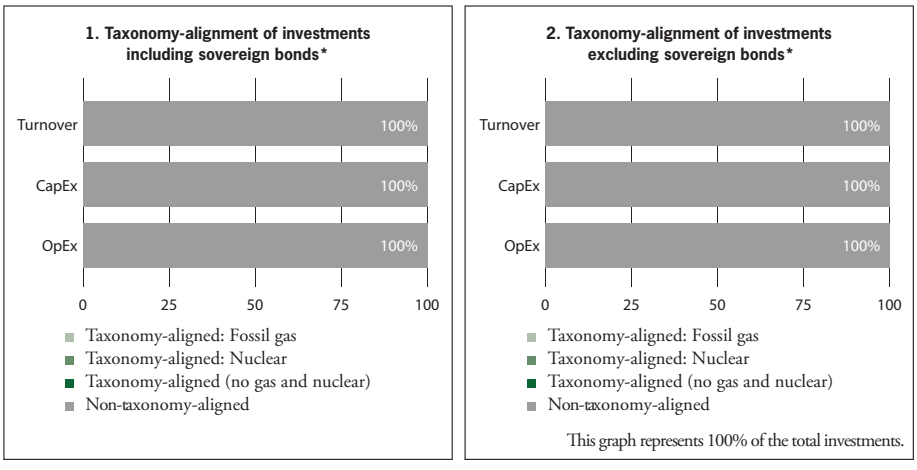
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.75% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments were comprised of cash and derivatives held for efficient portfolio management and/or liquidity purposes. These investments were not subject to minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

In 2025, the Investment Adviser conducted engagements on topics such as decarbonisation, labour management and fair wages.

The Investment Adviser also monitored investments in the Fund according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Quantactive Global Infrastructure Fund**

Legal entity identifier: **549300FWCN1WWNKTBN70**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Throughout the reference period, the Fund promoted environmental and social characteristics by limiting its negative environmental and social externalities by selecting securities with superior ESG profiles using the ISS ESG Corporate Rating ("ISS ESG Rating"). The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the nature of the Fund's environmental and social characteristics are set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
ESG Rating		
Fund's ISS ESG Rating should be higher than the ISS ESG Rating of the investment universe at each rebalancing date at each rebalancing date The Rating of the investment universe, and that of the Fund were:	1.39	1.48
Exclusions		
% Fund exposure to investee companies deriving >10% revenue from:		
Manufacturing or production of tobacco	0.00%	0.00%
Manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Operating gambling activity; and	0.00%	0.00%
Operating adult entertainment	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member	0.00%	0.00%
% Fund exposure to investee companies which:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under "How did the sustainability indicators perform?" above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
ENBRIDGE INC	Energy	4.31%	CANADA

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

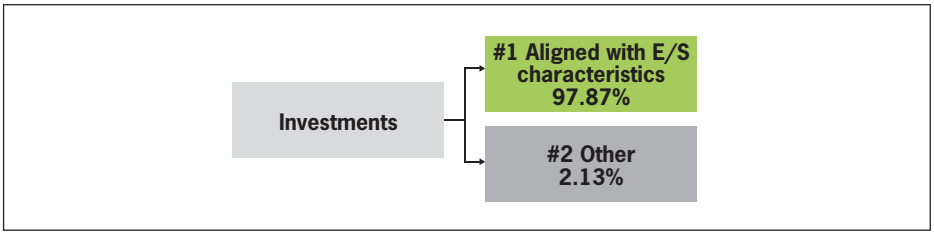
What was the proportion of sustainability-related investments?

97.87% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Utilities	56.80%
Energy	19.57%
Industrials	11.18%
Real Estate	7.30%
Communication Services	3.02%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	65.33%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

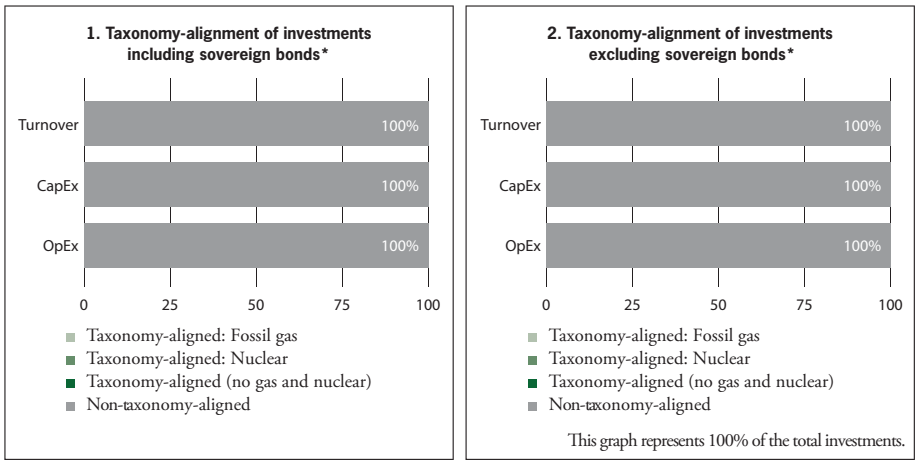
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.13% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised of cash instruments, and were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Quantactive Global Property Fund**

Legal entity identifier: **XBU1PE3KMQXHFSDLPA33**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Throughout the reference period, the Fund promoted environmental and social characteristics by limiting its negative environmental and social externalities by selecting securities with superior ESG profiles using the ISS ESG Corporate Rating ("ISS ESG Rating"). The Fund also excluded certain companies which have experienced notable sustainability-related controversies, or which are in violation of international norms.

Further detail on the Fund's environmental and social characteristics are set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
ESG Rating		
Fund's ISS ESG Rating should be higher than the ISS ESG Rating of the investment universe at each rebalancing date	1.09	1.22
The Rating of the investment universe, and that of the Fund were:		
Exclusions		
% Fund exposure to investee companies deriving >10% revenue from:		
Owning or operating real estate used for for-profit prisons	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%
Manufacturing or production of coal mining	0.00%	0.00%
Manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%
Manufacturing or production of arctic oil & gas	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member, excluding companies located in Japan	0.00%	0.00%
% Fund exposure to investee companies which:		
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
ESG Rating				
Fund's ISS ESG Rating should be higher than the ISS ESG Rating of the investment universe at each rebalancing date (from 06 December 2024)		n/a	n/a	2.17 *(Fund)*
The Rating of the investment universe, and that of the Fund were:				1.52 *(Universe)*
Exclusions				
% Fund exposure to investee companies deriving >10% revenue from:				
Owning or operating real estate used for for-profit prisons	0.00%	0.00%	0.00%	0.00%
Owning or operating real estate used to manufacture cannabis	0.00%	0.00%	0.00%	0.00%
Manufacturing or production of tobacco	0.00%	0.00%	0.00%	0.00%
Manufacturing or production of coal mining	0.00%	0.00%	0.00%	0.00%
Manufacturing or production of controversial weapons & civilian firearms	0.00%	0.00%	0.00%	0.00%
Manufacturing or production of arctic oil & gas	0.00%	0.00%	0.00%	0.00%
% Fund exposure to investee companies that do not have at least one female board member, excluding companies located in Japan (from 26 July 2023)	0.00%	0.00%	0.00%	0.00%
% Fund exposure to investee companies which:				
Have experienced a notable and severe sustainability-related controversy related to their operations/products, unless the Investment Adviser considers the company was taking steps for material remediation and improvement	0.00%	0.00%	0.00%	0.00%
Failed to comply with UN Global Compact or ILO fundamental principles, unless the Investment Adviser considers that the company was taking steps for material remediation and improvement	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

As described under "How did the sustainability indicators perform?" above, the Fund did not knowingly invest in companies that fail to comply with the UN Global Compact or the ILO fundamental principles, unless the Investment Adviser considered that the company was taking appropriate steps for material remediation and improvement.

The Fund therefore considered in part, principal adverse impact indicator number 10: violations of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
Welltower Inc	Health Care	7.07%	UNITED STATES
PROLOGIS INC	Industrial	5.28%	UNITED STATES
EQUINIX INC	Data Centers	3.93%	UNITED STATES
GOODMAN GROUP	Diversified	3.11%	AUSTRALIA
VENTAS INC	Health Care	2.91%	UNITED STATES

SINO LAND CO LTD	Diversified	1.94%	HONG KONG

% Assets are calculated based on the Fund's investments at year-end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

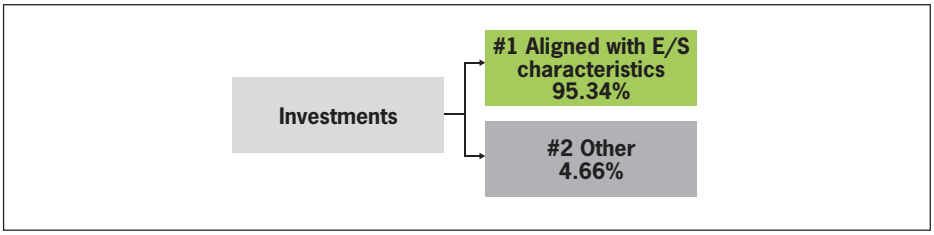
What was the proportion of sustainability-related investments?

95.34% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were in cash instruments which did not align with the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Diversified	34.78%
Health Care	15.82%
Residential	10.86%
Retail	10.82%
Data Centers	6.23%
Industrial	6.01%
Office	3.87%
Specialty	3.33%
Self Storage	2.88%
Lodging/Resorts	0.75%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	1.60%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

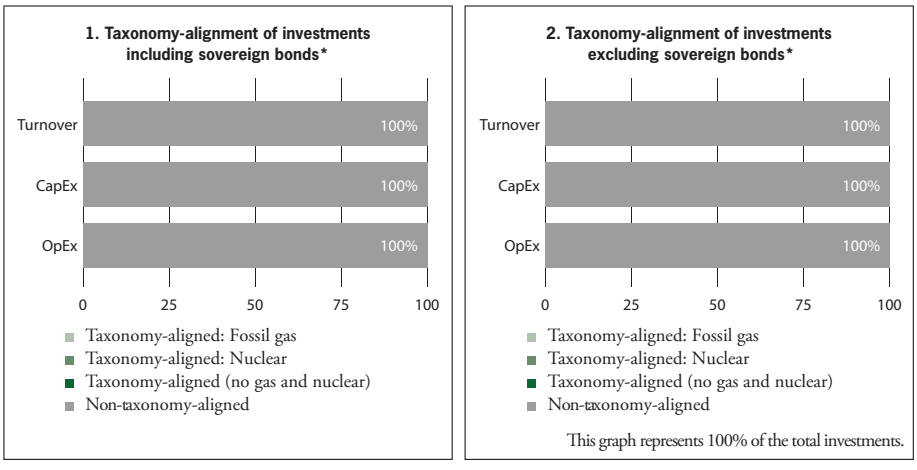
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

4.66% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments which were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted environmental and social characteristics in the following ways.

Firstly, a proportion of the Fund's portfolio was thematically aligned towards sustainable development in one of the Investment Adviser's chosen environmental and social sub-themes, which were:

- responsible energy;
- sustainable production and circular economy;
- decent work and innovation; and
- access, affordability, and sustainable economic growth.

Secondly, the Fund avoided investments in certain industries with the potential to cause harm to the environmental and social characteristics described above by applying binding exclusions.

Thirdly, having regard to the low carbon aims of the Paris Agreement the Fund promoted the environmental characteristic of maintaining a lower carbon footprint than the MSCI Emerging Markets Index in aggregate at the portfolio level.

Finally, the Fund invested 40.63% of its portfolio in sustainable investments.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

an unremediated "Red" ESG controversy	0.00%	0.00%	0.00%	0.00%
Lower Carbon Footprint:				
Carbon Footprint lower than that of the MSCI AC Asia ex Japan Index. Measured by weighted average carbon intensity, Scope 1 and 2 emissions.	See relevant year	130.50 (Fund) 322.60 *(MSCI EM Index)*	124.60 (Fund) 321.35 *(MSCI EM Index)*	84.16 (Fund) 332.48 *(MSCI EM Index)*
Sustainable Investments:				
% of the Fund that are sustainable investments	20.00%	43.84%	37.79%	33.48%
Reference universe reduction:				
The Investment Adviser aimed for a certain % reduction of the reference universe by the binding exclusions described above. The target % universe reduction, and the actual % universe reduction caused by the exclusions were:	20.00%	21.90%*	22.82%*	24.54%*

* Calculated based on the number of stocks in the universe (as defined in the prospectus).

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to at least one of the environmental or social sub-themes listed above. The Investment Adviser used metrics to ensure that the sustainable investments contribute to at least one of these themes, for example:

- by considering quantifiable positive metrics such as aligned revenues (being revenues from activities aligned with a theme, e.g. revenues from renewable energy generation in the case of the responsible energy theme) and aligned business activities; and
- other relevant metrics such as customer composition, Transitions Performance Index ("TPI") scores, above average wages, employee retention rates, research and development spend, international sales or private label sales (as indicators of investment in local economic growth and quality employment opportunities), diversity metrics such as women in the workforce or management, and operational metrics relating to inclusion or access to financial services communications or healthcare.

Each metric had a threshold or benchmark that the company met in order to be considered aligned with a sustainability theme, e.g. at least 20% for aligned revenues or above country or industry averages on other metrics. Further detail regarding the relevant metrics for each sub-theme is set out under "How did the sustainability indicators perform?" above.

The Investment Adviser obtained data on these metrics from company reporting and third party sources.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the do no significant harm test for sustainable investments, the Fund assessed the mandatory PAI indicators that are (i) relevant to the investment, and (ii) deemed material to a particular issuer, based on third party data providers' assessment of materiality.

Companies with two missing PAI indicator data points were not considered sustainable investments due to lack of data.

For each mandatory PAI the Fund set thresholds specific to that PAI to determine whether significant harm was caused.

PAI indicators were sourced from company reported data, third party data and the investment team's engagements with company management. The Investment Adviser used third party information, and supplemented individual data points based on company engagements or company websites in certain cases.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third party data vendor which measured workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's investments were screened for minimum social safeguards, before going through the PAI screen described above.

The Investment Adviser used third party data sources to undertake minimum social safeguards screening. The screening undertaken included identification of companies which are subject to UNGC and OECD controversy and compliance flags, as well as flags for compliance with international norms. In addition, the Fund excluded investments in issuers that fail to comply with the UN Global Compact, or the OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above. The portion of the Fund that is not made of sustainable investments considered certain PAI through the Fund's exclusionary criteria as follows:

- The Fund excluded issuers whose core business is in thermal coal mining and extraction, thermal coal power generation and fossil fuels. The Fund therefore partly considered PAI indicator number 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derive any revenue from controversial weapons manufacturing or retail. The Fund therefore considered PAI indicator number 14: exposure to controversial weapons.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

Lastly, the Fund considered and, where relevant engaged with issuers across all relevant mandatory PAI indicators in the SFDR rules on a materiality basis, meaning if the Investment Adviser considered a particular PAI indicator to be materially relevant to, or impacted by, the activities of the issuer, the Investment Advisor engaged on that PAI.

HDFC BANK LTD	Financials	1.63%	INDIA
CAPITEC BANK HOLDINGS LTD	Financials	1.61%	SOUTH AFRICA
WIWYNN CORP	Information Technology	1.58%	TAIWAN

What was the proportion of sustainability-related investments?

97.08% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

40.63% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

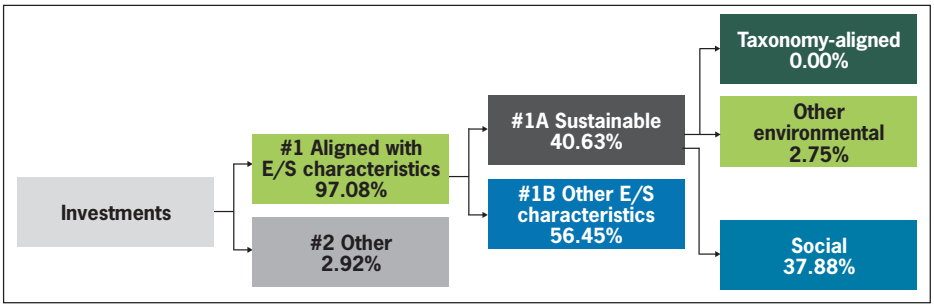
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

– The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

– The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's aim to maintain a lower carbon footprint than the MSCI Emerging Markets Index is applied at a portfolio level (and not at the level of individual holdings, some of which may on an individual basis have a higher carbon intensity than the portfolio-level average or target).

The Fund's methodology for categorising investments as sustainable investments assesses the investment's overall alignment to one or more environmental or social themes. The Fund has used this approach to classify its investments as either social or environmental sustainable investments in this section. However, please note that investments classified as social or environmental sustainable investments may also be making a contribution to environmental or social objectives respectively.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	32.00%
Financials	22.97%
Consumer Discretionary	14.57%
Communication Services	7.39%
Industrials	5.50%
Consumer Staples	4.66%
Materials	3.89%
Health Care	3.49%
Energy	2.18%
Real Estate	0.90%
Utilities	0.50%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.61%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

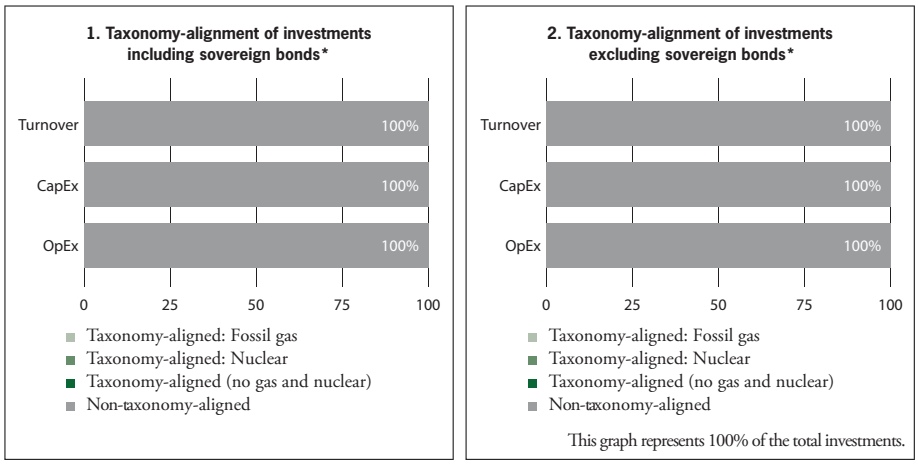
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

2.75% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

37.88% of the Fund's investments were sustainable investments with a social objective during the reference period.

As noted above, this Fund has categorised investments as having either environmental or social objectives for the purposes of this report. However, please note that the sustainable investments with a social objective may additionally exhibit environmental characteristics.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.92% of the Fund's investments were comprised of (i) companies with no sustainable theme or where a dedicated company engagement to supplement data points has not yet been completed, (ii) hedging instruments and/or (iii) cash held for ancillary liquidity. These investments were not subject to minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

In 2025, the Investment Adviser conducted engagements on topics such as decarbonisation, labour management and fair wages.

In addition, the Investment Adviser seeks portfolio alignment with environmental and social themes including access and affordability, responsible energy transition, circular economy and sustainable production and decent work and innovation.

The Investment Adviser also monitored investments in the Fund according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Tailwinds Fund**

Legal entity identifier: **254900DUO6ANON66OY60**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

As at 31 December 2025 (continued)

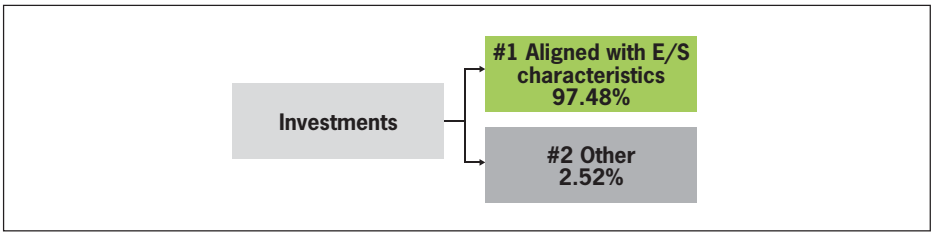
What was the proportion of sustainability-related investments?

97.48% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	24.96%
Information Technology	22.43%
Financials	15.92%
Health Care	9.95%
Consumer Discretionary	9.70%
Materials	5.43%
Consumer Staples	4.01%
Communication Services	2.38%
Energy	1.44%
Real Estate	1.26%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.28%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

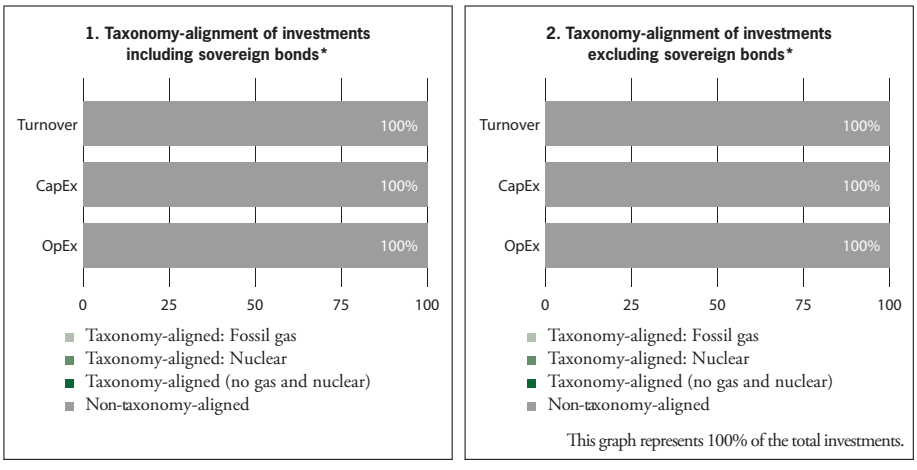
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.52% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue or capital expenditure alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **US Advantage Fund**

Legal entity identifier: **2NPFP4LYIICQVCUT1Q64**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	9.55%	UNITED STATES
TESLA INC	Consumer Discretionary	8.33%	UNITED STATES
SHOPIFY INC	Information Technology	7.53%	CANADA
ROYALTY PHARMA PLC	Health Care	5.60%	UNITED STATES
AIRBNB INC	Consumer Discretionary	5.49%	UNITED STATES
DOORDASH INC	Consumer Discretionary	4.84%	UNITED STATES
SNOWFLAKE INC	Information Technology	4.73%	UNITED STATES
CROWDSTRIKE HOLDINGS INC	Information Technology	4.72%	UNITED STATES

% Assets are calculated based on the Fund's investments at year-end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

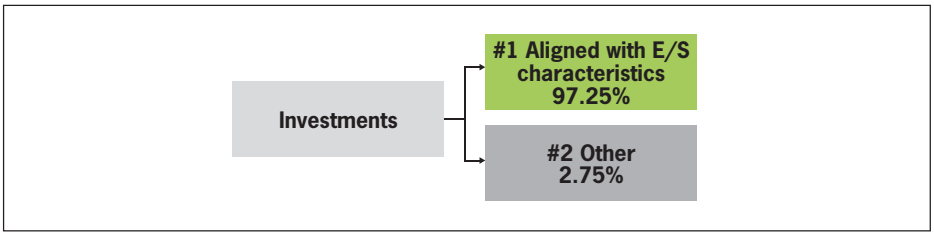
What was the proportion of sustainability-related investments?

97.25% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	39.18%
Consumer Discretionary	23.67%
Health Care	14.23%
Financials	7.38%
Communication Services	6.67%
Industrials	5.06%
Real Estate	1.07%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.45%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

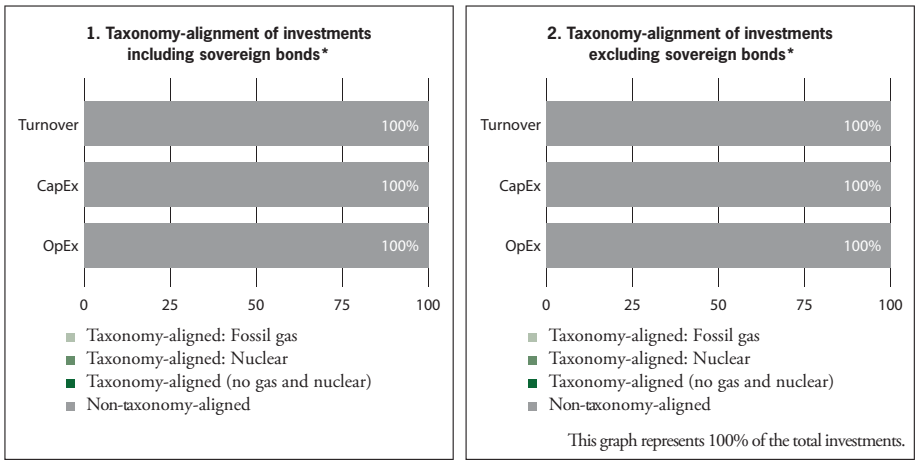
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	9.62%	UNITED STATES
TESLA INC	Consumer Discretionary	9.58%	UNITED STATES
APPLOVIN CORP	Information Technology	7.93%	UNITED STATES
AFFIRM HOLDINGS INC	Financials	7.16%	UNITED STATES
ROYALTY PHARMA PLC	Health Care	4.89%	UNITED STATES
DOORDASH INC	Consumer Discretionary	4.84%	UNITED STATES
SHOPIFY INC	Information Technology	4.72%	CANADA
QXO INC	Industrials	4.65%	UNITED STATES

% Assets are calculated based on the Fund's investments at year-end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

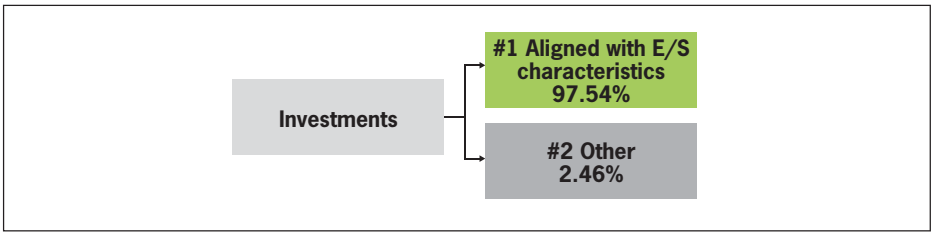
What was the proportion of sustainability-related investments?

97.54% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	40.27%
Consumer Discretionary	20.28%
Health Care	11.35%
Financials	10.96%
Industrials	7.44%
Communication Services	6.10%
Real Estate	1.15%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.67%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

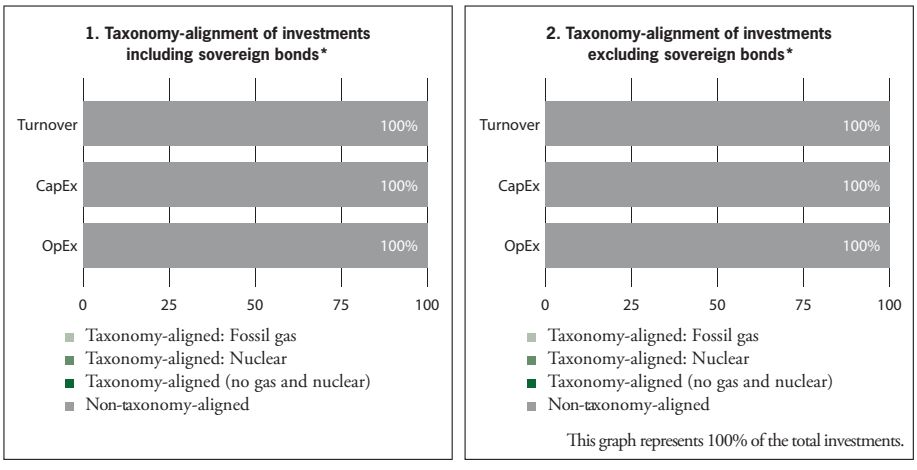
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.46% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue or capital expenditure alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **US Insight Fund**

Legal entity identifier: **549300ZCDS88ZDMP4R16**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund invested in companies whose GICS sub-industry is:				
Tobacco	0.00%	0.00%	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies which derive revenue from:				
Tobacco (>5% recent year revenue)	0.00%	0.00%	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund invested in companies whose GICS sub-industry is:				
Tobacco	0.00%	0.00%	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies which derive revenue from:				
Tobacco (>5% recent year revenue)	0.00%	0.00%	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
CLOUDFLARE INC	Information Technology	9.44%	UNITED STATES
ROYALTY PHARMA PLC	Health Care	6.64%	UNITED STATES
QXO INC	Industrials	6.39%	UNITED STATES
ROYAL GOLD INC	Materials	6.15%	UNITED STATES
CORE & MAIN INC	Industrials	4.93%	UNITED STATES
LVMH MOET HENNESSY LOUIS VUITTON SE	Consumer Discretionary	4.90%	FRANCE
UNION PACIFIC CORP	Industrials	4.82%	UNITED STATES
FLOOR & DECOR HOLDINGS INC	Consumer Discretionary	4.51%	UNITED STATES
AMERICAN TOWER CORP	Real Estate	3.51%	UNITED STATES

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

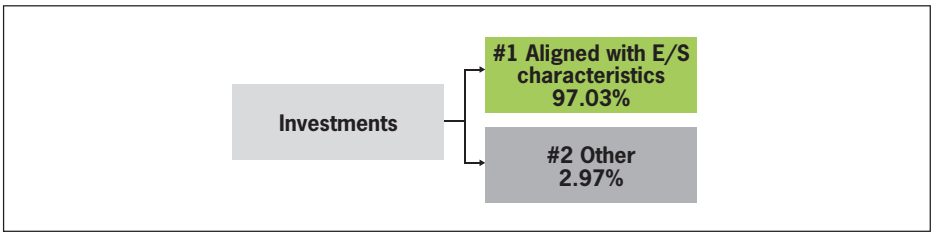
What was the proportion of sustainability-related investments?

97.03% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Industrials	21.19%
Consumer Discretionary	17.85%
Information Technology	14.19%
Health Care	12.02%
Financials	10.75%
Materials	8.46%
Real Estate	7.32%
Consumer Staples	4.10%
Communication Services	0.62%
Energy	0.52%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	9.24%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

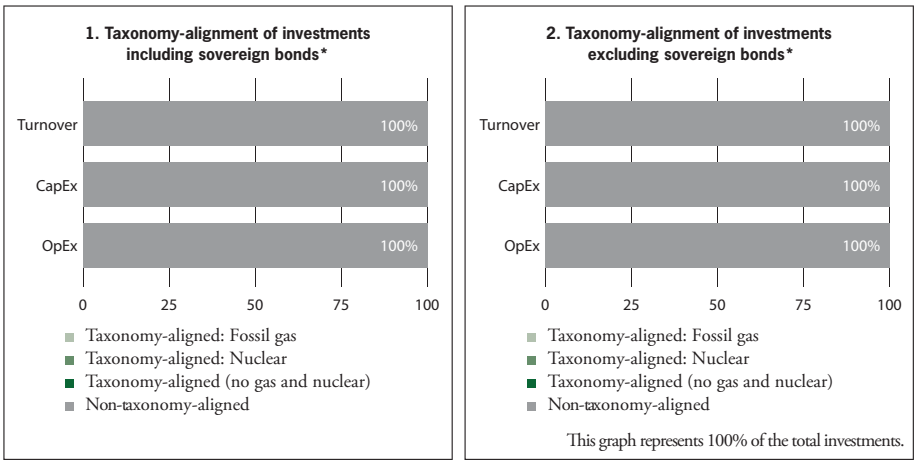
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.97% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue or capital expenditure alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **US Value Fund**

Legal entity identifier: **549300RD1Y0V6O4C3B19**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics.

- The Fund promotes the environmental characteristic of limiting environmental externalities by excluding investments in coal mining, arctic drilling, and nuclear power.
- The Fund promotes the social characteristic of limiting exposure to investments in certain activities which can cause harm to human health and wellbeing, including tobacco, gambling, civilian firearms, controversial weapons, and white phosphorous. Finally, Companies that fail to comply with the UN Global Compact or have experienced severe controversies without material remediation and improvement will also be excluded.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
% of the Fund's exposure to companies which derived revenue from or were involved with:		
Tobacco (>5% revenue)	0.00%	0.00%
Gambling (>5% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Controversial weapons (Any tie)	0.00%	0.00%
Coal mining (>0% revenue)	0.00%	0.00%

Failed to comply with the UN Global Compact	0.00%	n/a	0.00%	0.00%
Experienced severe controversies without material remediation and improvement	0.00%	n/a	0.00%	0.00%

The Fund's classification as Article 8 under SFDR became effective on 27 December 2023.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through application of the Fund's exclusionary criteria:

- The Fund excluded companies which derive any revenue from thermal coal mining and arctic drilling. Through these exclusions, the Fund therefore considered in part PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded companies which fail to comply with the UN Global Compact or have experienced severe controversies, without material remediation and improvement. The Fund therefore considered PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded companies which derived any revenue from controversial weapons. The Fund therefore considered PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country

ABBOTT LABORATORIES	Health Care	2.76%	UNITED STATES
SALESFORCE INC	Information Technology	2.74%	UNITED STATES

% Assets are calculated based on the Fund's investments at year-end during the reference period.

What was the proportion of sustainability-related investments?

98.22% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

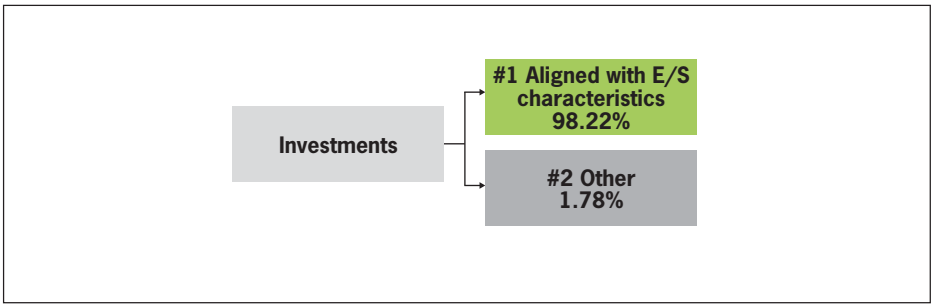
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Financials	24.36%
Information Technology	11.01%
Industrials	10.78%
Health Care	10.65%
Communication Services	10.57%
Consumer Discretionary	8.50%
Consumer Staples	6.04%
Energy	6.01%
Materials	4.62%
Utilities	3.75%
Real Estate	1.93%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	14.01%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the fossil fuel exclusions applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

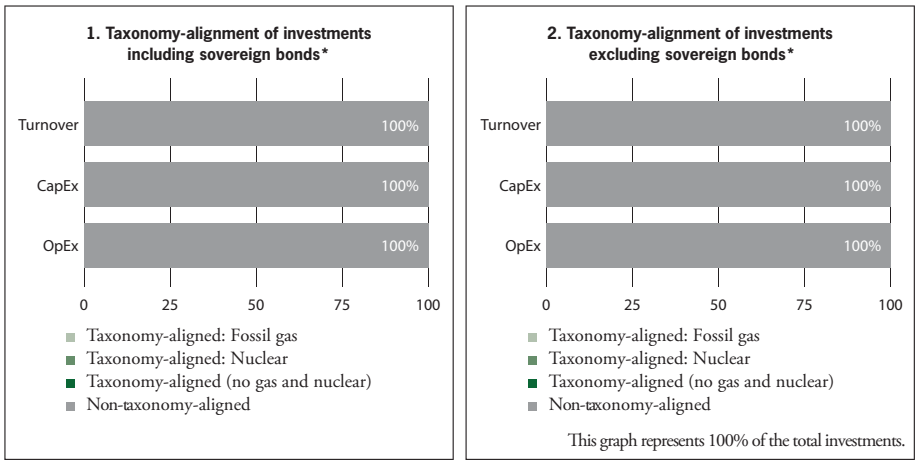
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.78% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash and derivatives which were used for efficient portfolio management and currency management. These instruments were not subject to environmental and/or social screening or any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Adviser monitored investments in the Fund according to the Fund's environmental and social characteristics.

The investment team engages with companies' management teams on ESG issues that are central to the Fund's underlying fundamental thesis through direct dialogue with companies.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Vitality Fund**

Legal entity identifier: **5493007UKKJN3WEI4Y14**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- the Fund promoted the environmental characteristic of limiting environmental externalities by excluding investments in thermal coal; and
- the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, including tobacco and certain weapons, comprising civilian firearms, cluster munitions and anti-personnel mines.

Further detail on the nature of these exclusions is set out below (in response to the question "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund invested in companies whose GICS sub-industry is:		
Tobacco	0.00%	0.00%
Coal & Consumable Fuels	0.00%	0.00%
% Fund invested in companies which derive revenue from:		
Tobacco (>5% recent year revenue)	0.00%	0.00%
Thermal Coal (>10% recent year revenue)	0.00%	0.00%
Manufacture of Civilian Firearms and ammunition (>10% recent year revenue)	0.00%	0.00%
% Fund invested in companies involved, through corporate ownership, in manufacturing the core weapon system or components/services of the core weapon system that are considered tailor-made and essential for the lethal use of cluster munitions & anti-personnel mines	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following principal adverse impacts ("PAI") indicators on sustainability factors through the Fund's exclusions:

The Fund excluded issuers which receive a certain percentage of their revenue from coal mining and extraction. The Fund therefore partly considered the PAI indicator (4) exposure to companies active in the fossil fuel sector.

The Fund excluded issuers involved in manufacturing the core weapon system of cluster munitions and anti-personnel mines. The Fund therefore partly considered the PAI indicator (14) exposure to controversial weapons.

Where the Investment Adviser considered the following PAI indicators to be materially relevant to, or impacted by, the activities of the issuer, it also considered the following PAIs on sustainability factors. This was done by the Investment Advisor:

- integrating ESG analysis within the research process and/or
- engaging with management of investee companies.

The PAIs considered are the following:

- PAI indicator (1): Greenhouse gas emissions (GHG);
- PAI indicator (3): GHG intensity;
- PAI indicator (5): Non-Renewable energy consumption and production; and
- PAI indicator (6): Energy consumption intensity per high impact climate sector.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
EXACT SCIENCES CORP	Health Care	9.77%	UNITED STATES
ARGENX SE	Health Care	8.62%	BELGIUM
Eli Lilly & Co	Health Care	8.50%	UNITED STATES
ALNYLAM PHARMACEUTICALS INC	Health Care	4.71%	UNITED STATES
ASCENDIS PHARMA A/S	Health Care	4.66%	DENMARK
THERMO FISHER SCIENTIFIC INC	Health Care	4.59%	UNITED STATES
STRUCTURE THERAPEUTICS INC	Health Care	4.52%	CHINA
CERIBELL INC	Health Care	3.75%	UNITED STATES
NEWAMSTERDAM PHARMA CO NV	Health Care	3.57%	UNITED STATES

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

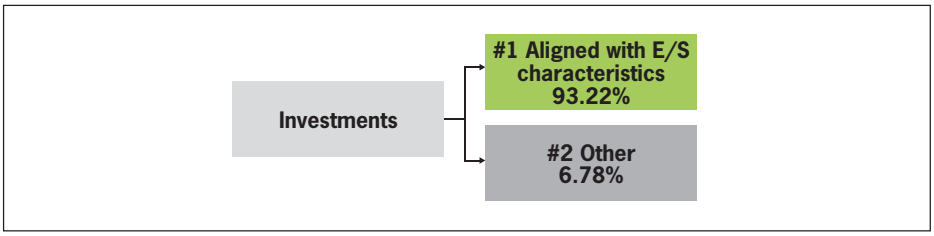
What was the proportion of sustainability-related investments?

93.22% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Health Care	93.22%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

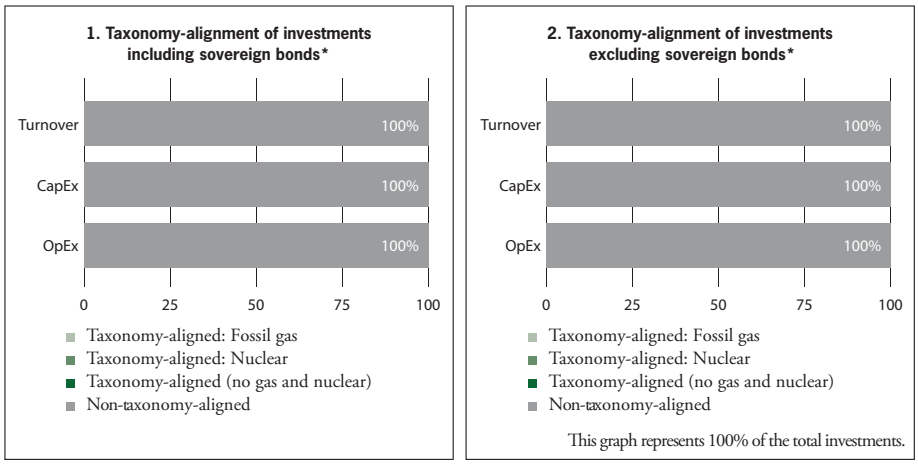
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

6.78% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics to avoid any new investments in companies that were involved in excluded activities, or existing companies that may have initiated excluded activities. Additionally, the Investment Adviser engaged companies' management on topics specific to each business with a focus on material ESG risks and opportunities that may have impacted the value of a company's securities.

The Investment Manager utilised its "SR Tailwinds" Framework to classify business activities of investee companies (such as the allocation of company resources or the production of goods and services) according to sustainability tailwinds (such as Tailwind 5: Resource Efficiency, Upstream Opportunities). This enabled the investment team to understand whether the investee companies are creating financial value and positive externalities that can benefit society. In addition, this organising framework helped the investment team categorise and be more descriptive on how the company's financial value is enhanced or diminished by a business' effect on people, planet or systems.

Additionally, the Investment Adviser set out to approximate revenue or capital expenditure alignment for each portfolio company and their respective SR Tailwinds to help the Investment Adviser estimate the materiality of the opportunity that the tailwinds presented each holding, which in turn helped the Investment Adviser understand the prevalence of each SR Tailwind at the portfolio level. This analysis was conducted in addition to traditional fundamental analysis and stewardship activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Global Green Bond Fund**

Legal entity identifier: **549300Q43ZZQCDYRE581**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ Yes	☐ No
☒ It made **sustainable investments with an environmental objective: 94.58%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☒ It made **sustainable investments with a social objective: 3.91%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent was the sustainable investment objective of this financial product met?

During the reference period, the Fund attained its sustainable investment objective by investing in certain types of bonds, which included the following instruments:

- bonds that were labelled "Green" by the issuer, whose proceeds are targeted to environmentally beneficial projects;
- Sustainability Bonds, with a proportion of the proceeds targeted to environmentally beneficial projects;
- Sustainability-linked Bonds, with environmental key performance indicators and targets;
- bonds of issuers that sought to provide environmental solutions or that demonstrated environmental sustainability leadership; or
- bonds which were deemed by Calvert to make a significant social positive contribution either through the issuer's products and services or through its practices or through the specific projects or investments financed by the bond issue. Such investments may include labelled Social Bonds, with proceeds allocated to projects focussed on positive social outcomes and / or target populations, or labelled Sustainability-linked Bonds with social key performance indicators and targets.

The above bonds may or may not be labelled as green, sustainable, transition, or social bonds by external labelling regimes.

Where investments did not meet the Fund's sustainable investment objective, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	98.50%
Fund investments deemed eligible according to its Sustainable Bond Evaluation framework, by receiving a score of at least three (on a scale of one to five, where five is best. The percentage of Fund investments which the Investment Adviser aimed to be deemed eligible according to its Sustainable Bond Evaluation Framework, and the actual percentage of Fund investments which met these criteria were:	90.00%	98.50%
Exclusions:

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
% Fund exposure to corporate issuers experiencing significant ESG controversies or violations of international norms* without evidence of material remediation and improvement - *UNGC, ILO Fundamental Principles, OECD Guidelines for Multinational Enterprises, UNGP on Business and Human Rights	0.00%	0.00%	0.00%	0.00%
Sovereign:				
% Fund exposure to sovereign issuers in bottom-10% ranked countries for social violations, without evidence of positive momentum (from 23 August 2024)	0.00%	n/a	n/a	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

In Q2 and Q3 2024, the Fund held investments that became non-compliant with the Fund's sustainable investment objective. This was either as a result of certain underlying ESG indicators' values changing, or non-compliance with the Investment Adviser's Sustainable Bond Evaluation Framework. The Investment Adviser rectified these exceptions by selling the holdings within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser tested all of the Fund's investments against the PAI indicators which are mandatory to consider under SFDR. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The Investment Adviser sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the Investment Adviser was supplemented with best available proxy indicators or qualitative analysis.

The Investment Adviser applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm. Thresholds were reviewed annually based on a large investable universe.

In cases where the PAI methodology suggested an investment may be causing significant harm, the Investment Adviser conducted additional desktop research to verify the accuracy of the data point

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the Investment Adviser concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the Investment Adviser believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

Where the Investment Adviser determined that a held issuer was causing significant harm according to one or multiple PAIs, it was removed from the portfolio on a reasonable timeline, taking into consideration the best interests of the shareholders of the Fund.

The Investment Adviser's use of proxy indicators will be kept under review and will be replaced by more specific PAI indicators from third-party data providers, when the Investment Adviser determines that sufficiently reliable data has become available.

Calvert generally conducted the PAI assessment at the issuer level. However, where appropriate the assessment was done at security level in whole or in part. For instance, in the case of green and sustainability use of proceeds bonds, the PAI indicators that are directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through Calvert's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond that has a negative assessment under the PAI indicators related to carbon intensity, yet where the issuer has been evaluated by Calvert to have a credible strategy to reduce its GHG emissions, and where the Green Bond purchased specifically contributes towards such goal, would be eligible for investment. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Calvert monitored business practices on an ongoing basis, through data on ESG controversies and standards screening sourced from third party providers. Calvert made assessments on controversy cases, using information from relevant ESG data providers, that it viewed as significant, and on failures to comply with the UN Global Compact (UNGC) Principles, the UN Guiding Principles on Business and Human Rights, the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises or the International Labour Organization (ILO) Fundamental Principles.

The Fund excluded companies with evidence of violations of any of the global norms listed above and without evidence of material remediation and improvement. Calvert maintained its own determination of significant ESG controversies and violations of UNGC Principles, informed by data sourced from third party providers.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund took the mandatory PAI indicators into account for all its sustainable investments using a combination of qualitative and quantitative criteria, as explained above in response to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the proportion of sustainability-related investments?

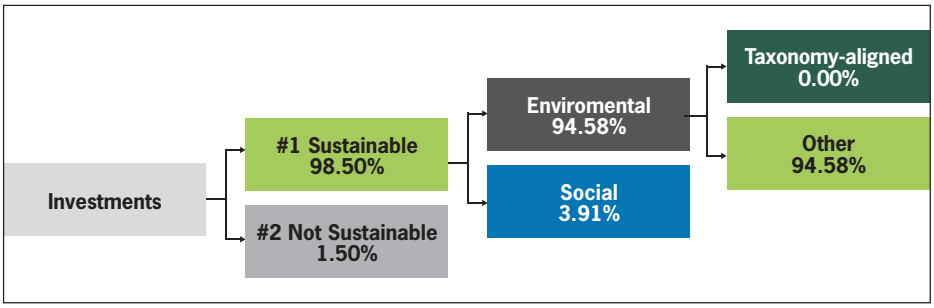
98.50% of the Fund's investments were sustainable investments.

94.58% of the Fund comprised sustainable investments with an environmental objective.

3.91% of the Fund comprised sustainable investments with a social objective.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	30.54%
Utilities	18.80%
Securitized	16.63%
Sovereigns	11.24%
Real Estate	6.04%
Supranationals & Agencies	5.41%
Communication Services	3.91%
Industrials	3.00%
Consumer Discretionary	1.42%
Materials	0.60%
Information Technology	0.54%
Health Care	0.39%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The investments in this Fund include primarily green and sustainability use of proceeds bonds, which contribute to environmental projects that help reduce GHG emissions associated with fossil fuels. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures two issuers deriving some revenue from such activities as part of their business. Of those two investments, one is a sustainability-linked bond with a commitment by the issuer to reduce its GHG emissions and increase renewable energy capacity, and the other one is a pure-play renewable energy company, with minimal revenue exposure to fossil fuel power generation.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

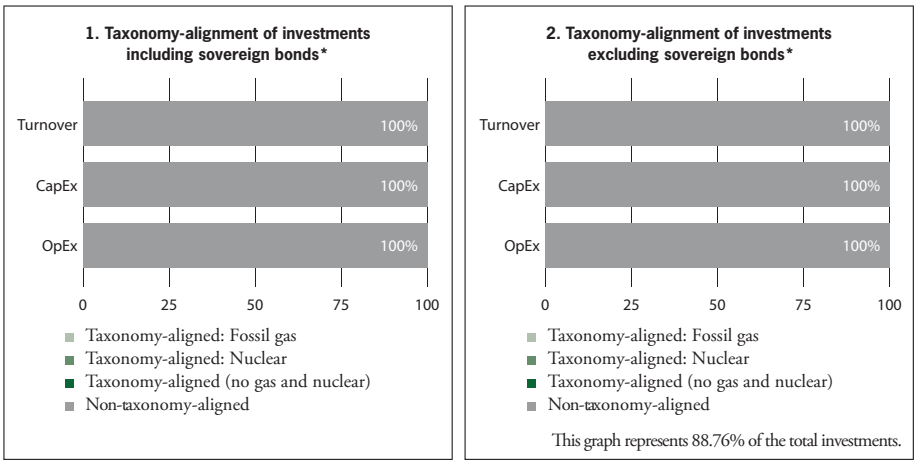
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

94.58% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives.

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Additionally, as noted above, some sustainable investments which the Investment Adviser has assessed and reported as having an environmental objective may additionally exhibit social characteristics.

What was the share of socially sustainable investments?

3.91% of the Fund's investments were sustainable investments with a social objective.

As noted above, some sustainable investments which the Investment Adviser has assessed and reported as having a social objective may additionally exhibit environmental characteristics.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

1.50% of the Fund's investments were not aligned with the sustainable investment objective of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the sustainable investment objective during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's sustainable investment objective. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to issuers becoming non-compliant with the Fund's sustainable investment objective. The Investment Adviser sold these holdings within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Global High Yield Bond Fund**

Legal entity identifier: **254900B55Q8A1KYLJN18**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- **Eligibility in line with Principles-based ESG Materiality Framework:** Through the application of the Calvert Principles for Responsible Investment (the "Calvert Principles"), the Fund promoted environmental sustainability and resource efficiency, equitable societies and respect for human rights, in addition to accountable governance and transparent operations. The Calvert Principles assess investee company activities and behaviours across a number of ESG themes deemed to be material by Calvert, and only issuers whose business practices and governance structure assessed to be consistent with the Calvert Principles were eligible for inclusion in the Fund's portfolio.
- **Low carbon intensity and portfolio-level decarbonisation:** The Fund promoted the environmental characteristic of climate change mitigation by:
  - maintaining a lower carbon intensity than the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index (USD-hedged); and
  - aiming to reduce the Fund's portfolio-level carbon intensity by 50% by year-end 2030, compared to March 30, 2022.
- **Exclusions:** The Fund promoted the environmental characteristic of avoiding investments in thermal coal and other types of unconventional oil & gas activities, and the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform").
- **Sustainable Investments:** 33.20% of the Fund's investments were sustainable investments in issuers which contribute to specific environmental or social objectives, based on Calvert's assessment, as further described under the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Alignment with Principles-based ESG Materiality Framework		
% Fund exposure to issuers that are aligned with the Calvert Principles:	80.00%	97.38%
Carbon intensity		
The Fund's corporate investments will maintain a lower carbon intensity than the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index (USD-hedged). Carbon intensity is measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO2e/US$ million revenue. The carbon intensity of the Index and that of the Fund were:	213.99	139.59
The Fund aims to reduce its portfolio level WACI by 50% by year-end 2030, compared to the baseline of 30 March 2022. The WACI of the baseline is 400.88 tons CO2e/US$ million revenue. While the binding element of this environmental characteristic refers to the year 2030, the Investment Adviser pursues a yearly decarbonisation pathway to achieve this longer-term target, and to correct any potential deviations from such pathway. The Fund's annual decarbonisation rate for year-end 2025 is:	n/a	-26.38%
The Fund's cumulative decarbonisation rate since 30 March 2022 is:	-50% by 2030	-65.18%
Exclusions:		
Corporates:		
% of the Fund's exposure to issuers which derive revenue from:		
Controversial weapons manufacturing or retail (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Civilian firearms manufacturing or retail (>5% revenue)	0.00%	0.00%
Gambling (>10% revenue)	0.00%	0.00%
Tobacco retail and distribution (>10% revenue)	0.00%	0.00%
Thermal and metallurgical coal exploration,mining, extraction, manufacturing or distribution (>1% revenue) (from 1 April 2025)	0.00%	0.00%
Military or conventional weapons, or weapons systems manufacturing or retail (>10% revenue) (from 1 April 2025)	0.00%	0.00%
Oil sands exploration or production (>5% revenue) (from 1 April 2025)	0.00%	0.00%
Arctic oil exploration or production (>5% revenue) (from 1 April 2025)	0.00%	0.00%
Thermal coal-power generation (>10% revenue from 1 April 2025)	0.00%	0.00%
% Fund exposure to corporate issuers experiencing very severe ESG controversies	0.00%	0.00%
Sustainable Investments		
% Fund investments that are sustainable investments	30.00%	33.20%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

% Fund investments that are sustainable investments	30.00%	n/a	44.49%	39.45%

The Fund launched on 28 November 2023.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

The Fund's decarbonisation pathway represents a continuation of a previous Sustainable Global High Yield Strategy, and therefore the baseline WACI of the Fund's binding characteristic has been calculated by reference to a specified high yield portfolio as of 30 March 2022 (consistent with the previous Sustainable Global High Yield Strategy). This Fund's assets have continued, and will continue, to be managed in line with the original Sustainable Global High Yield Strategy decarbonisation pathway, however, a portion of the cumulative decarbonisation rate represented above took place prior to the launch of this Fund (which occurred on 28 November 2023). Although not a binding characteristic of this Fund, in the interests of transparency to investors, the cumulative decarbonisation rate since the launch of the Fund is -39.37%.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In parallel to the Calvert Principles analysis, Calvert performed an assessment of each investment in the Fund to determine whether it qualified as a sustainable investment. This assessment aimed to identify issuers with evidence of making a positive contribution to a specific environmental or social objective, through either of the following pathways:

1. Companies generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment;

2. Companies benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non-exhaustive, illustrative list):

   a. Direct environmental impact (e.g., carbon emissions, waste emissions, water use);

   b. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon);

   c. Workplace practices (e.g., diversity, inclusion, gender pay equity);

3. Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. Sustainable Bonds held as sustainable investments in the Fund must have been deemed eligible for investment according to Calvert's proprietary sustainable bond assessment framework, through which the robustness, expected impact and transparency of all such instruments in the Fund were evaluated.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser tested all of the Fund's investments against the PAI indicators which are mandatory to consider under SFDR. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The Investment Adviser sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the Investment Adviser was supplemented with best available proxy indicators or qualitative analysis.

The Investment Adviser applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;
2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and
3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm. Thresholds were reviewed annually based on a large investable universe.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In cases where the PAI methodology suggested an investment may be causing significant harm, the Investment Adviser conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the Investment Adviser concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the Investment Adviser believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

PAI assessments for all holdings were reviewed at least quarterly.

The Investment Adviser's use of proxy indicators will be kept under review and will be replaced by more specific PAI indicators from third-party data providers, when the Investment Adviser determines that sufficiently reliable data has become available.

Calvert generally conducted the PAI assessment at the issuer level. However, where appropriate the assessment was done at security level in whole or in part. For instance, in the case of green and sustainability use of proceeds bonds, the PAI indicators that are directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through Calvert's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond that has a negative assessment under the PAI indicators related to carbon intensity, yet where the issuer has been evaluated by Calvert to have a credible strategy to reduce its GHG emissions, and where the Green Bond purchased specifically contributes towards such goal, would be eligible for investment. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded from the entirety of the portfolio issuers which have experienced very severe controversies, including those related to violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, the ILO Fundamental Principles, or the OECD Guidelines for Multinational Enterprises.

This screening was done using third party data, however in relation to the UNGC, Calvert maintains its own determination of significant ESG controversies or violations of UNGC Principles, informed by data sourced from third party providers.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The Fund considers the PAI indicators through some of the Fund's binding criteria as follows:

- The Fund maintained a lower carbon intensity than the ICE BofA Developed Markets High Yield Ex-Subordinated Financial Index (USD-hedged), and aimed to halve its portfolio-level carbon intensity by 2030. The Fund therefore considered in whole the PAI indicator 3: GHG intensity of investee companies.
- The Fund excluded issuers which derived certain proportions of revenues from fossil fuels. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers involved in activities related to controversial weapons. The Fund therefore considered the PAI indicator 14: exposure to controversial weapons.

In addition, through the application of the Calvert Principles to the totality of the portfolio, the Fund invested in companies that, in the opinion of the Investment Adviser, exhibited, through their operations and business practices, sound management of ESG characteristics. These characteristics included environmental sustainability, resource efficiency, support for equitable societies and respect for human rights, accountable governance, and transparent operations.

As a result, the Fund considered the following PAIs through its pass/fail assessment for those companies and sectors where Calvert deemed such PAIs relevant:

- PAI 1 "GHG emissions";
- PAI 3 "GHG intensity of investee companies";
- PAI 4 "Exposure to companies active in the fossil fuel sector";
- PAI 13 "Board gender diversity"; and
- PAI 14 "Exposure to controversial weapons".

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

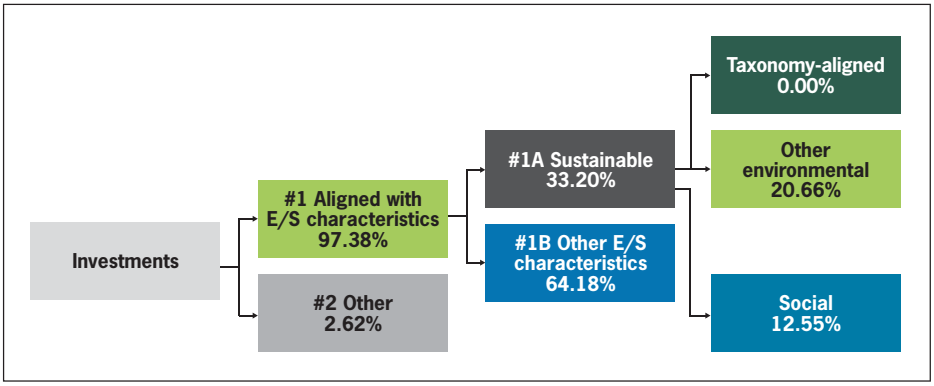
What was the proportion of sustainability-related investments?

97.38% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

33.20% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	17.52%
Consumer Discretionary	14.81%
Materials	12.48%
Financials	11.65%
Communication Services	10.68%
Health Care	10.59%
Information Technology	6.65%
Utilities	5.93%
Consumer Staples	4.12%
Real Estate	2.45%
Energy	0.51%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

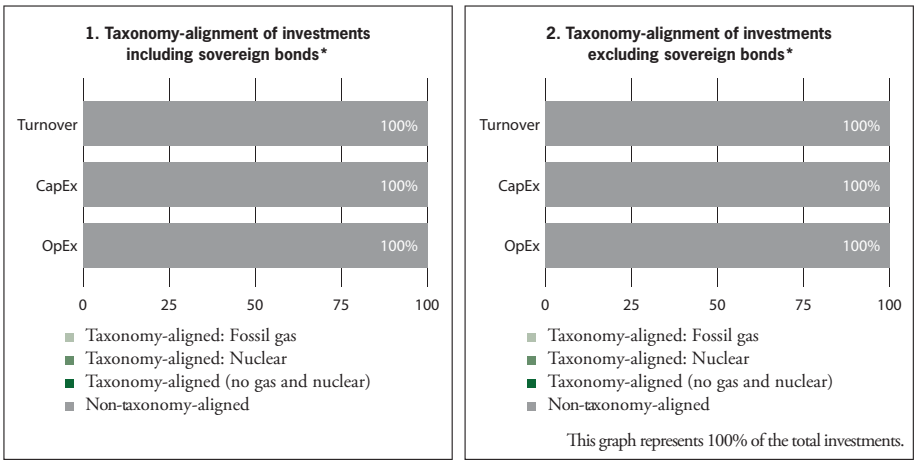
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

20.66% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

12.55% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.62% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental and social characteristics, to avoid any new investments in excluded countries or activities. During the reference period, some investments became restricted after they were acquired for the Fund, due to becoming ineligible per the Calvert Principles, or no longer meeting a threshold associated with the Fund's restricted activities. The Investment Adviser sold these investments within the breach remediation timeframe, keeping in mind the best interests of the Fund's shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Sustainable Euro Corporate Bond Fund**

Legal entity identifier: **549300GCM5BJ69ZMX437**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.45% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Eligibility in line with Principles-based ESG Materiality Framework: Through the application of the Calvert Principles for Responsible Investment (the "Calvert Principles"), the Fund promoted environmental sustainability and resource efficiency, equitable societies and respect for human rights, in addition to accountable governance and transparent operations. The Calvert Principles assessed investee issuers' activities and behaviours across a number of ESG themes deemed to be material by Calvert, and only issuers whose business practices and governance structure assessed to be consistent with the Calvert Principles were eligible for inclusion in the Fund's portfolio.
- Low carbon intensity and portfolio-level decarbonisation: The Fund promoted the environmental characteristic of climate change mitigation by:
  - Maintaining a lower carbon intensity than the Bloomberg Euro Aggregate Corporate index; and
  - Aiming to reduce the Fund's portfolio-level carbon intensity by 50% by year-end 2030, compared to year-end 2020.
- Exclusions: The Fund promoted the environmental characteristic of avoiding investments in thermal coal and other types of unconventional oil & gas activities, and the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Sustainable Investments: The Fund made sustainable investments in issuers which contributed to specific environmental or social objectives, based on Calvert's assessment, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90% *(until 31 March 2025);* 80% *(from 1 April 2025)*	98.50%
Carbon intensity lower than the Bloomberg Euro Aggregate Corporate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO2e/US$ million revenue	87.93	56.42
The Fund aims to halve its WACI at the portfolio level by year-end 2030, compared to the baseline of December 31, 2020. The WACI of the baseline is 100.72 tons CO2e/US$ million revenue. While the binding element of this environmental characteristic refers to the year 2030, the Investment Adviser aims to pursue a yearly decarbonisation pathway to achieve this longer-term target.		
The Fund's annual decarbonisation rate for year-end 2025 is:	n/a	29.61%
The Fund's cumulative decarbonisation rate since December 31, 2020 is:	-50% by 2030	-43.98%
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
thermal coal mining and extraction (>0% revenue) (until 31 March 2025)	0.00%	0.00%
thermal and metallurgical coal exploration, extraction, refining, distribution, mining (≥1% revenue) (from 01 April 2025)	0.00%	0.00%
controversial weapons (any activities) (>0% revenue)	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Tobacco retail and distribution (>10% revenue)	0.00%	0.00%	0.00%	0.00%
Adult entertainment (>10% revenue until 22 August 2024)	0.00%	0.00%	0.00%	0.00%
Military or conventional weapons, or weapons systems manufacturing or retail (>10% revenue) (from 23 August 2024)	0.00%	n/a	n/a	0.00%
% Fund exposure to corporate issuers experiencing significant ESG controversies	0.00%	1.18%	0.00%	0.00%
ESG Tilt (until 22 August 2024):				
Corporates - ESG Corporate Score - % Fund Exposure to corporate issuers that fall within the bottom 20% of each corporate sub-sector	0.00%	0.00%	2.23%	0.23%
Sustainable Investments:				
% Fund investments that are sustainable investments	60.00%	70.30%	77.28%	72.51%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Over 2023, the Fund held an average of 2.23% asset value in investments that, while already held in the Fund, became non-compliant with the Fund's characteristic of not investing in the bottom-20% ESG-scored corporates of each sub-sector of the Bloomberg Euro Aggregate Corporate Index. These exceptions, which were driven by the ESG scores of those investments becoming relatively lower within their sub-sector, happened in Q1 and Q2. The Investment Adviser rectified these exceptions by selling the holdings within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of Arctic gas, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

On 23 August 2024, the Fund's investment strategy was amended and the Fund was renamed. As part of these strategy changes, the Fund's minimum commitment to sustainable investments was amended from 60% to 50%, the Fund began to apply the Calvert Principles for Responsible Investment to drive its selection of eligible securities from a sustainability standpoint, and the screening policy was amended, as indicated in the table above. The Fund's portfolio-level decarbonisation commitment was also changed to focus on the near-term target of 50% reduction by year-end 2030.

Over 2024, the Fund held an average of 0.23% asset value in investments that became non-compliant with the Fund's characteristic of not investing in the bottom-20% ESG-scored corporates of each sub-sector of the Bloomberg Euro Aggregate Corporate Index. This was either as a result of certain underlying ESG indicators' values changing, or due to new data becoming available. The Investment Adviser rectified this exception by selling the holdings within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In parallel to the Calvert Principles analysis, Calvert performed an assessment of each investment in the fund to determine whether it qualified as a sustainable investment. This assessment aimed to identify issuers with evidence of making a positive contribution to a specific environmental or social objective, through either of the following pathways:

1. Companies generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment;

2. Companies benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non-exhaustive, illustrative list):

   a. Direct environmental impact (e.g., carbon emissions, waste emissions, water use);

   b. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon);

   c. Workplace practices (e.g., diversity, inclusion, gender pay equity);

3. Green, Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. Sustainable Bonds held as sustainable investments in the Fund must have been deemed eligible for investment according to Calvert's proprietary sustainable bond assessment framework, through which the robustness, expected impact and transparency of all such instruments in the Fund were evaluated.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and

- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser tested all of the Fund's investments against the PAI indicators which are mandatory to consider under SFDR. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The Investment Adviser sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the Investment Adviser was supplemented with best available proxy indicators or qualitative analysis.

The Investment Adviser applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;

2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and

3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm. Thresholds were reviewed annually based on a large investable universe.

In cases where the PAI methodology suggested an investment may be causing significant harm, the Investment Adviser conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the Investment Adviser concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the Investment Adviser believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

PAI assessments for all holdings were reviewed at least quarterly.

The Investment Adviser's use of proxy indicators will be kept under review and will be replaced by more specific PAI indicators from third-party data providers, when the Investment Adviser determines that sufficiently reliable data has become available.

Calvert generally conducted the PAI assessment at the issuer level. However, where appropriate the assessment was done at security level in whole or in part. For instance, in the case of green and sustainability use of proceeds bonds, the PAI indicators that are directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through Calvert's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond that has a negative assessment under the PAI indicators related to carbon intensity, yet where the issuer has been evaluated by Calvert to have a credible strategy to reduce its GHG emissions, and where the Green Bond purchased specifically contributes towards such goal, would be eligible for investment. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded from the entirety of the portfolio issuers which have experienced very severe controversies, including those related to violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, the ILO Fundamental Principles, or the OECD Guidelines for Multinational Enterprises.

This screening was done using third party data, however in relation to the UNGC, Calvert maintains its own determination of significant ESG controversies or violations of UNGC Principles, informed by data sourced from third party providers.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund maintained a lower carbon intensity than the Bloomberg Euro Aggregate Corporate index, and aimed to halve its portfolio-level carbon intensity by 2030. The Fund therefore considered in whole the PAI indicator 3: GHG intensity of investee companies.
- The Fund excluded issuers which derived certain proportions of revenues from fossil fuels. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers involved in activities related to controversial weapons. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

In addition, through the application of the Calvert Principles to the totality of the portfolio, the Fund invested in companies that, in the opinion of the Investment Adviser, exhibited, through their operations and business practices, sound management of ESG characteristics. These characteristics included environmental sustainability, resource efficiency, support for equitable societies and respect for human rights, accountable governance, and transparent operations.

As a result, the Fund considered the following PAIs through its pass/fail assessment for those companies and sectors where Calvert deemed such PAIs relevant:

- PAI 1 "GHG emissions";
- PAI 3 "GHG intensity of investee companies";
- PAI 4 "Exposure to companies active in the fossil fuel sector";
- PAI 13 "Board gender diversity"; and
- PAI 14 "Exposure to controversial weapons".

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

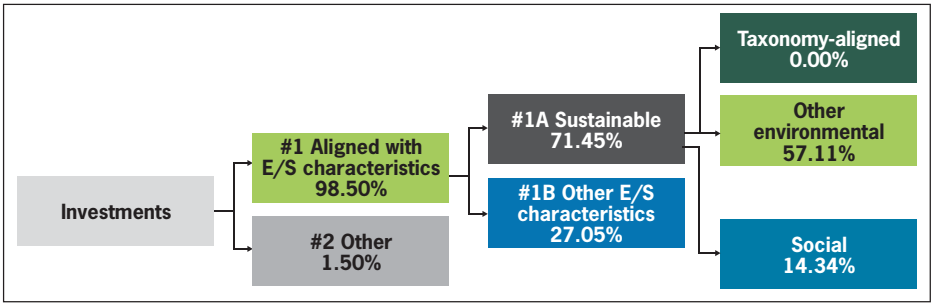
What was the proportion of sustainability-related investments?

98.50% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

71.45% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	53.52%
Utilities	12.23%
Industrials	6.82%
Real Estate	6.15%
Communication Services	5.47%
Consumer Discretionary	4.24%
Health Care	4.13%
Consumer Staples	3.66%
Materials	1.56%
Supranationals & Agencies	0.42%
Information Technology	0.29%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.67%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

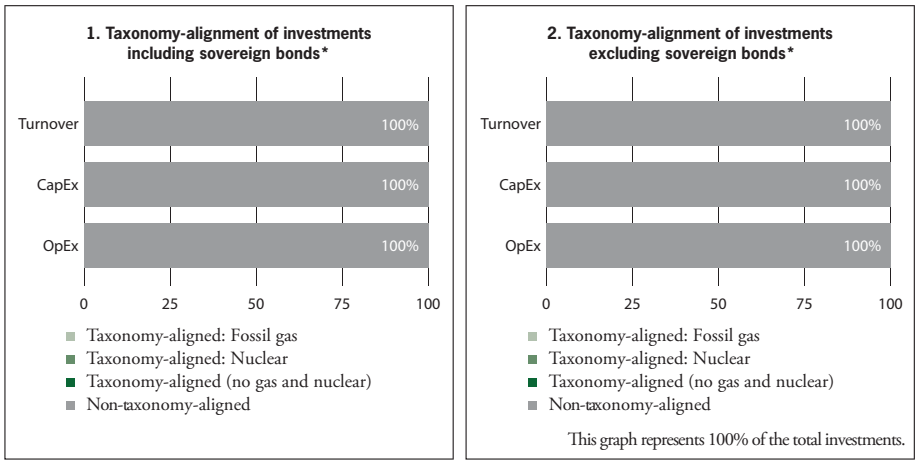
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

57.11% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

14.34% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.50% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities also supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Calvert Sustainable Euro Strategic Bond Fund**

Legal entity identifier: **5493001NHR60KNHKPZ06**

Reference period: **01 January 2025 to 30 October 2025**

This Fund was liquidated on 30 October 2025.

Unless stated otherwise, the values below have been calculated based on the Fund's investments on 30 September. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.21% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the following environmental and social characteristics:

- Eligibility in line with Principles-based ESG Materiality Framework: Through the application of the Calvert Principles for Responsible Investment (the "Calvert Principles"), the Fund promoted environmental sustainability and resource efficiency, equitable societies and respect for human rights, in addition to accountable governance and transparent operations. The Calvert Principles assessed investee issuers' activities and behaviours across a number of ESG themes deemed to be material by Calvert, and only issuers whose business practices and governance structure assessed to be consistent with the Calvert Principles were eligible for inclusion in the Fund's portfolio.
- Low carbon intensity and portfolio-level decarbonisation: The Fund promoted the environmental characteristic of climate change mitigation by:
  - Maintaining a lower carbon intensity than the corporate portion of the Bloomberg Euro Aggregate index; and
  - Aiming to reduce the Fund's portfolio-level carbon intensity by 50% by year-end 2030, compared to year-end 2020.
- Exclusions: The Fund promoted the environmental characteristic of avoiding investments in thermal coal and other types of unconventional oil & gas activities, and the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing, as well as in sovereign issuers that significantly violate social rights. Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").
- Sustainable Investments: The Fund made sustainable investments in issuers which contributed to specific environmental or social objectives, based on Calvert's assessment, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
% of the fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	80.00%	99.16%
Carbon footprint lower than the corporate portion of the Bloomberg Euro Aggregate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO2e/US$ million revenue		56.09 (Fund) 73.48 (Bloomberg Euro Aggregate Index)
The Fund aims to halve its WACI at the portfolio level for all corporate investments by year-end 2030, compared to the baseline of December 31, 2020. The WACI of the baseline is 79.92 tons CO2e/US$ million revenue. While the binding element of this environmental characteristic refers to the year 2030, the Investment Adviser aims to pursue a yearly decarbonisation pathway to achieve this longer-term target.		
The Fund's annual decarbonisation rate for year-end 2025 is:	n/a	n/a
The Fund's cumulative decarbonisation rate since December 31, 2020 is:	-50% by 2030	-29.82%
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Thermal coal mining and extraction (>0% revenue) (until 31 March 2025)	0.00%	0.00%
Thermal and metallurgical coal exploration, extraction, refining, distribution, mining (>1% revenue) (from 01 April 2025)	0.00%	0.00%
controversial weapons (any activities) (>0% revenue)	0.00%	0.00%
civilian firearms manufacturing, production (>0% revenue until 31 March 2025; ≥5% revenue from 01 April 2025)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
oil fuels exploration, extraction, refining, distribution (≥10%) (from 01 April 2025)	0.00%	0.00%
gaseous fuels exploration, extraction, manufacturing, distribution (≥50%) (from 01 April 2025)	0.00%	0.00%
Oil sands extraction (>5% revenue)	0.00%	0.00%
Arctic oil & gas production (>5% revenue)	0.00%	0.00%
Thermal coal-fired power generation (>10% revenue)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
% of the fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were (from 23 August 2024):	80.00%	n/a	n/a	98.87%
Carbon footprint lower than the corporate portion of the Bloomberg Euro Aggregate Index (shown in the Indicator Threshold column) Measured by Weighted Average Carbon Intensity ("WACI"): scope 1 and 2 emissions in tons CO2e/US$ million revenue	See relevant year	90.50 (Fund) 92.80 *(Bloomberg Euro Aggregate Index)*	77.09 (Fund) 106.02 *(Bloomberg Euro Aggregate Index)*	52.85 (Fund) 79.96 *(Bloomberg Euro Aggregate Index)*
The Fund aims to achieve net zero emissions at the portfolio level for corporate investments by 2050. As an interim target for net zero, the Fund aims to halve its WACI at the portfolio level for all corporate investments by year-end 2030, compared to the baseline of 31 December 2020. The WACI of the baseline is 79.92 tons CO2e/US$ million revenue. While the binding elements of this environmental characteristic refer to the years 2030 and 2050, the Investment Adviser aims to pursue a yearly decarbonisation pathway to achieve those longer-term targets.				
The Fund's annual decarbonisation rate for year-end 2023 is:	n/a	-10.91%	-22.43%	-28.71%
The Fund's cumulative decarbonisation rate since 31 December 2020 is:	n/a	13.24%	-12.17%	-37.99%

Securitisations - ESG Securitised Score (>=3 (1-5, where 5 is best))	3.00	n/a	3.00	3.00
Sustainable Investments:				
% Fund investments that are sustainable investments	50.00%	64.09%	66.79%	65.91%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

Over 2023, the Fund held an average of 0.67% asset value in investments that, while already held in the Fund, became non-compliant with the Fund's characteristic of not investing in the bottom-20% ESG-scored corporates of each sub-sector of the Bloomberg Euro Aggregate Index. These exceptions, which were driven by the ESG scores of those investments becoming relatively lower within their sub-sector, happened in Q1 and Q2. The Investment Adviser rectified these exceptions by selling the holdings within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

In addition, during the reporting period the Fund temporarily deviated from its pathway towards meeting its environmental characteristics of maintaining a lower carbon intensity than the index, and of halving its carbon intensity by 2030. As of end of Q3, the Fund's carbon intensity (tons CO2e/$US million revenue, for corporate investments) was higher than that of the index and of its own year-end 2020 baseline. This temporary deviation was, in part, associated with investments in labelled Green and Sustainability Bonds from corporate issuers with high carbon intensities, but with proceeds intended to finance projects that support a low carbon transition.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

On 23 August 2024, the Fund's investment strategy was amended and the Fund was renamed. As part of these strategy changes, the Fund began to apply the Calvert Principles for Responsible Investment to drive its selection of eligible securities from a sustainability standpoint, and the screening policy was amended, as indicated in the table above. The Fund's portfolio-level decarbonisation commitment was also changed to focus on the near-term target of 50% reduction by year-end 2030.

In Q1 2024, the Fund also held investments in a sovereign issuer which became restricted after falling into the bottom-20% scored sovereigns. The Investment Adviser rectified this exception by selling the holdings within the pre-established remediation timeframe, in Q2.

In relation to the Fund's annual decarbonisation rate being higher than the decarbonisation rate since year-end 2020, this is due to the fact that in 2022, the Fund had a higher carbon intensity than the index and of its baseline.

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of Arctic gas, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

In parallel to the Calvert Principles analysis, Calvert performed an assessment of each investment in the fund to determine whether it qualified as a sustainable investment. This assessment aimed to identify issuers with evidence of making a positive contribution to a specific environmental or social objective, through either of the following four pathways:

1. Companies generating a significant proportion of their revenues from products or services that directly address environmental or social needs including, but not limited to, alternative energy, pollution prevention, nutrition, or connectivity, as an indicator of positive impact alignment;

2. Companies benefiting the environment and/or society through operating responsibly and efficiently, based on metrics that represent a company's performance on the following areas of impact (provided as a non-exhaustive, illustrative list):

   a. Direct environmental impact (e.g., carbon emissions, waste emissions, water use);

   b. Supply chain impact (e.g., indirect carbon emissions, raw materials sourcing, lifecycle carbon);

   c. Workplace practices (e.g., diversity, inclusion, gender pay equity);

3. Sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on Calvert's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

4. Green, Social or Sustainability Bonds ("Sustainable Bonds") where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. Sustainable Bonds held as sustainable investments in the Fund must have been deemed eligible for investment according to Calvert's proprietary sustainable bond assessment framework, through which the robustness, expected impact and transparency of all such instruments in the Fund were evaluated.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensured that the sustainable investments of the Fund did not cause significant harm to relevant environmental or social sustainable investment objectives by:

- Testing whether the investment met the thresholds set by the Investment Adviser for each of the mandatory principal adverse impact ("PAI") indicators (see the response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?" below for the details of this process); and
- Ensuring that the sustainable investments of the Fund were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (see the response to the question, "Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?" below for the details of this process).

Additionally, the investment management team reviewed the portfolio holdings to determine if the company was involved in issues that would fall into a category of significant harm that was not captured by the above process.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser tested all of the Fund's investments against the PAI indicators which are mandatory to consider under SFDR. The Investment Adviser did this using a combination of quantitative and qualitative tests, using available third party and proprietary data for each PAI indicator.

The Investment Adviser sought data that was most closely aligned with each individual PAI to construct the PAI assessment methodology. In some cases third party data was limited and if issuers or specific issues were not covered by a vendor for a particular PAI, the Investment Adviser was supplemented with best available proxy indicators or qualitative analysis.

The Investment Adviser applied the following types of thresholds for the PAIs in order to determine if the investment was causing significant harm:

1. Absolute thresholds: i.e., company performance breached a threshold that was set based on a quantitative metric or a qualitative score-based assessment, considering a universe of large, listed companies;

2. Peer group-relative thresholds: i.e., company performance breached a quantitative threshold that was set based on considering the aggregate performance of the sub-set of companies within a sector that caused the most harm in a specific area, such as carbon emissions or waste emissions; and

3. Controversy-based thresholds: i.e., company controversy performance was qualitatively assessed to be on the worst part of a scale of potential harmful impact.

For certain environmental PAIs, an exemption was made for companies that derived a significant amount of revenues from activities designed to directly address those specific areas of environmental harm. Thresholds were reviewed annually based on a large investable universe.

In cases where the PAI methodology suggested an investment may be causing significant harm, the Investment Adviser conducted additional desktop research to verify the accuracy of the data point and that there were no intervening factors that cast doubt over the validity of the significant harm analysis. If the Investment Adviser concluded, through its internal assessment, that the issuer was not causing significant harm, it proceeded with the investment and the rationale for that decision was documented. Intervening factors that may lead to a conclusion that an issuer is not causing significant harm include:

i. The significant harm assessment was tied to inaccurate vendor data that, once corrected, no longer breached a significant harm threshold;

ii. The significant harm assessment resulted from a company being classified in a peer group which the Investment Adviser believes was not appropriate due to company-specific characteristics, or to unique or extenuating circumstances specific to the jurisdiction in which the company operates; or

iii. The issuer demonstrated steps and actions to address the potential significant harm such as through the adoption of time-bound targets and goals or dedicated remediation activities and there were clear meaningful signs of improvement and positive change.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

PAI assessments for all holdings were reviewed at least quarterly.

The Investment Adviser's use of proxy indicators will be kept under review and will be replaced by more specific PAI indicators from third-party data providers, when the Investment Adviser determines that sufficiently reliable data has become available.

Calvert generally conducted the PAI assessment at the issuer level. However, where appropriate the assessment was done at security level in whole or in part. For instance, in the case of green and sustainability use of proceeds bonds, the PAI indicators that are directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through Calvert's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond that has a negative assessment under the PAI indicators related to carbon intensity, yet where the issuer has been evaluated by Calvert to have a credible strategy to reduce its GHG emissions, and where the Green Bond purchased specifically contributes towards such goal, would be eligible for investment. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund excluded from the entirety of the portfolio issuers which have experienced very severe controversies, including those related to violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, the ILO Fundamental Principles, or the OECD Guidelines for Multinational Enterprises.

This screening was done using third party data, however in relation to the UNGC, Calvert maintains its own determination of significant ESG controversies or violations of UNGC Principles, informed by data sourced from third party providers.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund's corporate investments maintained a lower carbon intensity than the corporate portion of the Bloomberg Euro Aggregate index, and aimed to halve its portfolio-level carbon intensity by 2030. The Fund therefore considered in whole the PAI indicator 3: GHG intensity of investee companies.
- The Fund excluded issuers which derived certain proportions of revenue from fossil fuels. The Fund therefore considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded issuers which committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered in whole the PAI indicator 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom-10% ranked countries on an indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations

In addition, through the application of the Calvert Principles to the totality of the portfolio, the fund invested in companies that, in the opinion of the Investment Adviser, exhibited, through their operations and business practices, sound management of ESG characteristics. These characteristics included environmental sustainability, resource efficiency, support for equitable societies and respect for human rights, accountable governance, and transparent operations.

As a result, the fund considered the following PAIs through its pass/fail assessment for those companies and sectors where Calvert deemed such PAIs relevant:

- PAI 1 "GHG emissions";
- PAI 3 "GHG intensity of investee companies";
- PAI 4 "Exposure to companies active in the fossil fuel sector";
- PAI 13 "Board gender diversity"; and
- PAI 14 "Exposure to controversial weapons".

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

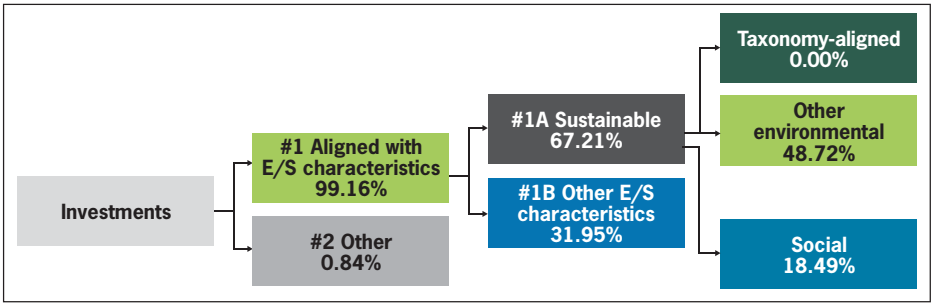
What was the proportion of sustainability-related investments?

99.16% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

67.21% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	39.79%
Sovereigns	25.67%
Utilities	8.57%
Supranationals & Agencies	7.58%
Real Estate	3.93%
Consumer Discretionary	3.36%
Communication Services	3.34%
Industrials	3.26%
Consumer Staples	1.23%
Materials	1.19%
Health Care	0.84%
Securitized	0.39%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.73%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business; in addition to the activities listed, this figure may include the financing of fossil fuels through banking activities. The indicator therefore has a broader scope when compared to the other fossil fuel exclusions applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

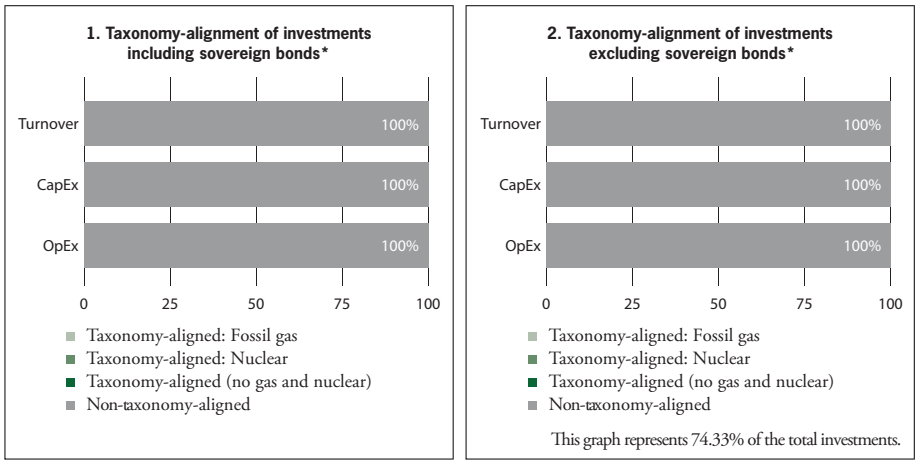
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

48.72% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

18.49% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.84% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, an investment became restricted due to no longer meeting a threshold associated with the Fund's restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Emerging Markets Corporate Debt Fund**

Legal entity identifier: **5493007BB7NIVVCOWZ40**

Reference period: **01 January 2025 to 31 December 2025**

Unlessstated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.40% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	10.00%	25.40%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund exposure to corporate issuers deriving revenue from:				
Controversial weapons (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%	0.00%	0.00%
Sustainable Investments:				
% Fund investments that are sustainable investments	10.00%	31.80%	31.57%	22.76%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green,Social or Sustainability Bonds ("Sustainable Bonds"), as labelled in the securities' documentation, where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third-party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

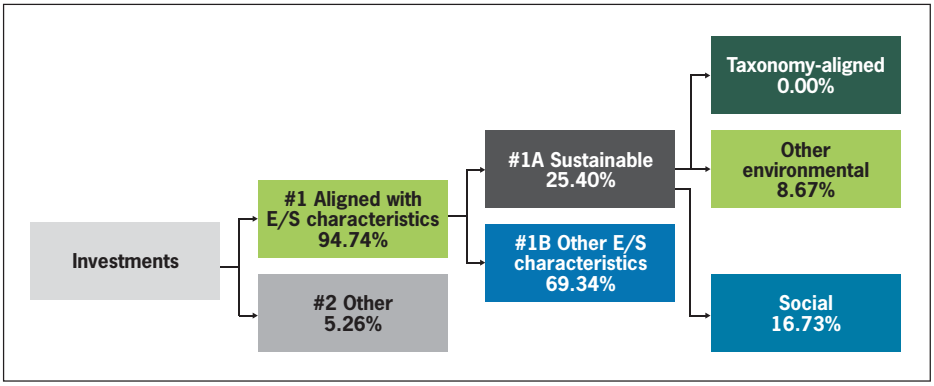
What was the proportion of sustainability-related investments?

94.75% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

25.40% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	34.75%
Energy	12.93%
Materials	11.91%
Utilities	7.97%
Industrials	6.99%
Communication Services	6.65%
Consumer Discretionary	4.67%
Consumer Staples	3.77%
Real Estate	1.91%
Health Care	0.99%
Information Technology	0.82%
Sovereigns	0.76%
Supranationals & Agencies	0.63%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	16.88%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

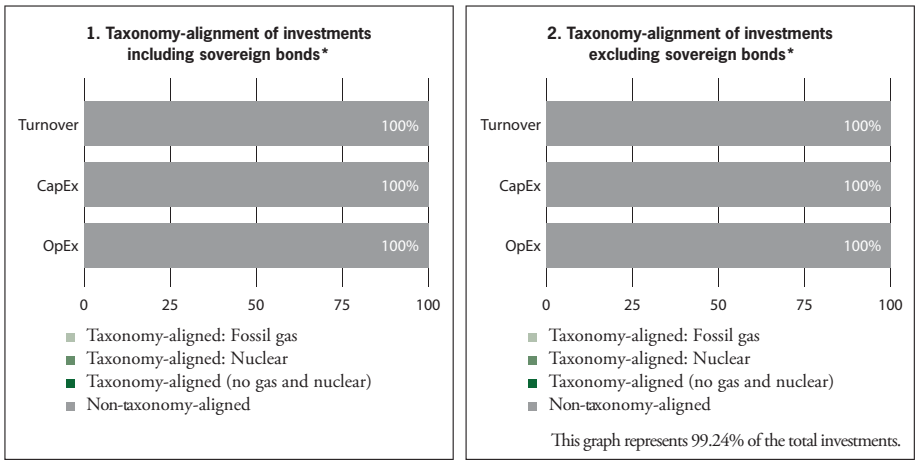
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.67% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

16.73% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

5.26% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund exposure to corporate issuers deriving revenue from:				
Controversial weapons (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%	0.00%	0.00%
Exclusions – Sovereigns:				
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations, without evidence of positive momentum	0.00%	0.03%	0.02%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

As of 31 December 2022, the Fund held 0.03% of its Net Asset Value in a derivative instrument providing indirect exposure to a country that does not satisfy the Fund's social characteristic of excluding investments in the bottom-10% ranked countries on social violations. Given this investment was a derivative instrument, it was classified under the "Other" category, and as such it was not subject to the environmental and social criteria applied to the Fund. Notwithstanding this, the Investment Adviser disclosed this holding in the spirit of transparency. The Investment Adviser sold this investment in Q3 2023, as described above.

As of end of Q2 2023, the Fund held an average of 0.02% of its net asset value in a derivative instrument providing indirect exposure to a country that does not satisfy the Fund's social characteristic of excluding investments in the bottom-10% ranked countries on social violations. Given this investment is a derivative instrument, it is classified under the "Other" category, as per the Fund's asset allocation table further below. As such, the investment is not subject to the environmental and social criteria applied to the Fund. Notwithstanding this, the Investment Adviser is disclosing this holding in the spirit of transparency, and in line with the Fund's non-binding aim not to invest in derivatives associated with underlying assets, currencies or interest rates related to countries that would otherwise be subject to the social violations, the Investment Adviser sold such investment at the beginning of Q3 2023, keeping in mind the best interests of the Fund's shareholders.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded any corporate issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded any corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
UKRAINE REPUBLIC OF (GOVERNMENT) 4.0 01-FEB-2032 Reg-S (SENIOR)	Sovereign	2.96%	Ukraine

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

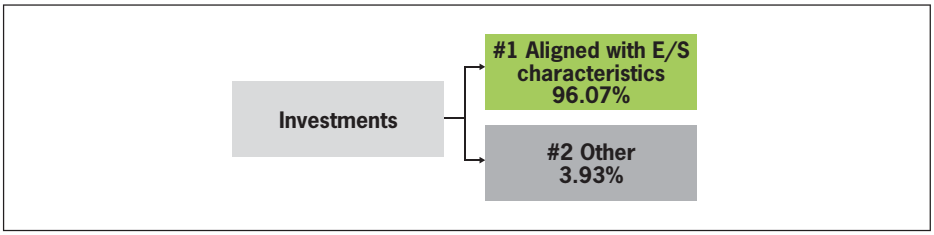
What was the proportion of sustainability-related investments?

96.07% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	67.66%
Financials	8.74%
Energy	8.29%
Industrials	2.91%
Materials	2.48%
Utilities	1.83%
Communication Services	1.30%
Supranationals & Agencies	0.94%
Real Estate	0.78%
Health Care	0.44%
Consumer Staples	0.37%
Consumer Discretionary	0.31%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.33%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

The Fund also had some exposure to fossil fuels through swaps held for investment or hedging purposes.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

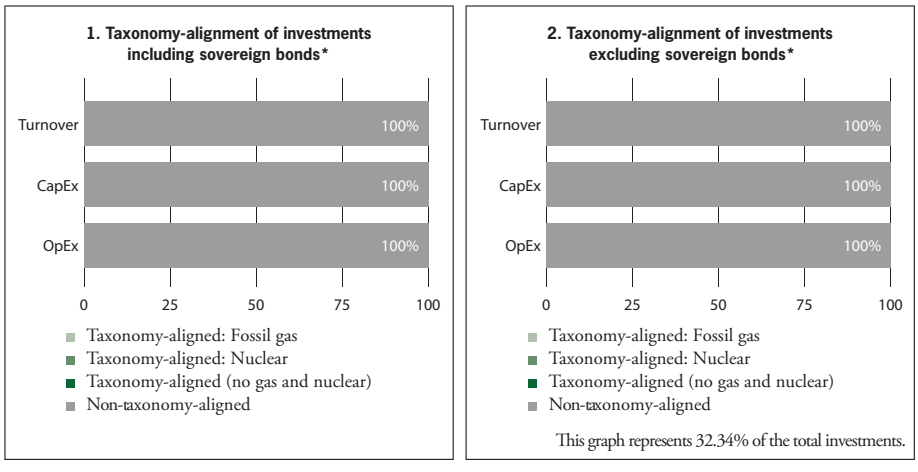
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.93% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Emerging Markets Debt Opportunities Fund**

Legal entity identifier: **54930003QKRHK5C2BJ98**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations, without evidence of positive momentum	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund exposure to corporate issuers deriving revenue from:				
Controversial weapons (>0% revenue)	0.00%	n/a	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	n/a	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	n/a	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	n/a	0.00%	0.00%
Exclusions – Sovereigns:				
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations, without evidence of positive momentum	0.00%	n/a	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The Fund launched on 11 August 2023. The Eaton Vance International (Ireland) Emerging Market Debt Opportunities Fund merged with this Fund on the same date. The information for previous periods is available in the Periodic Disclosure for Eaton Vance International (Ireland) Emerging Markets Debt Opportunities Fund.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded any corporate issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded any corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

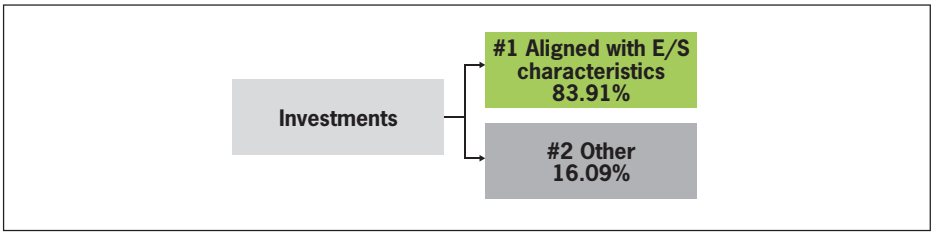
What was the proportion of sustainability-related investments?

83.91% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	56.08%
Financials	12.43%
Energy	4.72%
Industrials	2.90%
Materials	2.62%
Utilities	1.49%
Communication Services	1.19%
Real Estate	0.70%
Supranationals & Agencies	0.45%
Consumer Staples	0.39%
Consumer Discretionary	0.38%
Health Care	0.31%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	2.32%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels. The Fund also had some exposure to fossil fuels through swaps held for investment or hedging purposes.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

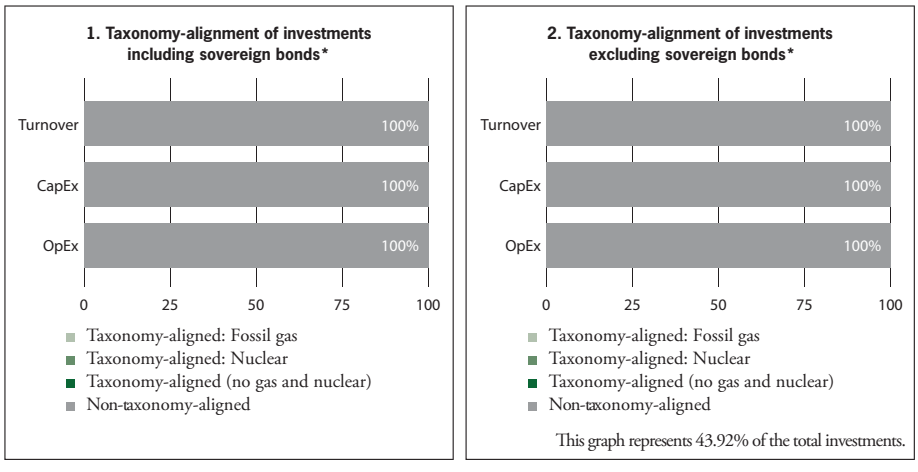
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

16.09% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

During the reference period, some investments became restricted after they were acquired for the Fund. This comprised of a security from a sovereign issuer, which was deemed by the Investment Adviser to no longer exhibit positive momentum in relation to certain social violations identified. The Investment Adviser sold this investment in Q3 2025, keeping in mind the best interests of the Fund's shareholders.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Emerging Markets Fixed Income Opportunities Fund**

Legal entity identifier: **549300Y6JEXZOOJBV556**

Reference period: **01 January 2025 to 16 May 2025**

This Fund was merged into the MS INVF Emerging Markets Debt Opportunities Fund on 16 May 2025

Unless stated otherwise, the values below have been calculated based on the Fund's investments on 31 March. This calculation methodology also applied to the Fund's top holdings and sector exposure

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Exclusions – Sovereigns:		
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations, without evidence of positive momentum	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund exposure to corporate issuers deriving revenue from:				
Controversial weapons (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%	0.00%	0.00%
Exclusions – Sovereigns:				
% Fund exposure to sovereign issuers in bottom 10% ranked countries social violations, without evidence of positive momentum	0.00%	0.00%	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded any corporate issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded any corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 16 May 2025.

% Assets are calculated based on the Fund's investments as of the end of Q1 during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

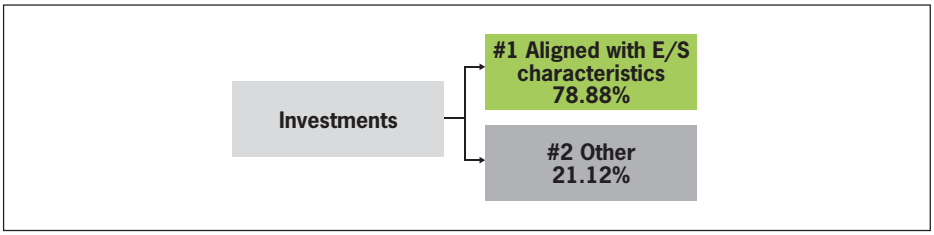
What was the proportion of sustainability-related investments?

78.88% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	48.55%
Financials	12.84%
Energy	4.94%
Industrials	2.93%
Materials	2.77%
Utilities	2.13%
Real Estate	1.36%
Supranationals & Agencies	1.15%
Communication Services	0.90%
Consumer Discretionary	0.61%
Health Care	0.46%
Consumer Staples	0.24%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	4.31%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

The Fund also had some exposure to fossil fuels through swaps held for investment or hedging purposes.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

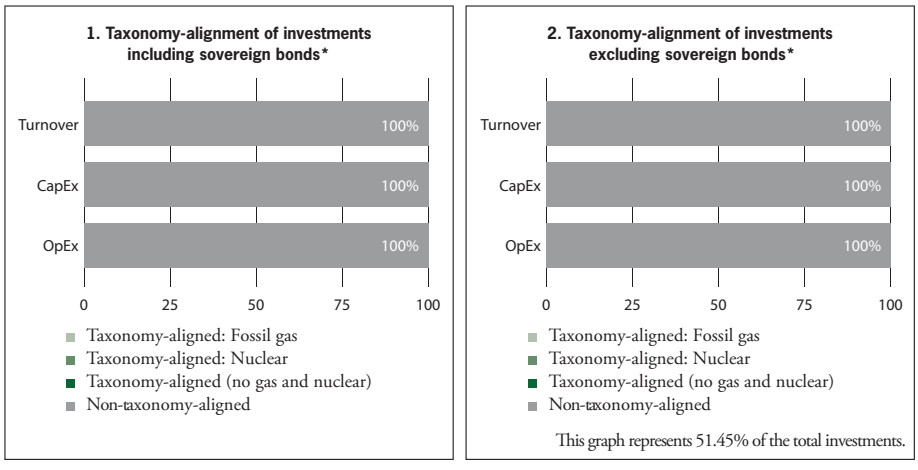
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

21.12% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Emerging Markets Local Income Fund**

Legal entity identifier: **54930003MCYFJBQA4A94**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the social characteristic of avoiding investments in sovereign issuers that significantly violate social rights and in investments which can cause harm to human health and wellbeing. In addition, the Fund promoted the environmental characteristic of climate change mitigation by avoiding investments where thermal coal mining and extraction represents a certain percentage of a company's revenue.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The Fund launched on 11 August 2023. The Eaton Vance International (Ireland) Emerging Markets Local Income Fund merged with this Fund on the same date. The information for previous periods is available in the Periodic Disclosure for Eaton Vance International (Ireland) Emerging Markets Local Income Fund.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts (PAIs) in part through its exclusionary criteria, as follows:

- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.
- The Fund excluded any corporate issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded any corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

The Fund did not consider any other PAI indicators.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

JSCB AGROBANK 20.75 15-SEP-2028 (SENIOR)	Financials	1.01%	Uzbekistan

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

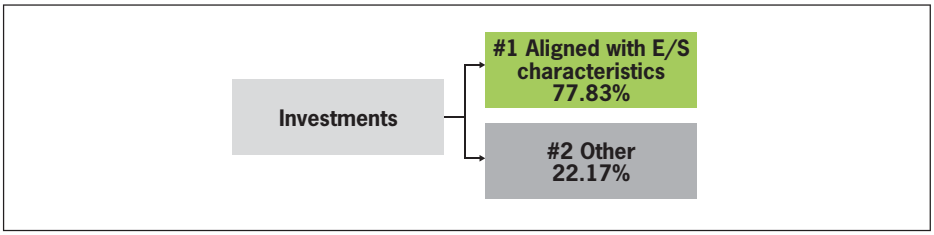
What was the proportion of sustainability-related investments?

77.83% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging or investment purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards, as described below (in answer to the question, "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?").

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	70.67%
Financials	6.15%
Supranationals & Agencies	0.70%
Energy	0.27%
Communication Services	0.04%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund may include green and sustainability use of proceeds bonds. Where the Fund invests in these types of bonds, the Investment Adviser will assess any exposure the proceeds of the bonds have to fossil fuels but it will not take into account any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds will be excluded from the fossil fuel exposure calculation above, as the Investment Adviser will treat these bonds as not having any exposure to fossil fuels.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

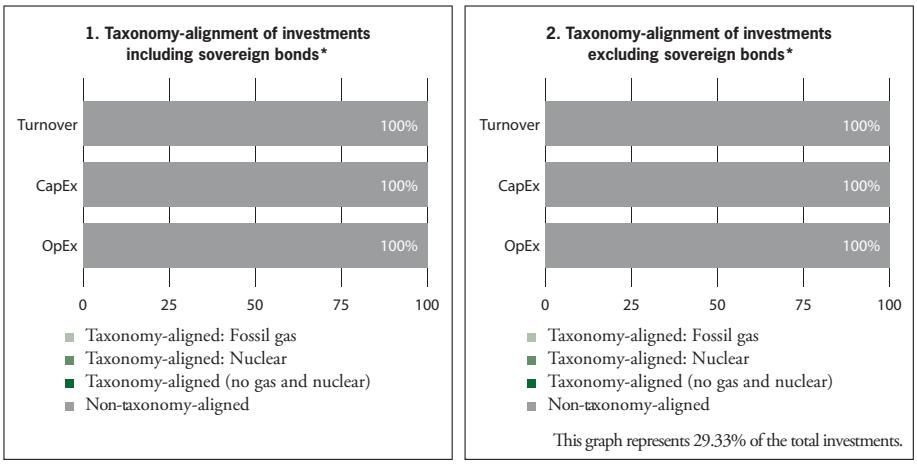
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

22.17% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for investment or hedging purposes, and they were not subject to any minimum environmental or social safeguards. For the avoidance of doubt, the Fund, nevertheless, did not invest in any derivatives associated with underlying assets, currencies, or interest rates related to countries that would otherwise be subject to the social violations exclusion described under the binding characteristics of the Fund.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser engaged with selected sovereign and corporate bond issuers on their governance practices, as well as on other material sustainability issues, including sustainability-related controversies or breaches of international norms and principles. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Euro Bond Fund**

Legal entity identifier: **GUL4X2DG7SIORG2PJB64**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.31% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG sores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of certain environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons manufacturing & retail (>0% revenue)	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association ("ICMA")'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded corporate issuers which derived a certain portion of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

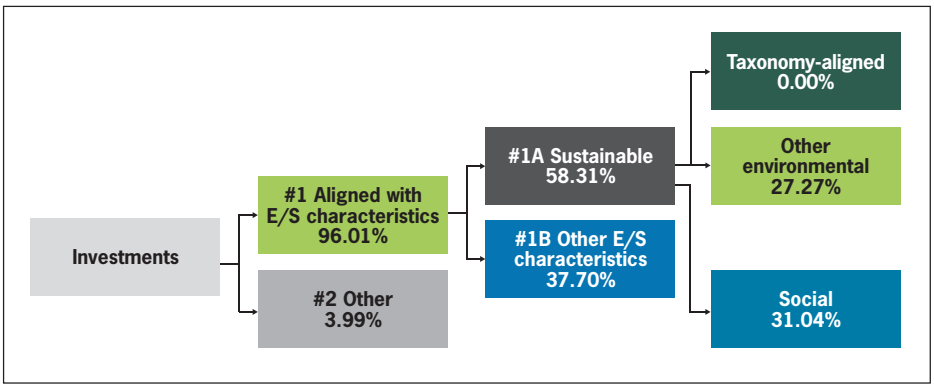
What was the proportion of sustainability-related investments?

96.01% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

58.31% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	38.45%
Sovereigns	27.89%
Supranationals & Agencies	10.01%
Utilities	4.80%
Industrials	4.53%
Energy	3.28%
Real Estate	3.15%
Communication Services	2.37%
Health Care	0.73%
Consumer Discretionary	0.52%
Securitized	0.27%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	7.47%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

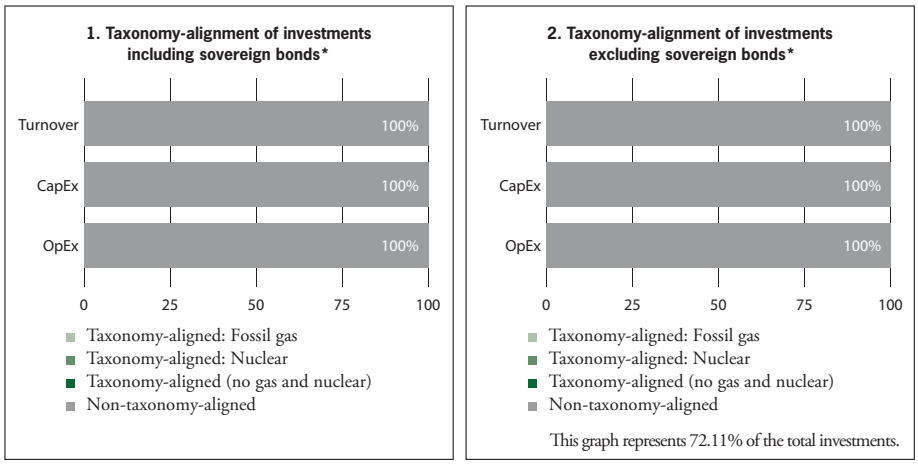
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

27.27% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

31.04% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.99% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Euro Corporate Bond – Duration Hedged Fund**

Legal entity identifier: **549300AEOIVRQNYMMX43**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.26% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of certain environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Military or conventional weapons, or weapons systems manufacturing or retail (>10% revenue from 28 April 2025)	0.00%	0.00%
Gambling (>10% revenue from 28 April 2025)	0.00%	0.00%
Coal-fired power generation (>20% revenue from 28 April 2025)	0.00%	0.00%
% Fund exposure to corporate issuers in violation of the UNGC, UN Guiding Principles on Business and Human Rights, ILO Fundamental Principles, or OECD Guidelines for Multinational Enterprises (from 28 April 2025)	0.00%	0.00%
Sustainable Investments:

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund exposure to corporate issuers deriving revenue from:				
Controversial weapons (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.55%	0.00%	0.00%
Sustainable Investments:				
% Fund investments that are sustainable investments	40.00%	50.70%	54.60%	57.98%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

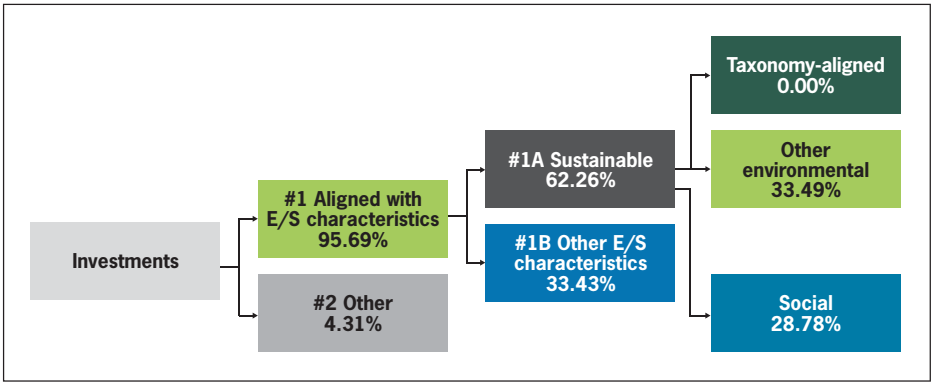
What was the proportion of sustainability-related investments?

95.69% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

62.26% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	50.39%
Utilities	12.29%
Industrials	5.48%
Consumer Discretionary	5.14%
Consumer Staples	4.84%
Communication Services	4.61%
Real Estate	4.12%
Health Care	3.92%
Energy	2.50%
Materials	1.81%
Information Technology	0.49%
Supranationals & Agencies	0.09%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	11.30%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

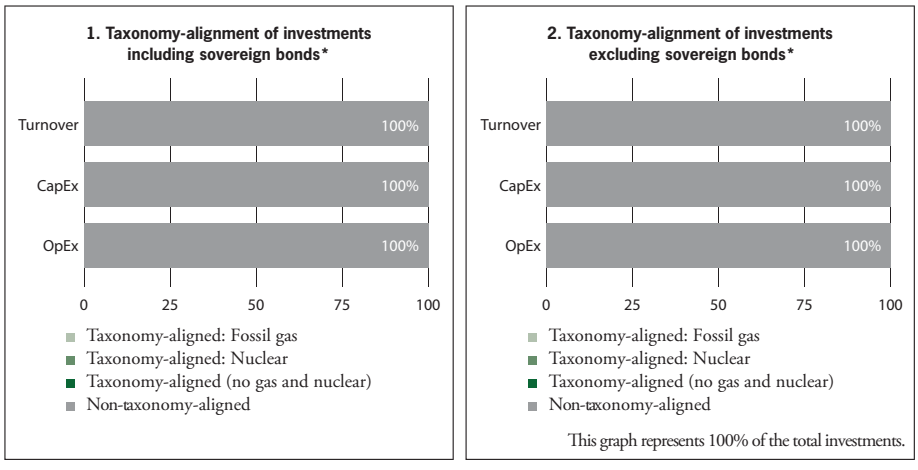
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

33.49% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

28.78% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

4.31% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Euro Corporate Bond Fund**

Legal entity identifier: **28WYH088EMGB02JCXS87**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.91% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Military or conventional weapons, or weapons systems manufacturing or retail (>10% revenue)	0.00%	0.00%
Gambling (>10% revenue)	0.00%	0.00%
Coal-fired power generation (>20% revenue)	0.00%	0.00%
% Fund exposure to corporate issuers in violation of the UNGC, UN Guiding Principles on Business and Human Rights, ILO Fundamental Principles, or OECD Guidelines for Multinational Enterprises	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	61.91%

% Fund exposure to corporate issuers in violation of the UNGC, UN Guiding Principles on Business and Human Rights, ILO Fundamental Principles, or OECD Guidelines for Multinational Enterprises (from 23 August 2024)	0.00%	n/a	n/a	0.00%
Sustainable Investments:				
% Fund investments that are sustainable investments	40.00%	50.32%	57.26%	60.53%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

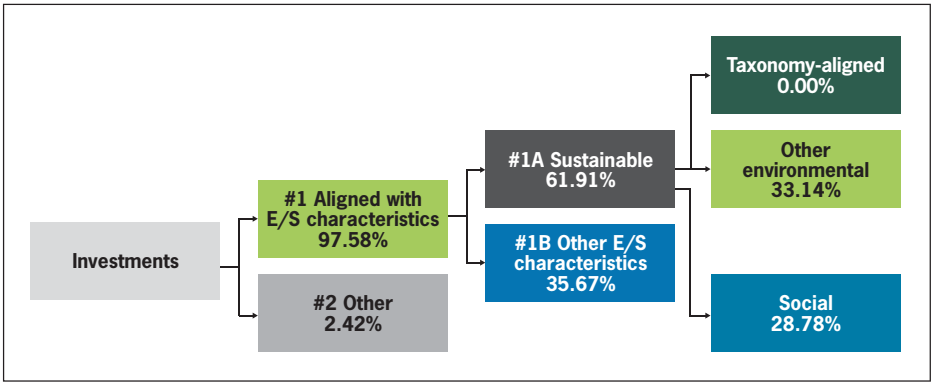
What was the proportion of sustainability-related investments?

97.58% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

61.91% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	47.94%
Utilities	13.72%
Industrials	6.87%
Consumer Discretionary	5.29%
Communication Services	4.88%
Real Estate	4.84%
Health Care	4.51%
Consumer Staples	4.05%
Energy	3.22%
Materials	2.10%
Supranationals & Agencies	0.14%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	12.21%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

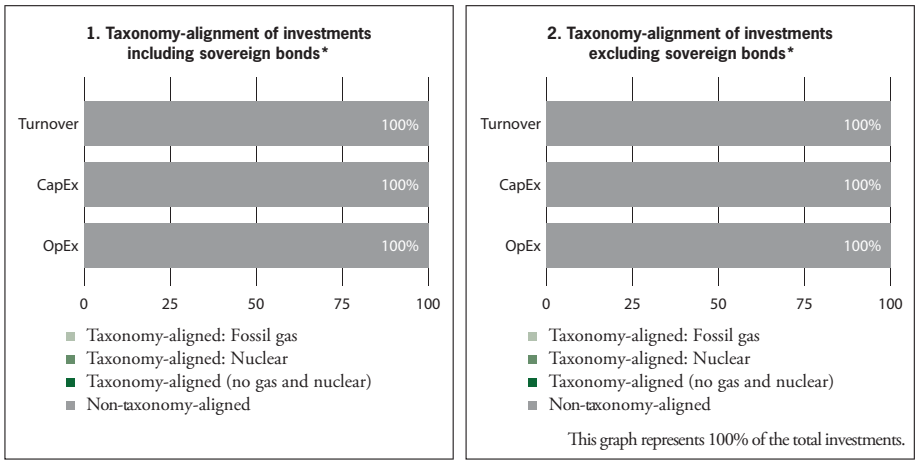
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

33.14% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

28.78% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.42% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Euro Strategic Bond Fund**

Legal entity identifier: **WJ0VQQOXBXWTMJ8MSW75**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 52.90% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Military or conventional weapons, or weapons systems manufacturing or retail (>10% revenue from 28 April 2025)	0.00%	0.00%
Gambling (>10% revenue from 28 April 2025)	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

In Q1 2023 the Investment Adviser sold one investment held since 2022, which no longer met the Fund's exclusionary criterion of avoiding investments in issuers that derive 5% or more revenue from the extraction of thermal coal, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association ("ICMA")'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded corporate issuers which derived a certain portion of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

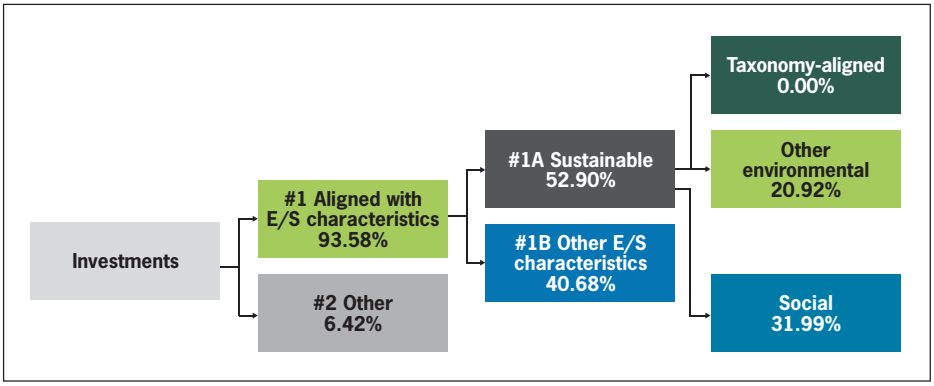
What was the proportion of sustainability-related investments?

93.58% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

52.90% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	35.65%
Financials	31.53%
Supranationals & Agencies	6.14%
Utilities	5.60%
Communication Services	2.61%
Consumer Discretionary	2.03%
Industrials	1.89%
Real Estate	1.85%
Energy	1.82%
Health Care	1.52%
Securitized	1.01%
Consumer Staples	0.99%
Materials	0.90%
Information Technology	0.04%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.78%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

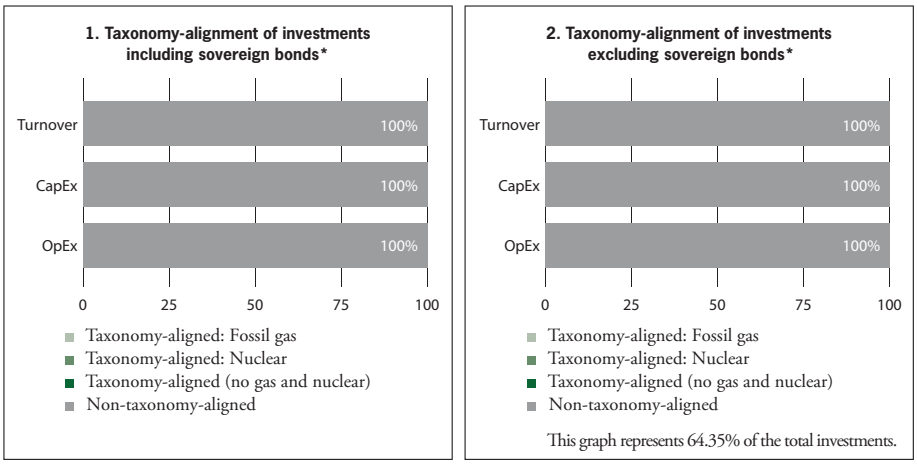
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

20.92% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

31.99% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

6.42% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, an investment became restricted due to no longer meeting a threshold associated with the Fund's restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **European Fixed Income Opportunities Fund**

Legal entity identifier: **549300NSR0FF1GG4P265**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.98% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association ("ICMA")'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded corporate issuers which derived a certain portion of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

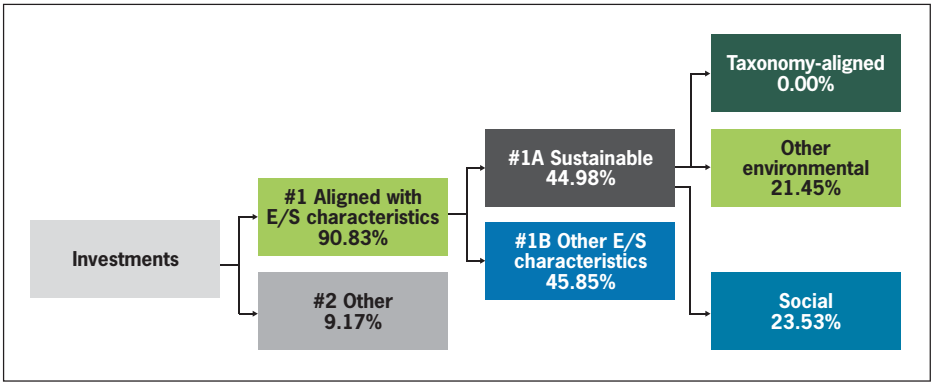
What was the proportion of sustainability-related investments?

90.83% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

44.98% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	35.49%
Sovereigns	15.17%
Securitized	8.44%
Utilities	8.35%
Consumer Discretionary	4.31%
Communication Services	3.89%
Real Estate	3.68%
Industrials	2.94%
Energy	2.81%
Materials	1.84%
Consumer Staples	1.78%
Health Care	1.71%
Supranationals & Agencies	0.23%
Information Technology	0.18%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.90%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

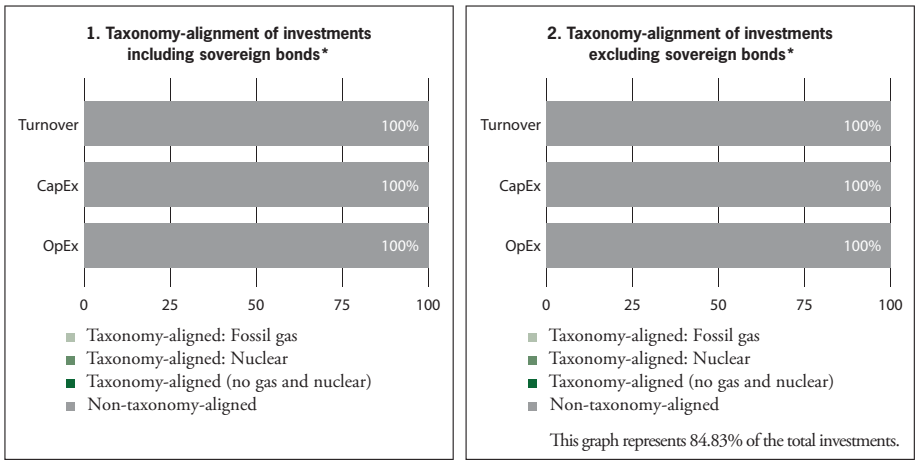
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

21.45% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

23.35% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

9.17% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, an investment became restricted due to no longer meeting a threshold associated with the Fund's restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **European High Yield Bond Fund**

Legal entity identifier: **CV1X7ZNWEZI3H0SHCK68**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.52% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:

Sustainable Investments:				
% Fund investments that are sustainable investments	5.00%	32.73%	34.74%	23.97%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

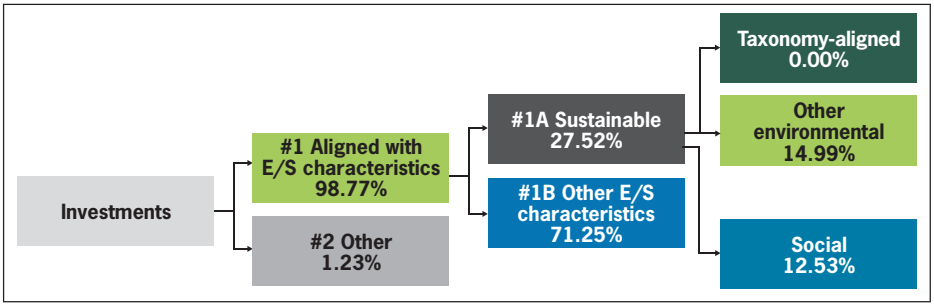
What was the proportion of sustainability-related investments?

98.77% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

27.52% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	29.98%
Communication Services	15.54%
Industrials	13.40%
Materials	8.61%
Health Care	7.82%
Real Estate	5.95%
Information Technology	5.82%
Financials	5.26%
Utilities	3.39%
Consumer Staples	2.95%
Energy	0.04%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.28%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

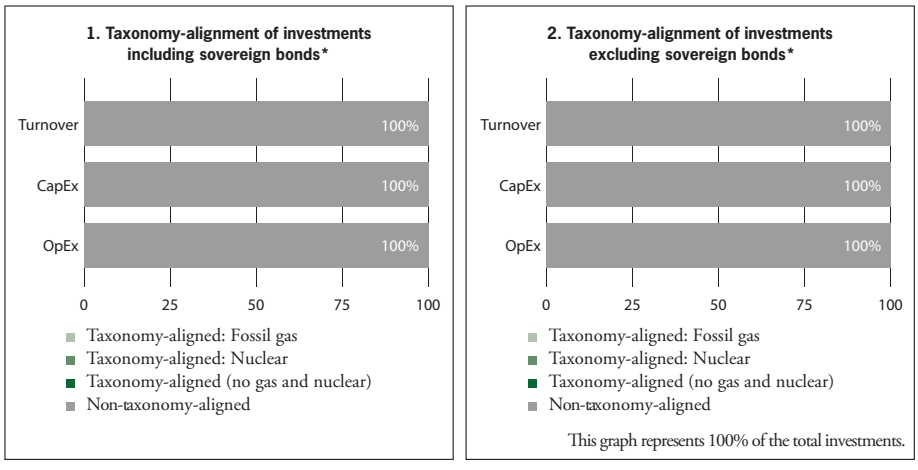
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

14.99% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

12.53% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.23% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Floating Rate ABS Fund**

Legal entity identifier: **549300T7UJE2TXHL2Z08**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the social characteristic of avoiding investments in securitisations that violate responsible business or lending practices.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Securitisations:				
% Fund exposure to securitisations affected by:				
Predatory lending	0.00%	n/a	0.00%	0.00%
Severe malpractice	0.00%	n/a	0.00%	0.00%
Severe consumer protection breach	0.00%	n/a	0.00%	0.00%
Very severe controversies	0.00%	n/a	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

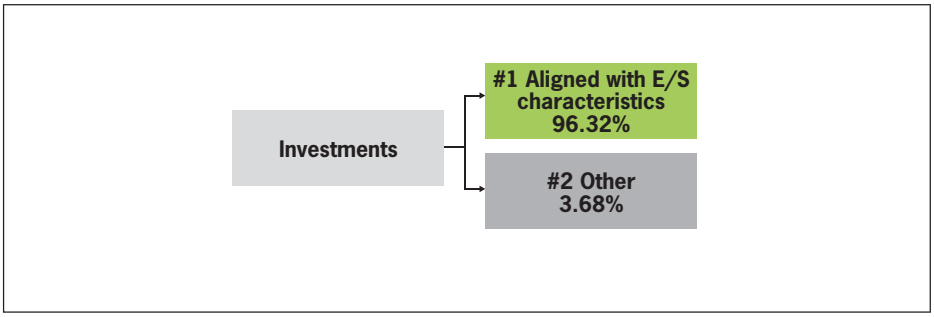
What was the proportion of sustainability-related investments?

96.32% of the Fund's investments attained the promoted social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes which did not attain the promoted social characteristics and were not subject to any minimum social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
Non-Agency Residential Mortgage-Backed Securities	61.82%
Commercial Mortgage-Backed Securities	24.37%
Asset Backed Securities	10.14%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the following environmental and social characteristics:

- **Exclusions:** The Fund promoted the social characteristic of avoiding investments in mortgage-backed securities or any other asset-backed securities ("securitisations") that violate responsible business or lending practices.
- **Best-in-class ESG screening:** The Fund also invested in securitisations that it considered to be best-in-class on ESG matters, based on proprietary ESG scores calculated by the Investment Adviser, and in doing do, promoted environmental or social characteristics, such as, but not limited to, certified energy efficient buildings, affordable housing lending or access to credit for underserved social groups.
- **Sustainable Investments:** The Fund made 29.19% sustainable investments in Sustainable Securitisations, which make a positive environmental and/or social contribution through their use of proceeds to projects including, but not limited to, financing for renewable energy, energy efficiency, affordable housing, and financial inclusion projects.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Securitisations:		
% Fund exposure to securitisations affected by:		
Predatory lending	0.00%	0.00%
Severe malpractice	0.00%	0.00%
Severe consumer protection breach	0.00%	0.00%
Very severe controversies	0.00%	0.00%
Best-in-class ESG Screening		
% Fund exposure to securitisations rated 1 or 2, based on the proprietary ESG scoring methodology (1-5, where 5 is best)	0.00%	0.00%
Portfolio level ESG Securitised Score (>=3), based on the proprietary ESG scoring methodology	3.00	4.01

Sustainable Investments:				
% of the Fund invested in companies classified as sustainable investments	10.00%	n/a	n/a	21.17%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments consisted of Green, Social or Sustainability Securitised Bonds ("Sustainable Securitisations"), where the issuer commits to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that align with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, as well as certain pooled securitisations with a clearly identified environmental or social objective.

Sustainable Securitisations mobilise financing directly towards a multiplicity of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Securitisations contribute depend on the eligible environmental and social project categories of each security.

All Sustainable Securitisations held in the Fund were assessed using the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. This evaluation considers whether the transaction aligns with best practices in terms of criteria for identifying eligible environmental or social projects to be financed; how the allocation of the proceeds to those eligible projects is monitored; the likely environmental or social benefits of the securities in question; and adherence to any applicable recognised market guidelines.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under SFDR, and which are relevant to the investment.

The Investment Adviser determined specific metrics and thresholds for what constituted significant harm to screen PAI indicators that were relevant to the investment, using in-house research and, where available, third party data to support the analysis.

The Investment Adviser used reasonable proxy indicators defined by its ESG research team or sourced from third parties to address the current lack of data for certain PAI indicators. The Investment Adviser's use of proxy indicators was and will be kept under review and was and will be replaced by data from third party data providers, when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser conducted the PAI assessment at either the issuer level or the securitisation's collateral level, depending on the relevance of each applicable indicator in the context of the investment. As an example, in the case of Green Securitised Bonds with proceeds financing energy efficient buildings, the assessment of any violations of UNGC and OECD Guidelines was conducted at the securitisation issuer's level, however the assessment of PAI indicators associated with GHG emissions or fossil fuel exposure was conducted at the collateral level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Investments were screened using third party data, where available, regarding the issuer's compliance with the UN Guiding Principles on Business and Human Rights. Where the application of this screen revealed potential non-compliance, or where data was not available, the Investment Adviser conducted additional desktop research to verify the issuer's practices.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

In considering if an investment could be regarded as a sustainable investment, the Investment Adviser considered the relevant mandatory principal adverse impact ("PAI") indicators under SFDR.

In addition, the fund considered certain PAIs through its proprietary Best-in-Class ESG Screening and scoring process.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

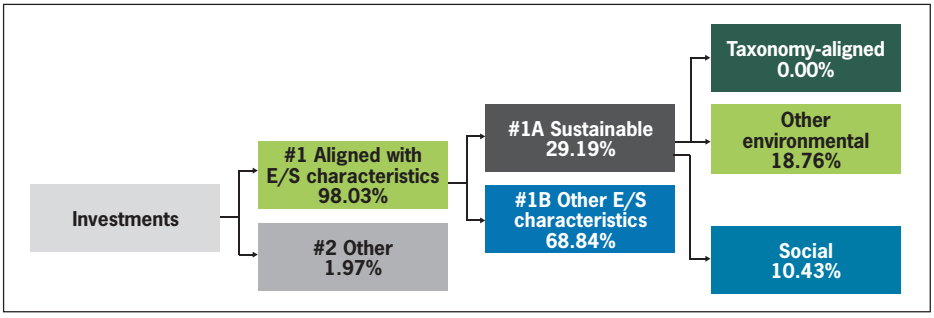
What was the proportion of sustainability-related investments?

98.03% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

29.19% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Non-Agency Mortgage-Backed Securities	23.60%
Commercial Mortgage-Backed Securities	13.21%
Asset-Backed Securities	11.15%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	0.00%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund did not have any exposure to securities or issuers deriving revenue from the fossil fuel related activities listed in the table above.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

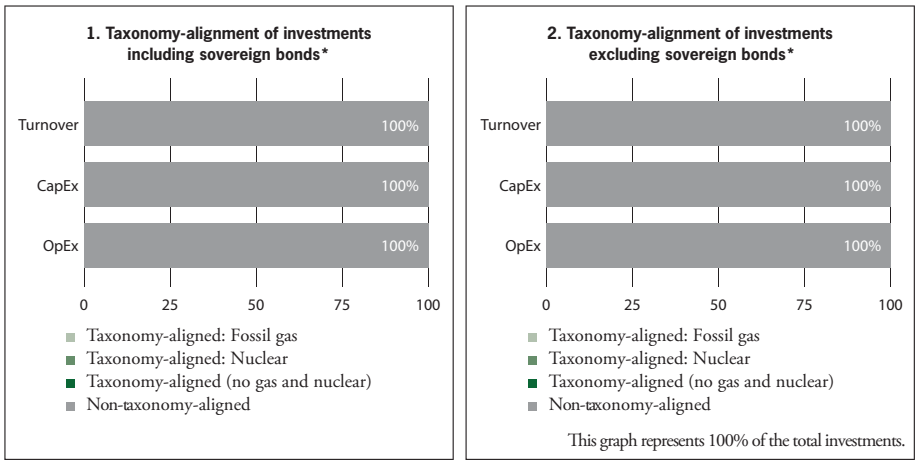
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

18.76% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

10.43% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.97% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's environmental or social characteristics, to avoid any new investments in excluded activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Asset Backed Securities Fund**

Legal entity identifier: **5493000D3CS7FYLIY330**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.18% of the Fund's investments were not aligned with the social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser monitored the investment universe according to the Fund's social characteristics, to avoid any new investments in excluded activities.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third-party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Bond Fund**

Legal entity identifier: **XTIK5CR06MPXCNXP7M95**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 26.73% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association ("ICMA")'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded corporate issuers which derived a certain portion of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

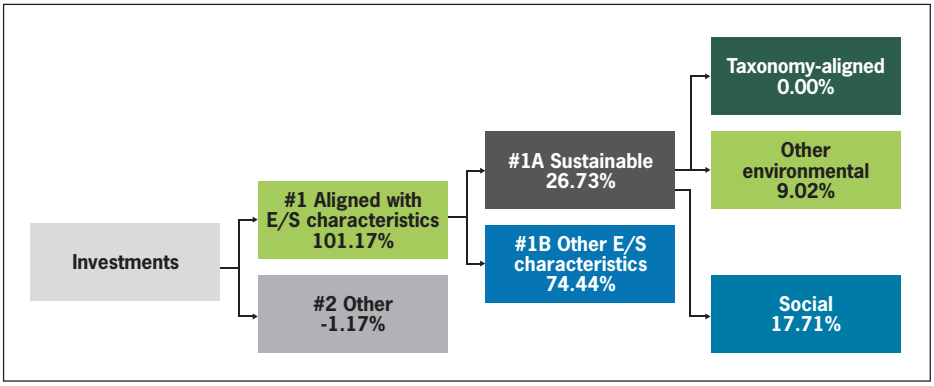
What was the proportion of sustainability-related investments?

101.17% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

26.73% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

As included in the asset allocation table above, #2 Other includes FX and cash, which were net negative.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Sovereigns	34.79%
Securitized	32.89%
Financials	15.41%
Supranationals & Agencies	5.40%
Utilities	3.13%
Communication Services	2.31%
Energy	2.08%
Consumer Discretionary	1.48%
Health Care	1.12%
Information Technology	0.85%
Materials	0.71%
Real Estate	0.47%
Consumer Staples	0.34%
Industrials	0.19%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.19%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

As included in the asset allocation table above, as of year-end, FX and cash was net negative. Given that the sectors table above excludes assets such as cash and hedging instruments, data may sum to >100%.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

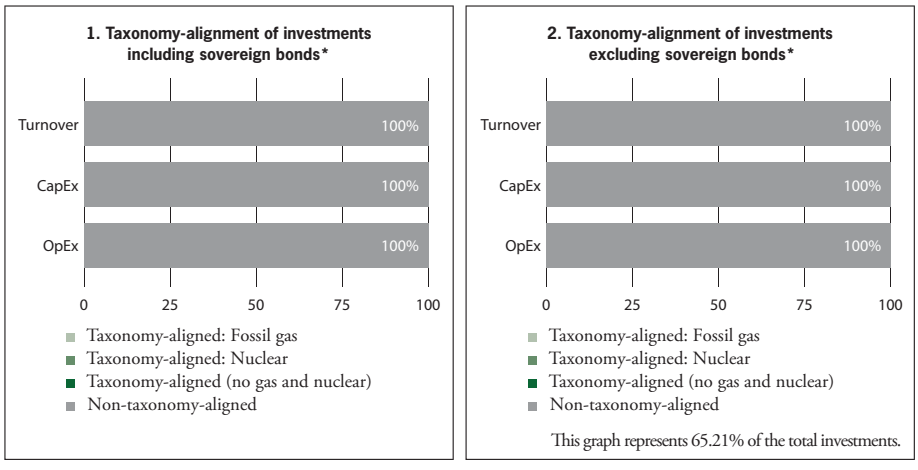
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.02% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

17.71% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

-1.17% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards. Other includes FX and cash, which were net negative.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Convertible Bond Fund**

Legal entity identifier: **K3YUM7KVWUDP746NXC39**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.07% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (5% revenue)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	49.07%

Sustainable Investments:				
% Fund investments that are sustainable investments	5.00%	51.01%	59.61%	60.46%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third-party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third-party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

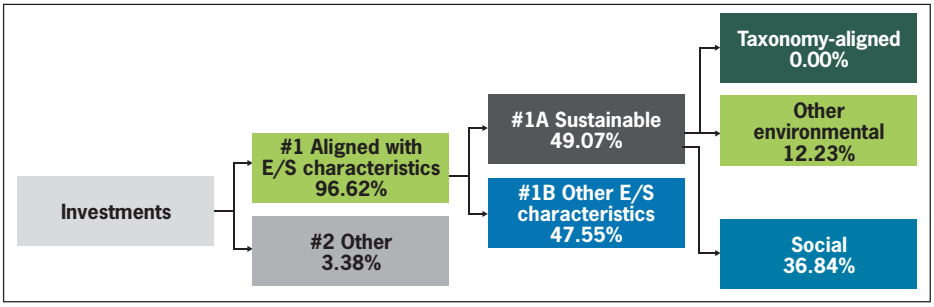
What was the proportion of sustainability-related investments?

96.62% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

49.07% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Information Technology	29.19%
Consumer Discretionary	13.75%
Financials	13.40%
Health Care	10.85%
Utilities	8.64%
Industrials	6.76%
Real Estate	4.05%
Communication Services	3.75%
Materials	3.71%
Consumer Staples	1.47%
Energy	1.03%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	12.35%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

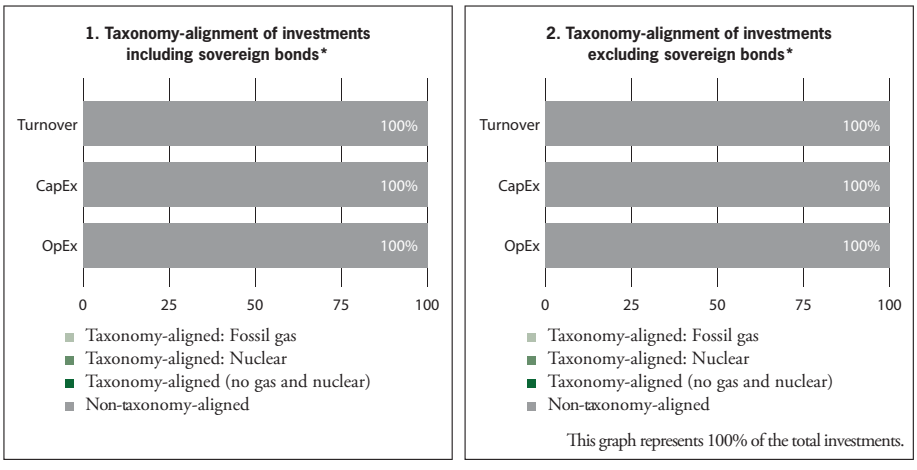
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.23% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

36.84% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.38% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Credit Fund**

Legal entity identifier: **549300I79HKQYIXDUL59**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.09% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues related to the SDGs, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
JPMORGAN CHASE & CO 5.766 22-APR-2035 (SENIOR)	Financials	1.96%	United States

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

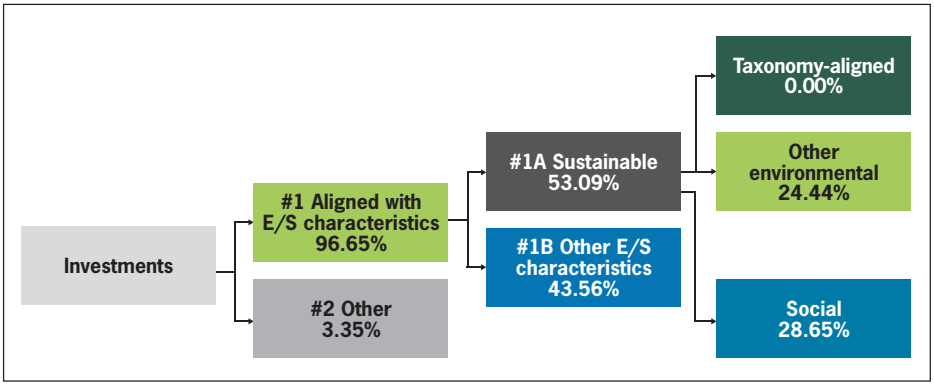
What was the proportion of sustainability-related investments?

96.65% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

53.09% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	44.57%
Utilities	12.82%
Energy	7.10%
Communication Services	7.00%
Health Care	6.12%
Industrials	4.55%
Consumer Discretionary	4.29%
Information Technology	3.29%
Materials	2.53%
Consumer Staples	2.22%
Real Estate	2.17%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	18.64%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

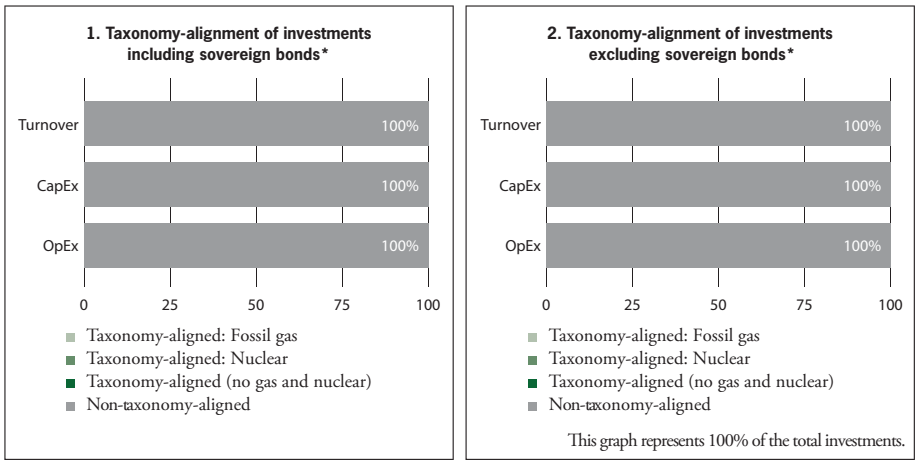
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

24.44% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

28.65% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.35% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

During the reference period, an investment became restricted after it was acquired for the Fund. This comprised of a security no longer meeting the Fund's exclusion policy on coal-fired power generation. The Investment Adviser sold this investment in Q2 2025, keeping in mind the best interests of the Fund's shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Fixed Income Opportunities Fund**

Legal entity identifier: **549300GM4KLC6LR0TV49**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association ("ICMA")'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded corporate issuers which derived a certain portion of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

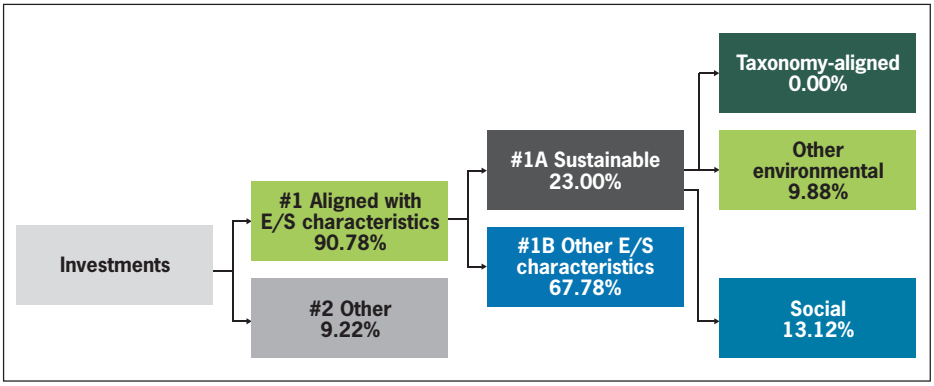
What was the proportion of sustainability-related investments?

90.78% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

23.00% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Securitized	40.39%
Sovereigns	17.54%
Financials	12.58%
Utilities	3.84%
Consumer Discretionary	3.75%
Communication Services	3.02%
Materials	2.46%
Energy	2.01%
Industrials	1.46%
Health Care	1.34%
Supranationals & Agencies	1.08%
Consumer Staples	0.74%
Information Technology	0.57%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.57%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

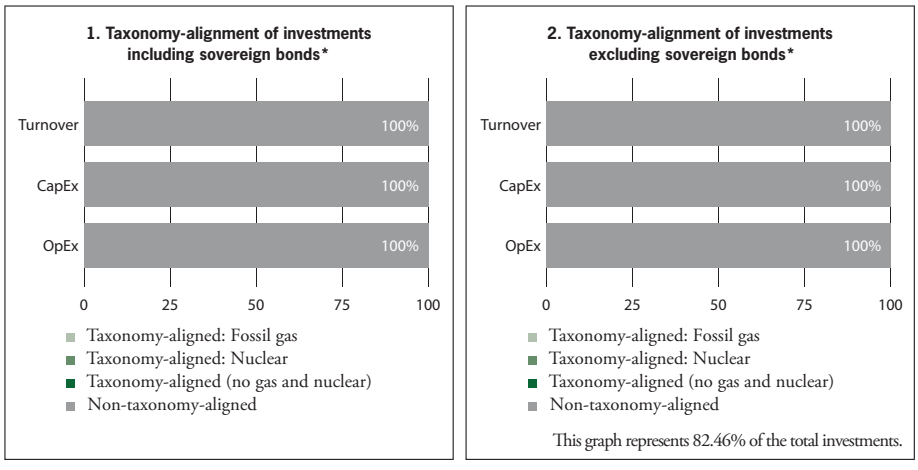
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

9.88% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

13.12% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

9.22% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global High Yield Bond Fund**

Legal entity identifier: **549300IGC07J6G0N2H29**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.17% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value

Sustainable Investments:		
% Fund investments that are sustainable investments	5.00%	19.17%

Since 20 October 2023, the SFDR pre-contractual disclosure of the Global High Yield Bond Fund has disclosed a commitment in sustainable investments of both 20% and 5% in the same document. We would like to inform investors that the fund has committed to invest at least 5% of its net assets in sustainable investments since 20 October 2023. During such period, the level of sustainable investments in the portfolio of the sub-fund has always been above 20% of the sub-fund's net assets. The SFDR pre-contractual disclosure for the fund has been corrected to only disclose the correct commitment level of 5% in the visa-stamped prospectus dated March 2025.

. . . and compared to previous periods?

% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	95.62%	94.13%	
Calvert Principles (20% investible universe reduction)	20.00%	22.43%	22.71%	n/a

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

On 20 October 2023, the Fund's investment policy was amended and the Fund was renamed (the "Portfolio Changes"). As part of these Portfolio Changes, the Fund's restriction screening policy was amended, its net zero objective and positive ESG tilt were removed, and the minimum commitment to sustainable investments with an environmental or social objective was reduced from 20% to 5%.

The sustainability indicator values presented above are based on the applicable quarter-end values, (before and after 20 October 2023), that the Fund's respective investment policies were in place. The annual reduction in carbon intensity has not been calculated for 2023, as the applicable sustainability indicator (which relies on year-end values) was no longer in place at the end of the year.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

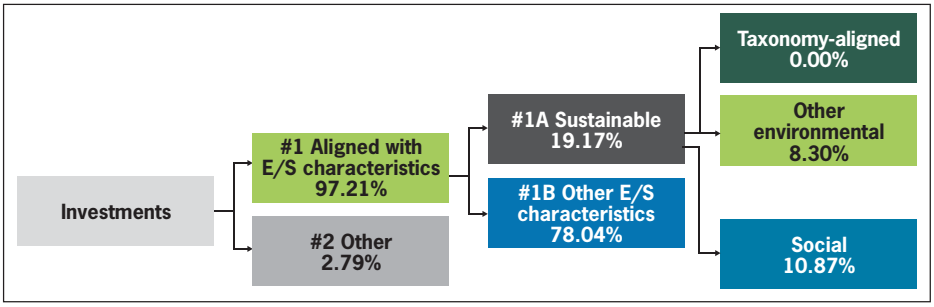
What was the proportion of sustainability-related investments?

97.21% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

19.17% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Consumer Discretionary	20.23%
Industrials	15.71%
Materials	11.45%
Communication Services	10.51%
Health Care	9.36%
Financials	8.23%
Utilities	6.98%
Energy	5.21%
Information Technology	4.05%
Consumer Staples	3.31%
Real Estate	2.17%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	10.76%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

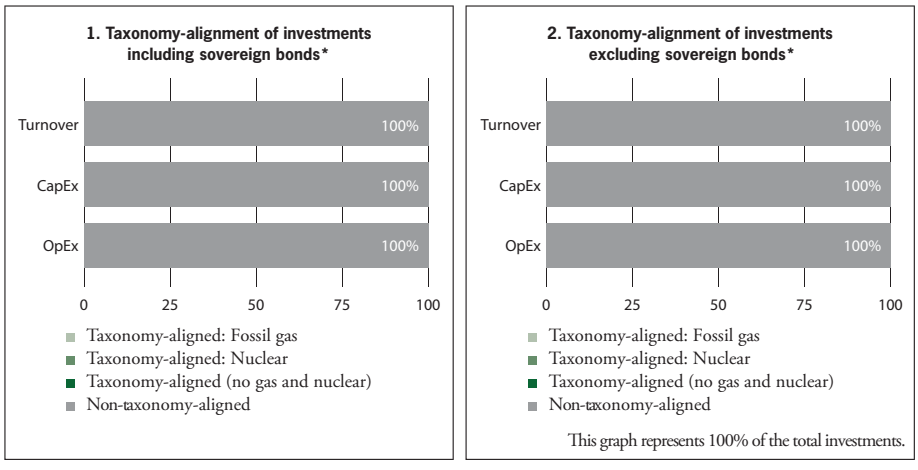
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.30% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

10.87% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

2.79% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Short Maturity Euro Bond Fund**

Legal entity identifier: **IQZY8EWFJYACW1750M88**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.89% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association ("ICMA")'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded corporate issuers which derived a certain portion of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

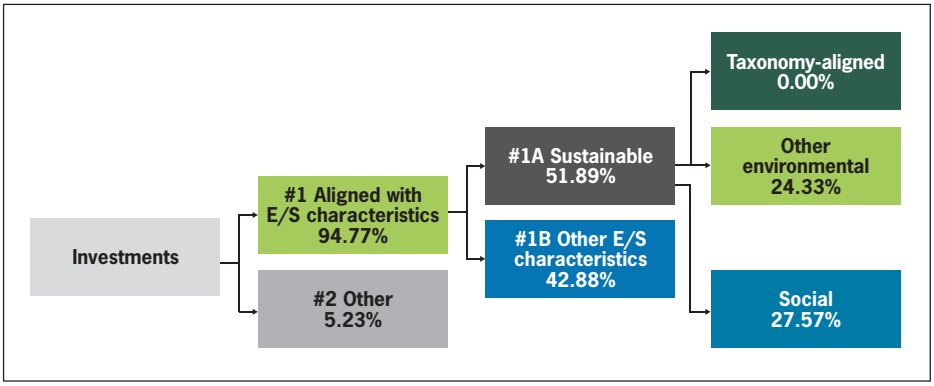
What was the proportion of sustainability-related investments?

94.77% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

51.89% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	43.01%
Sovereigns	33.12%
Supranationals & Agencies	6.00%
Utilities	3.92%
Consumer Discretionary	3.09%
Communication Services	1.23%
Consumer Staples	1.00%
Industrials	0.86%
Health Care	0.84%
Materials	0.53%
Real Estate	0.51%
Energy	0.37%
Information Technology	0.31%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	3.10%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

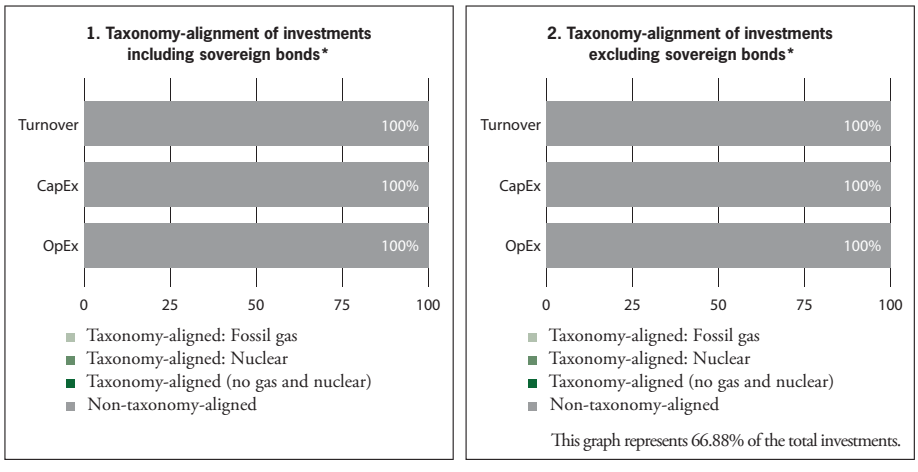
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

24.33% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

27.57% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

5.23% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, an investment became restricted due to no longer meeting a threshold associated with the Fund's restricted activities.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Short Maturity Euro Corporate Bond Fund**

Legal entity identifier: **549300TGXT6HICNUSW15**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.39% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Military or conventional weapons, or weapons systems manufacturing or retail (>10% revenue from 28 April 2025)	0.00%	0.00%
Gambling (>10% revenue from 28 April 2025)	0.00%	0.00%
Coal-fired power generation (>20% revenue from 28 April 2025)	0.00%	0.00%

Sustainable Investments				
% Fund investments that are sustainable investments	40.00%	n/a	68.44%	69.57%

The Fund was launched on 28 February 2023.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
INTESA SANPAOLO SPA 5.0 08-MAR-2028 Reg-S (SENIOR NON-PREFERRED)	Financials	1.37%	Italy

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

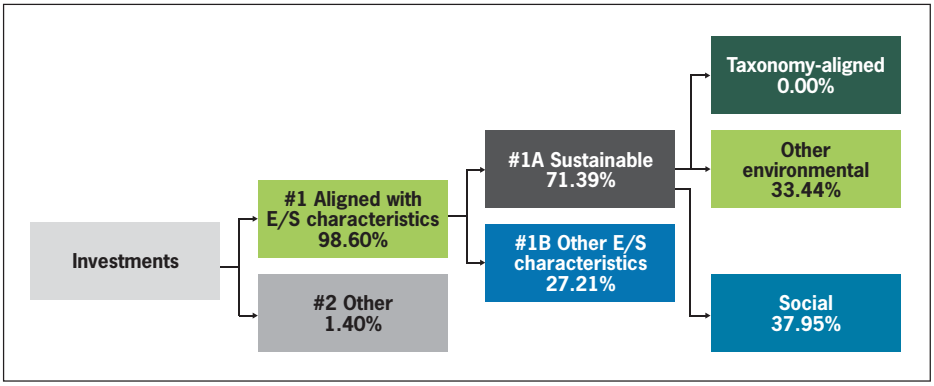
What was the proportion of sustainability-related investments?

98.60% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

71.39% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	59.48%
Consumer Discretionary	7.90%
Utilities	6.06%
Consumer Staples	5.17%
Health Care	4.41%
Communication Services	4.35%
Industrials	3.45%
Information Technology	2.59%
Energy	1.77%
Materials	1.75%
Real Estate	1.68%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	6.34%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

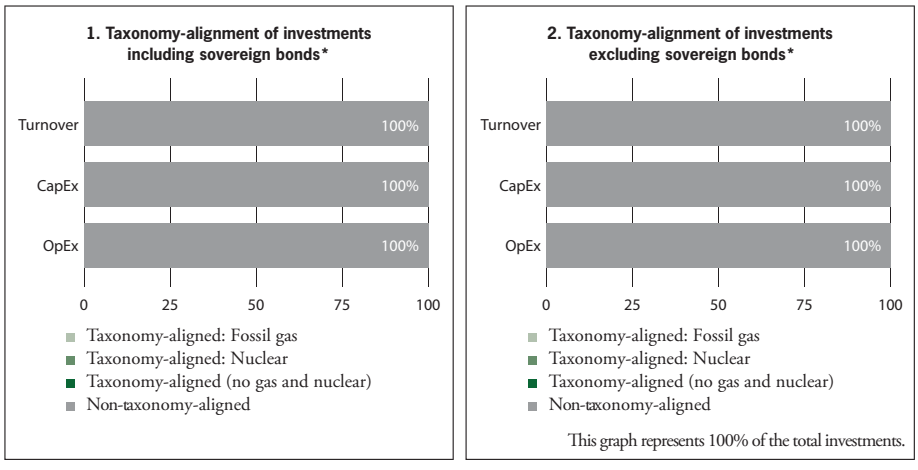
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

33.44% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

37.95% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.40% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **US Dollar Corporate Bond Fund**

Legal entity identifier: **549300A8CL51MXFJCN13**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.99% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and well-being.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments. in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions – Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%
Military or conventional weapons, or weapons systems manufacturing or retail (>10% revenue from 28 April 2025)	0.00%	0.00%
Gambling (>10% revenue from 28 April 2025)	0.00%	0.00%
Coal-fired power generation (>20% revenue from 28 April 2025)	0.00%	0.00%
% Fund exposure to corporate issuers in violation of the UNGC, UN Guiding Principles on Business and Human Rights, ILO Fundamental Principles, or OECD Guidelines for Multinational Enterprises (from 28 April 2025)	0.00%	0.00%
Sustainable Investments:		
% Fund investments that are sustainable investments	40.00%	44.99%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

. . . and compared to previous periods?

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Exclusions – Corporates:				
% Fund exposure to corporate issuers deriving revenue from:				
Controversial weapons (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Civilian firearms (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Tobacco manufacturing (>0% revenue)	0.00%	0.00%	0.00%	0.00%
Thermal coal mining and extraction (>5% revenue)	0.00%	0.00%	0.00%	0.00%
Sustainable Investments:				
% Fund investments that are sustainable investments	40.00%	42.85%	46.05%	48.05%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser will also only include issuers which had sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, where the Fund invested in a Green Bond issued by a utility company, where the proceeds were used to finance renewable energy projects contributing to avoiding GHG emissions, the Investment Adviser considered that the investment satisfied the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Sustainable Bond's use of proceeds are still assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
JPMORGAN CHASE & CO 5.766 22-APR-2035 (SENIOR)	Financials	1.94%	United States

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

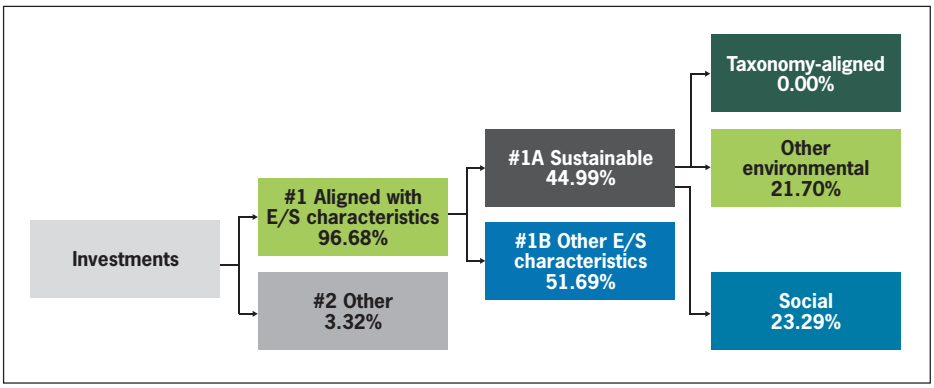
What was the proportion of sustainability-related investments?

96.68% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

44.99% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	37.35%
Utilities	12.74%
Energy	8.59%
Health Care	7.96%
Communication Services	7.01%
Industrials	6.72%
Consumer Discretionary	4.13%
Information Technology	3.65%
Materials	3.16%
Real Estate	2.79%
Consumer Staples	2.55%
Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	23.28%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers with any ties to such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

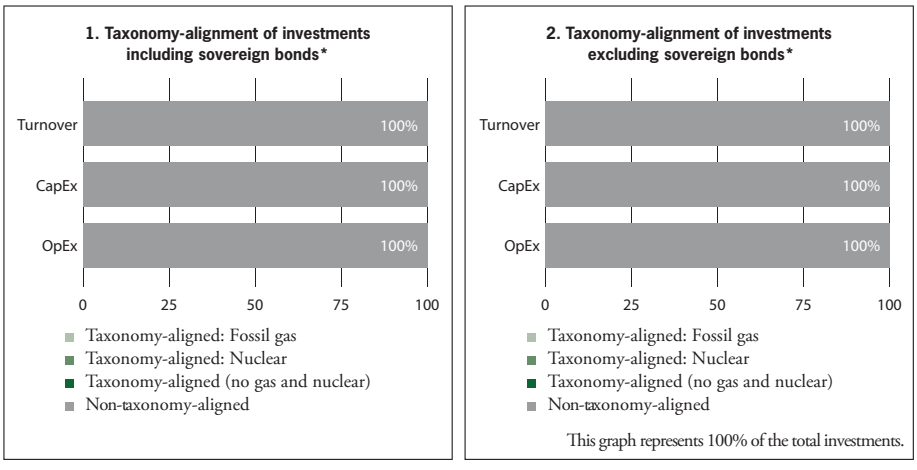
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

21.70% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

23.29% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.32% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

During the reference period, an investment became restricted after it was acquired for the Fund. This comprised of a security no longer meeting the Fund's exclusion policy on coal-fired power generation. The Investment Adviser sold this investment in Q2 2025, keeping in mind the best interests of the Fund's shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Product name: **US Dollar Short Duration Bond Fund**

Legal entity identifier: **5493008B8KBFODOHZX52**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.31% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period the Fund promoted its environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing, in sovereign issuers that significantly violate social rights, and in securitisations that violate responsible business or lending practices.

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions made a net positive contribution towards the United Nations' Sustainable Development Goals ("SDGs");
- Sovereign issuers with ESG scores in the top-2 ranks according to the Investment Adviser's proprietary scoring methodology, associated with positive environmental or social attributes; or
- Sustainable Bonds which made a positive social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions		
Corporates:		
% Fund exposure to corporate issuers deriving revenue from:		
Controversial weapons (>0% revenue)	0.00%	0.00%

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments in the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but is not limited to, bonds that aligned with the International Capital Market Association ("ICMA")'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds that had been assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. They include environmental (e.g. Climate Action or Life on Land) and social (e.g. Good Health and Well-Being) objectives. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material mis-alignment on any of the SDGs.

- Bonds from sovereign issuers with an ESG rank of 4 or 5, in a 1-5 range where 5 is best, based on the Investment Adviser's proprietary ESG scoring methodology. Ranks of 4 and 5 reflect a country's positive contribution towards environmental and social themes such as decarbonisation, forestry conservation, promotion of education, health and wellbeing, and good living standards. The Investment Adviser, however, did not treat the investment as sustainable if the sovereign issuer ranked 4 or 5 and had experienced recent negative momentum as assessed through in-house research, which was not captured by ESG data providers. For example, this may have included circumstances where a country was facing significant political and/or social instability.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores. The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which were relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded corporate issuers which derived a certain portion of revenue from thermal coal mining and extraction, as well as from coal-fired power generation. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which have committed violations of the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, or which have experienced very severe controversies relating to violations of the OECD Guidelines for Multinational Enterprises. The Fund therefore considered the PAI indicator number 10: violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises.
- The Fund excluded corporate issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.
- The Fund excluded any sovereign issuers where there was evidence of them having caused significant harm from social violations, which the Investment Adviser defines in relation to the bottom 10% ranked countries on a custom indicator reflecting the fulfilment of social rights. The Fund therefore considered in part the PAI indicator 16: investee countries subject to social violations.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

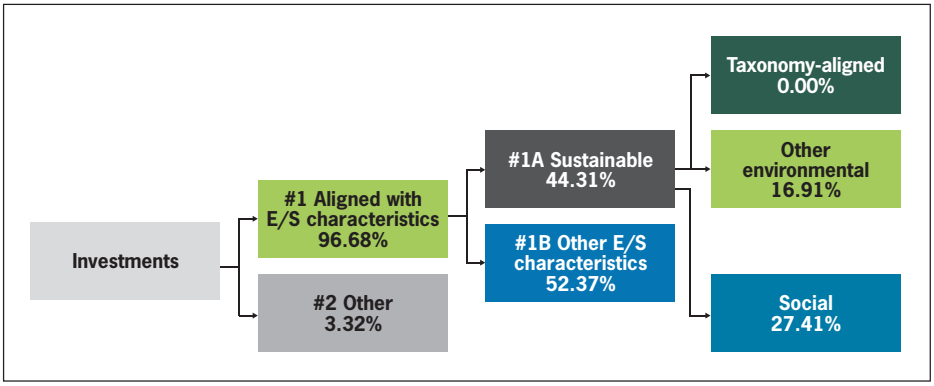
What was the proportion of sustainability-related investments?

96.68% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

44.31% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Financials	44.65%
Securitized	16.66%
Sovereigns	10.28%
Information Technology	4.95%
Industrials	4.41%
Consumer Staples	3.02%
Utilities	2.85%
Consumer Discretionary	2.81%
Health Care	2.77%
Real Estate	1.76%
Energy	1.05%
Materials	0.88%
Communication Services	0.59%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	9.14%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

The Fund also had minimal exposure to fossil fuel related activities through investments in commercial paper, held for ancillary liquidity.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

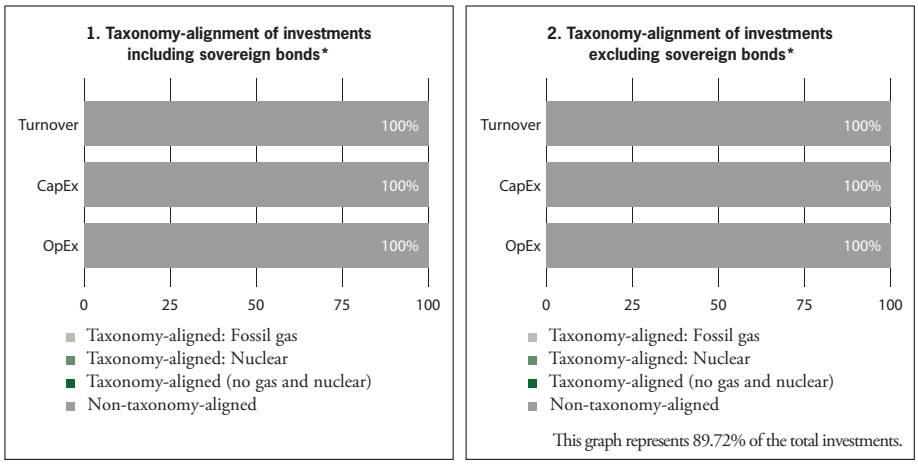
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

16.91% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

27.41% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.32% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period, some investments became restricted due to no longer meeting thresholds associated with the Fund's restricted activities. The Investment Adviser sold these investments, keeping in mind the best interests of the Fund's shareholders.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **US Dollar Short Duration High Yield Bond Fund**

Legal entity identifier: **549300ZADDUDEM9Q8605**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.61% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Thermal coal mining and extraction (5% revenue)	0.00%	0.00%	0.00%	0.00%
Sustainable Investments:				
% Fund investments that are sustainable investments	5.00%	15.33%	22.77%	23.43%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: from 01 January 2025 to 31 December 2025.

Security	Sector	% Assets	Country
ECHOSTAR CORP 10.75 30-NOV-2029 (SECURED)	Communication Services	1.79%	United States

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

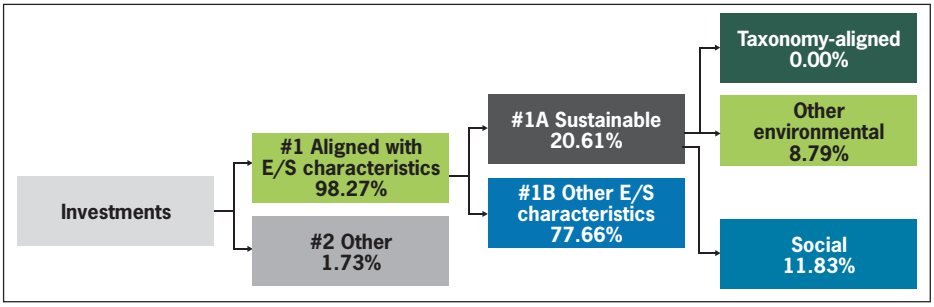
What was the proportion of sustainability-related investments?

98.27% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

20.61% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	25.13%
Consumer Discretionary	18.83%
Materials	10.94%
Health Care	8.48%
Financials	8.06%
Energy	7.77%
Utilities	6.51%
Communication Services	5.71%
Information Technology	3.35%
Real Estate	2.25%
Consumer Staples	1.24%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	11.40%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

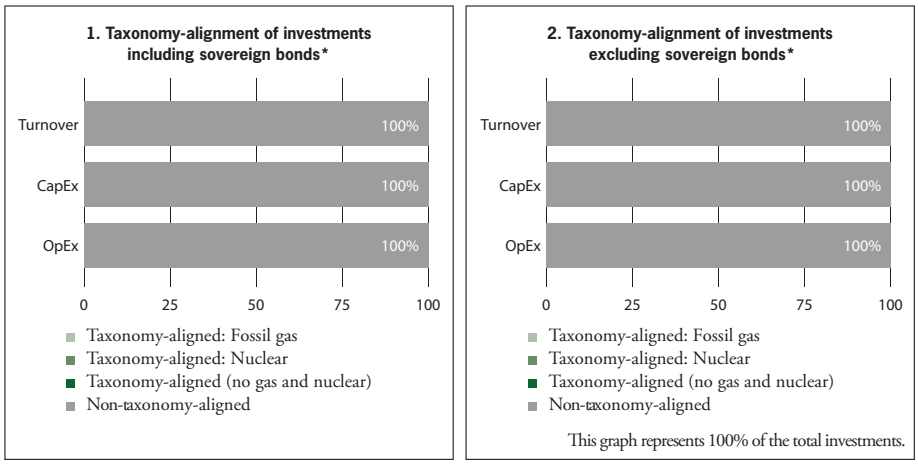
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

8.79% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

11.83% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.73% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **US High Yield Bond Fund**

Legal entity identifier: **54930007SWUXWYEHVP32**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

% of the Fund's portfolio which the Investment Adviser aimed to be compliant with the Calvert Principles, and the actual percentage of the Fund's portfolio which was compliant with the Calvert Principles were:	90.00%	95.89%	95.88%	n/a
Calvert Principles (20% investible universe reduction)	20.00%	26.29%	26.86%	n/a

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

On 31 August 2023, the Fund's investment policy was amended and the Fund was renamed (the "Portfolio Changes"). As part of these Portfolio Changes, the Fund's restriction screening policy was amended, its net zero objective and positive ESG tilt were removed, and the minimum commitment to sustainable investments with an environmental or social objective was reduced from 20% to 5%.

The sustainability indicator values presented above are based on the applicable quarter-end values, (before and after 31 August 2023), that the Fund's respective investment policies were in place. The annual reduction in carbon intensity has not been calculated for 2023, as the applicable sustainability indicator (which relies on year-end values) was no longer in place at the end of the year.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered all of the mandatory PAI on sustainability factors which are relevant to the investment for the portion allocated to sustainable investments, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors taken into account?"

The portion of the Fund that was not comprised of sustainable investments considered certain PAIs only in part through the Fund's exclusionary criteria, as follows:

- The Fund excluded issuers which derived a certain percentage of revenue from thermal coal mining and extraction. The Fund therefore partly considered the PAI indicator 4: exposure to companies active in the fossil fuel sector.
- The Fund excluded issuers which derived any revenue from controversial weapons manufacturing or retail. The Fund therefore considered in whole the PAI indicator 14: exposure to controversial weapons.

% Assets are calculated based on the Fund's investments at year-end during the reference period. The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

What was the proportion of sustainability-related investments?

96.22% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

25.20% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

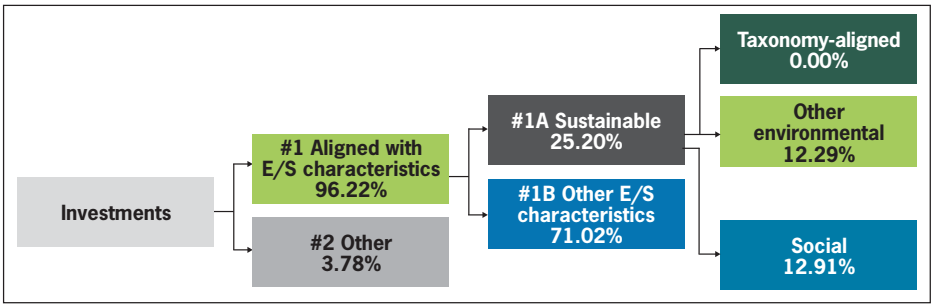
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	18.07%
Consumer Discretionary	17.04%
Materials	9.87%
Health Care	9.33%
Communication Services	8.51%
Financials	8.03%
Energy	7.62%
Utilities	7.23%
Consumer Staples	5.84%
Information Technology	3.15%
Real Estate	1.54%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	13.36%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

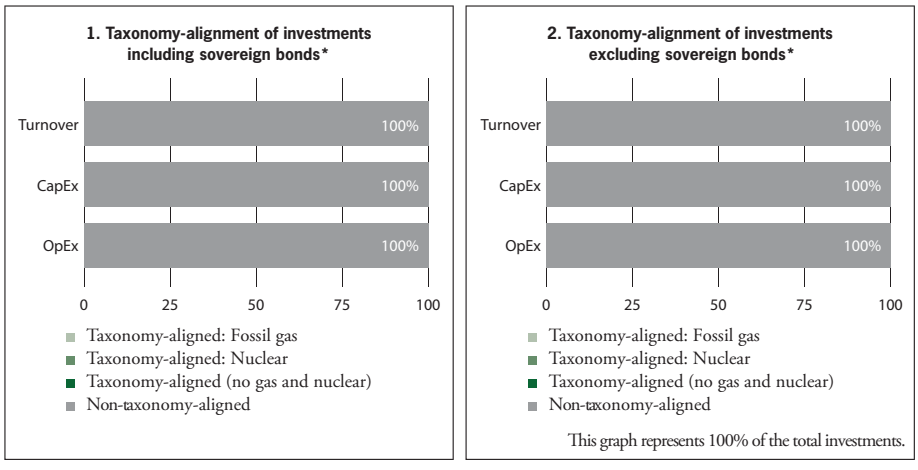
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

12.29% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

12.91% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3.78% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **US High Yield Middle Market Bond Fund**

Legal entity identifier: **5493001L587BVK8II004**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 17.56% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted the environmental characteristic of climate change mitigation by excluding investments in certain types of fossil fuels. In addition, the Fund promoted the social characteristic of avoiding investments in certain activities which can cause harm to human health and wellbeing.

Further detail on the nature of these exclusions is set out below (in response to the question, "How did the sustainability indicators perform?").

The Fund also supported the above environmental and social characteristics by making sustainable investments in:

- Corporate issuers whose business practices, products or solutions, made a net positive contribution towards United Nations' Sustainable Development Goals ("SDGs"); or
- Sustainable Bonds which made a positive environmental or social contribution through their use of proceeds, as explained in response to the question below, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?".

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Corporates:

Sustainable Investments:				
% Fund investments that are sustainable investments	5.00%	17.96%	22.13%	24.40%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund's sustainable investments fell within one of the following categories:

- Green, Social or Sustainability Bonds ("Sustainable Bonds"), where the issuer committed to allocate the proceeds to projects making a positive environmental or social contribution. This included, but was not limited to, bonds that aligned with the International Capital Market Association (ICMA)'s Green Bond Principles, Social Bond Principles, and Sustainability Bond Guidelines, and bonds which were assessed through the Investment Adviser's proprietary Sustainable Bond evaluation framework. Sustainable Bonds mobilise financing directly towards a variety of environmental and social projects whose focus spans across a number of sustainability objectives. Examples include, but are not limited to, financing for renewable energy, energy efficiency, clean transportation, affordable housing, and financial inclusion projects. The specific objectives to which the Sustainable Bonds contribute depend on the eligible environmental and social project categories of each security.

- Bonds from corporate issuers whose business practices, products or solutions, made a net positive contribution towards the SDGs. The SDGs were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet and ensure that by 2030 all people enjoy peace and prosperity. The Investment Adviser defines positive contribution to the SDGs as a net positive aggregate alignment score across all the SDGs (i.e., scores measuring positive contribution to individual SDGs have to, in total, be greater than the total of any negative contribution scores), based on third party data. The Investment Adviser also only includes issuers which have sufficient positive SDG alignment with at least one individual SDG, and which did not have any material misalignment on any of the SDGs.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principal adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The "do no significant harm" methodology applied by the Investment Adviser on sustainable investments excluded investments that the Investment Adviser considered caused significant harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the SFDR rules, and which are relevant to the investment.

The thresholds were set: (i) on an absolute value basis; (ii) on a relative basis in the context of the investment universe; or (iii) using pass/fail scores.

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning exposure to activities negatively affecting biodiversity sensitive areas, the Investment Adviser supplemented the assessment by using an additional indicator provided by a third party data vendor which measured the extent to which companies were involved in controversies related to environmental issues and had adopted measures to mitigate biodiversity risk, as a reasonable proxy. These proxies were and will continue to be kept under review and were and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

The Investment Adviser generally conducted the PAI assessment at the issuer level. However, for certain investments the assessment was done at the security level in whole or in part. For instance, in the case of Sustainable Bonds, as defined above, the PAI indicators that were directly related to the sustainability factors targeted by the bond's use of proceeds were assessed at the security level, through the Investment Adviser's proprietary Sustainable Bond Evaluation Framework. As an example, investments in a Green Bond issued by a utility company, where the proceeds are used to finance renewable energy projects contributing to avoiding GHG emissions, would be considered to satisfy the PAI indicators related to GHG emissions and GHG intensity, even if the issuer had a negative overall assessment on those PAI indicators. Other PAI indicators that are unrelated to the Green Bond's use of proceeds would still be assessed at the issuer level.

The Fund's PAI assessment was supported, on a qualitative basis, by the Investment Adviser's engagement with selected issuers on their corporate governance practices, as well as on other material sustainability issues, in line with the Investment Adviser's Fixed Income Engagement Strategy, available on www.morganstanley.com/im.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments were screened to exclude issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

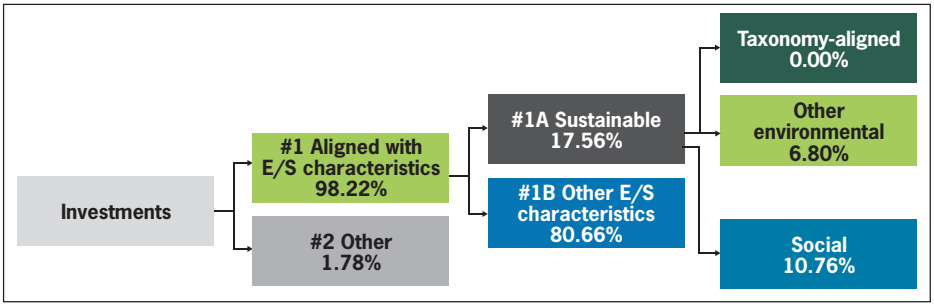
What was the proportion of sustainability-related investments?

98.22% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

17.56% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram below.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Fund's methodology for categorising investments as sustainable investments considers both environmental and social factors (as relevant) as set out above.

The Investment Adviser has defined an approach to differentiate sustainable investments into investments with an environmental or social objective, respectively, based on the predominant thematic characteristics underpinning such investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Industrials	22.40%
Consumer Discretionary	19.63%
Financials	9.59%
Materials	9.27%
Energy	7.77%
Health Care	7.15%
Communication Services	6.53%
Utilities	5.34%
Consumer Staples	4.55%
Information Technology	4.03%
Real Estate	1.95%

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	10.15%

The table above only includes investments made by the Fund and excludes other assets held by the Fund such as cash and hedging instruments.

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining exclusion applied as a binding characteristic to the Fund.

The investments in this Fund include green and sustainability use of proceeds bonds. Where the Fund invested in these types of bonds, the Investment Adviser assessed any exposure the proceeds of the bonds have to fossil fuels as opposed to any exposure the issuer may have to fossil fuels. This is because any exposure the issuer has to fossil fuels does not impact the use of proceeds of the bond. In practice, this means any green and sustainability use of proceeds bonds are excluded from the fossil fuel exposure calculation above, as the Investment Adviser treats these bonds as not having any exposure to fossil fuels.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

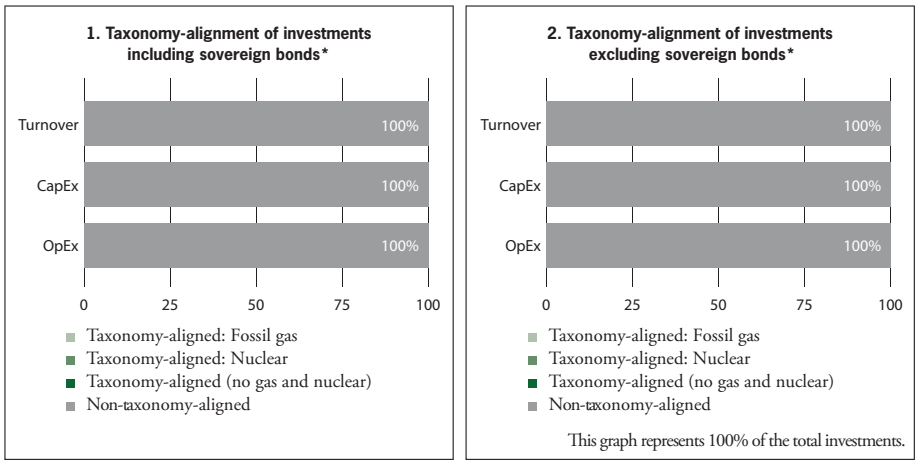
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

6.80% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

10.76% of the Fund's investments were sustainable investments with a social objective during the reference period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

1.78% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. These investments comprised cash instruments held for ancillary liquidity and derivatives held for hedging purposes, and they were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

During the reference period, the Investment Adviser regularly monitored investments in the Fund according to the Fund's environmental and social characteristics.

In addition, the Investment Adviser monitored any progress or deterioration in the sustainability performance of the Fund's holdings based on its proprietary research and ESG scoring methodologies, and engaged with selected bond issuers held in the Fund, in relation to their sustainability practices and any controversies, to encourage improvement. Such engagement activities supported, on a qualitative and non-binding basis, the Fund's PAI and good governance assessment.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Balanced Defensive Fund**

Legal entity identifier: **549300MHNRAKP3UFJG77**

Reference period: **01 January 2025 to 31 December 2025**

This Fund was reclassified from Article 6 to Article 8 on 23 August 2024.

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the implementation of these exclusions is set out below in response to the question "How did the sustainability indicators perform?".

- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund's investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser's credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser's views on the credit quality of those sovereigns.

Credit

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which have caused severe environmental harm where appropriate remedial action has not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question "How did the sustainability indicators perform?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Equity and Credit investments		
% Fund exposure to corporate issuers deriving revenue from:		
thermal coal mining (>5% revenue)	0.00%	0.00%
oil sands extraction (>5% revenue)	0.00%	0.00%
arctic oil and/or gas production (>5% revenue)	0.00%	0.00%
controversial weapons manufacturing or production (>0% revenue)	0.00%	0.00%
civilian firearms manufacturing (>0% revenue)	0.00%	0.00%
tobacco manufacturing (>0% revenue)	0.00%	0.00%
tobacco supply, distribution or retail sales (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%
ESG Tilt		
Equity investments		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure: (1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and (2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.26	7.04
Europe (Reference Index MSCI Europe)	7.79	8.51
Japan Basket (Reference Index MSCI Japan)	7.62	8.54
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	6.40	6.96
Developed World ex Japan ex USA ex Europe Basket (Reference Index MSCI World ex Japan ex USA ex Europe)[1]	n/a	n/a
Total ESG Score of the MSCI ACWI index and that of the Fund:	6.64	6.98

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Low Carbon Transition Score of the benchmark named below for the region and that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.32	6.66
Europe (Reference Index MSCI Europe)	5.83	6.16
Japan Basket (Reference Index MSCI Japan)	5.78	6.12
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.67	5.99
Developed World ex Japan ex USA ex Europe Basket (Reference Index MSCI World ex Japan ex USA ex Europe)[1]	n/a	n/a
Total Low Carbon Transition Score of the MSCI ACWI index and that of the Fund:	6.10	6.51
Government bonds (until 19 March 2025)[2]		
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The GBaR ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	n/a	n/a

[1] This basket was deallocated during the reference period. As of 31 December 2025, the Fund had no exposure to stocks within this basket.

[2] This indicator was removed from the Fund on 19 March 2025 and was not monitored thereafter. There were no exceptions to this indicator while it was in place during the reference period.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The GBaR ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	5.99	6.31

The Fund's classification as Article 8 under SFDR became effective on 23 August 2024.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

[1] This basket was previously called the Asia ex-Japan Basket with the previous reference index (MSCI Asia ex-Japan). The 2024 indicator value reflects Q4 only, as the regional basket was updated in Q4 2024. For the ESG score, the average Q1-Q3 value for the previous regional basket (Asia-ex Japan Basket) was 6.66, and the previous reference index (MSCI Asia ex-Japan) was 5.99. For the Low Carbon Transition score, the average values for the basket and the index were 6.12 and 5.71, respectively.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following PAI indicators through the application of the Fund's binding environmental or social characteristics:

- **PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies):** The Fund considered PAI indicators numbers 1-3 regarding GHG emissions in part through its direct equity and corporate credit investments. The Fund considered these indicators because it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).

- **PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities and corporate credit because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.

- **PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities and corporate credit because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.

- **PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.

- **PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

What was the proportion of sustainability-related investments?

85.13% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

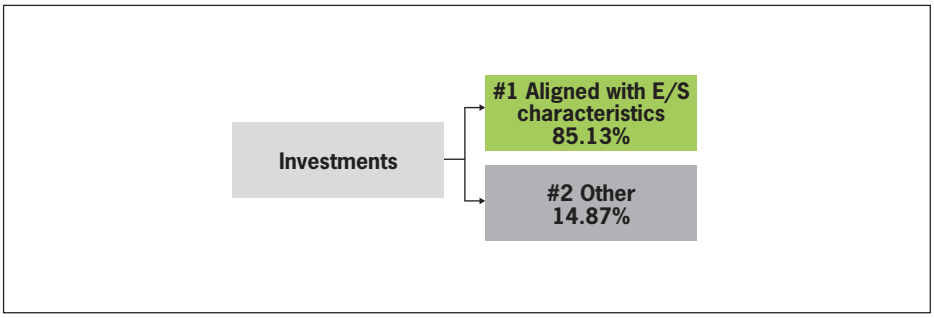
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The relevant environmental and social characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the environmental and social characteristics of the Fund were made up of:

- 28.38% equity investments
- 36.14% investments in government bonds
- 20.61% investments in corporate credit

The ESG tilt of the equity investments was applied at the level of the five regional baskets and the portfolio of equity investments, and not at the level of individual holdings. Some investee companies may therefore have had an ESG score or Low Carbon Transition score lower than the average for the regional basket or for the whole portfolio of equity investments. Similarly, the carbon budget of the equity investments was applied at the portfolio level of all the equity investments (and not at the level of the individual holdings, which may on an individual basis have had higher carbon emissions than the average for all the equity investments).

Mutual Funds	**9.22%**

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	5.65%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any companies that derive 5% or more of their revenues from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

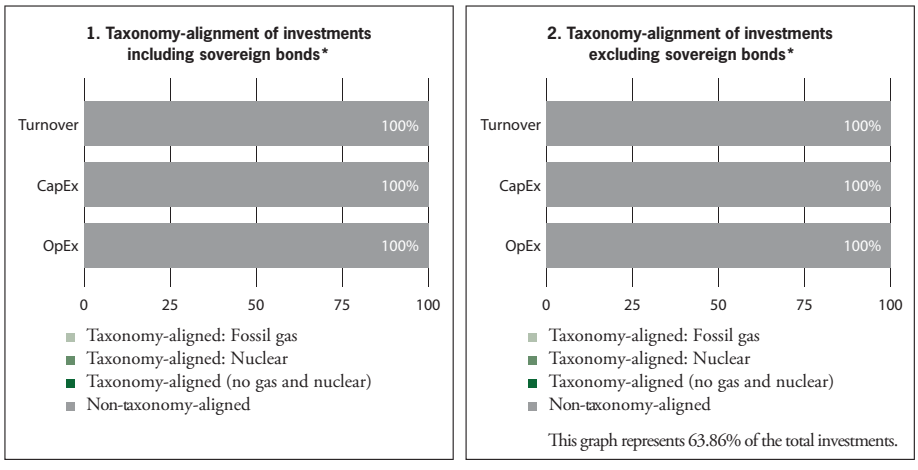
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

14.87% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised: (i) hedging instruments, (ii) cash held as ancillary liquidity, (iii) investments for which the investment team was lacking data in order to assess if they qualified as promoting environmental or social characteristics, (iv) any other investments which did not promote environmental or social characteristics (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Adviser carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period investments became restricted due to issuers experiencing ESG controversies.

The Investment Adviser exercised proxy voting and other rights as shareholders with the Fund's environmental and social characteristics in mind. These activities gave the Investment Adviser the opportunity to guide companies in which it invests towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Adviser voted by proxy in a prudent and diligent manner, based on MSIM's proxy voting policies and in the best interests of the Fund's clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Adviser is in no way obligated to follow such recommendations.

For more information on the Investment Adviser's engagement and voting with reference to the Fund please see the Stewardship Report.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Balanced Fund**

Legal entity identifier: **5493001XMV1F05VL2L46**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the implementation of these exclusions is set out below in response to the question "How did the sustainability indicators perform?".

- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund's investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser's credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser's views on the credit quality of those sovereigns.

Credit

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which have caused severe environmental harm where appropriate remedial action has not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question "How did the sustainability indicators perform?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal coal mining (>5% revenue)	0.00%	0.00%
thermal coal-fired power generation (>50% revenue)[1]	0.00%	0.00%
oil sands extraction (>5% revenue)	0.00%	0.00%
arctic oil and gas production (>5% revenue)	0.00%	0.00%
controversial weapons manufacturing or production (>0% revenue)	0.00%	0.00%
civilian firearms manufacturing (>0% revenue)	0.00%	0.00%
tobacco manufacturing (>0% revenue)	0.00%	0.00%
tobacco supply, distribution or retail sales (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds:		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%
ESG Tilt		
Equity investments:		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure: (1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and (2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.26	7.04
Europe (Reference Index MSCI Europe)	7.79	8.57
Japan Basket (Reference Index MSCI Japan)	7.62	8.46
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	6.40	6.98
Developed World ex Japan ex USA ex Europe Basket (Reference Index MSCI World ex Japan ex USA ex Europe)[1]	n/a	n/a
Total ESG Score of the MSCI ACWI index and that of the Fund:	**6.64**	**7.08**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Government Bonds:				
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The GBaR ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	See relevant year	5.90 (Fund) 5.87 *(Index)*	6.07 (Fund) 5.97 *(Index)*	5.89 (Fund) 5.99 *(Index)*

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

In Q4 2024, the Fund was exposed to an issuer that became restricted due to experiencing an ESG controversy. The Investment Adviser rectified this exception by selling the holding within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

As described in the Fund's pre-contractual disclosure and above, the application of the Investment Adviser's credit research overlay process may occasionally result in sovereign bonds held by the fund not outperforming the benchmark on ESG issues. In Q2 and Q3 the Fund's ESG Government Score was lower than the benchmark for this reason.

[1] These exclusions were added as sustainability indicators for transparency purposes; prior to this addition, they were listed in the Fund's exclusion policy and applied by the Fund but not included as indicators in the Fund's precontractual disclosure.

[2] This basket was previously called the Asia ex-Japan Basket with the previous reference index (MSCI Asia ex-Japan). The 2024 indicator value reflects Q4 only, as the regional basket was updated in Q4 2024. For the ESG score, the average Q1-Q3 value for the previous regional basket (Asia-ex Japan Basket) was 6.66, and the previous reference index (MSCI Asia ex-Japan) was 5.99. For the Low Carbon Transition score, the average values for the basket and the index were 6.12 and 5.71, respectively.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following PAI indicators through the application of the Fund's binding environmental or social characteristics:

- **PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies):** The Fund considered PAI indicators numbers 1-3 regarding GHG emissions in part through its direct equity and corporate credit investments. The Fund considered these indicators because it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).

- **PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities and corporate credit because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.

- **PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities and corporate credit because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.

- **PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.

- **PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

What was the proportion of sustainability-related investments?

88.55% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

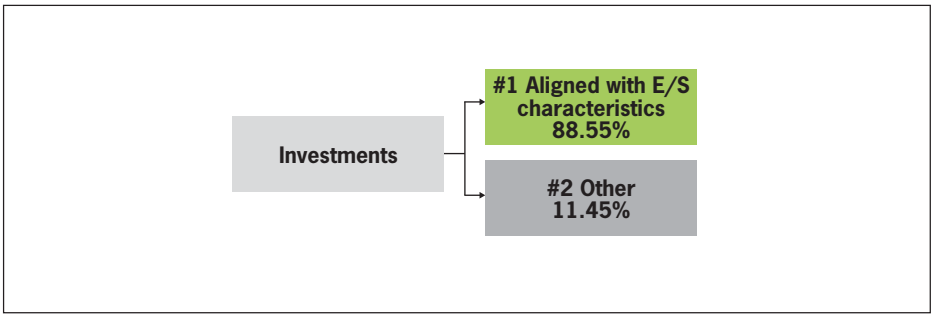
Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The relevant environmental and social characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the environmental and social characteristics of the Fund were made up of:

- 57.27% equity investments
- 22.76% investments in government bonds
- 8.52% investments in corporate credit

The ESG tilt of the equity investments was applied at the level of the five regional baskets and the portfolio of equity investments, and not at the level of individual holdings. Some investee companies may therefore have had an ESG score or Low Carbon Transition score lower than the average for the regional basket or for the whole portfolio of equity investments. Similarly, the carbon budget of the equity investments was applied at the portfolio level of all the equity investments (and not at the level of the individual holdings, which may on an individual basis have had higher carbon emissions than the average for all the equity investments).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Equity & Corporate Bonds	**65.79%**
Information Technology	15.38%
Financials	14.34%
Industrials	8.60%
Communication Services	5.30%
Consumer Discretionary	5.20%
Health Care	4.43%
Utilities	3.50%
Other	2.43%
Consumer Staples	2.24%
Materials	2.03%
Energy	1.47%
Real Estate	0.88%
Sovereign	**22.76%**
Mutual Funds	**9.75%**

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	9.13%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any companies that derive 5% or more of their revenues from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

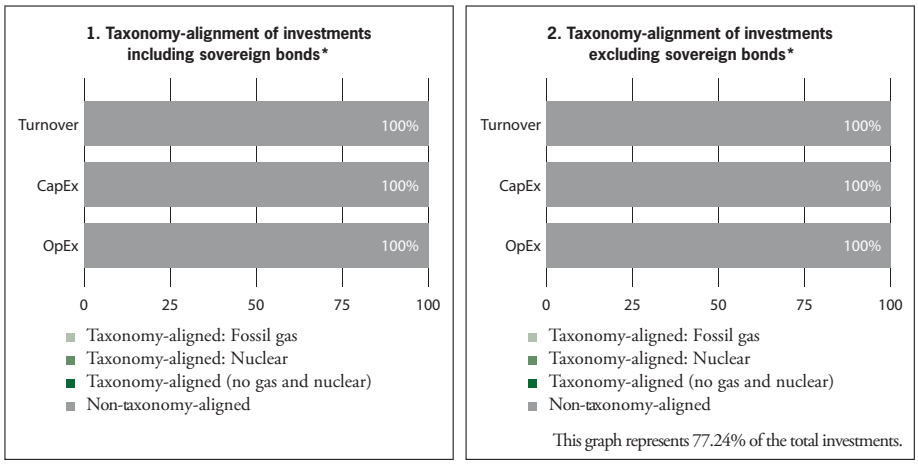
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

11.45% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised: (i) hedging instruments, (ii) cash held as ancillary liquidity, (iii) investments for which the investment team was lacking data in order to assess if they qualified as promoting environmental or social characteristics, (iv) any other investments which did not promote environmental or social characteristics (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguardss.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Adviser carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period investments became restricted due to issuers experiencing ESG controversies.

The Investment Adviser exercised proxy voting and other rights as shareholders with the Fund's environmental and social characteristics in mind. These activities gave the Investment Adviser the opportunity to guide companies in which it invests towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Adviser voted by proxy in a prudent and diligent manner, based on MSIM's proxy voting policies and in the best interests of the Fund's clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Adviser is in no way obligated to follow such recommendations.

For more information on the Investment Adviser's engagement and voting with reference to the Fund please see the Stewardship Report.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Balanced Income Fund**

Legal entity identifier: **549300V1TBJVKZCB8M65**

Reference period: **01 January 2025 to 31 December 2025**

Unless stated otherwise, the values below have been calculated based on the Fund's investments at the end of the reference period. This calculation methodology also applied to the Fund's top holdings and sector exposure.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the implementation of these exclusions is set out below in response to the question "How did the sustainability indicators perform?".

- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund's investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser's credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser's views on the credit quality of those sovereigns.

Credit

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which have caused severe environmental harm where appropriate remedial action has not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question "How did the sustainability indicators perform?".

Where investments did not meet the Fund's environmental or social characteristics, the Investment Adviser took remedial action, as described below.

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal coal mining (>5% revenue)	0.00%	0.00%
thermal coal-fired power generation (>50% revenue)[1]	0.00%	0.00%
oil sands extraction (>5% revenue)	0.00%	0.00%
arctic oil and gas production (>5% revenue)	0.00%	0.00%
controversial weapons manufacturing or production (>0% revenue)	0.00%	0.00%
civilian firearms manufacturing (>0% revenue)	0.00%	0.00%
tobacco manufacturing (>0% revenue)	0.00%	0.00%
tobacco supply, distribution or retail sales (>10% revenue)	0.00%	0.00%
gambling (>10% revenue)	0.00%	0.00%
adult entertainment (>10% revenue)	0.00%	0.00%
% of the Fund's exposure to corporate issuers which have experienced ESG controversies	0.00%	0.00%
Government Bonds		
% of the Fund's exposure to sovereign issuers which have MSCI ESG Government Score of 'CCC'	0.00%	0.00%
ESG Tilt		
Equity investments:		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure: (1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and (2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.26	7.04
Europe (Reference Index MSCI Europe)	7.79	8.58
Japan Basket (Reference Index MSCI Japan)	7.62	8.48
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	6.40	7.01
Developed World ex Japan ex USA ex Europe Basket (Reference Index MSCI World ex Japan ex USA ex Europe)[1]	n/a	n/a
Total ESG Score of the MSCI ACWI index and that of the Fund:	**6.64**	**7.09**

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Government Bonds				
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The GBaR ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	See relevant year	n/a	5.94 (Fund) 5.97 (Index)	5.89 (Fund) 5.99 (Index)

The Fund's classification as Article 8 under SFDR became effective on 27 December 2023.

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

As described in the Fund's pre-contractual disclosure and above, the application of the Investment Adviser's credit research overlay process may occasionally result in sovereign bonds held by the fund not outperforming the benchmark on ESG issues. In Q4 2023, the Fund's ESG Government Score was 0.03 lower than the benchmark for this reason.

In Q4 2024, the Fund was exposed to an issuer that became restricted due to experiencing an ESG controversy. The Investment Adviser rectified this exception by selling the holding within the pre-established remediation timeframe, keeping in mind relevant circumstances and the best interests of the shareholders of the Fund.

As described in the Fund's pre-contractual disclosure and above, the application of the Investment Adviser's credit research overlay process may occasionally result in sovereign bonds held by the fund not outperforming the benchmark on ESG issues. In Q2 and Q3 2024 the Fund's ESG Government Score was lower than the benchmark for this reason.

[1] This exclusion was added as a sustainability indicator for transparency purposes; prior to this addition, they were listed in the Fund's exclusion policy and applied by the Fund but not included as indicators in the Fund's precontractual disclosure.

[2] This basket was previously called the Asia ex-Japan Basket with the previous reference index (MSCI Asia ex-Japan). The 2024 indicator value reflects Q4 only, as the regional basket was updated in Q4 2024. For the ESG score, the average Q1-Q3 value for the previous regional basket (Asia-ex Japan Basket) was 6.68, and the previous reference index (MSCI Asia ex-Japan) was 5.99. For the Low Carbon Transition score, the average values for the basket and the index were 6.14 and 5.71, respectively.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered the following PAI indicators through the application of the Fund's binding environmental or social characteristics:

- **PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies):** The Fund considered PAI indicators numbers 1-3 regarding GHG emissions in part through its direct equity and corporate credit investments. The Fund considered these indicators because it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).

- **PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities and corporate credit because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.

- **PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities and corporate credit because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management amongst others.

- **PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.

- **PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities and corporate credit because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

What was the proportion of sustainability-related investments?

87.73% of the Fund's investments attained the promoted environmental and social characteristics of the Fund. The remainder of the investments were investments for cash instruments held for ancillary liquidity and derivatives held for hedging purposes, which did not attain the promoted environmental or social characteristics and were not subject to any minimum environmental or social safeguards.

The Fund did not make any sustainable investments within the meaning of the Sustainable Finance Disclosure Regulation ("SFDR").

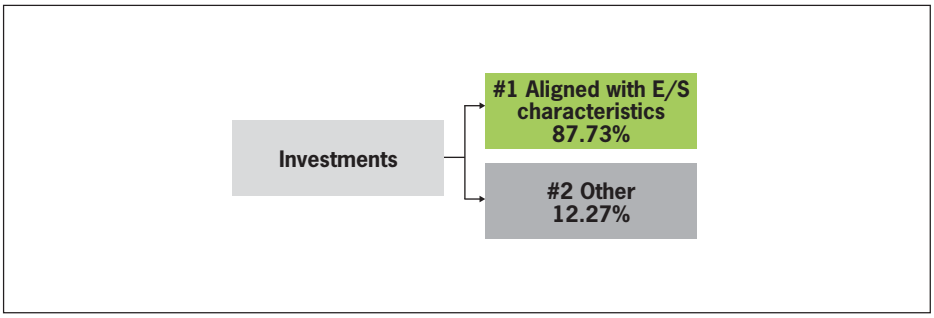
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The relevant environmental and social characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the environmental and social characteristics of the Fund were made up of:

- 56.84% equity investments
- 22.47% investments in government bonds
- 8.42% investments in corporate credit

The ESG tilt of the equity investments was applied at the level of the five regional baskets and the portfolio of equity investments, and not at the level of individual holdings. Some investee companies may therefore have had an ESG score or Low Carbon Transition score lower than the average for the regional basket or for the whole portfolio of equity investments. Similarly, the carbon budget of the equity investments was applied at the portfolio level of all the equity investments (and not at the level of the individual holdings, which may on an individual basis have had higher carbon emissions than the average for all the equity investments).

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Equity & Corporate Bonds	**65.26%**
Information Technology	15.14%
Financials	14.79%
Industrials	8.60%
Communication Services	5.27%
Consumer Discretionary	5.09%
Health Care	4.42%
Utilities	3.44%
Consumer Staples	2.29%
Other	2.11%
Materials	2.00%
Energy	1.31%
Real Estate	0.81%
Sovereign	**22.47%**
Mutual Fund	**9.25%**

Exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels	8.96%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any companies that derive 5% or more of their revenues from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

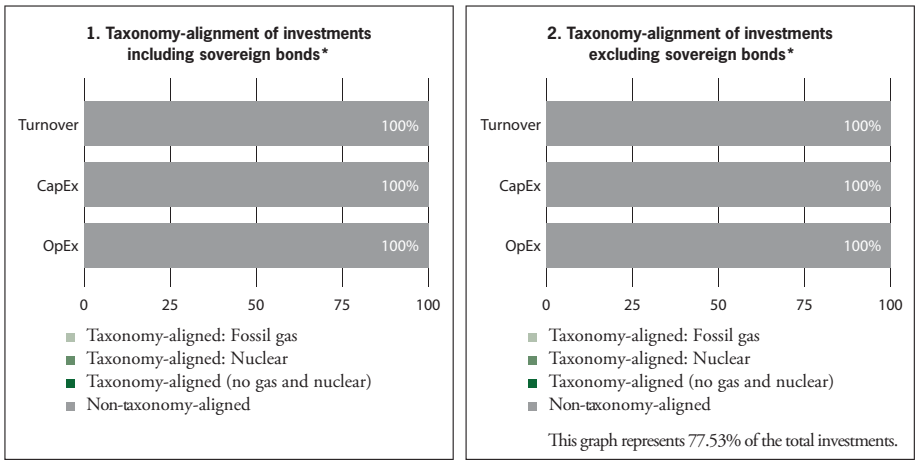
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

12.27% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised: (i) financial derivative instruments such as on or off exchange traded options, which may be written on indices; single securities; or currencies, (ii) hedging instruments, (iii) cash held as ancillary liquidity, (iv) investments for which the investment team was lacking data in order to assess if they qualified as promoting environmental or social characteristics, (v) any other investments which did not promote environmental or social characteristics (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet environmental and/or social characteristics during the reference period?

The Investment Adviser carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period. Investments that were held by the Fund but became restricted after they had been acquired were sold, in line with the Investment Adviser's Breach Remediation Policy. During the reference period investments became restricted due to issuers experiencing ESG controversies.

The Investment Adviser exercised proxy voting and other rights as shareholders with the Fund's environmental and social characteristics in mind. These activities gave the Investment Adviser the opportunity to guide companies in which it invests towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Adviser voted by proxy in a prudent and diligent manner, based on MSIM's proxy voting policies and in the best interests of the Fund's clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Adviser is in no way obligated to follow such recommendations.

For more information on the Investment Adviser's engagement and voting with reference to the Fund please see the Stewardship Report.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: **Global Balanced Sustainable Fund**

Legal entity identifier: **549300UMQ7ETEXI51419**

Reference period: **01 January 2025 to 26 March 2025**

This Fund was liquidated on 26 March 2025.

Unless stated otherwise, the values below have been calculated based on the Fund's investments on 28 February. This calculation methodology also applied to the Fund's top holdings and sector exposure

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective: ___%**	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective: ___%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the reference period, the Fund promoted a number of binding environmental and social characteristics, as described below.

Equity investments

- Exclusions: The Fund promoted the environmental characteristics of climate change mitigation by excluding investments in certain types of fossil fuels, namely Thermal Coal Mining and Oil Sands Extraction, and of avoiding environmental harm by excluding investments which caused severe environmental harm where appropriate remedial action had not been taken. In addition, the Fund promoted the social characteristic of avoiding investments in activities which can cause harm to human health and wellbeing. Further detail on the nature of these exclusions is set out below in response to the question "How did the sustainability indicators perform?".

- ESG tilt: the Fund promoted environmental objectives (such as: reducing carbon emissions; and preventing pollution and waste), social objectives (such as: tackling inequality or fostering social cohesion; promoting social integration and labour relations; investing in human capital; promoting access to finance and healthcare; and promoting nutrition and health) and governance objectives (such as good corporate governance and corporate behaviour) by applying an ESG tilt within the portfolio for all equity securities, using the MSCI ESG score and the MSCI Low Carbon Transition score.

- Carbon budget: The Fund promoted the environmental characteristic of reducing carbon emissions, by applying a carbon budget to all equity securities in the Fund's portfolio every year. This carbon budget characteristic applied to investments in equity securities made directly by the Fund, but did not apply to equity securities held by the fund indirectly through investments in exchange-traded funds (ETFs) or other types of fund.

Government bonds

- The Fund promoted the environmental and social characteristic of encouraging countries to manage their ESG risks. The Fund achieved this through: (1) excluding investing in the government bonds of countries performing poorly on managing their ESG risks; and (2) applying an ESG tilt to the government bonds benchmark, so that the Fund's investments in government bonds tracked a better ESG profiled benchmark in this regard. The process, however, remained subject to the Investment Adviser's credit research overlay, which resulted in changes to the weightings of sovereigns resulting from the process described to account for the Investment Adviser's views on the credit quality of those sovereigns.

Credit

- Exposure to ESG CDS: The Fund sold credit protection under index credit default swaps ("CDS") in order to gain exposure to corporate credit. The Fund gained this exposure through one ESG-aligned CDS, which referenced the iTraxx MSCI ESG Screened Europe Index. Exposure to this index meant that the Fund's credit exposure was targeted towards issuers that exhibit stronger performance with respect to management of ESG risks, as the index is screened by MSCI to exclude issuers with exposure to certain activities that have the potential to be harmful to human health and wellbeing, that have been subject to ESG controversies, or that have an MSCI ESG rating of BBB and below.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Solution providers

- The Fund promoted the characteristic of contributing to a number of social and environmental themes, by allocating a minimum percentage of investments to products offered by solution providers (i.e., external fund managers) who invested in businesses and activities that provided solutions across a number of social and environmental themes. The selection process examined the manager's target themes, investment philosophy, investment process and (for solution providers which invest in equities) the weighted average revenue-alignment of the manager's funds to environmental and social themes.

Sustainable investments

- The Fund made a certain number of sustainable investments, as explained in response to the question, "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

There were no exceptions to the Fund's attainment of its environmental and social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
Exclusions:		
Equity & Credit investments:		
% of the Fund's exposure to corporate issuers or issuers of directly held corporate bond investments which derive revenue from:		
thermal coal mining (>5% revenue)	0.00%	0.00%
thermal coal-fired power generation (>50% revenue)	0.00%	0.00%
oil sands extraction (>5% revenue)	0.00%	0.00%

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2025 Indicator Value
ESG Tilt:		
Equity investments:		
The Fund allocated its global equity investments to five regional baskets. The Investment Adviser aimed to ensure: (1) that each regional basket outperformed the equivalent benchmark for that region with regard to the ESG score and the Low Carbon Transition score; and (2) that the core equity as a whole outperformed the MSCI ACWI index with regard to those scores.		
ESG Score of the benchmark named below that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.41	7.51
Europe (Reference Index MSCI Europe)	7.78	8.55
Japan Basket (Reference Index MSCI Japan)	7.51	8.02
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.95	6.70
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	6.10	7.29
Total ESG Score of the MSCI ACWI index and that of the Fund:	**6.67**	**7.57**
Low Carbon Transition Score of the benchmark named below for the region and that of the Fund, in each of the following regions:		
US Basket (Reference Index S&P 500)	6.24	6.45
Europe (Reference Index MSCI Europe)	5.82	6.24
Japan Basket (Reference Index MSCI Japan)	5.79	6.04
Emerging Markets Basket (Reference Index MSCI Emerging Markets)	5.69	6.20
Asia-ex Japan Basket (Reference Index MSCI Asia ex-Japan)	5.80	6.00
Total Low Carbon Transition Score of the MSCI ACWI index and that of the Fund:	**6.06**	**6.33**
Government Bonds:		
The Fund overweighted sovereigns which were outperforming the average performance in the Bloomberg Global G7 Total Return Index (excluding elements of the index concerning Canada) and underweighted those underperforming the average performance of the benchmark, with regard to the GBaR Government ESG score (and subsequently applied a credit overlay), to create a proprietary Sovereign ESG benchmark. The MSCI ESG Gov Score of the benchmark and that of the Fund (after the credit overlay had been applied) were:	6.19	6.29

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Sustainability Indicator	Indicator Threshold	2022 Indicator Value	2023 Indicator Value	2024 Indicator Value
Solution Providers:				
% of investments in products offered by solution providers who invest in businesses and activities that sought to provide solutions across a number of ESG themes:	5.00%	9.00%	9.50%	6.89%
Sustainable Investments				
% of Fund investments that were sustainable investments:	30.00%	41.76%	37.11%	33.53%

The values for 2023 and 2024 were calculated based on the average of the Fund's investments at each quarter end during the reference period.

As described in the Fund's pre-contractual disclosure and above, the application of the Investment Adviser's credit research overlay process may occasionally result in sovereign bonds held by the fund not outperforming the benchmark on ESG issues. In Q2 and Q3 the Fund's ESG Government Score was lower than the benchmark for this reason.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Fund (which consisted of directly held equity investments, government bonds or investments made indirectly through solution providers) fell within one of the below categories:

i. Equity investments which demonstrated a positive environmental or social contribution via revenue alignment. The Fund used a combination of data sources (including MSCI Sustainable Impact Metrics data and ISS alignment data) to determine if more than 20% of the revenue of the sustainable investment aligned with any of the ISS SDG or MSCI impact themes;

ii. Equity investments which demonstrated operational contribution to environmental themes (for example, by key resource efficiency indicators on the use of energy, or on the production of waste & greenhouse gas emissions) or social themes (for example, labour relations, community relations or investment in human capital). An investment met this test if:

   a. it had an environmental ESG pillar score, as defined by MSCI, which was within the range of environmental ESG pillar scores of the top 10 percentile of MSCI ACWI, provided that its social pillar score was not within the range of the pillar scores of the bottom 10 percentile of MSCI ACWI; or

   b. it had a social ESG pillar score, as defined by MSCI, which was within the range of social ESG score of the top 10 percentile of MSCI ACWI, provided that its environmental pillar scores were not within the range of the pillar scores of the bottom 10 percentile of MSCI ACWI.

   c. Additionally, a security was not deemed to be operationally contributing to climate change or social themes if the environmental or social pillar score which was in the top 10 percentile of MSCI ACWI was deemed "not material" to the security by MSCI. MSCI deems environmental or social pillars as "not material" to the company if the company has limited effect on the environmental or social themes.

iii. sovereign bonds with a Government ESG Rating A or above, as determined by the MSCI ESG Government Rating.

Where the Fund invested via solution providers (i.e., external fund managers), all of the underlying investee companies fulfilled either:

a) the 20% revenue alignment threshold described in (i) above; or

b) criteria (ii) above by, demonstrating operational contribution to environmental themes or social themes.

Only those underlying investee companies which satisfied the tests described above were treated as constituting sustainable investments on a look-through basis and contributing towards the proportion of the Fund's assets allocated towards sustainable investments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Principal adverse impacts (PAI) are the most significant negative impact of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Adviser applied a "do no significant harm" methodology to the sustainable investments of the Fund, in order to ensure that the sustainable investments of the Fund did not include: (1) investments causing significant harm to any of the principle adverse impact ("PAI") indicators for issuers which are mandatory for the Investment Adviser to consider under the EU Sustainable Finance Disclosure Regulation ("SFDR") rules and which are relevant to the investment; or (2) investments which did not meet the minimum social safeguards set out in the EU SFDR rules.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Adviser excluded from the sustainable investments of the Fund, investments that caused harm to any of the PAI indicators which are mandatory for the Investment Adviser to consider under the EU SFDR rules, and which were relevant to the investment. The Investment Adviser has determined specific thresholds for significant harm based on third party data. PAI indicators:

The Investment Adviser used reasonable proxy indicators sourced from third parties to address the current lack of data for certain PAI indicators. For example, owing to the absence of reliable and comparable data concerning gender pay gap, the Investment Adviser used an indicator provided by a third party data vendor which measured controversies relating to discrimination and workforce diversity as a reasonable proxy.

These proxies were and will continue to be kept under review and will continue to be replaced by data from third party data providers when the Investment Adviser determines that sufficiently reliable data has become available.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes. The Investment Adviser excluded from the sustainable investments of the Fund, any issuers which experienced very severe controversies that were deemed to violate the UN Global Compact, the UN Guiding Principles on Business and Human Rights, or the ILO Fundamental Principles, and issuers with very severe controversies related to violations of the OECD Guidelines for Multinational Enterprises. This screening was done using third party data.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainable investments of the Fund considered all of the mandatory PAI indicators on sustainability factors which were relevant to the investment, by screening out investments which did not meet certain thresholds set by the Investment Adviser for each of the mandatory indicators, as described above in response to the question, "How were the indicators for adverse impacts on sustainability factors been taken into account?".

The equity investments of the Fund (including the portion that was not comprised of sustainable investments) considered the following PAI indicators through the application of the Fund's binding environmental or social characteristics (as described elsewhere in this document):

PAI indicators numbers 1-3 (GHG emissions, carbon footprint and GHG intensity of investee companies): The Fund considered these indicators because:

- it ensured that each regional basket of equity investments reduced its weighted average Scope 1 and 2 carbon emissions/EVIC by 7% each year as compared against the basket for that region for the previous year and
- it applied a tilt considering the Low Carbon Transition score to the equities held in the equity baskets. The Low Carbon Transition score is designed to identify potential leaders and laggards by measuring companies' exposure to and management of risks and opportunities related to the low carbon transition and assesses carbon intensity of each of the equity securities. The Low Carbon Transition score takes into account GHG emissions (scopes 1-3).

- **PAI indicator number 4 (exposure to companies active in the fossil fuel sector):** The Fund considered this PAI indicator in part through its direct investments in equities because it excluded issuers with high exposure to carbon-intensive activities, with a view to mitigation of climate-related financial risks. Namely, the fund excluded companies that derive 5% or more of their revenue from the mining of thermal coal or the extraction of oil sands.
- **PAI indicators numbers 7-9 (activities negatively affecting biodiversity-sensitive areas, emissions to water and hazardous waste and radioactive waste ratio):** The Fund considered these indicators in part through its direct investments in equities because it excluded investments in companies involved in ongoing severe structural controversy cases related to environmental harm where the Investment Adviser believed appropriate remedial action had not been taken. These controversies include controversies relating to Biodiversity & Land Use, Toxic Emissions & Waste, Water Stress, Operational Waste (Non-Hazardous), Supply Chain Management among st others.
- **PAI indicator number 10 (violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises):** The Fund considered this PAI indicator through its direct investments in equities because it excluded investments in issuers flagged in breach of selected global norms and conventions, including the United Nations Global Compact Principles (UNGC) and OECD Guidelines for Multinational Enterprises.
- **PAI indicator number 14 (exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)):** The Fund considered this PAI indicator through its direct investments in equities because it excluded investments in issuers which derive any revenue from controversial weapons (including all the controversial weapons listed for PAI number 14).

What was the proportion of sustainability-related investments?

79.41% of the Fund's investments were aligned with the environmental and social characteristics of the Fund.

36.00% of the Fund comprised sustainable investments which are further explained in the asset allocation diagram on the next page.

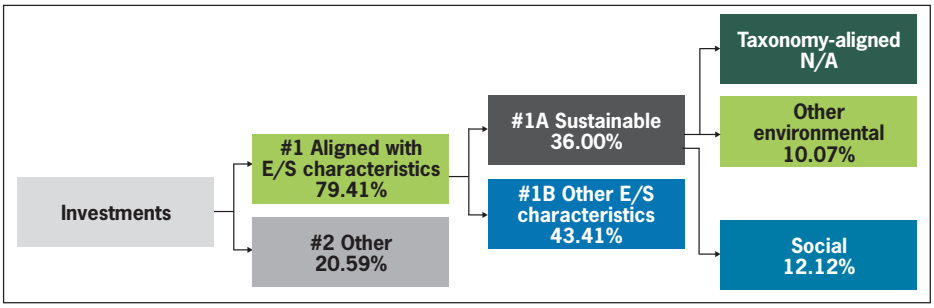
Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The relevant E/S characteristics vary depending on the nature of the Fund's investment. The Investments that were aligned with the E/S characteristics of the Fund were made up of:

- 50% equity investments
- 15% investments in government bonds
- 6% investments in solution providers (i.e., external fund managers)
- 8% investments in ESG aligned CDS

The ESG tilt of the portfolio was applied at the level of the five regional baskets and the portfolio as a whole, and not at the level of individual holdings.

Equity investments classified as sustainable investments

The Fund's methodology for categorising equity investments as sustainable investments considers both environmental and social factors (as relevant) as set out above. The Fund does not seek to prioritise one over the other in its investment process and presents the breakdown for SFDR reporting purposes only.

Sovereign investments classified as sustainable investments

The Fund's methodology for categorising sovereign investments as sustainable investments considers both environmental and social factors (as relevant) and as set out above, the Fund does not categorise its sovereign sustainable investments as having either an environmental objective or a social objective.

Solely for SFDR reporting purposes, the Investment Adviser has equally divided the proportion of the Fund's sovereign sustainable investments into environmental and social categories in this question and the questions below ("What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?" and "What was the share of socially sustainable investments?"). These figures and disclosures are not targets or commitments and should not be used to characterise the Fund's investment focus, profile or portfolio from a sustainability perspective.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

In which economic sectors were the investments made?

Sector	% Assets
Equity & Corporate Bonds	**50.57%**
Information Technology	12.24%
Financials	8.71%
Industrials	5.74%
Consumer Discretionary	5.34%
Health Care	5.03%
Communication Services	4.06%
Materials	3.22%
Consumer Staples	2.76%
Energy	1.38%
Utilities	1.10%
Real Estate	0.99%
Sovereign	**41.42%**
Mutual Funds	**5.05%**
Exchange Traded Fund	**0.97%**

Exploration, Mining, Extraction, Production, Processing, Storage, Refining or Distribution, Including Transportation, Storage and Trade of Fossil Fuels.	4.60%

The Fund's exposure to fossil fuel related activities, as presented in the table above, captures issuers deriving any revenue from such activities as part of their business. The indicator therefore has a broader scope when compared to the thermal coal mining and oil sands extraction exclusion applied as a binding characteristic to the Fund.

As described throughout this document, the Investment Adviser excludes from the Fund any company that derives 5% or more of its revenue from the mining of thermal coal or extraction of oil sands. Remaining equity holdings are subject to tilts considering ESG and Low Carbon Transition assessment scores seeking to overweight leaders and underweight laggards with regard to those scores. Additionally, the Fund applies a carbon budget to its equity investments which may underweight certain sectors such as those involved in fossil fuels. The Fund may therefore have some exposure to fossil fuel activities beyond those expressly prohibited through the binding characteristics of the Fund.

Additionally, the Fund has some exposure to fossil fuel activities through indirect portfolio holdings such as ETFs and funds. Please note that the Fund's binding exclusions, as set out in the Fund's pre-contractual disclosure, currently applies only to the directly held ESG equity and corporate credit securities. The Investment Adviser prefers ETFs and funds which have committed to a level of ESG integration, in order to align with the portfolio's overall objective to promote ESG characteristics, the Investment Adviser does not commit on a binding basis to invest in such ETFs and funds.

The table above only includes investments made by the Fund and excludes other assets held by the Fund, such as cash and hedging instruments.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy. None of the Fund's investments have been assessed by the Investment Adviser as aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☑ No

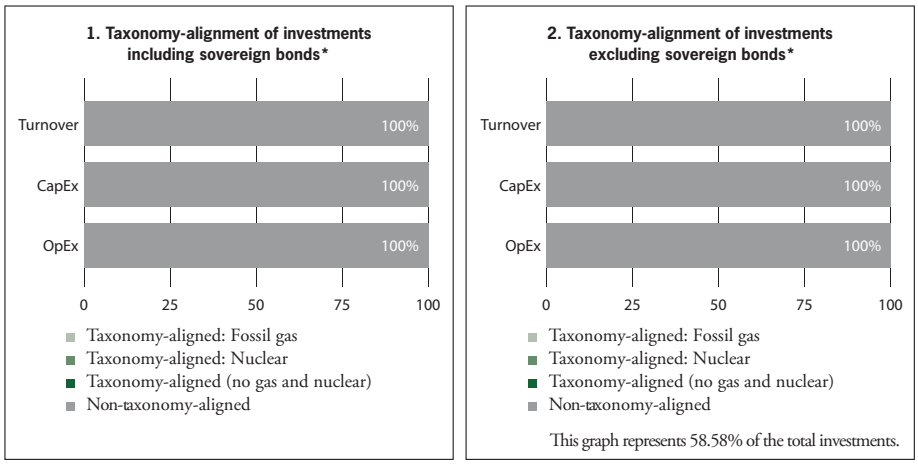
The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned activities are expressed as a share of:

– turnover reflecting the share of revenue from green activities of investee companies.

– capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

– operational expenditure (OpEx) reflecting green operational activities of investee companies.



* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

[1] Fossil gas and/or nuclear activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commissions Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What was the share of investments made in transitional and enabling activities?

The Fund did not make any investments which the Investment Adviser assessed to be in transitional or enabling activities, according to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

10.07% of the Fund comprised sustainable investments with an environmental objective, which were not Taxonomy-aligned. The EU Taxonomy does not comprehensively cover all industries and sectors, or even all environmental objectives. Accordingly, the Investment Adviser used its own methodology to determine whether investments were sustainable in accordance with the SFDR sustainable investment test, and then invested in such assets for the Fund. The Fund did not commit to making a minimum portion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

As noted above in response to the question "What was the asset allocation?", the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective Solely for SFDR reporting purposes, the Investment Adviser has divided the proportion of the Fund's sustainable investments into environmental and social categories, as per the methodology set out above.

What was the share of socially sustainable investments?

12.12% of the Fund's investments were sustainable investments with a social objective during the reference period.

As noted above in response to the question "What was the asset allocation?", the Fund does not categorise its sustainable investments as having either an environmental objective or a social objective Solely for SFDR reporting purposes, the Investment Adviser has divided the proportion of the Fund's sustainable investments into environmental and social categories, as per the methodology set out above.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

20.59% of the Fund's investments were not aligned with the environmental or social characteristics of the Fund and have been included in the "other" category. They comprised: (i) hedging instruments, (ii) cash held as ancillary liquidity, (iii) investments for which the investment team was lacking data in order to assess if they qualified as sustainable investments or if they promoted environmental or social characteristics, (iv) any other investments which neither promoted environmental or social characteristics, nor qualified as sustainable investments (such as derivatives used for speculative purposes which do not have any ESG features). These investments were not subject to any minimum environmental or social safeguards.

Docusign Envelope ID: 03E7AEA2-E750-4CE0-BBC2-E31C2931E732

Appendix 9: Sustainable Finance Disclosure (unaudited)

As at 31 December 2025 (continued)

What actions have been taken to attain the environmental and/or social characteristics during the reference period?

The Investment Adviser carried out enhanced monitoring of the Fund to meet the environmental and social characteristics during the reference period.

The Investment Adviser exercised proxy voting and other rights as shareholders with the Fund's environmental and social characteristics in mind. These activities gave the Investment Adviser the opportunity to guide companies in which it invests towards better ESG practices, potentially enhancing the environmental and social characteristics of the Fund.

The Investment Adviser voted by proxy in a prudent and diligent manner, based on MSIM's proxy voting policies and in the best interests of the Fund's clients. Morgan Stanley Investment Management (MSIM) retained research providers to analyse ballot items and to make vote recommendations, however the Investment Adviser is in no way obligated to follow such recommendations.

For more information on the Investment Adviser's engagement and voting with reference to the Fund please see the Stewardship Report.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable.

How does this reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Data Limitations

In general, Morgan Stanley Investment Management uses a range of data sources and internal analysis as inputs into its ESG processes. This may include use of data sourced from third party data providers, including for making the disclosures in this report. Such data may be subject to methodological limitations and may be subject to data lags, data coverage gaps or other issues impacting the quality of the data. ESG-related information, including where obtained from third party data providers, is often based on qualitative or subjective assessment, and any one data source may not in itself present a complete picture relating to the ESG metric that it represents. Minimal discrepancies may also arise in reported data on the Fund's portfolio weightings where the Fund has made use of different underlying sources of holdings data to produce the disclosures included in the report. Morgan Stanley Investment Management takes reasonable steps to mitigate the risk of these limitations. However, it does not make any representation or warranty as to the completeness or accuracy of such data. Any such data may also be subject to change by the third party provider without notice. As such, Morgan Stanley Investment Management may choose to take such action (or inaction) based on any change in data provided by a third party data provider as it deems appropriate in the circumstances.

This report has been prepared based on the Fund's portfolio holdings as of the date specified at the top of this document only (unless the context indicates otherwise). Unless otherwise indicated, the percentages included in this report have been measured according to portfolio weight, which is based on the market value of the investments in the Fund.

The description of sustainability indicators may be updated to reflect the most recent third party data provider methodologies and to enhance transparency for investors. Any material changes to revenue thresholds or business activities are fully identified and disclosed.
